and the rest printed at the *Indian Press, Ltd.*, Allahabad.

PREFACE

Some friends and pupils of Mahāmahopādhyāya Dr. Ganganatha Jha desired to present to him a volume of Essays on Oriental Subjects when he completed his sixtieth year on 25th September, 1932. The proposal did not materialise till the 13th of March, 1932, when an Editorial Board was formed. Work could proceed only when a publisher ready to finance the publication was found. The Oriental Book Agency of Poona having agreed to publish the work, the Secretary of the Editorial Board issued invitations for contributions to scholars in India and outside on the 9th of November, 1932, and to Pandits of the old school on the 12th of March, 1933. It was then intended to present the manuscripts of the papers to Dr. Jha in April 1933. In spite of the shortness of notice the invitations met with very good response.

The presentation ceremony had, however, to be postponed till the 24th of November, 1933. On that day a meeting was held in the Vizianagram Hall of the Allahabad University for this purpose. The Chairman, the Hon'ble Dr. Sir Sita Ram, President of the Legislative Council of the United Provinces, the first post-graduate pupil of Dr. Jha's, presented to him the manuscripts of the contributions received. At that meeting the Secretary read out or referred to greetings sent by Sir George A. Grierson, Professor Otto Strauss, Mahāmahopādhyāya Pandit Gopinatha Kaviraja, Mrs. Rhys Davids, Professor R. L. Turner, Professor Charles Bally, Professor A. B. Dhruva, Professor S. K. Belvalkar, Dr. R. P. Paranjpe and Dr. N. G. Sardesai (proprietor of the Oriental Book Agency). Speeches were also made by Rao Raja Pandit Shyam Behari Misra, Mr. Panna Lal, Maulavi Syed Mohammad

Ali Nami, Dr. Tara Chand, Dr. Ishwari Prasad, Pandit Iqbal Narain Gurtu and the Chairman on the great scholarship of Dr. Jha and his services to the cause of education.

Arrangements for printing the Volume, however, could not be made till after a year. Progress in the Press first selected was extremely slow and we had later to change over to another Press. The Volume is now, at last, completed. On behalf of the Editorial Board, the Secretary offers his apologies to Dr. Jha and to the kind contributors for the great delay in publication. As most of the proofs had to be corrected locally there must be several mistakes which would not have escaped the notice of the authors. We crave their pardon for not being able to send them proofs. It is melancholy to contemplate that during the long time that has elapsed between the receipt of the papers and their publication as many as six contributors have left us for ever and one member of the Editorial Board is also now no more!

Our intention was to present the volume to Dr. Jha on his completing the sixtieth year but circumstances delayed its publication till the end of his sixty-fifth year. May he live long to continue his untiring labours in the interpretation of our past culture and to inspire younger Sanskritists with the noble example of his devoted service in the cause of *Sura-Sarascati*!

K. CHATTOPADHYAYA,
Secretary, Editorial Board,
ALLAHABAD,
15th September, 1937. Ganganatha Jha Commemoration
Volume.

TABLE OF CONTENTS

	PAGE
Preface	iii
Table of Contents	v
Praśastis—Appreciations	
1. Pandit Śrīśaṅkara Tarkaratna	I
2. MM. Pt. Mādhava Śāstri Bhāṇḍārī	II
3. Pt. Nārāyaṇa Śāstri Khiste	IV
4. Maulavi Syed Mohammad Ali Nami	VII
5. Professor Otto Strauss	IX
6. Sir George A. Grierson	IX
7. The Right Hon'ble Dr. Sir Tej Bahadur Sapru	X
PART I—(<i>Papers in Sanskrit</i>)	
1. Śābarabhāṣye Udāharaṇaparipāṭī (Pt. Chinnasvāmī Śāstri)	1
2. Sāhityamīmāṃsā (Pt. Badarīnātha Jhā)	11
3. Upamālaṅkāraḥ (Pt. Bhārgava Śāstri Joshi)	19
4. Vedāpauruṣeyatvam (MM. Pt. Mādhava Śāstri Bhāṇḍārī)	29
5. Śrīmahimnaḥstotraṁ vedaśca (Śrī Miṭṭhulāla Śāstri)	41
6. Ekoddiṣṭaśrāddhādhikāranirupāṇam (Late Pt. Rājanātha Miśra)	71
7. Yogapadārthavicāraḥ (Pt. Ravinātha Jhā)	77
8. Ārogyaviśayako nibandhaḥ (MM. Pt. Vāsudeva Śāstri Abhyankar)	88
9. Śabdabrahmavādaḥ (Pt. Hārāṇacandra Śāstri)	89

قصیدہ

اثر خاتمہ مولانا سید محمد علی نامی، ایکم۔ اے۔
معلم عربی و فارسی، جامعہ الہ آباد

سجایا باغبان فکر نے اب اک نیا گلشن
ہے جس کا ہر گل مضمون بشکل مہر و مہر روشن
فتوحات مضامین میں قلم مثل سنکدر ہے
سیاہی بن گئی آب حیات علم کا مخزن
ہر اک نہر سطر میں ہے رواں آب حیات ایسا
ہے جس کے فیض سے ہر شاخ مضمون روکش گلشن
گل افسانی سے گر رشک بدخشاں طبع رنگیں ہے
تو بحر فکر میں بھی ہیں معانی کے گہر روشن
لب بلب پہ گلشن میں ہے کس گل کی نوا سنجی
کہ اعجاز نوا سنجی سے گلشن بن گیا ارگن
بہار آرائے باغ علم وہ ذات مقدس ہے
کہ جس کی خوشہ چینی کے تمنائی ہیں اہل فن
لب غنچہ شگفتہ ہو گیا کس نام نامی سے
یہ کس کے شکر کی شکر سے طوطی کا بھرا دامن

یہ کس کی ذات والا غیرت باد بھاری ہے
 بنا شکل زبیاں کس اسم سامی سے گل سوسن
 جناب ڈاکٹر ذی جاہ گنگا ناتھ جھاب صاحب
 یہ یونیورسٹی ہے جن کے فیض علم سے گلشن
 رہے فائز کمال علم سے اعلیٰ مراتب پر
 کہ وائس چانسلر بھی بن گئے یہ علم کے اوشن*
 : کچھہ طلاب ہی تک عام تھا لطف و کرم ان کا
 ہر اک دل آپ کے اوصاف عالی کا بنا مسکن
 ہر اک ماتحت و ہمسر پر رہا وہ مہر کا جلوہ
 کہ ہے ہر بزم دل ان کی نیا مہر سے درہن
 دعا ہے صدق دل سے یہ بھی خواہاں مخلص کی
 کہ ان کا نام نامی دہر میں دائم رہے روشن
 سر اقدس پہ تاج علم و فن دائم رہے رخشاں
 در دولت پہ آویزاں رہے تعلیم کی چلمن
 رہے نامی گرامی ذات والا فیض علمی سے
 فیوض علم کا شہرہ رہے از بند تا نندن

Professor Otto Strauss wrote to Dr. Jhā from Breslau :—

Dear Mahāmahopādhyāya,

It is this old and beautiful title among all you bear, with which I beg to address you on your 60th birthday. For you have been a real Upādhyāya to all of us who strive to understand the philosophical systems of ancient India. Without your works on Mīmāṃsā, Nyāya and Vedānta I could not have written the humble contributions which you perhaps know by name. You appear to me as the happy blend of the ancient Pandit with his depth of knowledge and of the modern scholar with his wide horizon. May God grant you many years to come in such a freshness that you may be able to continue your labour for the good of all who are approaching the jewels of ancient Indian thought.

Yours very sincerely,
Otto Strauss.

From Sir George A. Grierson's letter to the Secretary :—

No one values Dr. Jha's learning more than I do, or can be more grateful to him for what I have learnt from his writings, and I should consider it an honour and a privilege to have an opportunity of showing this by a contribution to the proposed volume. Unfortunately, however, owing to advanced age and failing eyesight I have been compelled to relinquish literary work and must therefore regretfully decline your invitation.

From the Right Honourable Dr. Sir Tej Bahadur Sapru :—

The tributes which have been paid to Dr. Ganga Nath Jha are none too high for his great intellectual gifts and his achievements in the domain of scholarship. Of him it may truthfully be said that no graduate of the Allahabad University has done more for the advancement of learning than he, and no one has in recent years vindicated the claims of Indian scholarship among the learned societies of the world than the great Pandit who combines in himself profound learning and deep reverence for our ancient culture and philosophy with a marvellous faculty for interpreting them to the modern world. His learning and his intimacy with everything that is best in our philosophy and culture is reflected in his daily life, his purity of character, the simplicity of his ways and his inveterate contempt for the advertising methods of modern life. His conservatism may try the patience of the present day reformer but it also extorts his admiration for its genuineness and sincerity. A great scholar and a fine gentleman, he has shed undying lustre upon the University of which he is the product and to the guidance and service of which he has dedicated years of ceaseless and fruitful activity.

Tej Bahadur Sapru.

PART II

THE MEASURES OF GODS

DR. P. K. ACHARYA, I. E. S., M. A. (CALCUTTA).

PH. D. (LEYDEN), D. LITT. (LONDON).

Professor of Sanskrit, Allahabad University.

The spiritualists and philosophers have apologised for even bringing down the gods within the sphere of description (dhyāna).¹ Historically it is not quite certain from when the gods began to be idolised. So far as the faithful and devoted worshippers are concerned, the idea of figure-representation of gods and goddesses appears to have been conceived even in the nature-worship of the early Vedic times. Later in the Vedic period the unlimited, the immeasured god, beyond the conception of thought and words, was represented as possessing a thousand heads, a thousand eyes, a thousand feet and other features, obviously a multiplied number of human limbs.² Thus the idolisation of gods

1. (a) अज्ञानेन मया देव यत्कृतं मूर्तिकल्पनम् ।

तत्सर्वं कृपया शंस क्षमस्व मधुसूदन ॥ (Bhavishya-Purāṇa)

(b) न्यूनातिरिक्तानि परिष्फुटानि यानीह कर्माणि मया कृतानि ।

क्षम्याणि चैतानि मम क्षमस्व प्रयाहि तुष्टः पुनरागमाय ॥

(Skanda-Purāṇa)

2. (a) सहस्रशीर्षा पुरुषः सहस्राक्षः सहस्रपात् ।

स भूमिं सर्वतः स्पृत्वात्यतिष्ठदशङ्गुलम् ॥

(Purusha-sūkta, Yajurveda)

(b) नमोऽस्त्वनन्ताय सहस्रमूर्तये सहस्रपादाक्षिशिरोरुबाहवे ।

सहस्रनाम्ने पुरुषाय शाश्वते सहस्रकोटीयुगधारिणे नमः ॥

(Mahābhārata, Śānti-parvan. 47, 20; Bhavishya Purāṇa)

and goddesses appears to have been going on from very early times for hundreds of years till we come across in the Rāmāyaṇa of at least 500 B.C. an undoubted reference to the sculpturing of Sītā in the form of a golden image which was unavoidably required as King's Consort for a royal public function. The early archaeologists who refused in the absence of archaeological remains to go far beyond the Christian era on the basis of the literary evidences, both Vedic and post-Vedic, for the sculptural representation of gods and goddesses in India, must have been wiser by the recent discoveries made at Mohenjo-daro and Harappa, which have shifted the sculptural history of India beyond the Vedic period by not less than a few thousand years. But both the literary references and archaeological finds have left the practical artists in a state of utter confusion. Even today the sculptor or the painter does not know, at any rate he does not put into practice, the uniform proportion of the image he makes. In fact he could have no guidance until the Śilpa-śāstra was codified.

The image-maker of Sītā must have made a realistic representation, because Sītā was his contemporary. The image-makers of Gautama Buddha, of Gāndhāra or Amarāvati school, or of Sarnath and other places, were not Buddha's contemporaries. Nor were there any photographs or models available for the sculptors. And it is also doubtful if those sculptors could have met any man of Buddha's race or family. Thus their images of Buddha if not guided by the Śilpa-śāstra must have been imaginary and unauthorised so far as the physical features and personal proportions of the Buddha's figure are concerned. Naturally, therefore, the artist's confusion will be endless when he attempts to represent from his imagination the unknown gods and god-

desses of whom there are no models or photographic copies and no ethnical representations for his guidance. Let the artist be as much idealistic as he chooses to be, even more than the Vedic seers, but only as regards the expressions he gives to the images of the gods and goddesses, and let the individual artists be content with this much originality. But there must be a harmony among the artists themselves regarding the general features and proportionate measures of the limbs of deities, for, otherwise, there is bound to be a fundamental unreality about the whole production, and thus the very object of the artist will be frustrated. It is easy to imagine the god Śiva, for instance, in his various moods and activities, such as the lover and bridegroom of the Mountain-maid, or as fury incarnate at the sacrificial function of his father-in-law, Daksha, where his most beloved wife, Satī, lost her life, or at the dance of destruction. But it would create an unreality about his very existence if one artist gives to the Śiva image the features of the Grecian warrior Alexander the Great, or the French conqueror Napoleon Bonaparte, another artist makes him the replica of a Chinese or Japanese monk, a third one gives to Śiva the short stature of a Gurkha soldier or the tall bearded figure of a Sikh horseman, and a fourth artist represents Śiva in the delicate womanly figure of a Burmese or Siamese gentleman clad in coloured silk. Another great God, Viṣṇu, who has been perhaps the most popular deity for centuries and has undergone as many as ten incarnations, is, like Śiva, found in fundamentally divergent forms, some of which are indistinguishable even from female figures. The goddesses of wealth and learning, Lakshmī and Sarasvatī, have been retaining their popularity down to the modern age and their figures often appear as the frontispiece in monthly

magazines published in various modern languages of India. These images like those of Rāma and Sītā, and Rādhā and Kṛishṇa have undergone much more startling physical changes at the hands of the artists; the southern variety of the Madras Presidency bears no similarity with the western variety of the Bombay Presidency including the Mahratta and Gujarat types, nor has the northern variety, comprising of sub-divisions of the Punjab, United Provinces and Bihar types, any affinity to the Eastern variety with sub-divisions of Bengal and Orissa types. The other gods and goddesses as well as the epic heroes and heroines have met with a similar fate owing to the boundless fancies of the artists. One can understand and even tolerate the racial or provincial stamp inevitably marked on the goods in the countries of their origin. The local beauties or heroes may supply the model to the imagination of the artists. But the realistic fundamental uniformity in the measure and proportion of images need not interfere with the idealistic expression of the artist's mind, and does not injure his individual originality. The general rules of grammar and metre have never injured the style or diction of the individual composition. Even the employment of new metres by a poet presupposes the restriction of uniformity. To be original one need not be lawless. Even under the limitation of proportionate measure the artist can have unlimited scope for his original production.

There has, however, been a uniformity among different groups of authoritative works dealing with the subject of measure of gods and goddesses and other beings. The subject has been elaborately treated in a number of *Purāṇas*, *Āgamas* and *Silpaśāstras* under *tāla-māna*.¹

¹ See the writer's Dictionary of Hindu Architecture under *Tālamāna*.

The term *tāla* according to the *Brahmāṇḍa-purāṇa* (Part 1, Second Ānusaṅgapāda, Chap. VII. 97) and the *Suprabhedāgama* (Chap. XXX. 22) implies the distance between the tips of the fully stretched thumb and the middle finger. But both in the *Matsya-purāṇa* (Chap. 258, V. 19) and the standard work on the subject, the *Mānasāra* (Chaps. 65 & 66), the *tāla* system of measurement has been further simplified for the practical artist by prescribing the face to be the unit of measure for individual images. Thus the total length of an image of the ten *tāla* measure, for instance, should be ten times its own face-length, i.e., the distance between the chin and the top of the head. The neck, thence the navel zone, thence the thigh-root, thence the knee-cap, thence the ankle and feet are given a certain proportional measures in this unit. Similarly the arms, hands, palms and fingers etc, bear certain proportional measures. And the variations of interspace between different limbs are distinguished in four *bhaṅgas* or poses (viz. samabhaṅga, ābhaṅga, atibhaṅga and tri-bhaṅga) and in three postures or attitudes, viz., straight or standing, sitting and recumbent.

The *Bimbamāna* (Ms., British Museum, no. 558-592) in an appendix has referred to twelve varieties of this *tāla* measure, while the *Mānasāra* has illustrated with full details up to the tenth variety, leaving out the eleventh and the twelfth varieties which, as stated in the *Bimbamāna*, should be employed in measuring certain (super-) gods and fiends (Rākshasas). Each of these twelve or ten varieties admits of three sizes, namely, large, medium, and small. The classification of the *tāla* systems and their details as given in the *Mānasāra* almost reappear without much alteration in the *Aṁśu-madbheda* of Kāśyapa (Ms. Egg. 3148, 3012, Fol. 251),

Suprabhedāgama (Chap. XXXIV 30-40), *Bṛhat-Saṃhitā* (Chap. LVIII. 1) and other works.

According to all these authorities the different varieties of the *tāla* measure are used in measuring different classes of gods and people and other beings:-

Large ten *tāla* is prescribed for superior gods (Brahmā, Viṣṇu, Śiva and others), Buddha, Jain images (Jina, Siddha, Saugandha, Arhat, Pārśva and the other Tirthaṅkaras), and devotees of the Sāyujya class.

Middle ten *tāla* is recommended for superior goddesses (Lakshmī, Sarasvatī, Sāvitrī, Bhūdevī, Durgā, and the Love-goddess), the Sārūpya class of devotees and others.

Small ten *tāla* is suggested for Sāmīpya class of devotees and others.

Nine *tāla* is prescribed for inferior goddesses (e. g. Brahmāṇī, Vaishṇavī, Māhendrī, Bhairavī, Chāmundī, Kaumārī, Vārāhī and others), the Sālōkya class of devotees, superior sages (Vaśiṣṭha, Bhārgava, Viśvāmitra, Bharadvāja), certain mythical beings (e. g. Yaksha and Vidyādhara), Garuḍa and others.

Eight *tāla* is recommended for Sages (like Kāśyapa) and ordinary human beings, etc.

Seven *tāla* is suggested for Sages (like Agastya), certain demigods and mythical beings, and ordinary females.

Six *tāla* is prescribed for tiger and such other animals,

Five *tāla* for Gaṇeśa (a mythical being),

Four *tāla* for Goblins (Bhūta), etc.,

Three *tāla* for Kinnara (a mythical being),

Two *tāla* for goose and other birds, and

One *tāla* for Banduka and Kabandha (headless body).¹

This method of the *Śilpa-śāstra* has been commended by the modern European artists. "The (Ancient) Hindu image-maker or sculptor" observes Mr. Hadaway "does not work from life, as is the usual practice among Europeans, but he has in place of the living model, a most elaborate and beautiful system of proportions, which he uses constantly, combining these with the observation and study of natural detail. It is, in fact, a series of anatomical rules and formulæ, of infinitely more practical use than any European system which I know of, for the Indian one treats of the actual proportion and of the surface form rather than the more scientific attachments of muscles and the articulation of bones"².

"There is in the Hindu system," observes Mr. Vincent Smith, "nothing complicated or difficult to understand or remember, but like every other canon of artistic proportion, these methods are no more capable of producing works of art in unskilled hands than are any other aids or methods."³

Will the modern Indian artist think over these weighty remarks? Will he also take into consideration the fact that the greater majority of Indians are practical idol-worshippers? Their ordinary worship is hardly performed except in presence of an idol. This idol should, therefore, be of such a nature and form as would command their respect and incite their faith. An image of unusual

¹ For further details and illustrations see the writer's *Architecture of Mānasa*, Vol. V, pages 53-70 and Plate CLVI, Volume IV, Chapter LI-LXVII, pp. 497-632, Volume III, pp. 334-407.

² *Dictionary of Hindu Architecture*, pp. 221-244.

³ *Indian Antiquary*, XLIV, pp. 90-91.

proportions which does not answer the *dhyāna* (description) of the deities, by uttering which the worshippers try to concentrate their mind and offer prayers to the idol, cannot give rise to that genuine faith which must be based on truth. If a map is to be used for learning the geography of a place that must correspond to the mental picture of the place which the reader has formed after reading an authoritative description. It is hardly necessary to add that the dirty surroundings and defaced and broken images of several temples and shrines have caused untold injury to the religious susceptibility of the educated and uneducated Indians alike. Cleanliness is certainly next to godliness. But a lovable image carved after the *dhyāna* is all the more necessary to create an atmosphere of reality and faith. If not for the sake of mere art, at least for the sake of the faithful, the artists should cast the images of gods and goddesses, which are meant for worship, strictly after the directions of the *Śilpa-śāstra* which has now been made available for the artists by the publication of the series under the general title of *Mānasa-sāra* (Essence of Measurement) together with the Text, English Translation, Plates and an encyclopaedic Dictionary of Hindu Architecture.

CONTRIBUTION OF INDIA TO ARABIC LITERATURE DURING THE PRE-GHAZNAWID PERIOD.

M. G. ZUBAID AHMAD M.A., P.H., A.H., Ph.D. (LONDON),
Arabic and Persian Department, University of Allahabad.

The most important contribution of India to Arabic literature undoubtedly begins with the Ghaznawid period, the tenth century A. D.; but she also certainly made some contributions to Arabic, in respect of vocabulary and otherwise, from a much earlier period. However insignificant they may be, they deserve notice. But before enumerating them, some account may be given of the relations between India and Arabia during the pre-Ghaznawid period.

LEGENDARY RELATION

Legend speaks of relations between these two countries, before the dawn of history. In the Hadith literature there are many traditions which refer to the legend that Adam, the father of mankind, being driven out of Paradise, alighted on the peak, called after him, of a mountain in Ceylon.¹ When his repentance was accepted by God, he was brought to 'Arafāt near Mecca where he met Eve who had been thrown down at Jiddah. These traditions are not only found in the religious literature of Islam but also in works of history and geography. For example, we find this legend in the

¹ Tabari, *Tarikh*, I., 119 & following pages, Tabari, *Tafsir*, Commentary on the verse I. 28.

works of Ibn Qutaybah (d. 276 A. H.), Maqdisi (d. 375 A. H.) and Yāqūt-al-Ḥamawī (d. 626 A. H.)¹

In the legend there is a controversy about the place of the death of Adam. According to one or two traditions " he is said to have died in Ceylon.

He is also said to have made many pilgrimages, not less than forty, to Mecca, going back to Ceylon every time.²

It is also asserted that the Black Stone of the Ka'bah, in the form of a brilliant ruby, fell from Paradise along with Adam and was carried to Mecca when he was ordered by God to build the Ka'bah.³

The story of Hābil and Qābil is said to have taken place in India according to one tradition.⁴

According to this legend, Arabia and India have had intercourse with each other from the very beginning of human life on the earth.

RELATIONS OF HISTORICAL TRUTH

Though political relations between India and Arabia were first established as late as the seventh century after Christ, yet these two countries, entirely different from each other in race and language, had been connected through trade from so early a time as the commencement of the seventh century before Christ, or perhaps even from pre-historic times.⁵

Two of the three routes by which trade was carried in ancient times between India and the West, passed

¹ Ibn Qutaybah, *Ma'ārif* (Göttingen) p. 9. Maqdisi, p. 13 Yāqūt's *Mu'jam*, V., 74.

² Ghulām 'Alī Azād, *Subhat al Marjān* (Bombay) 1st Section.

³ Ibid.

⁴ Ibid.

⁵ Ibid.

⁶ Rawlinson. *Intercourse between India and the Western World*, first chapter.

through Arabia. The first route ran from the mouth of the Indus and up the Euphrates, at the point where the road branches off to Antioch and the Levantine ports. This route attained high importance during the golden days of the Babylonian Empire, with the decay of which it fell into oblivion.

The second route, more important than the first, lay from the Indian coast to that of Yaman and Hadramawt and from there, passing along the Red Sea coast, to Syria and thence to Europe, either directly from the Syrian coast or via Egypt and Alexandria. This route was of great importance and the prosperity of South-west Arabia in ancient times was largely due to it, and it formed a highway of commercial traffic until the Ptolemies established an overland route from India to Alexandria.¹

This route, passing from Yaman to Syria through the Hijaz, has been referred to in the Qur'ān as IMĀM MUBĪN (A Manifest Road).² This Imām Mubīn has been generally taken by the commentators to be the road passing from Yaman to Syria. Another Qur'ānic verse, referring to the commercial caravans of Sabā, throws some light on the prosperity of this route. This verse (XXXIV, 18) is as follows:—

“And We made continuous towns between them
 “(the people of Sabā) and the towns which
 “We had blessed— (the Syrian towns)—
 “and We apportioned the journey therein.
 “Travel through them nights and days.”

In this verse, the phrase “Qurā Zāhirah” has been explained by Tabarī to mean Qurā Mutāwāṣilah (continuous towns), that is to say, towns lying close

¹ Encyclopaedia Britannica, 11th edn. Vol. II, p. 264.

² Qur'ān. XV. 79.

to one another.¹ In the Qur'ān there is another reference, though indirect, to this commerce carried by the Quraysh. In verse CVI, 1, **لَيْلَى قَرِيْشٍ أَيْلَانِهِمْ رَحَلَةُ الشَّتَا وَالصَّيْفِ**, the summer and winter journeys mean those made by the Quraysh on the highway called Imām Muhīn.²

It is certain that Ceylon was early known to the Arabs on account of its pearl fisheries and trade in precious stones, and Arab merchants had formed commercial establishments there centuries before the rise of Islam.³ When and how the Muslims reached the island is unknown. From Balādhurī it appears that some Muslim merchants had been there long before the attack on Sind by Muḥammad b. Qāsim. The cause of this attack has been stated by Balādhurī to have been vengeance for the plunder, by some pirates of Debal, of vessels which the ruler of Ceylon had despatched, filled with Muslim orphans.⁴

As to the political connection of India with Arabia, it is sufficient here to point out that the first invasion of the Indian coast by the Arabs was at so early a date as the reign of the second Caliph (13-23, A. H., 632-644 A. D.) But the Arab inroads did not penetrate far until 710 A. D., when Multan with the country of Sind fell before Muḥammad b. Qasim during the reign of Walid (705-715).

CONTRIBUTION OF INDIA TO ARABIC LITERATURE

After the above account of the relations between India and Arabia before the Ghaznawid period, it will be easy to make a survey of the contribution of India to Arabic literature during this period.

¹ Tabarī, Tafsīr, Part 22nd, p. 58.

² Ibid, Part 30th, p. 197.

³ Encyclopaedia of Islam, I, 838.

⁴ Balādhurī, Buldān, 435.

(1) To begin with, the legend of Adam's alighting on the mountain of Sarandīp may be said to be, in a way, a contribution of India to Arabic literature. When Ceylon was for the first time visited by the Muslims, they, having heard the local traditions about the depression in the peak, might have remoulded them to suit their own faith; and in order to give them authority they put them in the mouth of the Prophet.

(2) The commercial intercourse between these two countries introduced many Indian words into the Arabic language. The merchandise imported from India into Arabia consisted of perfumes, spices, cloths etc. Arabs naturally borrowed words for these articles from Indian languages. Thus words such as *ṣandal*, *misk* (musk), *kāfūr* (camphor), *qaranfūl* (cloves), *filfil* (pepper), *hail* (cardamon), *zanjabīl* (ginger), *jā'ifal* (nutmeg), *nārjīl* (cocoanut); *mawz* (banana), *limūn* (lemon), *tanbūl* (betel) etc. are Arabicised forms of the Indian words. In some cases the word 'Hindī' was added to the words which already existed in Arabic, e. g. 'ūd Hindī, *qusṭ Hindī*, *tamr Hindī*, etc. The last word became 'tamarind' in English.

Indian cloths also used to go to Yaman and thence to the Hijāz. The Arabic words *shās* (muslim), *shīt* (calico) and *fūṭah* (striped cloth) come under this category¹.

Arabian navigation to the Indian coast introduced half a dozen words of Indian origin into Arabic travels and geographical works, e. g. the word "*bārijah*" (plu. *bawārij*) meaning 'pirates' is the Arabicised form of the Indian word "*bēra*," and the word "*dawnīj*" (plu.

¹ i Tāj -al-rūs, under the word 'fūṭah'.

ii Muḥammad Sulaymān, *Arḍ-al-Qur'ān* II, Chapter on "Arabic Language."

dawānīj) meaning 'small boat' owes its origin to the Indian word "ḍongī"¹

Jurjī Zaydān, the well known modern Arabic scholar of Egypt, says that the words "subḥ" (dawn), "ḍaw" (light) and "bahā" (light) seem to be of Sanskrit origin, as these words are not found in the sister languages of Arabic.²

The word "ṭūbā" that occurs in the Qur'ān is said by some Arabic scholars to be the name of a paradise, in some Indian language.³

An Indian sword was very much valued in Arabia; the Arabs called it "muḥannad," "Hindī" and "Hindawānī," which words frequently occur in Arabic literature. The very word "Hind" has fascinated Arabs a good deal. They have used it as a lovely name for their woman.

(3) Another debt which Arabic literature owes to India is the introduction of her numerals into Arabic, in which language they are still called AL RUQŪM-AL HINDIYYAH. In Arabic writing letters only were used in place of numerals up to the eighth century A.D., when this Indian system passed to the Arabians, probably along with the astronomical tables, brought to Baghdād by an Indian ambassador in 773 A. D. The system was explained in Arabic in the early part of the ninth century by the famous scholar Muḥammad b. Mūsā Alkhwārizmī and from that time continued, though at first slowly, to be used throughout the Arabian world.⁴ Al Bīrūnī

¹ For the word "bārijah" see Al-Bīrūnī, Kitāb al-Hind, p. 102 and the 'Ajā'ib al-Hind, ed. Paris, p. 114.

For the next word see Yāqūt al-Ḥamawī, Mu'jam al-Buldān, under the word "qays" Vol. VII. (Taken from Sayyid Muḥammad Sulaymān, "Arab-o-Hind ke ta'alluqāt", p. 63, where the remaining four words are also mentioned.)

acknowledges that the Muslim system of numerals is derived from the best of their (the Hindus') systems.¹ It is a well known fact that this system passed from the Arabians to the West, where these numerals were known as "Arabic Numerals."

(4) Another contribution of India to Arabic literature is astronomical material. Undoubtedly the Arabs had their own science of astronomy, probably taken from the Chaldeans, but during the second century of the Hijra, when the 'Abbāsid caliphate was at its zenith and when extraordinary efforts were made to translate foreign books into Arabic, we find much evidence of the influence of Indian culture on Arabian civilisation. Many books were translated from Sanskrit into Arabic. Of the astronomical works, the *Sindhind* was the first book to attract the attention of the Arabs. It was first translated by Al-Fazārī (d. 154 A. H.) and a second time by the already mentioned Muḥammad b. Mūsā of Khwārm. Lastly Al Birunī wrote a book on the *Sindhind* with the title of *تجوامع الموجود لخواطر الهند في حساب التنجيم*.

(5) Another equally important contribution of India to Arabic literature is medicine.

Charaka and Suśruta occupy the highest position as the medical authorities in the Sanskrit language². Their works were rendered into Arabic at the close of the eighth century A.D., and quoted as authorities by the celebrated Abū Bakr Al Rāzī (d. 932 A. D.)³. Ibn Nadīm gives not less than fifteen names of those Indian authors whose works had been translated into Arabic by the time of the composition of his *Fihrist*.⁴ None

⁶ *Berlin Catalogue*, No. 6411.

of these renderings are known to exist except a small book of Shānaq on poisons. The Berlin Library contains a MS of it.¹ The original text was, as stated in the preface of the work, first translated into Persian by Abu Ḥātim al Balkhī for Khālīd al-Barmakī in 200 A. H. and was afterwards rendered into Arabic by Al-‘Abbas b. Sa‘īd al Jawharī in 210 A. H. Ḥajjī Khalīfah has also mentioned it under the title of the Kitāb al Sumūn.¹ The MS. is small and contains only 84 pages. It is divided into four sections (Maqālāt). The first maqālah is an introduction in which the author says how doctors have invented various compounds of deadly poisons to save the sacred lives of kings. To him, the usage of these poisons is not allowed for anybody except kings. The second chapter deals with the symptoms of the effects of various poisons. The third chapter describes various methods of preparing deadly poisons. For instance, he says that a baby swallow should be devoured by a poisonous snake; then both of them should be shut up in a copper kettle and buried under a cow-dung hill. After a certain number of days, when they are thoroughly decomposed and fermented, the mixture is to be dried up in the sun. A very small quantity of it is sure to kill any man who happens to eat it. The last chapter contains the remedies and antidotes. The author has also given a prescription of an antidote which renders any man that eats it poison-proof.

On the last page the scribe has written that at the instance of the Caliph, the device of bringing up a girl in such a way that whosoever happens to cohabit with her is sure to die at once, has been omitted on account of its being an act of barbarism. The work is of interest

¹ Khalīfah, V., 96.

as showing the various methods of destroying human life in ancient times.

(6) Two story books, one "Kalilah wa Dimnah" and the other "Alf laylah wa laylah," enjoy an unrivalled position in the domain of light literature. The former is an Indian story which was first translated from Persian into Arabic by Ibn Al-Muqaffā in the eighth century A. D. The subject matter of the latter was also, for the greater part, of Indian origin.¹ Ibn Nadīm has given several names of story books translated from Sanskrit into Arabic.² All such books may be regarded as a part of the contribution of India to Arabic literature.

(7) The game of chess which plays no mean part in Arabic literature is also a contribution of India. "The best authorities agree that Chess existed in India before it was known to have been played anywhere else. The word Shatranj is a foreign word among Persians and Arabians while its natural derivation from the Sanskrit word CHATURANGA is obvious."³ Many metaphors and similes have been taken from chess in both Arabic and Persian literatures.

(8) Al-Birūnī's *Kitāb al Hind* is one of the most important contributions of India to Arabic literature, not because the author is regarded by some Arabic writers of repute as a resident of Sind, but because the whole subject matter has been taken from India. The name of the author is so associated with India that we can hardly think of Arabic literature produced in that country without thinking of him. Whatever reputation he enjoys as a great scholar of astronomy and mathematics is due

³ Encycl. Brit. under "Chess"

largely to the benefits he derived from the writings and works of Indian scholars. Apart from the patronage that he received from the first Sultān of Muslim India and his son, and apart from the facilities given to him by the Ghaznawids, it is impossible to ignore his great obligation to Indian scholars and teachers, at least as far as his knowledge of Indian sciences is concerned.

(9) Abū Ḥaṣ̣ Rabī' b. Ṣubayḥ was what is called in the language of Islamic learning, 'Tab' Tubī'īn (i.e. one of the companions of the companions of the Prophet's companions). He is, according to an authority, said to be the first Muslim to write a book¹. He was a reliable transmitter of Ḥadīth. He migrated in his later days to Sind where he died in 160 A. H.² He is mentioned by Ghulām 'Alī Āzād, Raḥmān 'Alī and Nawwāb Ṣiddīq Ḥasan as the first Muslim scholar who lived in India.³

Sind was, during the first three centuries of the Hijra, an Arab colony where people of more than one tribe settled. These domiciled Arabs must have maintained Arabic as their mother tongue for a long time, and there must have sprung up many a poet among them. But it is a matter of great regret that no accounts whatever of such intellectual activities of Sindian Arabs and of those natives who must have learnt the language of their rulers, have come down to us. The *Futūḥ al Buldān* and other similar books do not throw any light upon this matter. But it may be conjectured that some migrating Arabs must have written some books in Arabic. Ḥājji Khalifah mentions "*Ta'rikh Sind*" among the

¹ Khalifah, I., 80.

² Āzād Subḥānī, P. 26.

³ Ibid. 26; Raḥmān 'Alī Tadlikira, 3; Ṣiddīq Ḥasan, Abjad al 'Ulūm, 889.

histories written by the Muslims, but does not give the name of its author¹. Perhaps it was written by some Sindī Arab. The author of *Chāch Nāmah* says that he has taken the material for his book from an Arabic History written by the ancestor of the man who asked him to render it into Persian. Perhaps this Arabic history of Sind is the same as that to which Khalīfah refers. In the absence of any positive evidence and authority it is impossible to say anything definite.

Just as some Arabs settled in Sind, similarly many Sindians were domiciled in Arabia, either as slaves or free men. Of them also very little is known. Sam'ānī gives only two names under the *nisbah* "Sindī": one is Abū Ma'shar and the other is the poet Abū 'Atā Aflah Sindī². The former was a *muhaddith* (traditionist) and was regarded as an authority on the history of the Prophet. The high position that he held as a scholar may be judged from this fact that when he died, the Caliph Harūn al-Rashīd accompanied his funeral procession and led the prayers himself. Abū 'Atā Aflah will be spoken of at some length later on in connexion with the contribution of India to Arabic poetry.

Sam'ānī also gives several names under the *nisbah* "Manṣūrī," (of Manṣūrah, Bhakkar), "Daybulī" (of Daybul, Thath) "Lahorī" and "Hindī".³ All these men are said by

¹ Khalīfah, I, 133.

² Sam'ānī, Kitāb-al-ansāb, p. 313b.

N.B. Jurjī Zaydān has given the name of another Sindī poet Kushājīm. He definitely says that he was an Indian by origin (*Vide* his History of Arabic Literature, Vol. II 251). But this statement of his seems to be wrong, on the authority of Sam'ānī, who says that "Sindī" is both an adjective (Al-ism-al-mansūb) and a name and gives the names of Kushājīm and Rajā'al-Hindī, the traditionist, as examples of the latter case, (Sam'ānī, Ansāb, 314a)

³ Ibid. 543, 236b, 497 and 592.

Sam'ānī to be scholars and traditionists who transmitted *ḥadīth* to others.

When Abu'l-Qāsim al-Maḡdisī visited India during the latter part of the tenth century, he also found many traditionists in Sind. He specially makes mention of a certain Abū Muḥammad Maṣṣūrī who was a *muḥaddith* and an author of several good books¹.

Now all these *ahādīth* that the above mentioned Indians and those who settled in India transmitted to others, and their works on *ḥadīth* may be taken as the first contribution of India to Arabic literature as far as the science of *ḥadīth* is concerned.

Abū 'Aṭā Aflaḥ Sindī, mentioned above along with Kushājīm, the traditionist, was a MAWLA (client) of Banū Asad and was a good poet, which may be judged from this fact that Abū Tammām Ḥabīb thought fit to quote three lines of his in the beginning of the first chapter of his *Hamāsah*.

The author of *Kitāb Al Aghānī* has devoted no less than five pages to him.² He was one of those poets who sang in the praise of the Umayyads. He flourished during the latter part of the Umayyad period and outlived his patrons to see the time of the first two 'Abbāsīd Caliphs. He died in the reign of Maṣṣūr. He tried to sing equally enthusiastically in the praise of his new masters, but they would not accept any poem from him after his having lavishly praised their past enemies. Aflaḥ was his name and Abū 'Aṭā his *Kunyah*. There was something wrong with his tongue. He could not pronounce such letters as *Sh*, *J*, etc. His poems were

¹ Maḡdisī, *Aḥsan-al-taqāsīm*, 451.

² *Aghānī* XVI, 81-87.

admired, but as his tongue was defective he could not recite them well. Once a certain Sulaymān was so pleased with him that he gave him a good-looking boy named 'Aṭā to recite his poems for him. This boy proved of great help to him, and the poet was so satisfied with his services that he adopted him as a son and took his *kunyah* from him. People used to enjoy the defect of his tongue, but he was very sensitive about it, and did not allow them to ask him to pronounce any particular word. The story of the device of Ḥammād, the famous narrator, by which he could succeed in making him pronounce some particular words need not be mentioned here.

The poems of Abū 'Aṭā Allāh Sindī may be taken as the contribution of India to Arabic poetry during the pre-Ghaznawid period.

THE NĀRAYANIYA IN TAMIL LITERATURE.

RĀJASEVASAKTA, RAO BAHADUR, DR. S. KRISHNASWAMI
AIYANGAR, M.A., HON. PH.D., M.R.A.S.,
F.R.HIST.S., F.A.S.B., *Madras.*

Among the collections of poems known to Tamil scholars as the Śāṅgam collection, one by name Parip-āḍal, so named from the character of the composition, contains a number of poems, five¹ in all, among those that have so far been recovered, bearing on Viṣṇu. They are poems of laudation composed in honour of Viṣṇu. They are all of them, however, cast in a form which may be regarded as generally usual, but which show characteristic features which connect them rather intimately with what is known as the *Pāñcharātra*. In a contribution made to the Winternitz Commemoration Volume, I compared the substance of the poems with some of the well-known *Pāñcharātra* works, such as the recently published Jayākhyā in the Gaekwad's Oriental Series, the Padma Saṁhitā, the Ahirbudhnyā Saṁhitā and one or two others. The comparison was more or less of a general character, and did not go into the details very minutely. The comparison showed that these poems differed in essential features from the text books of the *Pāñcharātra*, such as the ones noted above. These text books are of the character of manuals of ritual for the *Pāñcharātrin*, and as such concern themselves more or less directly

¹ Poems 2, 3, 4, 13, and 15.

with what regulates the life procedure of the believer in the Pāñcharātra concerning the practice of his religion. These therefore lay themselves out deliberately to describe the four sections of this religious practice elaborately. They are *Charyā*, the conduct of a believer in *Pāñcharātra*, *Kriyā*, the deeds or works commended of a *Pāñcharātrin*, involving the construction of temples and institutions connected with temple-worship. The first has reference more or less to the personal conduct of a worshipper; the second may be regarded as perhaps public acts of charity and religion by a devoted *Pāñcharātrin*. Then follows the *Yoga*, the discipline through which one has to pass to realise the *Tattva* or the truth; and ultimately comes *Jñāna* or the knowledge which leads to ultimate salvation. Whatever else of the *Pāñcharātra* is brought into the scheme of these works, they are as preliminaries leading to this ultimate prescription for regulating the life of a *Pāñcharātrin*.

The Tamil poems are found to be cast in a more general mould, and say comparatively little of these particular sections. They seem more intended to give an idea of the *Tattva*, or the truth in regard to God, and his connection with all that exists in more general terms. But they give unmistakable evidence of association with the Pāñcharātra in that they describe the features of the system in other departments. They fall into five sections generally, and relate first to *Para*, or the ultimate truth, the highest knowledge, the knowledge *sui generis*; then comes His emanations or *Tyāhas*; and then the *Vibhava* or His greatness as exhibited in His many manifestations; then comes in the idea of His *antaryāmīta*, immanence in all things; and then the forms in which he could be worshipped for the benefit of the uninitiated, the *Archā*. From this, of course, naturally would follow

what exactly should be the discipline of a man to perform worship, in what particular forms the worship should be conducted and with what appurtenances, and then naturally how real knowledge of God himself in His relation to creation can be attained by the practice of the *yogic* discipline. It is the former part of the scheme that finds exposition either in full or in part, according to the choice of the author and the purpose of his poem, whatever that be. Of course, being poems composed on occasions, they do not exhibit, nor need we expect that they should exhibit, the special features usually found, and appropriately, in set treatises on the subject. Even so, it would be an interesting question to enquire whence came the notion, and why the idea itself is expressed in the form in which it happens to be, in these five poems by four different authors, two poems being by one and the same poet.

A source that might have inspired these poets is the Nārāyaṇīya section of the Mahābhārata.¹ One of the poems, other than the five relating to Viṣṇu in this collection, happens to be by one Perundēvan who composed the poems in invocation of each one of the eight classical collections made from the works of ancient authors generally described all together as 'Śaṅgam poets'. The selection probably was made from a comparatively large number of poems, and possibly the selection contains only those that were regarded as the most excellent in each particular mode of composition. While this author who composed the poems in invocation has sung in praise of different Gods for the different collections, the poem prefixed to this collection happens to be one on Viṣṇu. The poem in invocation, however, is very much mutilated, and has been recovered but imperfectly. But from what is avail-

¹ Bk XII. Ch. 344-361, Kumbhakonam, Edn.

able, it is fairly clear that it follows the method of composition of the other five poems, which are very much more completely recovered than this one. This author is the celebrity known by his name Peruṇḍēvanār, but with a distinguishing epithet, "who made the Tamil poem Bhāratam"; that is, his achievement in the field of literature was a Tamil version of the Mahābhārata, and this it is that gave him the name *Bhāratam Pāṇḍiya Peruṇḍēvan*, among a number of Peruṇḍēvanārs, whose names and a few poems have come down to us.

Taking up the Nārāyaṇīya for comparison, we find that the similarity of subject-matter is striking notwithstanding the fact that the purpose of composition of the two works is entirely different. The Nārāyaṇīya in the Mahābhārata is a narrative which expounds what *Pāñcharātra* is, and how it came to be given to the world through Rishi Nārada, and is of an expository character thrown in the narrative form. The Tamil poems on the contrary are poems in laudation of Viṣṇu; but in the lauds composed, the authors have described Viṣṇu according to the *Pāñcharātra* conception of God.

The Nārāyaṇīya is expounded in 17 chapters of the Mokshadharma section of the Śānti Parvan of the Mahābhārata. It begins with chapter 344, according to the Kumbhakonam edition, and comes to an end with chapter 361. The first two chapters of these 17 are devoted to the introduction of the subject as usual in the Mahābhārata. It comes in as a result of Brihaspati's anger in the matter of the acceptance of the *havis*, or the sacrificial offering, by Mahāviṣṇu in a sacrifice that he celebrated for king Uparichara Vasu. The next chapter 346 is in praise of Śvētadvīpa, the residence of the Primeval One, according to the Pāñcharātra. Ch. 347 begins an account of what Viṣṇu in Śvētadvīpa told Nārada about the manner in which

he set about the work of creation. Chapter 348 is devoted to a description of the ten well-known *Aratāras*. There are one or two points worth noting about these. As these are generally recited, there are a few lines which introduce the *Buddha Aratāra* of Viṣṇu. It must be noted here that, in this chapter, the Buddha is not brought in as a separate *Aratāra* of God, taking the place of Kṛiṣṇa, the ninth regular *Aratāra*, which is the form in which it is usually brought in. This chapter of the Mahābhārata, however, represents the Buddha and his religious teaching as only one of the acts of Kṛiṣṇa himself. The way that it is introduced seems to indicate the possibility of interpolation, as, in the short recital of the *Aratāras* which follows, in Śloka 55, the *Buddha Aratāra* does not find mention. Instead, the name Sātvata occurs; and Sātvata is but a synonym of Kṛiṣṇa, not of Buddha. The *Pāñcharātra* that Nārada thus learnt is described as the Mahopanishad¹, following the four Vedas, and adopting in it the principles of Sāṅkhya and Yoga. Nārada is said to have recited what he heard, in the court of Brahma in the presence of all assembled there. Chapters 349-50 are two chapters not directly connected with the exposition of the *Pāñcharātra*, although ideas of the *Pāñcharātra* are scattered all through. But they do relate to questions other than a mere exposition. Chapter 351 contains the recounting of creation by Kṛiṣṇa to Arjuna, and includes in it a portion of the praise of the Brahmans as such. The next following chapter, 352, is again a parenthesis, in which Kṛiṣṇa explains to Arjuna how he acquired the various names of his, and what their import is. With chapter 353 begins again Nārada's recital of what took place in Śvĕtadvīpa between him

¹ M. Bh. XII. 358 & 62.

and Vishṇu to Nārāyaṇa in Badari Āśrama, at whose instance he went to Śvĕtadvīpa. The next chapter is similarly an account of Nārada's stay there in Badari.

With chapter 353 ends practically the Nārāyaṇīya, which is referred to as such in the course of this narrative in that term (chapter 356, śloka 14 and ch. 348 ś. 62). Other terms of a similar import such as the *Nārāyaṇaridhi*¹, *Bhāga-arata*², *Pāñcharātra*³, *Aikāntikamata*⁴ also occur. The chapters following 354 to 361 consist of matter connected with the story, but not forming part of it. There is also a reference to the *Sāṅkhya*, *Yoga*, *Vēda*, *Pāśupata* and *Pāñcharātra malas*⁵.

Leaving these details aside for the moment, we return to the Tamil poems. They are all of a different purpose, cast in a different form, but deal practically with the same subject-matter. As I stated already, they are composed in praise of Vishṇu, and, therefore, they are concerned primarily with giving us an idea of the poets' conception of Vishṇu as such. Therefore it is by the characteristic qualities of Vishṇu as the Supreme Deity that the poets feel concerned to describe Him. In a plan like that, the ritualistic details with which the *Āgamas* are primarily concerned, the topics treated of in the *Āgamas*, need hardly find a place except perhaps indirectly. While the poets therefore concern themselves merely with describing Vishṇu as the Supreme Being, they find occasion to give us not merely His character as the creator of all, as immanent in all, as the absorber of all, in fact, as the be-all and end-all of all creation, but also make allusion to those special features which are implied in those general attributes

¹ Ch. 355, 7.

² 354, 17. •

³ 348, 62; 359, 64.

⁴ 348, 59; 354, 19.

⁵ 359, 64.

of His, as for example, those of His *Vyūhas*, and *Vibharas* or *Acalāras*. They also sometimes refer broadly to His character of immanence in all, and there is at least one reference to the form in which He is worshipped as the images of Kṛishṇa and Saṅkarshaṇa¹ as such, almost in the same manner as they are found mentioned in some of the Andhra and earlier inscriptions². Thus we see that while the different form in which these are thrown is characteristic of the purpose for which each one of the poems was composed, there is a remarkable similarity of subject-matter and of the treatment of topic between them and the Nārāyaṇīya. The inference, therefore, seems tenable that the authors of the Tamil classics probably drew their ideas in this particular from the Mahābhārata, and it may be that they did so in other particulars as well.

With this we reach a condition in our knowledge of the *Pāñcharātra* which distinctly implies (1) that the formal text books of the *Pāñcharātra* were written and got into vogue perhaps later than the age of the Tamil classics. After an elaborate examination of the question, Professor Schrader came to the conclusion that perhaps the earliest of these are referable to about A.D. 300. We seem to have here in these Tamil classics a view of the *Pāñcharātra*, perhaps less formal, but none the less distinctly *Pāñcharātrāic* in character, assimilable to the exposition of the *Pāñcharātra* as found in the Nārāyaṇīya section of the Mahābhārata. Perhaps with this will have to be taken such evidence of temple-worship of which we get glimpses in the Andhra and some of the pre-Andhra inscriptions of Northern and Middle India. There is besides the Bud-

¹ Poem 15, ll. 13, 28 and 66 in particular; also poem 2, ll. 23-24; and Puran, 56 and 58.

² Nanaghat, Ghosundi and Besnagar Inscriptions.

dhist reference to the school of the Bhāgavatas,¹ which would take us perhaps safely to the age of Aśoka—perhaps the fourth century B.C.—and may therefore be regarded as perhaps about the age of the Nārāyaṇīya, as the late Sir R.G.Bhandarkar held. But the *Pāñcharātra* notion seems to have reached back to times much earlier. Readers of the *Chāndogya Upanishad* know that at the outset of this Upanishad, *Rishi* Nārada is found stating to Sanatkumāra the qualifications that he was already possessed of to fit him to acquire further knowledge of the Supreme, and in stating his accomplishments categorically, he is found to mention (1) Ṛig-Veda, (2) Yajur-Veda, (3) Sāma-Veda (4) Atharva-Veda, then the (5) *Itihāsa-Purāṇa*, (6) the Veda of the Vedas (grammar), then (7) *Pitṛyam* (that which relates to manes), (8) *Dairam* (Science of the Gods), (9) *Nidhi* (the lore of the treasure trove), (10) *Tāko-Tākyam* (generally rendered logic), and (11) *Ekāyanam*. Here *Ekāyanam* has been rendered as the equivalent of the *Arthasāstra* polity. Whatever *Ekāyanam* is, it is rather hard to guess how exactly the meaning has been arrived at except perhaps the mention of logic and the Artha Śāstra together in certain well-known connections. But it could hardly have any justification either on the etymology of the word, or even with respect to its allusion. *Ekāyanam* seems distinctly to mean the one and the only path to salvation². There is a tradition supported by the authority of the work Śrī Praśna Samhitā³ that it constituted an Upanishad, rather the head and crown of Upanishads. We find the Mahābhārata refer to the *Pāñcharātra* as a *Mahā-Upanishad*. Such a work, how-

¹ Bhandarkar's *Vaishnavism* etc., p. 10.

² In the sense of a single course it seems to be used in the subsequent passages of the same Upd.

³ J. R. A. S. 1911, 937. n. 1.

ever, has not come down to us, like the other Upanishads; but it must be noted here that the Tamil classics under reference refer repeatedly to those ideas being the sum and substance ultimately of the teaching of the Upanishads (*Maṛai*), and even of the Veda (*Vāṅ-Molī*). There seems warrant, therefore, for the belief that either as a separate and special Upanishad, or, what is far more likely, in the sense of a generally accepted truth by one section of those who study Veda and Vaidic literature, *Pāñcharātra* had come to be recognised by the Vaidic schools as the Ekāyana-Śākhā of the Śukla Yajurveda. The *Pāñcharātra* seems to have had an early vogue and a provenance of its own, even in the days of the early Upanishads. The *Īśvara Saṁhitā*, the *Pāñcharātra* text quoted by Yāmuna-chārya and Rāmānuja, distinctly refers to the Supreme Character of the Śāstra. It is referable in its origin to Vāsudēva, not Vāsudēva-Kṛishṇa, but distinctly the anterior Vāsudēva, another name for Viṣṇu as the one Supreme Being immanent in all.¹ There is support for this contention even in the Bhagavat Gītā². I am informed that Madhvāchārya, in his Bhāṣhya on the Brahmasūtras uniformly uses the term *Ekāyana* in the sense of *Pāñcharātra*, and it is nothing surprising that he so uses it with the series of authorities before him. One statement in regard to it, in an attempt to explain the name, is worth noting here. It is said to be called *Pāñcharātra* for the reason that it threw into the dark five other systems,³ and the five are stated to be Yoga, Sāṅkhya, Veda, Bauddha and *Pāśupata*, with which five this is joined to constitute the sixth. The Nārāyaṇīya section of the Mahābhārata again contains reference to the other four excluding the Bauddha, and places, of

¹ Ibid 935-37.

² vii. 19.

³ Padma Tantra quoted on pp. 940-1. J. R. A. S. 1911.

course, *Pāñcharātra*¹ above the rest of them. Thus there is room for belief in the antiquity of the *Pāñcharātra*. It has had a continuous following, and is at the root of the Bhakti school. The *Pāñcharātra* itself refers certainly to *Vishṇu-bhakti*, while *Pāśupata* takes corresponding rank for Śiva *Bhakti*. The history of the *Pāñcharātra* is, therefore, bound up with that of the *Bhakti* cult from the very beginning to which we are able at present to carry our investigations,² and the two are associated together in the development of *Bhakti*. We shall have to reserve a more elaborate treatment of the subject for another occasion.

¹ MBh. XII. 359-64.

A MARSIIYA WRITER OF THE LUCKNOW SCHOOL OF POETRY

S. M. ZAMIN ALI, M. A., HEAD OF THE DEPARTMENT
OF URDU, *Allahabad University.*

Mirzā Salāmat Ali, "Dabir", son of Mirzā Ghulām Husain, was born in Muhalla Ballimārān, Delhi, in 1213 A. H. He was descended from a very respectable family of Shiraz that had earned a world wide reputation. Mullā Hāshim Shirāzī, a renowned Persian prose writer and the brother of Mullā Ahlī, an equally noted Persian poet, was his great-grandfather. His mother belonged to a well-known Lucknow family.

At the age of seven the Mirzā accompanied his parents who had decided to migrate from Delhi and settle down in Lucknow. Here he was trained in the traditional manner in Persian and Arabic. He was barely 12 years of age when he began to lisp in numbers. His father finding in him an extraordinary talent for poetry took him to Mir Zamīr, the best marsiya writer of the age, who asked Mirza to read out some of his compositions. Mirza recited the following Qit'a:—

کسی کا کندہ نگینے پہ نام ہوتا ہے
کسی کی عسکر کا لبریز جام ہوتا ہے
عجب سرا ہے یہ دنیا کہ جس میں شام و سحر
کسی کا کوچ کسی کا مقام ہوتا ہے

Mir Zamīr was much impressed and undertook to guide him as his pupil. He also asked him to adopt "Dabīr" as his poetic name.

Mirzā Dabīr continued on the one hand his studies in Arabic and Persian with Mirzā Kāzīm 'Alī, Maulavi Fidā 'Alī and Mullā Mahdī Māzindarānī, who were regarded as the best scholars of the age in Oriental languages, and on the other he proceeded with his Urdu compositions under the guidance of Mīr Zamīr.

He used to compose in Persian and Bhāshā also. For his Persian verses he became the pupil of Mullā Mahdī Māzindarānī, while in Bhāshā he composed "Thumrī" and other forms of verse at the instance of Shāh Nasīr-uddīn Haider, the King of Oudh. He used to compose ghazals also and it is said that the number of his ghazals was so large that three Dīwāns could have easily been compiled. But he never attended a mushaira except on one occasion when at the request of his friend Mirzā Muhammad, 'Barq', he recited his ghazal, the opening line (مطلع) of which ran as follows:—

دفن کرنا مستحکم کوے یار میں قبر بلبل کی بنے گلزار میں

Besides ghazals he tried other forms of Poetry as well but nowhere else does he reach the heights attained by him in his marsiyas. It is by reason of his achievement in this form that he enjoys his present position as a poet of the first magnitude.

It is very difficult to give a correct number of his marsiyas as he used to give away his compositions sometimes to his friends and sometimes to needy people who recited them as their own. His work as published by the Neval Kishor Press, Lucknow, comprises in 20 volumes of Daftar-i-mūtam; 14 of which contain 366

marsiya and the remaining 6 contain Salāms (سلام) Rubā'is, (رباعی) Masnavis (مثنوی) Nauhas (نوحه) Mukhammas (مخممس) etc.

Besides these there is a good number of marsiyas which have not been published at all and are found in manuscript with the reciters of marsiyas.

He has composed a portion of some of his marsiyas in *صنعت منقوطة* i.e. in words where every letter has dot (نقطه) He has also composed two marsias from beginning to the end in *صنعت غیر منقوطة* i.e. in words every letter of which is without a dot.

The recitation of marsiya is no lesser an art than its composition. Unlike other contemporary reciters of marsiya Mirzā Dabīr used to read it out to the audience in a graceful tone and simple manner without any gesture. In the act of recitation he laid stress only on articulation, elocution, and modulation of voice. With these his graceful appearance succeeded in producing the desired effect on the minds of the audience.

He was of a swarthy complexion, medium stature, well built, but inclined to be corpulent; he had large eyes, a high forehead and a short beard. He used to wear loose trousers, a half sleeved Jacket under a loose Kurta (shirt) and a Changōshiā Topi (cap), (چوگوشیه توپی); the old type Lucknow shoe called *Ghētlā* was his usual foot-wear.

So long as Lucknow continued under the prosperous rule of the King of Oudh, Mirzā Dabīr, in spite of numerous pressing invitations from outside to recite marsiyas, declined to leave Lucknow.

Wājid 'Alī Shāh, the last King of Oudh was a great admirer of Mirzā Dabīr. He expressed his appreciation of his work in the following couplet;

بچھن سے ان کے دام شکن میں اسیر ہوں
میں کم سنی سے عاشق نظم دبیر ہوں

He was very pious and generous. He used to spend almost all his income in secret charity. His acts of charity came to light after his death.

On several occasions he gave away his marsiyas to others who made money out of them. He died at the age of 74 in 1292 A.H. and was buried in his own house in Muhalla Nakhkhās at Lucknow.

The scholarly style, the choice diction, the creative imagination, the classical allusions and the fresh imagery of Mirzā Dabir make him a poet worthy of the most careful study. In order to appreciate his work fully it is necessary that the mind of the reader should adapt and adjust itself to the workings of the artist's mind, and attune itself to the proper mood. Thus prepared, no reader can fail to be moved and charmed. Even the most blasé will find something to attract, to surprise, and to charm them. Religion, history, classical literature, philosophy, are all made to contribute their share; but above and beyond them are his own shaping imagination, his own gift of vision, the marvel of his rhythm, and the capacity to rouse or depress, to exalt the reader into a mood of ecstasy or at will to dissolve him into tears. But even a great poet is not without blemishes. He gets so deeply absorbed in his lofty thoughts and so borne aloft by his imagination that at times he loses sight of uniformity and proportion and becomes careless in linking the incidents together. His style then becomes uneven and now and then there is a flagging of his wings.

Here are some specimens of his compositions:

کس شیر کی آمد ہے کہ دن کانپ رہا ہے
 دن ایک طرف چرخ کہن کانپ رہا ہے
 دستم! کا بدن زیر کفن کانپ رہا ہے
 ہر قصر سلاطین زمن کانپ رہا ہے
 شمشیر بکف دیکھ کے حیدر کے پسر کو
 جبریل لرزتے ہیں سمیٹے ہوئے پر کو

عہدیت سے ہیں نہ قلعة افلاک کے در بند
 جلاں فلک بھی نظر آتا ہے نظربند
 وا ہے کمر چرخ سے جوزا کا کمر بند
 سیارے ہیں غلطان صنت طائر پر بند
 انگشت عطارد سے قلم چھوٹ پڑا ہے
 خورشید کے پنچے سے علم چھوٹ پڑا ہے

Here are other specimens of his classical composition. He does not forget that he is a writer of marsiya even when he has to describe the sweet refreshing morning or the spring season. His imagination has transfigured even the beauties of nature into something that forebodes the martyrdom of Husain.

جب سرنگوں ہوا علم کہکشان شب
 خورشید کے نشان نے مٹایا نشان شب
 تیر شہاب سے ہوئی خالی کمان شب
 تانی نہ پھر شعاع قمر نے سلمان شب
 آئی جو صبح زیور جنگی سلوار کے
 شب نے زرہ ستارونکی رکھدی اُتار کے

شمشیر مشرقی جو چڑھی چرخ پر شتاب
 پھر تیغ مغربی نے دکھائی نہ آب و تاب
 تھا بسکہ گرم خلیج برفیافتاب
 باقی رہا نہ چشم نیلوفری میں آب

محتاج ماہتاب ہوا آفتاب کا
باغ جہاں میں پھول کھلا آفتاب کا

تھی جوش خوں کے عارضہ میں مبتلا شفیق
فصاد صبح آیا لیے نشتر و طابق
کھوئی شفیق کی فصد تو رنگ اُفتی تھا فقی
گلرنگ تھا صحیفۂ گردوں ورق ورق
خون شفیق میں سرخ قضا نے قلم کیا
اورد خط و خال روز شہادت رقم کیا

-:0:-

کوفہ میں بہار آئی جو گلگشت چمن کو
شرمانے لگا رنگ زمیں چرخ کہن کو
رگ رگ سے ملی نبض رواں گل کے بدن کو
لائے نے کیا پھل کے سبک لعل یمن کو
ہر سرو بنا شکل زباں شوق سخن میں
فوارے در افشاں ہرے تعریف چمن میں
وہ جشن وہ سبزے کا نیا فرش لب نہر
تھا صحن گلستاں کے حسینوں کا بسا شہر
وہ حسن زمیں جس پہ فلک کھائے ہوئے زہر
وہ جوش گلوں کا وہ بہار چمن دہر
پیدا نہ زمیں تھی نہ کہیں چرخ عیاں تھا
سبزے میں وہ پنہاں تھی شفیق میں یہ نہاں تھا

وہ مشک بدوش ابر کا ہر باغ میں آنا
وہ نہر چمن کا کہیں آنا کہیں جانا
قمری کا ادھر سرو کے مذہب پہ ترانا
بلبل کا ادھر مصطفیٰ گل پڑھ کے سنانا
کس رنگ کا مضمون ضیابا: لکھا ہے
قدرت کے قلم نے خط گلزار لکھا ہے

وہ موسم گل رنگ یہ کوفے کے چمن میں
 شبیم نہی کہ تھے موتیوں کے ڈھیر عدن میں
 دندان نظر آنے لگے غنچے کے دھن میں
 بلبل کی طرح جان پڑی گل کے بدن میں
 پر بلبل بستان نجف مرثیہ خواں تھا
 زعرا کا چمن فصل بہاری میں خزاں تھا

—:0:—

یونس دھان ماری شب میں نہاں ہوا
 کنعان بامداد سے یوسف عیاں ہوا
 لیلا شب کے حسن کا گلشن خزاں ہوا
 عالم تب فراق سے گرم فغان ہوا
 مستجنوں کے رنگ رخ کی طرح دھوپ زرد تھی
 تھی صبح یا زمانے کی اک آہ سرد تھی

Here is another instance of his lofty thoughts and poetic description:

پوچھ رہے کس علم کا شعاع آفتاب کی
 پانی رہے کس پھیرے سے ہمت ستاب کی
 یہ شان رہے نشان رسالت مآب کی
 چوب علم کلید رہے جنت کے باب کی
 نقشہ علم کے پنچے میں الا کا ملا
 بندوں کو اس نشان سے نشان خدا ملا
 طوبیٰ کی شاخ تیشہ قدرت نے کی قلم
 اور نور نخل طور بہرا اُس میں یک قلم
 کی صادقوں کی راستی قول اُس میں ضم
 بے پردہ شو کے عنو بنی پوشش علم
 جب باندہ کر پھیرے کو سیدنا علم کیا
 صانع نے پردے میں ید طولیٰ علم کیا

—:0:—

سرمہ لگایا مد نگہ کی سلائی سے
 ظلمت کو روشناس کیا روشنائی سے
 بھائی ہزار میل کدورت صفائی سے
 کم تھی نہ میل کلک قدر کی صفائی سے
 سرمے کے خط سے ترجمہ پورا نظر پڑا
 مردم کو عین صاد کا سورا نظر پڑا

—:0:—

گُلگونہ و حسار فلک گرد ہے دن دی
 ہو خار میں خوشبو ہے بہشتوں کے چمن کی
 خورشید نقیبانہ لیے چوب لہر کی
 دہتا ہے کہ آمد ہے شہنشاہِ زمن دی
 مانند براق نبوی رخس ہے رو میں
 روح القدس آئے عین خوزادے کے جلو میں
 دھندلے ہے دن مہر درخشاں کی ہے آمد
 ایمن ہوا بن موسیٰ عمران کی ہے آمد
 جن پڑھتے ہیں کلمہ کہ سلیمان کی ہے آمد
 سجدے میں عین سب قبلۃ ایماں کی ہے آمد
 پریوں نے پرے قاف میں بیہوش پڑے ہیں
 پر خوف سے بالے بدن بال کھڑے ہیں

—:0:—

اطلس کے بچھونے پہ فلک کو نہیں آرام
 اس مرتبہ لوٹا ہے کہ نیلا ہے سب اندام
 سیاروں پہ ثابت ہوئی اب گردشِ ایام
 خورشیدِ سنحر کے لیے اب حشر کی ہے شام
 اکی دم قدم گوا زمینِ جم نہیں سکتے
 گردش میں ہیں قطبین فلک تہم نہیں سکتے

—:0:—

In order to draw a contrast and comparison between Milton, Firdausi and Mirzā Dabir the following pieces are quoted:

Milton:-

“To Sun, who scarce uprisen
With wheels yet hovering over the ocean,
Shot parallel to the earth his dewy ray
Discovering in wild landscape all the east
Of Paradise and Eden's happy plains”

Firdausi:—

چو خورشید زد پنجه بر پشت گاو
زهامون بر آمد خروش چکاو
چو خورشید درخشان بگسترد پر
سیہ زاع پیران فرو برد سر

Mirzā Dabir:—

دلگونہ شفق جو ملا حور صبح نے
اسپند مشک شب کو کیا نور صبح نے
گرمی دکھائی روشنی طور صبح نے
تھلنے چراغ کر دیے کافور صبح نے
لیلاے شب کی رات کو دولت جو لت گئی
افشاں جبین سے مہر درخشاں کے چہت گئی

or

پیدا شعاع مہر کی مقراض جب ہوئی
پنہاں درازی پر طافس شب ہوئی
اور قطع زلف لیلی زہرہ لقب ہوئی
میتلوں صفت قباے سحر چای سب ہوئی
فکر رفو تھی چرخ ہلومند کے لیے
دن چار تکرے ہو گیا پیوند کے لیے

Here are some instances of his creative imagination and the use of new similes and metaphors:

- (۱) قرطاس پر رواں خط تقدیر دیکھ لو
آؤ خدا کے ہاتھ کی تحریر دیکھ لو
- (۲) طے ہر قدم پہ ایک مہینے کی راہ ہے
اسپر ہلال نعل کی رویت گواہ ہے
- (۳) اس رخس کے منہ پر بھی دن چڑھ نہیں سکتا
صورت کا یہ عالم ہے کہ سن بڑھ نہیں سکتا
- (۴) صرصر سے ہے ایمن یہ چراغ رخ تاباں
عارض کو کیا خط نے چراغ تہ داماں
- (۵) اکبر نشان سجدہ جبین پر دکھاتے ہیں
یا سر نوشت نیر اکبر دکھاتے ہیں
- (۶) شہزادے نے جو مہد کے اندر قدم رکھا
جھولی نے ناز سے نہ زمیں پر قدم رکھا
- (۷) ناگاہ بے فروغ ہوا مشرق خیام
زیذب کے آفتاب چلے سوے فوج شام
- (۸) ٹھیکل کا عکس دیوے میں ہے کھکشاں نما
کاسہ ہر ایک سم کا ہے جام جہاں نما
- (۹) واں شور تھا پیدا مہ نو سے مہ نو ہے
یاں غل تھا جدا شمع سے یہ شمع کی لوہے
- (۱۰) عکس رخ جاں بخش سے آتا ہے یہ باور
آئینے میں ہے نبض رواں ہر رگ جوہر
- (۱۱) ناوی میں مڑے زخم پہ زخم اسکو دیا ہے
جوہر نے دل آئینہ کو بخیمہ کیا ہے

The following is one of the instances where his lofty imagination has soared so high as to make him obscure:

شمشیر نے جل تہل جو بھرے قاف سے قاف
پریاں ہوئیں مرغابیاں گرداب بنا قاف

چہلے کے لئے خوف سے اس درجہ گھٹا قاف
 جو پلچے میں سیرغ کی مقدار کے تھا قاف
 کہا جانے کدھر لے کے خزانہ وہ بہا تھا
 قاروں کو عذاب ابدی ڈھونڈ رہا تھا

Here are some instances of his poetic description
 and figurative language:

Description of sword—

کاٹا پلک میں آنکھ کو پتلی میں نور دو
 پانڈوں میں کجروی کو سروں میں غرور کو
 سیلے میں بغض و کینہ کو دل میں فتور کو
 نیزہ میں معصیت کو طبیعت میں زور کو
 ذات ای طرف، متادیا بالکل صفات کو
 کیسی زباں-زباں میں یہ کات آئی بات کو

—:0:—

چیونٹی کی یہ اندھیرے میں رفتار دیکھ لیں
 آنکھوں میں نبض مردم بیسار دیکھ لیں

—:0:—

عقبی کے جو درجے ہیں رہ پانڈوں کے تلے ہیں
 دنیا صفت نقش قدم چہرے چلے ہیں

—:0:—

جس مورچے میں لیلی تبغ دوسر گئی
 چنگے بھلوں کو سائے سے دیوانہ کر گئی
 ہر صف میں خای آرائی ادھر سے ادھر گئی
 پھر یہ نہا نہا کے لہو میں نکھر گئی
 عالم نہ پوچھو قطرہ فشانے کے حسن کا
 جوہن ٹپک رہا تھا جوانی کے حسن کا

سب کے گلوں سے ملتی تھی لیکن رکی ہوئی
جوہر یہ تھا کہ بوجھ سے خود تھی جھکی ہوئی

—:0:—

دریائے خوں تھا تیغ سبکدرو کی ناؤ پر
پر یوں رواں تھی جیسے کہ کشتی بہاؤ پر

—:0:—

اُتھی، گری، بلند ہوئی، پست ہو گئی
پی پی کے میکشوں کا لہو مست ہو گئی

-:0:-

نہزے تلے تو اس نے کہا دیکھے بہالے ہیں
بھٹتی نہ خنجرروں سے کہ گودی کے پالے ہیں

—:0:—

قبضہ تو رہا دست جناب شہ دیں میں
پہل جا کے لگا شاخ سر گاؤ زمیں میں

بے جرم معرکے میں رہا خارا شگاف تھی
لشکر کا خون کیا تھا مگر پای صاف تھی

—:0:—

تھی راستگو وہ تیغ یہ روشن جہاں پہ تھا
جتنا لہو پیا تھا وہ جاری زباں پہ تھا

—:0:—

دی دی کے قدم دکھتی تھی ہر سر پہ ادب سے
جھک جھک کے مثال شرفا ملتی تھی سب سے

Here is another metaphorical description of the
rising of the sun;

یوسف غریقِ چاہ سیہ ناگہاں ہوا
 یعنی غروبِ ماہ تجلیِ نشان ہوا
 یونس دہاں ماہیِ شب سے عیاں ہوا
 یعنی طلوعِ نیرِ مشرقِ ستاں ہوا
 فرعونِ شب سے معرکہ آرا تھا آفتاب
 دن تھا کلیم اور ید بیضا تھا آفتاب
 دے سفید یوسف آفاقِ شب نقاب
 مغرب کی چاہ میں جو نہاں تھا وہ زیرِ آب
 سقائے آسمان نے لیا دلو آفتاب
 اور دیسماں شعاع کی باندھی بہ آبِ وتاب
 یوسف کو دلو مہر میں بٹھلا کے چاہ سے
 کھینچا نواحِ شرق میں مغرب کی راہ سے

Here is a description of the scorching heat of the day:

مٹی خرابِ چرخِ پہ ہے مہتاب کی
 رنگت ہے برجِ حوت میں ماہیِ کباب کی
 دریا میں آنکھ بیٹھ گئی ہے حباب کی
 حدت ہے موجِ موج میں تیرِ شہاب کی
 فوارے کو نہ حوض میں گرسی سے کل پڑی
 پانی کی بھی زبانِ دھن سے نکل پڑی

Here are a few instances of his pathetic composition:

بانو پچھلے پہرِ اصغر کے لیے روتی ہے ایک رہ جاگتی ہے خالقِ خدا سوتی ہے

سوک کا فرش ہے اور سامنے جلتا ہے چراغ
 شانے میں داغِ دسن سیلے میں اولاد کا داغ
 جانِ اندوہ میں دلِ رنج میں آشتیہ دماغ
 نہ وہ گلِ ہیں نہ وہ غنچے نہ وہ زہرا کا باغ

گوشہ چادر کا اگر سر سے سری جاتا ہے
ننگے سر کوفے میں پھرنا اُسے یاد آتا ہے

—:0:—

تم نے بیٹا مری گودی کو کیا کیا خالی
بغداد میرے حسابوں ہوئی دنیا خالی

—:0:—

ہوں وہ بے خود کہ نہیں منجھکو خبر ہوتی ہے
شام کب ہوتی ہے کس وقت سحر ہوتی ہے

—:0:—

بانو کے شیر خوار دو ہفتہ سے پیاس ہے
بچے کی نبض دیکھ کے ماں بے حواس ہے
نہ دودھ ہے نہ پانی کے ملنے کی آس ہے
پھرتی ہے آس پاس یہ جینے سے یاس ہے
کہتی ہے کیا کروں میں دھائی حسین کی
پتلی پھری ہے آج میرے نور عین کی

These specimens, though few in number, will, I trust, demonstrate the justice of the claim that I have made on behalf of Mirzā Dabīr.

DANḌAKARANYA

DR. D. R. BHANDARKAR, M.A., PH.D., F.A.S.B.,

*Carmichael Professor of Ancient Indian History,
Calcutta University.*

The question that we want to discuss here is, which is the Daṇḍakāraṇya of Vālmīki's Rāmāyaṇa ? A Hindu of Mahārāshṭra has no doubt on this point. At the commencement of a religious ceremony a pious Hindu has to make mention of the country where and of the time when he is performing that ceremony. In accordance with this practice a Hindu of Mahārāshṭra begins his ceremony with the words, *asmin Daṇḍakāraṇya-deśe*. From this it is clear that to a native of Mahārāshṭra Daṇḍakāraṇya can be no other than the country where he lives. In support of this belief other arguments are advanced by him. In those sections of the Rāmāyaṇa where the life of Rāma, Lakshmaṇa and Sītā in the forest is described, places like Pañchavaṭī or Janasthāna, Godāvarī, Daṇḍakāraṇya and so forth are frequently mentioned. This shows that these places were not far distant from one another. Now, people point to a place near Nasik which is called Pañchavaṭī. Near this Pañchavaṭī flows the Godāvarī. This is known to every native of Mahārāshṭra, who is thus convinced as to the identity of Daṇḍakāraṇya with Mahārāshṭra. Evidence of a literary nature is — also forthcoming in favour of this belief. We have

thus a work of Hemādri called *Vratakhanda*. Hemādri was the Prime minister of the Yādava family of Devagiri in the time of its princes, Mahādeva and Rāmachandra, and flourished in the second half of the 13th century A. D. Now, the Introduction to his *Vratakhanda* contains a *rāja-praśasti*, where it is stated that the capital of these Yādavas was Devagiri situated in Seuṇa-deśa and that this Seuṇa-deśa was on the confines of Daṇḍaka¹. Devagiri is the modern Daulatabad in Nizām's dominions. And as this Devagiri was in Seuṇa-deśa and Seuṇa-deśa was contiguous with Daṇḍaka, the conclusion is irresistible that Daṇḍaka is identical with Mahārāshṭra which is contiguous with the province round about Daulatabad. Another piece of evidence in confirmation of this is furnished by the Purāṇas, such as, the Vāyu, Matsya and Mārkaṇḍeya. In these Purāṇas it is stated that "the region about the northern part of the Sahyādri through which flowed the river Godāvarī and in which Govardhana was situated was the most charming on earth; and there, to please Rāma, the sage Bhāradvāja caused heavenly trees and herbs to spring up for his wife's enjoyment, and thus a lovely garden came into existence."² Now this Govardhana which was not far from Godāvarī cannot but be the Govardhana which is in the neighbourhood of Nāsik. This also points to the conclusion that Rāma was residing in the forest round about Nāsik, where the Godāvarī flowed and Govardhana was situated, that in other words, Daṇḍakāraṇya was in no way different from Mahārāshṭra.

Let us now consider the views of one or two scholars who have given some thought to this subject.

Bom. Gazet., Vol. I. Pt. II. p. 275, v. 19.

Ibid. p. 186.

In *J. R. A. S.*, 1894, p. 231 ff. may be seen an article by F. E. Pargiter on "The Geography of Rāma's Exile". There on pp. 241-242 he expresses the view that "Daṇḍaka...appears to have been a general name which comprised all the forests from Bundelkhand to the river Krishṇā". This is a mere expression of opinion in support of which, however, he has adduced no evidence. It is well-known that from the hermitage of Bhāradvāja near Prayāga, Rāma went to Mount Chitrakūṭa and from there traversed through the forests of Nīla, Daṇḍaka, Madhuka, Pañchavaṭī, Krauñchālaya, and so on. Of these, Chitrakūṭa is doubtless "the range of hills stretching from the river Ken to about 20 miles of Allahabad" in the district of Bāndā as has been pointed out by Pargiter¹. Bundelkhand is no doubt immediately to the south of Bāndā. The view of Pargiter that Daṇḍakāranya had spread from Bundelkhand down to the Krishṇā is thus not at all impossible, but he has not supported it with any evidence as was expected of him. This evidence certainly was not available in 1894 when he published his view. Twenty years later, however, one stone inscription and one copper-plate were published in *Ep. Ind.*, Vol. XII., which confirm the inference drawn by Pargiter. The first of these records was published by the late Rai Bahadur Hiralal and speaks of a certain prince in the following words : *Daṇḍakāranya-nikāṣa-Vastaradeśe rājyam chakāra*, 'he ruled over the country of Vastara in the vicinity of Daṇḍakāranya'². The country of Vastara referred to in this inscription is obviously the State of Bastar which is in Orissa and which is immediately to the south-east of the Central Provinces. It is thus evident

¹ *J.R.A.S.* 1894, p. 231.

² *Ep. Ind.*, Vol. XII. p. 246, ll. 6-7.

that Daṇḍakāraṇya was in close proximity with Bastar, no doubt, immediately on the west of it, as the Godāvarī flows through that part of the country. It may, however, be contended that this inscription is dated Samvat 1760=1703 A. D., and is thus of a late period. Nevertheless, the other record, which is of the tenth century at the latest, was found in the Sonpur State in Orissa and has been edited by Mr. B. C. Mazumdar. It is a charter issued from Suvarṇapura (Sonpur) by Someśvara of the Gupta family and speaks of the king as *Paśchima-Laṅkāādhipati*, 'Lord of western Laṅkā'. From this one may reasonably infer that the district round about Sonpur was in the tenth century known as Western Laṅkā. Bastar and Sonpur are both in Orissa and are conterminous with each other. This shows that the Daṇḍakāraṇya of the stone inscription and the Laṅkā of the copper-plate were not far distant one from the other. We thus have one district actually named Daṇḍakāraṇya and —another, Laṅkā, and both were comprised in the forest region. This was really the evidence which was wanting when Pargiter wrote his paper but which confirms his inference that Daṇḍakāraṇya was the name of that stretch of forest land which extended from Bundelkhand to the Kṛishṇā.

Another scholar who has made a special study of this subject is Rao Bahadur Sardar Kibe, who has contributed a thought-provoking article to the *Indian Historical Quarterly*, 1928 (p. 694 ff.), entitled *Bāṇa's Laṅkā located in Central India*. He identifies Laṅkā with Amarkantak from which the Narmadā springs. If Laṅkā was thus situated in the southern part of the Vindhya, the Godāvarī, Pañchavaṭī or Janasthāna, Kishkindhā, Pampā and so forth must have

¹ *Ibid.*, p. 240, ll.6-7; also p.230 for the remarks of Mr. Majumdar.

been either in the northern part of or to the north of the Vindhyas. But Sardar Kibe was unable to locate these places and explained away these names, not as proper names, but as common nouns. Thus he makes Rai Bahadur Hiralal responsible for the statement that Godā 'is a common name for rivers in that part of the country', i. e. in the C. P. we suppose. Then he relies upon Mr. G. Ramdas Iyar who says that in the Śabarī dialect 'Jaitan' (=Janasthāna) means a place below the mountains just as Laṅkā means 'the high mountain' and that similarly 'Daṇḍaka' means 'a place full of water'. He has not, however, explained away the term Kishkindhā; nor was he able to locate it except vaguely by saying that it was to the north of the Vindhyas. Though this line of argument may not commend itself to everybody, his conclusion is by no means worthy of rejection. Some years ago Pandit Ramkrishna Kavi published a historical drama called *Kaumudīmahotsava*. Any scholar who reads this drama will notice that most of these places which Sardar Kibe was unable to locate were situated either in the flange or to the north of the Vindhyas. The hero of this drama was Kumāra Kalyāṇavarman, who, in consequence of the evil times on which he had fallen, was hiding himself in an inaccessible place, on the Vindhyas, called Vyādha-Kishkindhā¹, near the lake Pampā² and not far from the temple of Vindhyavāsini. These places are not far distant from Mount Chitrakūṭa

¹ *Kaumudī-mahotsava*, p. 3 f. Even in the Purāṇas Kishkindhaka is said to be *Vindhya-prishthanvāsini*, dweller of a country situated on the surface of the Vindhyas (Vāyu-P., Chap. 45, vs. 122 and 134; *Mārkaṇḍeya-P.* translated by Pargiter, pp. 342 and 360).

² Compare Pampāpura which is another name of Vindhyāchala-town, five miles to the west of Mirzapur in the United Provinces, where the celebrated temple of Vindhyavāsini is situated (Nundolal Dey's *Geographical Dictionary of Ancient and Medieval India*, p. 144).

in the Bāndā District. And it was Cunningham, who, more than fifty years ago, expressed the opinion that the Godāvārī of the Rāmāyaṇa was the holy Gupta Godāvārī, or "hidden Godāvārī" which rushes forth from a cave in the hill nine miles south-south-west of Chitrakūṭa.¹ It is thus plain that the sites associated with the exile of Rāma have been pointed out as being in the neighbourhood of Chitrakūṭa in accordance with the view of Sardar Kibe though he was not able to locate them.

There is another part of India where the people say that these places connected with Rāma's exile were situated. This will be manifest to any body who has travelled in the Jodhpur State in Rājputānā. Thus six miles north of Jodhpur is Maṇḍor which was an old capital. On the outskirts of this village a place is pointed out which is called *Rāvaṇ-ki-Chauri* 'the marriage hall of Rāvaṇa'; in other words, it was the place where was staying the father of Mandodarī, wife of Rāvaṇa, after whom, they say, the village was named Maṇḍor. A rivulet flows by this hamlet, and a site on its bank is still shown where Rāma is said to have shaved his pate on receiving the news of his father's demise. If the father-in-law of Rāvaṇa stayed in Maṇḍor, Rāvaṇa himself was born, they say, at a place called Rāvaṇia after him in the Bilāḍā District of the Jodhpur State. Not far from Rāvaṇia is Chokḍi where in a small natural cavern Rāvaṇa is said to have pleased Śiva and secured from him a kingdom of fourteen *Chokḍis*. About fifty miles from Chokḍi is Kekind which is locally believed to be the Kishkindhā of the Rāmāyaṇa. And this popular belief is supported by two inscriptions, one found in a Śaiva temple and dated Sainvat 1176 and the other in a Jaina and dated

¹ A.S.I.R. Vol. XXI, pp. 11-3.

Samvat 1230, but both giving Kishkindhā as the old name of the place¹.

One point which is worthy of note in regard to the places connected with Rāma's exile is that to whatever province we go that is not far removed from the Vindhya, we find some of them located by the people there. Whether we go to the Nāsik District of Mahārāshtra, or to the Bastar and Sonpur States in Orissa, or to the Jodhpur State in Rajputana or whether we confine ourselves to the Vindhya range itself, the people there are always ready to point to the sites of Rāma's exile which are situated there. The question therefore naturally arises : where were those sites then existing originally and in reality according to the Rāmāyaṇa? It will not be possible to give any satisfactory reply to this question, unless we bear two things in mind. The first is that there were real sites bearing those names. Thus Godā (i. e. Godāvarī) cannot be understood as common noun denoting any 'river,' or Laṅkā a 'high mountain,' but they must be taken as proper nouns denoting particular objects bearing these names. The second thing that we have to remember is : where can all the principal sites be identified without doing violence to any text from the Rāmāyaṇa? The text that has proved a stumbling block to some scholars is a verse from the Kishkindhā-kāṇḍa, which says that Kishkindhā was to the north of the Vindhya range. We will consider this matter before long, but here we shall concentrate our attention on the principal sites of Rāma's exile. They are the Godāvarī, Janasthāna or Pañchavaṭī and Kishkindhā. Now, where can this Godāvarī be? Obviously, it must be the celebrated Godāvarī of South India. It cannot reasonably be the Gupta-Godāvarī,

¹ P.R.A.S. WC., 1910-11, pp. 35-8.

the small stream which issues from a cave in the hill a few miles to the south of Chitrakūṭa. First, because the Rāmāyaṇa describes this Godāvarī as a big river, and not a streamlet gurgling out of a cavern. Secondly Godāvarī cannot be the proper name of this stream. It must have been so called figuratively on account of its sacred water which is drunk by the pilgrims. The Godāvarī of the Rāmāyaṇa must therefore be either the Godāvarī of the Nasik District or the same river as it flows south-eastwards touching the confines of the Bastar State. It is scarcely necessary to repeat here that according to a stone inscription Daṇḍakāraṇya was immediately on the west of the Vastara (Bastar) province. But in this latter region they do not show any site called Janasthāna or Pañchavaṭī. Nor is there any evidence, epigraphic or otherwise, that it was in existence there formerly. On the other hand, we know not only that there was Daṇḍakāraṇya round about Nasik, but also that there was Pañchavaṭī near Nasik which is but another name of Janasthāna. Nor was this place known to exist in the span of the Vindhya where Vyādha-Kishkindhā and Pampā are mentioned in the *Kaumudī-mahotsava* as being situated.

Let us now see where Kishkindhā of the Rāmāyaṇa is to be located. There are three Kishkindhās mentioned in this connection. One is the *Vyādha-Kishkindhā* of the historic play just referred to. This is the same as the Kishkindhā of the Purāṇas. The second is Kekind of the Jodhpur State, as we have also just seen. These two Kishkindhās are obviously to the north of the Vindhya. In support of it is often quoted the following couplet:

Diśas = tasyās = tāto bhūyaḥ prasthito dakṣiṇām diśam |
Vindhya-pādapa-saṁkīrṇām chandana-druma-śobhitām ||
(*Kishkindhā-Kāṇḍa*, XLVI, 17)

It is true that this verse leaves no doubt as to the Vindhya mountain being to the south of Kishkindhā. But the question arises : where was this Vindhya mountain ? Is it the range that stretches all along the north of the river Narmadā, or is it some other mountain ? Pargiter long ago pointed out that just as there were two Mahendras, so there were two Vindhya, and that one Mahendra and one Vindhya were near the extreme south of the Peninsula¹. This agrees with the fact that Sampāti, who gives tidings of Sītā, says that when he fell from the sky on the Vindhya mountain, he looked about, and, recollecting the scenery, concluded "on the shore of the *southern ocean* this must be the Vindhya"². It is quite evident from this statement that there was one Vindhya which touched the Southern Ocean. And what we have now to do is to determine where exactly this mountain was situated. Pargiter thinks that it "must be the hills and plateau of South Maisur"³. But it is possible to propose another and more probable identification. He himself draws our attention to two passages which are important in this connection. The first is from the Rāmopākhyāna of the Mahābhārata which informs us that when the female ascetic called Prabhāvatī brought Hanūmān and his comrades out of the subterranean cavern, they saw "near them the salt sea, the Sahya, Malaya and Dardura mountains; then climbing up Malaya and seeing the sea" they became dejected.⁴ The same scene is described in the Kishkindhā-kāṇḍa of the Rāmāyaṇa where the Vindhya mountain takes the place of Sahya. Now as shown by Pargiter, whereas the Malaya denotes the Travancore

¹ *J.R.A.S.* 1894, pp. 259-61.

² *Kishkindhā-kāṇḍa*, LVIII. 7; LX. 1-4.

³ *J.R.A.S.* 1894, p.261.

⁴ *Vanaparvan*, Chap. 261, vs. 43-4.

Hills or Cardamum Mountain, the Dardura represents the Nilgiris. That part of the Sahya which is spread over South Canara, Coorg and Malabar must therefore stand for the Southern Vindhya. Rāvaṇa's Laṅkā was thus an island which could be seen from the junction near the sea, where the Malaya, Dardura and Vindhya met.

The next question that we have to consider is : where is Kishkindhā to be located ? It must be, of course, to the north of the Southern Vindhya and situated near Pampā. These conditions are fulfilled by Anegundi, on the left bank of the Tuṅgabhadra, which is 'popularly identified with the Kishkindhā of the Rāmāyaṇa'.¹ In this locality there is a tributary of the Tuṅgabhadra which is actually known as Pampā and which rises in the Ṛishyamukha mountain, eight miles from the Anegundi hills.² This Anegundi suits admirably the position of Kishkindhā indicated in the Rāmāyaṇa. But what we have now to find out is whether there is any evidence which is of an early period and which is of an epigraphic character in support of the modern tradition, in other words, whether there are any inscriptions which refer to Kishkindhā and Vālin's kingdom being situated in that region. Anegundi is no doubt situated in the Raichur District of the Hyderabad State. But it is situated at a point where this District meets the Dhārwar District of the Bombay Presidency and the Bellary District of the Madras Presidency. Now in the Dhārwar District two epigraphs have been found which are worth noticing in this discussion. The first of these was found at Ron and has been edited by J. F. Fleet. It records the grant of one Turagavedeṅga who sprang from the

Imp. Gazet., Vol. V.p. 373.

Nundolal Dey's *Geographical Dictionary of Ancient and Medieval India*, p. 144.

race of Bālin and who was "lord of Kishkindhā, a best of towns."¹ Bālin mentioned here is obviously Vālin, elder brother of Sugrīva, who was a ruler of Kishkindhā for some time. The second inscription was discovered at Sudi and has been edited by Dr. L. D. Barnett. It refers to the administration of Daḍiga who belonged to the Bappura family and ruled over the Kisukāḍ-seventy. In regard to his origin it is stated that "when Jāmadagnya (Paraśurāma) came in the course of his wanderings, in which he destroyed the Kshatriya race, there were born, from the caves of Mount Kishkindhā, certain heroes, from whom sprang the members of the Bāli race, who are ornaments of the Bappuras".² This is an unmistakable piece of evidence that even as early as the thirteenth century A. D. Kishkindhā was associated with the south-eastern part of Dhārwar and there were rulers and big personages in that region who traced their descent from Vālin, king of Kishkindhā. To sum up, the evidence furnished by Vālmiki's Rāmāyaṇa tends to show that after all Danḍakārāṇya was no other than Mahārāshṭra.

MAÑJUGHOSA

DR. BENOYTOSH BHATTACHARYA, M.A., PH.D.,

RAJARATNA, *Oriental Institute, Baroda.*

Mañjughoṣa is one of the most popular deities of the Buddhist Pantheon and is famous as the god of Learning both in India as well as in all outlying countries where Buddhism was propagated. But the term Mañjughoṣa is somewhat loosely used and in strict iconographic parlance the application of the name is somewhat indefinite¹. Mañjughoṣa is as much a generic name for all the different forms of Mañjuśrī as the term Mañjuśrī is. No less than forty-one² sādhanas in the *Sādhanaṃālā* are devoted to the worship of the different forms of Mañjuśrī. These forms give at least thirteen³ distinct varieties easily distinguishable from one another. Moreover, some of the forms emanate from the Dhyāni Buddha Amitābha, some from Akṣobhya, some from the five Dhyāni Buddhas collectively, while others are regarded as independent forms because of their not being assignable to any of the Dhyāni Buddhas. These varieties have different Mantras assigned to each and the method of worship is different in

¹ See Chapter on Mañjuśrī in B. Bhattacharyya: *Indian Buddhist Iconography*, pp. 17ff.

² *Sādhanaṃālā*, Vol. I in the Gaekwad's Oriental Series, *Sādhana* Nos. 44-84.

³ In the *Buddhist Iconography* the number is mentioned as fourteen which is incorrect. The form named as Mañjunātha should be abandoned, as it is imaginary.

different cases. All these forms are put either under the head of Mañjughoṣa or Mañjuśrī, both being generic names. Here an endeavour will be made to find out the specific names that may be assigned to the different forms of the deity.

Mañjuśrī or Mañjughoṣa is one of the earliest deities to enter the Buddhist Pantheon. It is believed that the earliest Saṅgīti to introduce the worship, Maṇḍala and Mudrās of Mañjuśrī is the *Mañjuśrīmūlakaḥ*, an edition of which has been published in the Trivandrum Sanskrit Series. This work enjoyed a great popularity in Tibet and was also translated into Chinese. When the smaller recension of the *Amitāyus Sūtra* or the *Sukhāvatī Vyūha* was composed, the worship of Mañjuśrī was a settled fact, as his name appears in this work.¹ It may be surmised therefore that the *Mañjuśrīmūlakaḥ* where Mañjuśrī is first introduced must have been composed before the smaller recension of the *Amitāyus Sūtra* was written. The time of the composition of the latter work can be determined by the fact that the work was translated into Chinese between A. D. 384 and 417.² Moreover, the *Guhyasamāja Tantra* which is believed by the Nepalese Buddhists to be the earliest Tāntric work of the Buddhists and which must have been contemporaneous with Asaṅga, the elder brother of Vasubandhu, (280-360 A. D.) mentions the name of Mañjuśrī.³ Under the circumstances we may place the composition of the *Mañjuśrīmūlakaḥ* and the introduction of the deity Mañjuśrī somewhere in A. D. 200 before the *Guhyasamāja*

¹ *Sukhāvatīvyūha* ed. F. Max Müller in the *Anecdota Oxoniensia* p. 92, App. II.

² *Ibid.* Introduction, p. iii, not 4 (1).

³ This work is published in the Gaekwad's Oriental Series. For its antiquity and probable date see *Sādhana* Vol. II, Introduction pp. xxviii, xxxvff.

was delivered to an Assembly of the Faithful. Just as the *Guṇakāraṇḍavyūha* extols the virtues of the Bodhisattva Avalokiteśvara, the *Gaṇḍavyūha* likewise extols the virtues and powers of Mañjuśrī. This work is in 1400 Granthas and was taken to China in the seventh century and was translated into the Chinese language by Amoghavajra during the reign of the Tang Dynasty.¹ After the fourth century Mañjuśrī is mentioned in many Sanskrit Buddhist works and in the accounts of the Chinese travellers Fa-hien, Yuan Chwang, and I-Tsing. Images of Mañjuśrī are not to be found in the Gandhara or the Mathura schools, but they become abundant in the sculptures of Sāranāth, Magadha, Bengal, Java, Nepal and other places showing that the deity immediately after his introduction became extremely popular as the God of Learning in the Pantheon of the Northern Buddhists. The place assigned to Mañjuśrī is one of the very highest and he was considered always as a powerful rival of the most popular Bodhisattva of the Buddhists, the all-compassionate Bodhisattva Avalokiteśvara.

Many details about Mañjuśrī are met with in the *Svayambhū Purāṇa*² which deals with the glories of the Svayambhū Kṣettra in Nepal, popularly known as Simbhu. According to the *Svayambhū Purāṇa*, the Ādi Buddha manifested himself here in the shape of a flame of fire and for that reason the place was known as the Svayambhūkṣettra or the 'place of the Self-born Lord'. It is further said in the same work that Mañjuśrī hailed from China where he was living on mount Pañcaśīrṣa;

¹ Raja Rajendra Lal Mittra: Sanskrit Buddhist Literature of Nepal p.90.

² An account of the story recorded in the *Svayambhū Purāṇa* with many details will be found in R. Mittra: Sanskrit Buddhist Literature, pp. 249-358; Hodgson's Essays, pp. 115ff and Oldfield: Sketches from Nepal, Vol. II, pp. 185ff.

he was a great saint with a good number of disciples including the king of China, Dharmākara by name. One day Mañjuśrī received divine intimation that Ādi Buddha had manifested himself on a lotus rising from the lake Kālihrada in Nepal. Mañjuśrī forthwith decided to repair to Nepal to pay homage to the self-born Lord and was accompanied by large number of disciples, his two wives and king Dharmākara. But when he reached the lake he found the deity inaccessible being surrounded by a vast expanse of water. With great difficulty he approached the flame of fire and paid his homage alone. Then in order to make the god inaccessible to all he circumambulated the lake and finally with his sword cleft asunder the southern barrier of hills and the water rushed through that opening, leaving a vast stretch of land behind which is known as the Nepal Valley. Through that opening the water of the river Baghmatī still flows and the opening is known as Koṭ-bār or sword cut.

Mañjuśrī lost no time in erecting a temple over the sacred fire in order to consecrate it and very near to the temple on a hillock he made his own habitation. This is still pointed out by the priests of Nepal as the Sarasvatīsthāna. On the same hill he made a Vihāra (still known as Mañjupattana) for his disciples. Lastly he made Dharmākara the king of Nepal. These and many other pious deeds are ascribed to Mañjuśrī in the *Scayambhū Purāṇa*. Putting everything to order Mañjuśrī returned home and soon obtained the divine form of a Bodhisattva leaving his mundane body behind.

From the legendary account given in the *Scayambhū Purāṇa* it is difficult to ascertain the character of the deity Mañjuśrī as the account, to say the least, is shrouded in mystery. The account is, however, clear in giving

the deity a definitely human origin, his popularity being due to the fact that probably he colonized the valley of Nepal after making the place habitable by his excellent engineering skill by which the water could be drained off the valley.

Mañjuśrī is chiefly worshipped as the god of Learning and Knowledge, though he is worshipped also in all rites included in the Tantra; for bewitching, killing enemies, destroying houses, and so forth. Like the Mantra of Prajñāpāramitā, the female prototype of the god of Knowledge, the Mantra of Mañjuśrī is said to be most powerful inasmuch as it is able to confer mysteriously such rare qualities as perfect wisdom, retentive memory, intelligence, eloquence and the knowledge of all varieties of sciences without ever reading them.

As it has been said already, Mañjughoṣa or Mañjuśrī has as many as thirteen distinct forms, and to each of these a large number of sādhanas are assigned in the *Sādhana-mālā*. It is a well known fact in Buddhist Iconography that all Bodhisattvas emanate from one or the other of the Dhyāni Buddhas, and these emanations, in order to show their origin, hold on their crown a miniature figure of the parental Dhyāni Buddha. But with regard to Mañjuśrī the case is otherwise: some considered that Mañjuśrī is an emanation of Amitābha, others thought him to be an emanation of Akṣobhya or of the five Dhyāni Buddhas collectively, while in some Sādhana he is not connected with any Dhyāni Buddha at all. The reason for this apparent anomaly is not far to seek. The Dhyāni Buddha scheme first originated with the *Gaḥyasamāja* which is decidedly later than the *Mañjuśrī-mūlakalpa*, and Mañjuśrī being a much older deity his precise position in the pantheon of the Northern Buddhists could not be ascertained correctly.

The different cults associated Mañjuśrī with the Dhyāni Buddha of their choice, and thus the idea of the parental Dhyāni Buddha in case of Mañjuśrī became entirely confused.

Among the different forms of Mañjuśrī the following thirteen distinct types can be recognised and it is necessary that the types¹ should be properly described and distinguished:

1. *Vajrarāga Mañjuśrī*, also known as *Dharma-saṅkhasamādhi*, *Vāk* and *Amitābha Mañjuśrī*. This form is simple; it is one-faced and two-armed, and it emanates from the Dhyāni Buddha *Amitābha*. Like his sire *Amitābha*, *Vajrarāga* has his two hands joined on the lap in forming what is called the *Samādhi* or the meditative *Mudrā*. He can be distinguished from *Amitābha* only by his *Bodhisattva* ornaments which are absent in the case of *Amitābha* as he is a Dhyāni Buddha. Images of this deity are very rare and the only one that is known is preserved in the Museum and Picture Gallery at Baroda.

2. *Dharmadhātva Vāgīśvara* is another form of Mañjuśrī which emanates from the Dhyāni Buddha *Amitābha*. He is described as white in colour with four faces and eight arms, generally holding in the first pair of hands the bow and the arrow, in the second the noose and the goad, in the third the book and the sword and in the fourth the *Ghaṇṭā* and the *Vajra*. Sometimes he is represented with slight modifications with regard to the weapons held in his first and second pair of hands.

3. *Mañjughoṣa*, the third form of Mañjuśrī, is described as seated on a lion and as one-faced and

¹ See also *Indian Buddhist Iconography*, pp. 18ff and the corresponding *Sādhanas* in the *Sādhanaṁālā*, Vol. I.

two-armed, showing in the two hands the Vyākhyāna or the Dharmacakra Mudrā against the breast. He is decked in all Bodhisattva ornaments, is golden in colour and towards his left rises a lotus; he wears on his crown the miniature figure of his sire, Akṣobhya.

4. *Siddhaikarīra*, the fourth form of Mañjuśrī, is generally represented in either a sitting or standing posture. He is one-faced and two-armed, exhibiting in his two hands the gift-bestowing attitude in the right and the blue lotus in the left. He is either red or white.

5. *Vajrāṇaga*, the fifth form of Mañjuśrī is practically regarded in the Buddhist Pantheon as the God of Love, a prototype of Hindu Madana, who is worshipped in amorous Tantric rites. He is represented generally as yellow in colour, one-faced and six-armed. In the first or the principal pair of hands he draws to the full the bow of flowers charged with an arrow of red lotus; in the second the sword and the lotus; and in the third the mirror and the Aśoka bough. He also has the figure of Akṣobhya on the crown and stands in the Pratyālīḍha attitude or in the archer's pose. Vajrāṇaga is sometimes described as four-armed in which case the hands carrying the mirror and the Aśoka bough are dropped.

6. *Nāmasaṅgīti Mañjuśrī*, the sixth form, is described as three-faced and four-armed, the first pair of hands carries the bow and the arrow, while in the second there are the book and the sword—the two most important symbols of Mañjuśrī. He also shows the miniature figure of his parental Dhyāni Buddha, Akṣobhya, on his crown.

7. *Vāgīśvara*, the seventh form of Mañjuśrī, is generally described as of red or yellow complexion

and seated in the Ardhaparyāṅka attitude on a lion. He carries an Utpala or the blue lotus in the left hand, while the right is displayed in an artistic manner.

8. *Mañjuvara*, the eighth form, is described in the *Sādhanamālā* in several Sādhana and his images are widely represented in several schools of art. He is usually yellow in complexion, seated on a lion in the Lalita or the Ardhaparyāṅka attitude. He is described as one-faced and two-armed, and as showing the Dharmacakra Mudrā. Under one or both armpits are seen lotuses over which are placed the Prajñāpāramitā scripture in the form of a book.

9. *Mañjurāja*, the ninth form of Mañjuśrī, is very rarely represented, but this form is well described in the *Sādhanamālā*. There he is represented as of red complexion with three faces and six hands. The two principal hands are engaged in embracing his female counterpart (Śakti) with one hand touching her chin. The remaining four hands carry the sword, the arrow, the bow and the blue lotus.

10. *Mañjukumāra*, another form of Mañjuśrī, is also described in the *Sādhanamālā* though his images or paintings have not yet been found anywhere. He is, however, described as of red colour with three faces and six arms and as seated on *Saltraparyāṅka*.¹ In the three left hands he carries the Prajñāpāramitā, the Utpala and the bow, while the three right show the sword, the arrow and the gift-bestowing attitude.

11. *Arapacana*, the eleventh form of Mañjuśrī, is so called because he and his companions Keśinī,

¹ There is a considerable controversy regarding the correct interpretation of this term. The term evidently means 'an animal seat', but sometimes it is a mere sitting posture. In the latter case the term may signify a reclining attitude.

Upakeśinī, Candraprabha and Sūryaprabha take their origin from the five letters in the word Arapacana.¹ He is described in a large number of Sādhana in the *Sādhana-mālā* and images are found in large numbers in the different schools of art including those of Java and Nepal. He is represented as of white or red complexion and as seated on an adamantine seat (Vajraparyāṅka) in the meditative attitude with the legs crossed and the soles of both feet turned upwards. He carries the book against the breast in the left hand, while the right brandishes the sword. He is accompanied by his four attendants named above, who are represented in exactly the same way as the principal deity Arapacana. When actually represented in stone or metal the companions take the miniature form or the replica of the original deity.

12. *Śthiracakra*, the twelfth form of Mañjuśrī is described in only one Sādhana in the *Sādhana-mālā* and is very rarely represented. The only figure representing this deity is in the Museum of the Vaṅgīya Sāhitya Pariṣad of Calcutta. He is described as of white complexion with one face and two hands. The left hand shows the sword while the right exhibits the gift-bestowing attitude. He is accompanied by his female counterpart or the Śakti, who is beautiful in appearance and displays the sentiment of passionate love with her face covered with smiles.

13. *Tāḍirāt*, the thirteenth form of Mañjuśrī, is also described in only one Sādhana in the *Sādhana-mālā*, and his images are also very rarely met with. He is

¹ Cf. *Sādhana-mālā*, Vol. I, p. 118, from which extracts are given below: Śubhrākāra-niṣpaṇṇam Arapacanākhyam - tasya parataḥ śukla-Rephodbhava-Jālinīprabham... tadanu pṛṣṭhataḥ, sita-Pākāra-niṣpaṇṇam Candraprabham... tato dakṣiṇe śubhra-Cakāranīṣpaṇṇam Keśinīm... evam uttareṇa śubhra-Nakāranīṣpaṇṇam Upakeśinīm.

described as seated on a tiger in the Ardhaparyāṅka attitude. He wears all the Bodhisattva ornaments and is one-faced and two-armed, the two hands showing the Vyākhyāna Mudrā against the breast.

The above list exhausts all the different forms of Mañjuśrī so far known from literature.

SPACE, TIME AND BRAHMA

UMESH CHANDRA BHATTACHARJEE, M. A., *Professor*

of Philosophy, Presidency College, Calcutta.

The problem of time and eternity does not appear to have attracted the same degree of attention in Indian thought as in western Philosophy. In some of the recent Philosophies of the west, the problem of space and time in general and of time in particular has acquired a distinctive significance. Among the Indian systems, the Vaiśeṣika looks upon space and time as ultimate and objective realities. They are real objectively in the same sense and in the same manner as earth, water, fire and air (Vaiśeṣika-Sūtra i. 1. 5). In a corresponding *sūtra*, the Nyāya enumerates space among the elements (Nyāyasūtra i. 1. 13). Time is not included in this list; but in view of the close relation that admittedly existed between the two systems, the view of the Vaiśeṣika in this matter was obviously the view of the Nyāya also.¹

We are here taking space for आकाश and time for काल. So far as काल is concerned, there can be no doubt that it means time. Of आकाश, however, the essential attribute, according to Indian thought, is sound which, according to modern Physics, is conveyed by air. But this is only a matter of detail; and inspite of this defect in the theory, it is clear that the Indian Thinkers used the word आकाश for what we call space.

¹ Cf. Annambhaatta's *Tarka Saṃgraha* (3).

The view that the Nyāya-Vaiśeṣika put forward about the nature of space and time is after all the ordinary man's view. The man of common sense regards the world as *in* space and *in* time. And according to this way of thinking, space and time are more real and more fundamental than anything else. The Nyāya-Vaiśeṣika also affirms that space and time are substances (द्रव्य). And, so far as earth or air etc. are also substances, they also belong to the same category (पदार्थ) as space and time. Yet it is obvious to common sense that earth, water or air exist in and occupy space, and all changes belonging to them constitute a succession in time; and in that sense and to that extent, they are in space and in time. There is one substance, e.g. the soul, which strictly speaking, does not exist in space; but even it lives in time.

For common sense, therefore, the world is in space and time. Space contains the extended material things. And the changes that take place in the world constitute a temporal series. In space, the elements of the world co-exist; in time, we have a succession-series. This is how the world constitutes a spatio-temporal series.

But this idea of space and time as vacant containers which are filled by contents from outside, into the constitution of which they do not enter, is open to serious objection. We cannot really think of matter away from its space-quality or extendedness. Space as the empty container, therefore, is at best an abstraction. In the same way time as the empty possibility of succession is also an abstraction.

The difficulty of conceiving space and time as objectively real and at the same time different from the contents of the world led Kant and his followers to hold that both space and time were only subjectively

real. They were forms of perception—forms which the mind supplied from within. The things-in-themselves as they existed outside the mind, we did not and could not know. But when they acted on the mind and the mind came in contact with them, the mind perceived them as here and now or there and then. Space and time, according to this way of thinking, are quite different from what popular thought takes them to be.

As distinguished from these two views about time and space, we have in Bergson and Alexander a third and profoundly interesting view. With them space and time are not otherwise empty containers, which are filled by things and events into the constitution of which they do not enter. Nor are they mere subjective forms of knowledge. They are real objectively—and what is more, they are the essence of other existences.

With Bergson, time is a force—a force that creates and transforms. It is the stuff things even minds—are made of. We ordinarily think that there is an ego which has the psychic states. “But, as regards the psychical life unfolding beneath the symbols which conceal it, we readily perceive that time is just the stuff it is made of”¹. And properly understood, material objects also will be found to be made of the same stuff. “The world the mathematician deals with is a world that dies and is reborn at every instant,—the world which Descartes was thinking of when he spoke of continued creation.”²

Again, elsewhere: “If succession, in so far as distinct from mere juxtaposition, has no real efficacy, if time is not a kind of force, why does the universe unfold its successive states with a velocity which, in

¹ Creative Evolution Mitchell's translation, p. 4.

² *Ibid.* p. 23.

regard to my consciousness, is a veritable absolute? Why this particular velocity rather than any other? Why not with an infinite velocity? Why, in other words, is not everything given at once, as on the film of the cinematograph? The more I consider this point, the more it seems to me that, if the future is bound to *succeed* the present instead of being given alongside of it, it is because the future is not altogether determined at the present moment, and that if the time taken up by this succession is something other than a number, if it has for the consciousness that is installed in it absolute value and reality, it is because there is unceasingly being created in it, not indeed in any such artificially isolated system as a glass of sugared water, but in the concrete whole of which every such system forms part, something unforeseeable and new.”¹.

Time is thus the stuff psychical life is made of. It is also the stuff of so-called material things. It is indeed the very essence of the universe. “The flux of time is the reality itself, and the things which we study are the things which flow. It is true that of this flowing reality we are limited to taking instantaneous views. But just because of this, scientific knowledge must appeal to another knowledge to complete it”². To the ancient mind, change and becoming were a degradation of eternity, which was conceived as changeless and motionless. But “we should come to see in time a progressive growth of the absolute, and in the evolution of things a continual invention of forms ever new.”³.

Now, if time is thus the essence of reality, what about space? “The more consciousness is intellectualised, the more is matter spatialised” (p. 199). Kant showed

¹ *Ibid.* pp. 358-359.

² *Ibid.* p. 363.

³ *Ibid.* p. 364.

space to be a form of intuition : Bergson would accept in a general way the same conclusion about it, with this difference that, according to him, "the mind finds space in things, but could have got it without them if it had imagination strong enough to push the inversion of its own natural movement to the end" (p. 213). Again, we are told that the idea that mind forms of pure space 'is only the *schema* of the limit' at which the movement of mind down the incline of matter would end. And he tells us elsewhere (p. 218) that 'as regards space, we must, by an effort of mind *sui generis*, follow the progression or rather the regression of the extra-spatial degrading itself into spatiality.' And matter, although it stretches itself out in the direction of space, 'does not completely attain it' (p.219). In other words, matter is not completely material, just as space is a degradation of something extra-spatial. And when the philosopher takes a proper perspective, " he will see the material world melt back into a simple flux, a continuity of flowing, a becoming". Put in plain language, it would appear that spatiality, materiality and intellectuality are but sediments left by the life-current which is essentially time. Space, according to Bergson, is not, therefore, as fundamental as time.

With Alexander, however, space and time are not separable entities. The element of which the world is made, is neither time nor space, but it is Space-Time. 'Space and Time are not two things but one and there is no Space without Time nor Time without Space'¹. We are also told that the relation between them is the same as between mind and body—Time being the mind of Space and space the body of Time. This Space-Time

¹ *Space, Time and Deity* Vol. II., Ch. II. p.29.

is the stuff of which all existents are composed"¹. And out of this stuff gradually emerges a whole hierarchy of qualities, including mind. And in this hierarchy of qualities, 'the next higher quality to the highest attained is deity'. And 'God is the whole universe engaged in process towards the emergence of this new quality' (p.429).

The difference between Bergson and Alexander lies in the degree of importance attached to Space. So far as Time is concerned, their views converge: both regard it as the stuff of which 'all existents are composed'. Bergson would incline to think that it is the sole stuff which constitutes the world including perhaps Space also, which can thus be explained in terms of Time; whereas with Alexander, the stuff of which the world is made, is not Time only, but Time with Space as its body.

But how does the Vedānta view Space-Time? In the Vedānta-Syamantaka of Rādhādāmodara,² we have a brief statement of what professedly is the Vaiṣṇava-Vedānta position with regard to Time. Time, we are told, is all-powerful; it regulates the course of the world; and it existed even before creation. But nevertheless it in its turn is regulated and controlled by Brahma. Nothing is said here about Space. And the account must be regarded as very scanty and elementary.

In the Gītā which is oftener than not regarded as a Vedānta book, we find expressions like 'time, the killer of the world' (xi. 32). But these expressions, which, again, have been differently interpreted, cannot be taken as the basis of a philosophical theory of time.

If we turn to the Vedānta-texts, however, or the *śrutis* of the Upaniṣads, we meet with attempts at

¹ *Ibid.* p.428.

² *Vide* my Edition, published by the Punjab Sanskrit Book Depot, (Lahore), p. 29.

constructing a philosophical theory on the subject. But the relation stated there to exist between Brahma on the one hand and Space and Time on the other is far from quite clear and definite. With regard to Time, we have texts like Brhadāraṇyaka i.2.1., i.4.1., Chāndogya vi. 2. 1, &c., which speak of Brahma as existing in the *beginning* (अग्रे), i. e., *before* creation. Literally speaking, this is equivalent to saying that He existed *in* time. Such passages abound in the Upaniṣads. That Brahma was the beginning—the Alpha of things, that He existed before the world and would continue to exist even after it is dissolved, is the leading idea about Brahma. Obviously by ascribing temporal priority to Brahma, the Upaniṣadic thinker places both Brahma and the world in a chronological chain of which Brahma is at one end and the world at the other. And we have no clear reason to think that in passages like the above, the idea was to ascribe to Brahma only *logical* priority and not chronological priority in relation to the world.

With regard to Space, however, the Upaniṣadic theory is more definite. Taittirīya ii. 1. clearly says that Space (आकाश) arose out of Brahma. It was created. Brahma, therefore, cannot be conceived as *in* Space. But Space rather is in him; it arose out of him, or, was created by him, as the first of the things in the world-series, all other things containing it as one of their ingredients.

Instead of depending on the scattered statements of the Upaniṣads, if we turn to the system of the Vedānta-sūtras, we do not fare very much better. The cruder ideas of the Upaniṣads are no doubt clarified and rendered more definite; but the problem as such does not receive a systematic and careful handling.

For, the Vedānta-sūtras could not possibly go beyond the *śrutis* of the Upaniṣads. The *sūtras* were, by profession and in reality, only an exegesis of these *śrutis*. Still, without pretending or admitting to improve these texts, the *sūtras* do, to a considerable extent, make the nascent ideas clearer and more definite than the original texts on which they are admittedly based.

In Vedānta-sūtra ii. 3-4., we have a somewhat elaborate attempt made to explain the order of creation. The chief Upaniṣadic text on which this account is based is Taitt. ii. 1., referred to above, coupled with Ch. vi. 2. The order of creation as given in Taitt. ii. 1., and as accepted by the *sūtras*, is : Space is the first to be created and it is followed by Air, Fire, Water and Earth respectively. From each preceding thing the next in order arises, not spontaneously but through the causality of Brahma. The causality of Brahma does not cease with the creation of the first of the series, but continues to be operative at each successive stage. In other words, it is not that Brahma is only the First Cause which produces Space and Space as a Secondary Cause produces Air, and so on. Though there are some passages in the Upaniṣads which would suggest such an order of causation, yet, when read with other passages equally authoritative, they can have but one meaning; and that meaning is that Brahma is the sole cause and he is the cause of everything and is also the direct cause at every stage of the creative process. This is the conclusion of the Vedānta and is embodied in *sūtra* ii. 3. 13.

According to the Vedānta, the created world, as we see it, is not premanent. It lasts for a time—and only for a time; after which it is dissolved or re-absorbed

in Brahma from whom it sprang. This dissolution also is not the final stage after which nothing happens; for the world is re-created, in exactly the same order as previously and that, again, is followed by another dissolution, and so on. In dissolution, the order is reversed (*Sūtra*, ii. 3. 11). That is, earth is first absorbed in water, water is then absorbed in fire, fire in air; and air in space, and this list is then wound up, so to say, in Brahma, who alone remains to bring the world back into existence. This process of creation and dissolution is interminable. It had no beginning either.

Taking the two ends of the world-process together—its creation and its dissolution—we find that, according to the Vedānta, there is a fixed scheme or order in which the world, as we see it, repeats itself at more or less regular intervals. It is very much like breathing—inspiration and expiration that goes on in the human organism. In fact, the simile of breathing has also been actually employed to describe the process of creation (cf. Br. U. ii. 4.).

This rhythmic cycle of creation, according to the Vedānta, as also according to the Sāṅkhya, follows a dual course of evolution. On the one hand, there is the material world—the world of sense-perception which is object to us. On the other hand, there is the inner world of the soul and its senses through which it comes into contact with the world outside. Both these inner and outer worlds have their origin in Brahma and follow a parallel course of development. The soul, of course, is uncreated; but the senses with which it functions as a self are created. And their creation is a process parallel to the creation of the world of space and matter.

Now, in this scheme of creation, in which space and matter form only one part, the other being the senses

which are presided over by appropriate deities, space cannot be all-pervasive; for, mind, obviously, with its senses, is above or beyond space. Space is only the substratum of the physical world. And so far as material things are concerned, space, according to the quintuple combination of elements (पञ्चीकरण), is an ingredient in each one of them.

But what about Time? Time does not appear to be accounted for in any way. None of the *śrutis* on which the Vedāntic theory of creation is based make any direct reference to it. It does not appear to have struck the Vedāntist as any serious problem at all. On the contrary, the conception of an endless and beginningless cycle of worlds, seems to imply that Time was regarded as uncreated and fundamental like the finite soul. Further, the statement that Brahma existed *before* the world, would also suggest the same conclusion.

Time certainly is not subjective for the Vedāntist. It is real beyond the mind. The question that we have to face, therefore, is: What exactly is the relation between Time and the world on the one hand and Time and Brahma on the other?

That the world is in time is apparent from the stages indicated of its unfolding. The essence of Time is succession and sequence. The world is a process from stage to stage, from space to air, from air to fire, and so on. And this is a succession and must be in time. Besides, not being eternal but created, the world comes into existence at a point of time. Because Brahma precedes the world, creation is an event in time. And whatever has a beginning has an end also; and so the world comes to an end—again an event in time—to be renewed at a later time. The creation, the destruction and the renewal

of the world, as also its existence, this whole series is temporal.

Alongside of this, we may consider the migration of the finite soul. Until it attains final emancipation, the soul migrates from body to body. Each birth and each death that it experiences is an event in time. The soul had no beginning; it is uncreated. But its experiences are all in time. Like the world-process, this series of experiences of the finite self also had no beginning: but unlike the world-series, it may come to an end, if emancipation is attained. When a finite soul is liberated, it is no longer in the temporal world. The nature of its existence after liberation from the bondage of this existence, is a question on which the different schools of Vedānta are divided. But on one thing they seem to be all agreed, viz., that in the condition of liberation or *mukti*, the soul is beyond the vicissitudes of this temporal world.

Now, whether any individual finite soul continues to be in this world or not, the world as such does not stop; there are other souls to be affected by it. The finite world and the finite selves in it thus live, move and have their being in time. But what about Brahma? Is he also in time? The epithets usually applied to him would suggest that he is not. According to the school of Śaṅkara, no doubt, he has no attributes. But so far as qualities can be ascribed to him, he is always and by all Vedāntists described as eternal (नित्य). And he is changeless, though the changing world is caused by him; and even though he is the ground and the material (उपादान कारण) of the universe, he does not suffer any change. Now, a being that is changeless and eternal cannot be in time. The essence of time is change and succession.

What, then, becomes of the *śrutis* which speak of Brahma as preceding the world? Precedence is a time-relation. If Brahma precedes the world and brings it into existence at a point of time, how can he be above time and eternal?

The word 'eternal' and its corresponding words in other languages also, are employed in various senses.¹ Sometimes, 'eternal' means existing for an unending extent of time; and sometimes it means timeless or above time. It is also used to mean transcending time, yet somehow including it. In which of these senses, can Brahma be regarded as eternal (or नित्य), if he is eternal at all?

Some texts of the Upaniṣads and some Vedāntist writers also would draw a distinction between two aspects of Brahma: Brahma as self-subsisting and Brahma as the cause of the world. So far as Brahma in himself is concerned, he is supposed to be devoid of all limitations and also incapable of change and alteration. And as such he is above time and eternal. But as originating the world, Brahma places himself at the further end of the time-series which is the world. Now, how far this bisection of the Brahma-idea is possible and how far this is justified by the *śruti* texts themselves, is a matter of dispute among scholars. But we may note one thing in this theory, viz., an attempt to reconcile the eternal character of Brahma with the temporal nature of the world around us. So understood, Brahma would appear to be eternal in the third sense of the term as indicated above. Brahma would then be above time and yet would *somehow* be including in it himself. This *somehow* would no doubt be a great mystery. And it was perhaps, among other causes, a recognition

¹ Cf. Pringle-Pattison, *The Idea of God*, p. 343.

of this element of mystery in the relation between Brahma and the finite world that led to the theory of Inscrutable Difference-non-difference (अचिन्त्य भेदाभेद).

But whether such a distinction between the twofold character of Brahma--and eventually a distinction between Brahma and the world--is admissible or not is itself a question. According to the extreme wing Vedāntists who refuse to admit any ultimate difference between Brahma and the world, the only conclusion that is logically possible is the denial of the reality of the world of time and space. *Māyā* or illusion would then account for both time and space as also of the rest of the world. In that case, Brahma would be simply timeless.

But the fact of the world cannot be dismissed with ease. Besides, the conception of the soul's migration (संसार) is there. This presses upon the mind the need for recognising time as a fact. And so far as Brahma as the sole cause of the world sustains this beginningless time-series, he must be conceived as existing for *all* time: i.e., he is eternal in the sense that he is existing for a boundless extent of time.

The Vedānta has not made any definite choice regarding the sense in which Brahma is eternal. With regard to Space, the Vedāntist's position is clearly and unambiguously enunciated in the *sūtras*. Not so with regard to Time. The conclusion to which, however, the Vedānta tends may briefly be indicated as follows.

Brahma is above Time and Space. Space is created by him and has the degree of reality that belongs to other created things. It forms the substratum of the physical world. It enters into the composition of all other material things according to the principle of quintuple combination. The gross elements, space, air,

fire, water and earth, are but compounds containing one-half corresponding pure (subtle) element, another half being made up of one-eighth fraction of each of the other (pure) elements. That is, one unit of gross space is equal to one-half pure space *plus* one-eighth of pure air *plus* one-eighth of pure fire, *plus* one-eighth of pure water and one-eighth of pure earth. The same is true of each one of the other gross elements also. This is called quintuple combination (पञ्चीकरण), because, in the composition of each element, all the five elements enter. And, as all things are but modifications of these five elements, all these elements are found in each one of them. Necessarily, space also enters into the constitution of each one of them, barring of course the spiritual things.

But time does not enter into the composition of these elements or of any other thing of the world. On the contrary, the whole world of which space is an ingredient is a process *in* time. And the temporal order of the world with space as an ingredient in it is in Brahma. Brahma transcends time and yet somehow includes it.

We do not pause to criticise this position. But there is one thing which may be noted in passing. If the Vedānta does not give a quite satisfactory and up-to-date account of Time, it was perhaps due to the fact that, unlike space which was an element (भूत) and, therefore, a substance in character, Time was regarded as *un*-substantial. Whatever its real nature may have been, the fact that it was not believed to enter into the composition of physical things nor did it affect the existence of Brahma, would incline one to think that it was either subjective or illusory. But for this conclusion also we have no definite warrant.

In Bergson, Time is the very stuff of which the world is made. It is also the force that makes the world. And in Alexander, Time with its body, Space, is the whole of reality in its beginning; we say *in its beginning*, because reality is not static; it grows and grows from less to more. Both according to Bergson and Alexander, new forms and new qualities are emerging out of this original reality. But what about a God, or highest spiritual reality? That, according to Alexander is yet to come. "Deity is a *nisus* and not an accomplishment".¹

According to the Vedānta, Brahma is not only the first but also the highest reality. According to Alexander, the first and ultimate reality is Space-Time, out of which eventually the quality of deity will emerge. For the Vedānta, Brahma is the beginning and the end of the world—its Alpha and its Omega. But according to Alexander, Brahma, if that name could stand for the highest reality, would only be the unattained end of the world—its Omega, but not its beginning which was only Space-Time. Brahma may eventually emerge out of this original Space-Time, but he was yet to emerge. For the Vedānta, however, Brahma is all; he subsumes Space and Time. He alone is really real. The rest is his attribute or his creation and cannot claim a prior reality.

CATUṢKOTI

MAHĀMAHOPADHYĀYA PANDIT VIDHUSHEKHARA

BHATTACHARYA,

Asutosh Professor of Sanskrit, Calcutta University.

In Buddhism there are two middle-paths (*majjhimā paṭipadā--madhyamā pratipad*) and both of them are expounded by the Blessed One himself. The first of them is the Noble Eightfold Way (*Arya āṣṭāṅgika mārga*) which avoids the two *antas* or *kolis*, extremities of excessive attachment to worldly enjoyments and to extreme self-mortification. And the second is the one that avoids the opposite views, such as *asti, nāsti; nitya, anitya; ātman, anātman; sukha, dukkha; sūnya, asūnya* etc. Of the latter, Nāgārjuna says in his *Mūla-madhyamaka-kārikā* XV, 7:

kātyāyanāvavāde ca asti nāstīti cobhayam |

pratiśiddham bhagavatā bhāvābhāvavibhāvinā ||

“In the discourse to Kātyāyana, the Blessed One having thoroughly thought over existence and non-existence, has denied both, ‘it exists’ and ‘it does not exist’.”

This is based on the following or similar texts: *astīti kāśyapa ayam eko'ntaḥ, nāstīty ayam dvitīyo'ntaḥ. yad anayoḥ dvayor antayor madhyam iyam ucyate kāśyapa madhyamā pratipadā bhūtapratyavekṣā. Kāśyapaparivarta*, ed. Staël Holstein, §. 60, see also §§ 52-59.

“‘It exists’, this is, O Kāśyapa, one *anta*; ‘It does not exist’, this is the other *anta*. That which is the middle of those two *antas* is the Middle Path by which is reached true understanding of facts”.

The Pali text runs :

Sabbam atthīti kho kaccāyana, ‘ayam eko anto, sabbam natthīti ayam dutiyo anto, ete te kaccāyana

ubho ante anupagamma majjhimena tathāgato dhammaṃ deseti. *Saṃyutta Nikāya*, II, 17.

“ ‘All exists’, this, O Kaccāyana, is one *anta*, ‘All does not exist’, this, O Kaccāyana, is the other *anta*. But the Tathāgata having accepted neither of them instructs the truth by the mean.”

Because the doctrine systematised by Nāgārjuna is based on this second Middle Path it is called *mādhyamaka* and its followers are named thereafter *mādhyamikas*.

Nāgārjuna says about these two *antas* in his *Mūlamadhyamakakārikā* (V. 8.):

astitvaṃ ye tu paśyanti
nāstitvaṃ cālpabuddhayaḥ ।
bhāvānāṃ te na paśyanti
draṣṭvyopaśamaṃ śivam ॥

“Those unwise who see the existence and non-existence of things do not see the cessation of the visibles which is blissful.”

There is a work called *Jñānasāra Samuccaya*. Its original Sanskrit has not yet been found. But there is a Tibetan translation in Tanjur Mdo, Tsha; Cordier, III p. 297. It is called there: *Ye śes sñiṃ po kum las btus pa*.

The original work is attributed to Āryadeva. The following couplet (no. 28) occurs in it:

yod min med min yod med min ।
gñis k'i bdag ñid kyañ min pas ।
mtha' bži las grol dbu ma pa ।
mkhas pa rnams kyi[s] de kho n'o ॥

Its Sanskrit runs as follows:—

na sañ nāsan na sadasan
na cāpy anubhayātmakam ।

catuṣkoṭivinirmuktaṃ
tattvaṃ mādhyamikā viduḥ ||

"The Mādhyamikas know that the truth is free from the following four *antas* : (i) existent, (ii) non-existent (iii) both and (iv) not both".¹

This is widely quoted in Buddhist and non-Buddhist works alike.

Instead of the two *antas* owing to which we have the name *madhyama* or *madhyamaka*, here are four *antas*. This very fact shows that originally only two *antas* were considered, and the other two were gradually added. This is quite natural.

This idea of denial of two opposite *antas* of which *asti* and *nāsti* or *sad* and *asat* are well-known and the most important, has found its first expression in the *nāsad-āsīya sūkta* of the Rīgveda (X. 129.1) which begins with

nāsad āsīn no sād āsīt tadānīm

"There was neither the non-existent nor the existent then."

Compare also the following in the same hymn (2):

nā mrtyūr āsīd, amṛtaṃ nā tārhi.

"There was neither death nor immortality then."

Naturally it is then found in the Upaniṣads. For instance, we read in the *Śvetāśvatara Up.* IV 18:

na san r t cāsañ chiva eva kevalaḥ

"Neither existent nor non-existent, only Śiva alone."²
The following occurs in the *Bhagavadgītā* XIII, 12:

na sat tan nāsad ucyate

¹ Cf. *Māṇḍūkya-kārikā* VI, 83 :

asti nāsty asti-nāstīti
nāst' nāstīti vā punaḥ.

² *Tripitavibhūtimahānārāyaṇopaniṣad* (a minor Upaniṣad) in the *One Hundred and Eight Upaniṣads*, Nirṇayasāgara, 1917, p. 308:

tvam eva sad-asad-vilakṣaṇaḥ

"Only you are different from existent and non-existent."

“He is called neither existent nor non-existent.”

In Buddhism, in the canonical works themselves, we come across the two *antas* mainly:

astīti nāstīti ubho'pi antā
 śuddhi aśuddhīti ime'pi antā |
 tasmād ubhe anta vivarjayitvā
 madhye'pi sthānaṃ na karoti paṇḍitaḥ ||¹

“Both ‘it exists’ and ‘it does not exist’ are *antas*. Purity and impurity—these are also *antas*. Therefore, having abandoned both, a wise man does not stand even in the middle.”

astīti nāstīti vivāda eṣa
 śuddhī aśuddhīti ayam vivādaḥ |
 vivādaprāptyā na dukhaṃ praśāmyate
 avivādaprāptyā ca dukhaṃ nirudhyate ||

“‘It exists’ and ‘it does not exist’ this is a dispute. Purity and impurity this is (also) a dispute. Owing to the approach of a dispute sorrow does not cease, but it is suppressed on account of non-approach of a dispute.”

Here there is a fact to be noted. In the first of the two *kārikās* cited above, it is said that a wise man does not stand even on the middle of two *antas* or extremities. It implies that the middle of the two *antas* is not to be regarded as an *anta*. Yet, Maitreyanātha, the first ācārya of the Yogācāra School, appears to have regarded it as an *anta*, for one of his most important works is named *Madhyāntaribhāga*². It is

¹ This and the following stanza are from *Samādhirājasūtra*, Calcutta, p. 30, and are quoted in the *Madhyamakavyūṭi*, p. 135.

² This is translated into Tibetan and Chinese. The Sanskrit original is not yet found. There is a *bhāṣya* on it by the great Vasubandhu and Sthīramati has written a *ṭīkā* on the *bhāṣya*. These two works are translated into Tibetan. From Nepal only a mutilated Ms. of the *ṭīkā* in Sanskrit was secured and it is now being edited comparing with the materials from the Tibetan sources by the present writer jointly with Prof. G. Tucci. The first chapter is already out. In this *ṭīkā* Maitreyanātha's original Sanskrit *Kārikās* are being restored.

to be noted that, like the Mādhyamikas, the Yogācāras, too, are the followers of the Middle Path, though they are not called thereafter¹.

The consideration of the three *antās* came in gradually. And the following passages from the Brahmanical works (*Minor Upaniṣads*) may be cited in this connection:

na san nāsan na sadasat.

Mahopaniṣad, loc. cit., p. 372.

“Not existent, not non-existent, nor existent-and-non-existent.”

na san nāsan na sadasad,

bhinnābhinnam na cobhayam.

Parabrahmopaniṣad, op. cit., p. 457.

“Not existent, not non-existent, nor existent-and-non-existent. Not different, not non-different, nor both of them.”

As regards the Buddhist works we may quote the following :

vilagnadrṣṭigahaneṣu nityam

astiti nāstiti tathāsti nāsti

Saddharmapuṇḍarīka, II, 65 (p. 48).

“They are always entangled in the thickets of theories: ‘it exists’, ‘it does not exist’ and ‘it exists-and-does-not-exist.’ ”

asan na jāyate loko na san na sadasan kvacit |
pratyayaibḥ kāraṇaiś cāpi yathā bālair vikalpyate ||
na san nāsan na sadasad yadā lokam prāpsyati |
tadā vyāvartate cittam nairātmyam cādhigacchati ||

Laṅkāvatāra, ed. Nanjio, 1923, p. 156.

“As the foolish imagine, the world, owing to cause and conditions, comes into being not as existent, not as non-existent nor as existent-and-non-existent.

¹ See *Madhyamakavṛtti*, p. 274 ; Poussin, *Indian Historical Quarterly*, Vol. IV. p. 164.

When one sees the world as not existent, not non-existent, nor existent-and-non-existent, one's mind turns back and one understands what *nairātmya* is."

The following *kārikā* is by Nāgārjuna:

na sann utpadyate bhāvo nāpy asan sadasan na ca 1
na svato nāpi parato na dvābhyām jāyate katham 11

Lokāṭīṣṭaka, 13; *Acintyastava*, 9.

"A thing that comes into being is not existent, nor non-existent, nor existent-and-non-existent, and it comes into being not from itself, nor from the other, nor from both of them. How does it then come into being?"

Āryadeva, a staunch follower of Nāgārjuna, writes:

sad asat-sa-l-asae cāpi yasya pakṣo na vidyate 1
upāmbhaś cireṇāpi tasya vaktum na śakyate 11

Catuhśataka, XII, 25.

"Even within a long time one cannot find fault with the man who does not subscribe to any one of the following views: 'existent,' 'non-existent' and 'existent-and-non-existent'."

It must be noted that it does not follow from what is shown above from the *Laṅkāratara*, Nāgārjuna and Āryadeva, that during their time the theory of four *antas* did not arise: for all these are often referred to by each of them. As regards the *Laṅkāratara*, we find there (pp. 122, 152.) the very word *catuṣkoṭika* used several times in the sense of the method related to the *catuṣkoṭi* 'four *koṭis* = *antas* = extremities'.

As for Nāgārjuna and Āryadeva, readers are referred, among many others, to *Mūlamanvāṇakakārikā*, XXII, 11, *Catuhśataka*, VIII. 20. XIV, 21.

It follows, therefore, from the above that though the theory of the three as well as of the four *antas* was fully developed during their time, they used to employ either of

1 See *Mūlamanvāṇakakārikā*, 17; VIII. 20 with 9.

them, the theory of the two *antas* having always occupied the first place.

We have seen that the theory of the two *kotīs* or *antas* originated first in the Veda, and the Buddha accepted it afterwards. As regards the theory of the four *kotīs*, its real author is neither he nor his followers, but of the very well-known six heretic teachers, Śaṅkya Velaṭṭhiputta, as is evident from the *Brahmajālasutta* (41). Both Buddhism and Jainism were much influenced by the views held by Śaṅkya Velaṭṭhiputta.

The *syādrāda* or *saptabhaṅgī* theory of Jainism seems to have had originally two *antas* or *bhaṅgas*, *asli* and *nāśli*, the remaining five *antas* having been developed afterwards. In regard to the above two *antas* dealt with in Buddhism and Jainism, it is to be noted that while Jainism proceeds with the aspect of affirmation of both the *antas*, Buddhism concerns itself only with that of negation. And there lies the difference between them.

PHILOSOPHY OF THE TANTRAS

LATE DR. PRABHATCHANDRA CHAKRAVARTI M.A., P.R.S., PH.D.,

Late Asutosh Professor of Sanskrit, Calcutta University.

This is an attempt to show how intimately Tāntric religion is connected with that of the Vedas and how particularly the philosophical and mystical speculations of the *Tantras* rest upon the solid foundation of the Upaniṣads. The expression 'Philosophy of the *Tantras*' has its sufficient justification. We can really pride ourselves on possessing a popular system of philosophy developed by the *Tantras* on the lofty and sublime model of Advaitism. The *Tantras* have not only set forth a widespread religion but have contributed a scheme of religious discipline that runs parallel to the speculative philosophy of the Upaniṣads. The philosophy of the *Tantras* is a system of thought which forms the metaphysical background of the Tantric religion, and is a genuine expression of the mind seized with religious fervour and longing for liberation from the bondage of *saṃsāra*. In India, as in other ancient lands, philosophy got mingled to a great extent with theology; and every religious faith in India has to its credit a system of philosophy with its particular tenets and doctrines.

The *Tantras* in their items of faith did not make any noteworthy departure from the well-marked track of the Vedic religion, nor did they speculate anything about life and its final motive that goes

directly against the teaching of the Vedas. The influence of *Brahmaridyā* over the entire fabric of Tāntric worship is exceedingly clear. So far as the religious ideal is concerned, the *Tantras* have scrupulously followed in the wake of the Vedas¹. The performance of many Tāntric rites is accompanied by the recitation of the Vedic hymns, and a large number of Vedic rites has been incorporated into the practical side of the Tāntric religion. In short, the whole range of Tāntric religion teems with Vedic rituals. Apart from theological considerations, the *Tantras* have another aspect which one cannot pass over without being conscious of its profundity. Although the *Tantras* generally deserve to be ranked with the *Smṛti* texts by virtue of their religious tone and exegetical aspects, it might be said in all fairness that they come nearer the *Brahmakāṇḍa*² or, in other words, represent the last phase

¹ Kulācāra derives its authoritativeness from the fact that it stands on the foundation supplied by the Vedas. In course of enumerating the special features of Kulācāra, the Kulārṇava has, for instance, alluded to the following Vedic passages as are often recited by the *Kaulas* in their religious practices:—

देवताभ्यः पितृभ्यश्च मधु वाता ऋतायते ।

स्वाध्विष्टानमधिष्टानं क्षीरं सर्पिर्मधुकम् ॥

हिरण्यरात्रं स्वादिश्च अबक्षन् पुरुषं पशुम् ।

दीक्षामुपेयादित्याद्याः प्रमाणं श्रुतयः प्रिये ॥ Kulārṇava, 2. 140-1.

Vedic hymns in parts are generally recited at the time of Tāntric *abhiṣeka*, *sandhyā* and other rituals. The Gandharva Tantra has given us the following specimen:—

ओम् आपो देवी रसोऽमृतं पूतं ब्रह्म पुनीमहे ।

जलाङ्गलित्रयं भूमौ मार्त्तण्डमैरवाय च ॥

ऊर्ध्वबाहुस्ततो मन्त्री मार्त्तण्डं समुपाश्रयेत् ।

ओम् उदुत्यं जातवेदसं देवं वहन्ति केतवः ॥

दशे . विश्वाय मार्त्तण्डं शेषे भैरवमीडयेत् ।

तन्त्राणां स्मृतिव्यतिरेकेषु मन्वादिस्मृतोनां कर्मकाण्डशेषत्वं तन्त्राणां तु ब्रह्मकाण्डशेषत्वमिति विशेषः—Bhāskaraṛāya.

of Vedic epistemology, elaborating and reinterpreting the mystic religion of the Upaniṣads.

The real object of Philosophy is to find out the Reality that lies behind the phenomenal world, to distinguish the permanent from the passing, and to appease the age-long craving of the human mind. It is interesting to see how the *Tantras* have either partly or wholly fulfilled these purposes by giving a truly philosophical interpretation of life. A system of thought, whether religious or social, may be consistent and good enough within its own scope, but it would deserve the name 'philosophy', at least in its Indian conception, only when it gives a solution of the vital problem, and provides food for both intellectual and spiritual aspiration of mankind. The *Tantras* have living touch with the religious instinct of India and have offered a spiritual interpretation of life whence one would draw fresh inspiration for all ages to come.

The philosophy established by the *Tantras* is not really an innovation, but it is a well-adapted reinterpretation of the time-honoured doctrines expounded by the Upaniṣads. The system of philosophy developed by the *Tantras* in general is highly monistic in tone. The dual aspects of Śiva and Śakti merge ultimately in the Inscrutable Unity. The *Tantras* have, to speak the truth, echoed the same truth and adopted the same view as were preached by the ancient *ṛsis*. 'An identity in difference' or 'Unity in diversity' has been the last word of the *Tantras*. The *Tantras* have ultimately made no difference between *Jīva* and *Śiva*¹. *Ātman*, it is said, conditioned by *upādhis* or *māyā*, comes to be called *Jīva*, but it becomes the same as *Śiva*

¹ जीवः शिवः शिवो जीवः स जीवः केवलः शिवः—Kularjaya, 9. 42.

the moment it is freed from those accidental attributes. In the words of *Śiva* himself, a *jīva* is entitled to eternal emancipation when he is liberated from the bondage of *saṃsāra* by the force of self-realisation¹.

The *Tantras* have touched the keynote of the the *Ādaita* philosophy by accepting identity between *jīva* and *Brahman*, and have repeatedly stated in clear terms that the highest form of *yoga* is the attainment of unity of *jīva* with the supreme soul².

The *Tantras* have always insisted upon the supreme importance of *jñāna*. Knowledge in its purest form is said to be the only way that leads to final emancipation. It has emphatically been asserted that *mukti* is attainable only by *jñāna* and not by any other means.³ The *Tantrarāja* has only voiced the eternal truth of the Upaniṣads (*na ca punarāvartate*) when it says that *jīva* once liberated is not born again.⁴ Most of the *Tantras* have exalted the supremacy of *Brahmajñāna* in unequivocal terms. The *Tantras* have recognised two kinds of knowledge: one derived from the *āgamas* (*āgamoltha*), and the other obtained from spiritual experience (*viccekoltha*).⁵ The *Rudrayāmala* maintains that a Tāntric worshipper ultimately becomes the same as *Brahman* through the help of *Brahma-jñāna*, and that there is no self-elevating religion like *Brahma-jñāna*.⁶

True to the remark which we have already made, we are again inclined to say that the *Tantras* coalesce with the *Upaniṣads*, particularly as regards the doctrines relating to *jñāna* and *mukti*. Some of the *Upaniṣads* have not only mentioned such names as Kālī, Karālī, Umā Haimavatī, Ambikā and Śiva, but have referred to the cardinal point around which clusters the whole framework of the *śakti* cult. The *Śvetāśvaropaniṣad* has spoken about the wonderful part played by *Śakti* in the evolution of the manifold world.¹ The *Tantras* affiliated to the śākta school have explained the association of *śakti* with *puruṣa* (Śiva) as the basic principle of creation.² The same truth has been revealed by Śaṅkara just in the beginning of his *Ānandalaharī* :—

*‘Sivah śaktiṃ yuktā yadī bhavati śaktiḥ prabhavitum,
Naccederām dero na khalu kuśalaḥ spanditumapi.’*

The mysticism of *yoga*, which is said to have emanated from Hiranyagarbha or Dattatreya, has also been dealt with elaborately in the *Tantras*. The object of practising *yoga*, as conceived by the *Tāntrikas*, is to acquire the power of visualising the Supreme Soul within the limitations of the individual soul.³ One who longs for *mukti* is directed to think himself completely lost in the all-pervading soul.⁴ To a *yogin* the world of perception vanishes into the Absolute.⁵

⁴ मुमुक्षुश्चिन्तयेद्भीनां प्रकृतिं परमात्मनि ।—*Gāndharva Tantra.*

⁵ The definition of *yoga*, as given by Śaṅkara in his *Prapañcasāra*, is quite in agreement with that of the *Tantras* :—

‘यमिहात्मनि पश्यति तच्चविदुस्तमिमं किञ्च योगमिति ब्रुवते ।—*Prapañcasāra.*

Quite in agreement with the Vedānta standpoint, the *Tantras* have maintained dual aspects of Śiva, namely, *saguṇa* and *nirguṇa*. It is said further that from *saguṇa* Śiva, characterised by *sat*, *cit* and *ānanda*, arises *śakti* and from it evolves *nāda* and from *nāda* comes out *bindu*.

Next we turn to the Śaiva *Tantras* which are said to have streamed forth from the mouths of Śiva. The class of *Tantras*, specially originating in Kashmir, is popularly known as *Trika Siddhānta*, because it is based on the trinity of categories, viz., *pati*, *paśu* and *pāśa*.¹ The fundamental tenet of these *Tantras* is as follows:—“The eternal Being, free from all impurities, and, at the same time, All-knowing and All-doing, severs the fetters of bondage whereby *jīvas* are enchained and turned dissimilar to Śiva’.”²

Śiva-jñāna or *Saiva-dṛṣṭi* is unique in character. It is of no human origin but has come down directly from Śiva, the repository of all learning. This *pārameśvara-jñāna* is said to dawn upon the *jīva* through the influence of initiation (*dīkṣā*) and practice enunciated in the *Tantras*. It may be expressed in terms of supreme wisdom that permits a *jīva* either to attain similarity with, or to gain unity with, Śiva.

The *Tantras* have shown a sublime ideal of spiritual experience which is in a sense different from all other forms of *sādhana*. The Vedānta and other systems of Indian thought have in their own way dealt with *mukti* and the various means for attaining it. But nothing has solved the real problem in so authoritative a way as the *Tantras*. Wherein lies the outstanding

¹ The southern school of *Tantras* has also recognised three elements, viz. Śiva, Śakti and Bindu.

² अथानादिमलापेतः सर्ववित् सर्वकृच्छिवः ।

पूर्वव्यत्यासितस्थानोः पाशजालमपोहति ॥—*Argendra Tantra*, 2. 1

feature of the *Tantras*?¹ Whereas all systems of philosophy are but creations of fallible men, the *Tantras*, which are regarded as an embodiment of *Śiva-jñāna*, trace their origin to the positive revelations from Śiva.² What is human naturally runs the risk of being mistaken, but what comes directly from the supreme personality remains an unassailable fact for ever. Divine wisdom is far above all limitations and imperfections.

The *Tantras* belonging to the dualistic class have emphatically denounced the *Advaita* standpoint as advocated by the Vedāntin.³ Objection is raised against *Advaitism* on account of the fact that its exponents have supported the monistic nature of the soul by means of evidence that is far from being real and adequate.⁴ Moreover, the *Advaita* doctrine cannot stand, since the recognition of two categories, such as *pramāṇa* and *prameya*, is in direct opposition to the strict interpretation of non-dualism maintained by the Vedāntin.⁵ Aghora Śivācārya, a Tantrik teacher of great reputation, advanced arguments to show the hollowness of *Advaitism*, while commenting on the *Ratnatraya Kārikās*.⁶

The Sāṃkhya doctrine of *prakṛti* has also met with similar refutation at the hands of the Tantrikas. To

the Tantrikas *prakṛti* is not an eternal entity but evolves out of *Kalā*. To regard the same as the ultimate cause of the world¹ (*pradhānāt sarvamañjāyala*) is a huge falsity².

We have given here only a brief account of the monistic and dualistic schools of the *Tantras*, without dwelling upon any specific points. There are other contents of the *Tantras* (such as *nāda*, *bindu* and *kalā*) which have deeper significance. But this is not the proper place to deal with them with the thoroughness they deserve. The *Tantras* have developed the doctrine of *Śabda-Brahman* to the highest degree of perfection, laying particular stress on the supreme value of *Vāc*. The mystic process of devotion inculcated in the *Tantras*, by way of emphasising the potency of the *mantras* and the necessity of concentrating the mind on the deity behind *bīja*, gives rise to a kind of spiritual consciousness in which the worshipper finds himself ultimately united with the Supreme Being, and thus gets all his inner cravings fully satisfied.

¹ To confound *Kārya* with *Kāraṇa*.

TWO INSCRIPTIONS FROM KOSAM.

GAURISHANKAR CHATTERJI, M. A., *Lecturer, Allahabad University.*

In the month of January 1928 I went out from Allahabad on a historical trip, accompanied by my students of Ancient Indian History, to the village Kosam, the site of Kauśāmbī, famous in history and legend.

While at Kosam I discovered one inscribed stone in the hut of a local *mallah* or boatman who, ignorant of its value, had been using it as a support for his water jars. Another large inscribed stone was found near the entrance to the house of a village Brahmin who was using it as a paving to a raised platform near his house intended for visitors. The inscription in the latter stone was somewhat mutilated as a result, I think, of the utilitarian purpose it was being made to serve. The other inscription in the possession of the *mallah* was also somewhat damaged, two or three letters being worn off.

In the absence of proper conveyance facilities, I could not immediately bring the stones to Allahabad. I made imperfect eye copies of the two inscriptions but could not decipher them properly.

Nearly a couple of months later I made another trip to Kosam accompanied by Prof. Parmanand of the Allahabad University. On this occasion I purchased the stone that was in the possession of the *mallah* and succeeded in bringing it to Allahabad with the assistance of the professor. The other stone was too large to be brought to Allahabad without special arrangements and

so I made a careful eye copy of the inscription recorded on it.¹ I now intend to edit the two inscriptions that were thus rendered available in this article. I have to acknowledge with thanks the suggestions I received from my esteemed colleague Pandit Kshetreśachandra Chattopādhyāya of the Sanskrit Department of the Allahabad University and the profit I derived from a discussion about the readings of one of the inscriptions with Rai Bahadur Daya Ram Sahni, the late Director-general of Archaeology. It was gratifying to find that he generally agreed with my interpretations of some difficult words in the inscription.

Kosam is a village situated on the river Jumna about forty miles from Allahabad by the usual route, in Pargana Karari, Tahsil Manjhanpur, Dist. Allahabad. It is the site of ancient Kauśāmbī of hoary antiquity as was first pointed out by Cunningham.² The identification as is well known was doubted by Dr. Vincent A. Smith who, relying on certain topographical bearings given by the Chinese pilgrim Hsuen-tsang, located it in the Rewah District³. The identification, however, has been placed beyond the vestige of a doubt by the happy discoveries of Rai Bahadur Daya Ram Sahni who has conclusively proved in the *Journal of the Royal Asiatic Society* for 1927⁴ on the strength of two inscriptions that the vast ruins of Kosam represent

¹ Recently the stone was acquired and brought to Allahabad by Pandit Braj Mohan Vyas, the indefatigable collector of antiquities, for the Museum attached to the Allahabad Municipal Board of which he is the Executive officer. A very accurate estampage of the inscription recorded on it was supplied to me by him. The other stone, acquired by me, has been lent at his request to the Museum. Mr. Vyās was good enough to supply me with an estampage of this inscription as well.

² Cunningham, *Archaeological Survey Report*, Vol. I, pp. 303-308.

³ *Journal of the Royal Asiatic Society*, 1898, pp. 503-519.

⁴ Pp. 689-698.

the ancient city of Kauśāmbī, the headquarters of a provincial administration during several succeeding dynasties and an important trading centre lying on the main commercial route from Bhṛgukacchha or Broach to Pāṭaliputra, modern Patna.

Of the two inscribed stones discovered at Kosam, the one acquired by me is irregularly broken on one side and is evidently only a fragment of the original. Fortunately, however, the inscription recorded on it, to be described hereafter as Inscription no. A., is complete. The portion broken off and lost did not contain any further record. It is not possible to say exactly what the original size of the stone was. It was rectangular in shape 1' 9" broad and probably 1' 10½" long. The stone, as it stands at present, measures 1' 9" along the top. The two sides of its length measure respectively 1' 10½" and 1' 4", approximately, the extremities of these being joined together by the irregular line forming the broken edge of the stone.

The inscription engraved on the stone covers roughly a space of 1' 9" by 1' 4". It consists of six full lines engraved along the full breadth of the stone and two letters in the seventh line. There is no space left unoccupied at the top. A portion of the stone only from the 7th line up to the broken extremity is left blank. The last letter of the 2nd line is smaller in size than the rest evidently because there was want of space. The last letters of the third and fourth lines have been effaced.

The inscription is well preserved. The execution is neat. The characters are large and bold, the length of some of the letters, including ligatures, being more than 2'.

The other inscribed stone, acquired by Mr. Vyas, is perfectly intact. It is rectangular in shape but rounded off at the top neatly, evidently by the stone-cutter. The length and breadth of the rectangular portion are 2'8" and 2'5" respectively. The height of the arc is 11 $\frac{3}{4}$ ". The inscription, to be described hereafter as Inscription No. B, occupies the rounded space at the top. It consists of fine lines and has suffered some considerable damage, probably owing to the fact that the stone on which it is recorded was used for a long time as a kind of bench for sitting on. The proper name *Māṅgaṇī* occurring in the third line can be read with considerable difficulty. Indeed, but for the occurrence of the name in a clear legible form in Inscription No. A, it could not be read at all. Similarly the ligature *tra* of the word '*paltra*' occurring in the same line is blurred. Finally, in the 5th line there are at least three letters which have been completely obliterated owing to the stone being broken off at the particular place.

The standard of Brāhmī characters which the two records present refers them in my opinion to a period not later than the 3rd century A. D. In other words, the characters of the records belong to the northern class of alphabets of the Kushan period. Among the Brāhmī letters of these two records one may observe all the salient features of Kushan palaeography, though it must be admitted that at first sight one may notice many resemblances in the characters with those of the Gupta period. Mr. Daya Ram Sahni discovered in the cold weather of 1921-22, when he was engaged in the preliminary operations connected with the re-erection of the ancient pillar in the ruined fort of Kosam, three inscriptions in a

village in the vicinity of Kosam. Inscription No. 2 is a record of Śivamagha engraved on the 1st day of the 2nd fortnight of a certain year which is lost. Inscription No. 3 is a record of prince Bhadramagha of year 87. These two records discovered by Mr. Sahni being fragmentary and mutilated, he could not assign them definitely to any period though he conjectured that they belonged to the Gupta period. It is, however, now possible to refer all these records, including the two under discussion, to the era in which the inscriptions of the Kanishka Group of kings are recorded and that for the following reasons.

In the dated Kushan records in the Brāhmī script from the Mathura region and in the inscription of Friar Bala at Sarnath we meet with two modes of dating, viz. (1) giving the year, season, number of month within the season and day, (2) giving year, month and day¹. A third mode of dating is found in the inscription of king Aśvaghōṣa of the year 40 recorded on the Sarnath pillar. The fragmentary inscription of Aśvaghōṣa's reign discovered by Mr. Oertel also contains seasonal date, though the date itself has been lost². The same mode of dating is found in the Nāsik inscriptions of Gautamīputra Śātakarṇi and Vāsiṣṭhīputra Pulumāyi³. This mode gives the year, season, number of Pakṣa within the season and day. All the four records found at Kauśāmbī follow this mode of dating. It appears that in the Kauśāmbī and Sarnath regions this mode of dating was prevalent. It is not met with in the Brāhmī

¹ For examples of both the modes see Lüders' List of Brahmi Inscriptions, *Epigraphica Indica*, Vol. X, Appendix, pp. 3-15.

² See inscriptions No. 922 and 924, Lüders' List, p. 93; also *Epigraphica Indica*, Vol. VIII, pp. 171-172.

³ *Vide* inscriptions No. 1122, 1123, 1125, 1126 and others in Lüders' List,

records from Mathurā. The Gupta dates are the ordinary lunar month dates. To this there is only one exception and that too doubtfully so, viz., the inscription of the year 114 of the reign of Kumāragupta which is a compromise between season dates and lunar month dates, because it mentions both the season Hemanta and the lunar month Kārttika.

Secondly, the language of the inscription is mixed Sanskrit and Prakrit. As in Kushan inscriptions, the only two purely verbal forms are *rardhata* and *prīyatām*. The long *ā* is omitted; cf. the word *mahārajaśya*. The form *elāya pūrvāya* resembles very closely the various mutilated and barbarous forms of the Sanskrit *elasyām pūrvāyām*. Such features are characteristic of the inscriptions of the Kushan period but not of the Gupta period. It may be noticed here that the Sanskrit used in both the inscriptions is incorrect.

Thirdly, the palaeography of the inscriptions creates no difficulty in assigning them to the Kushan period. The exact epoch of the Kushans is yet an unsettled fact of Ancient Indian History. "But the substantial controversy is between the scholars who place the accession of Kanishka in A. D. 78 and those who date it later in about 120 A. D." Sir John Marshall made out a fairly convincing case for a date in the earlier half of the 2nd century A. D.¹ and Sten Konow's latest article on the subject² tries to make out a case for a much later date. On the view that Kanishka's accession took place in 78 A.D., the inscriptions under discussion have to be referred to about 165 A. D. (87, the year mentioned in the inscriptions, + 78). If,

¹ Journal of the Royal Asiatic Society, 1914, p. 273 ff.

² Kalawan Copper Plate Inscription, J. R. A. S., 1932, pp. 949 ff.

however, the later dates are adopted, the inscriptions have to be referred to the 3rd century A. D. In either case we are not faced with any palæographical difficulty at all.

The characters of the inscriptions generally resemble those of the inscriptions of the year 3 of Kanishka and those of Rājan Asvaghosha found at Sarnath, though it has to be admitted that they exhibit in certain letters later forms current in the Gupta period in the fifth century A. D.

Now, Kauśāmbī was an important centre of Jainism and it is very likely that the inscriptions themselves are Jaina. They end with the benedictory formula common to such inscriptions, viz., *dharmā puṇyā vardhate* (Inscription A) or *puṇyā vardhate* (Inscription B). Moreover, Inscription No. B begins with the invocation *siddham*, also a Jaina formula. According to the late lamented Rakhai Das Banerji, "it is very difficult to distinguish between the Jaina inscriptions of the Kushān period and those of the Gupta period"¹. Prof. Bhandarkar seems to hold the same view. "There seems to be" says he, "no palæographical peculiarity of any kind which demarcates the early Gupta from the Kushān script."² The Jaina inscriptions were in a script which was much in advance even of the current script. The cause of this is not far to seek. The merchants and traders, which the Jaina donors usually were, used an extremely cursive script in their daily transactions. The script which was in advance even of the current hand of the period was copied in the records of the

¹ R. D. Banerji, *Seythian Period of Indian History*, *Indian Antiquary*, Feb. 1908, p. 52.

² D. R. Bhandarkar, *Mathura Pillar Inscription of Chandragupta II*, Gupta year 61, *Epigraphica Indica* XXI, p. 2.

religious donations by the engraver. That explains the advanced forms of the characters of the present inscriptions as well.

The inscriptions present the following advanced forms of letters and later peculiarities :—

(1) The letter *sa* is looped ; but in the Kushan inscriptions also it is occasionally so.

(2) The letter *ma*, which resembles the form in Hariṣeṇa's inscription and Gupta inscriptions generally.

(3) The subscript *ya* is always bipartite, whereas generally in the Kushan inscriptions whenever the subscript *ya* is bipartite the tripartite form also occurs with it. But in the Jaina inscriptions from Mathura the subscript *ya* is generally bipartite.

On the other hand the forms of the majority of the letters distinctly belong to the later variety of the Kushan script and are even earlier:—

(1) The form of the subscript lingual *ṣa* as found in *paḥṣa* is archaic and is found in the inscription of Sodāsa and the older Maurya alphabet.

(2) The hooked form of *ha* which is found in the Kushan inscriptions and is a development of the form which appears in the Jaugada Separate Edict of Aśoka.

(3) The form of the letter *ya* which has a loop to the left while the right limb is angular is characteristic of the Kushan inscriptions.

(4) The broad-backed *śa* with a small slanting central stroke is archaic in form and appears in some Kushan inscriptions.

(5) The forms of the letters *ua*, *la*, *cha*, those of the vowels *e* and *ai* are the usual ones appearing in the Kushan inscriptions.

(6) The vowel marks also exhibit the usual Kushan forms.

As regards the subject matter of the two inscriptions, both of them are records of a religious benefaction, viz., the setting up of an *āsanapaṭṭā* at a tank, by the sons of a certain person named Śapara, in the reign of a certain king Bhadramagha in the year 87. A *paṭṭā* (*paṭṭa* in Sanskrit) is a slab [cf. the Bengali word *pāṭā*]. An *āsanapaṭṭā* would mean a slab for sitting on. Any body walking along the bathing ghats of Benares would not fail to find numerous wooden planks and stone slabs as well intended for bathers who can sit upon them and perform *sandhyā*, *pūjā* and other religious acts after their bath. It would appear that the persons named in the inscriptions set up such slabs at the different bathing ghats. It may be that the inscribed slabs themselves were intended as seats for bathers. They were fixed to the bathing ghats at the water's edge, so that persons could stoop a little and take water from the tank for various purposes connected with a religious act.

As regards King Bhadramagha nothing is known about him except that he flourished in the year 87 of an unspecified era which, we have shown, was the Kanishka era. He is known to us so far only from these two inscriptions and inscription no. III discovered by Mr. Sahni in the cold season of 1921-22.¹ Mr. Sahni also discovered a record of Prince Śivamagha² (Inscription No. III). It is to be noted here that we have records of a certain Rājan Aśvaghosa found at Sarnath. It seems that these were feudatory dynasties ruling at Kauśāmbī and Sarnath under the suzerainty of the Kushan overlord.

The name of the Prince in my inscriptions is clearly Bhadramagha. The name Bhadramagha is a queer one

¹ Epigraphica India, Vol XVIII, p. 160.

² Ibid. p. 159.

and one feels tempted to read it as Bhadramegha. It is unlikely however that the engraver committed an error in recording the name of the Prince.

I now proceed to give the reading and translation of the two inscriptions with notes.

Line 7 rdhatu.

Notes:

Line 3. *Pattanakarasya*. The word *pattana* in Sanskrit means, 'a town', 'a city'. This meaning does not suit here, for the word qualifies the proper noun *Śaparasya* (name of a person) and there is hardly any sense in describing a person as 'maker of a city'. The word also means a musical instrument, a *mṛdaṅga*, a sense which fits in quite well here. Moreover the word *pattana* may also be taken as the Prakrit form of the Sanskrit word *patraṇa*, an arrowhead. This meaning also is not inappropriate, though the former meaning may be more suitable.

Line 4. *Sandāryyehi*. If the word *sandāryya* is taken as a pure Sanskrit word it has to be interpreted as follows:—*udārasya bhārah=andāryyam* (*udāra + śyañ*),

Handwritten text in an ancient script, likely Pahlavi, arranged in approximately 10 horizontal lines. The script is highly stylized and difficult to decipher without specialized knowledge. The text appears to be a form of religious or administrative writing, possibly a prayer or a record. The characters are dark and set against a lighter, textured background.

meaning 'greatness', 'excellence', 'generosity' etc. *Andāryy-ggā saha varlāmānāḥ* = *sandāryygaḥ* i. e. 'one endowed with generosity, greatness etc'. Now, though this meaning is not impossible, it is hardly likely that persons who were making such ordinary religious benefactions used such an uncommon expression hardly intelligible to persons who would happen to read the record. Moreover, *sandāryyga* being a learned Sanskrit expression worthy of a pandit, it is a little odd that the Prakrit case-ending *-hi*, instead of the Sanskrit one should be used. I am inclined to think that the stem is a barbarous, incorrect form of the Sanskrit word *sodarya*, meaning 'uterine brother'. *Sandaryygehi* would thus stand for the Sanskrit word *sodaryygaḥ* by 'uterine brothers', 'by brothers of whole blood'.

Line 1. *Bhrātlahi* a mistake for *bhrātrahi* = *bhrātrbhīḥ* [= *bhrātrbhṛām?*].

Line 5 *Śanikāya Śaṇḍhakana cha*. These two are obviously proper names, either those of persons mentioned immediately before or of two persons different from them. In order to determine this we have to study the construction of the entire expression, '*Śaparsya.....Śaṇḍhakana cha*'. This whole expression can be possibly interpreted in three different ways :

Firstly, (a) *Śaparsya puttrahi sandāryygehi bhrātrahi* may be taken to refer to a certain number of persons who are sons of Śapara and uterine brothers,

(b) *Māṅganīputtrahi* may be taken to refer to some other persons different from (a),

(c) *Śanikāya, Śaṇḍhakana cha* may be taken to mean two other persons, the first being a female Śanikā.

Secondly, (a) the expression *Śaparsya puttrahi* and *Māṅganīputtrahi* may be taken to refer to the same

individuals, the meaning of the whole expression being —by uterine brothers, sons of Śapara and Māṅganī.

(b) Śanikāya and Śaṇḍhakana meaning the same as in (c) above.

Thirdly, the two names *Śanikāya* and *Śaṇḍhakana* may be taken as the names of persons described by the expression—“*Śaparasya puttrahi.....Māṅganīputtrahi*. i.e. Śanikā and Śaṇḍhaka are the names of two brothers, sons of Śapara and Māṅganī. As a matter of fact, the third meaning seems to be natural except for the fact that Śanikā does not exactly seem like the name of an individual. In the translation of the text I have adopted the third interpretation.

Translation:

In the year eighty-seven, 80 7, on the fifth day 5, of the third 3 fortnight of the rainy season, in the reign of Māhārāja Bhadramagha, on the day specified as above, [this] [stone] slab for sitting on, was set up, near the tank, by Śanikā and Śaṇḍhaka, the uterine brothers, sons of Śapara, the maker of arrow-heads, and Māṅganī. May [their] moral and religious merit increase.

INSCRIPTION B

Notes:

Śaparasya puttrahi Māṅganīputtrahi. The expression leaves little room for doubt that the sons of Māṅganī are the same persons as the sons of Śapara. In other words, Śapara was the husband of Māṅganī. The practice of specifying individuals with reference to their mother was widely prevalent in ancient India. It was due to the fact that one person sometimes had several wives which necessitated the specification of their offspring by a particular reference to the mother of whom they were born.

Ayyaya(yā)ḍava... Two letters after 'va' have been peeled off. It is difficult to make out the meaning of the expression. Mr. Daya Ram Sahni suggests in the *Epigraphica Indica*, Vol. XIII (Article. Three Brahmi Inscriptions from Kosam), that the expression may be *Ayyayādaradārā* equivalent to Sanskrit *Āryyayādaradārāḥ*, i.e. the wife of the noble Yādava. I think that persons dedicating the stone near the bank of the tank intended it to be specially used by the noble lady. It is not uncommon to find such stones near the bank of the river Ganges at Benares specially dedicated for the use of distinguished persons. *Ayyayādaradārā* would incorrectly stand for *Āryyayādaradārāṇām*. The genitive would be *sambandha-sāmānya-vivakṣayā*.

I recognise, however, that the explanation suggested of *Ayyayāḍava*[xx] is not entirely convincing.

Bhagavatū incorrectly stands for *bhagavatām*.

Sthapita. Incorrect for *sthāpitā*.

Translation:

Benediction. In the year 80 7, on the day 5 of the third fortnight of the rainy season in the reign of

Mahārāja Bhadramagha, on the day specified as above, [this] [stone] slab for sitting on was set up [near the tank] by the uterine brothers, sons of Śapara, the maker of arrow-heads, and Māṅgaṇī, for use of the revered lady, the wife of the noble Yādava. May [their] religious and moral merit increase.

It is generally assumed that the well-known *virtikāra-grantha* in Śābara's *bhāṣya* on *Mīmāṃsā-Sūtra* I. 1.5 makes reference to two schools of Buddhist philosophy, the *Vijñāna-vāda* (Bibliotheca Indica edition¹, p. 8, l. 21 to p. 9, l. 11) and the *Mādhyamika Śūnya-vāda* (p. 9, ll. 12 ff.). Professor Jacobi in his comprehensive paper on Buddhist references in the earlier texts of Hindu philosophy in *J.A.O.S.*, Vol. 31, pp. 1-29, has expressed

The references throughout are to this edition.

the opinion that we have here refutation of only Mādh-
yamika philosophy (pp. 15-22). He takes the same view
of the *Vedānta-Sūtras* II.2. 28-32,¹ which have been taken
by all others as giving a refutation of the Vijñāna-vāda.

When I was studying Śabara's commentary on the
Mīmāṃsā-Sūtras under Dr. Jhā, some years ago, it occurred
to me that the views of only one school of Buddhist
thought were discussed on pages 8 to 10 of the
ṛttikāra-grantha and that this school was the Vijñāna-
vāda and not the Sūnya-vāda. I felt that this was
in the fitness of things, in view of the fact that the
other early texts on Hindu philosophy refuted the
Vijñāna-vāda and showed no knowledge of the Sūnya-vāda.
The question is very important from the historical point
of view and it can be settled only by a careful study
of the texts. I shall here essay a solution of this
problem, so far as it affects the text of Śabara.

After explaining *Sūtras* 3-5 of the first *pāda* of
the first *Adhyāya* of Jaimini in a natural manner, Śabara
introduces a different interpretation of these *Sūtras* with
the words वृत्तिकारस्तु अन्यथेमं ग्रन्थं वर्णयद्भकार, तस्य निमित्तपरीष्टि-
रित्येवमादिम् (p. 7). This is the *ṛttikāra-grantha*, which
seems to continue to the end of Śabara's comment on
the fifth *Sūtra*² and not conclude with p. 18, l. 6 of
the Bibliotheca text as was supposed by the editor,
whom Jacobi follows (p. 15); for the discussion continues
without any break and some of the objections urged
before p. 18, l. 6 are answered in the following portion.
There is another misconception commonly prevalent
about the *ṛttikāra-grantha* that the whole is an actual
quotation from the *Vṛttikāra*. We have no reason to

¹ *Op. cit.*, pp. 13-15, 22-24.

² See Dr. Jhā's translation of the *Śabara-bhāṣya* (*G.O.S.*), Vol. I, p. 9 n.

³ Jacobi, *op. cit.*, p. 15.

believe that Śabara quotes the actual words of the Vṛttikāra; he seems to have given an extended paraphrase in his own words. So far as I am aware, no instance can be shown of any of our ancient writers actually quoting such lengthy passages: they quote only *sūtras* or a few verses or a few sentences. The question is settled by the words of Maṇḍana Miśra who, in his very brief account of the *adhikaraṇas* of the *Mīmāṃsā Sūtras*, gives a rather long summary of the *vṛttikāra-grantha*, beginning with the words बह्वर्थं वक्तुं कामेन तमर्थं सौत्रमिच्छता । वृत्तिकारमतेनेयं त्रिसूत्री वर्ण्यतेऽन्यथा ॥ 'The bhāṣyakāra), desiring to say a lot and wanting to suggest that all that is intended by the Sūtra, explains the three Sūtras (3-5) differently in accordance with the view of the Vṛttikāra.' That *carayate* is to be connected with *bhāṣykerlā* (to be supplied) and not *mayā* is proved by the fact that in the very next verse Maṇḍana quotes a word of the *bhāṣya*: सत्यमिध्याविभागो यो वृत्तिकारनिरूपितः । बौद्धस्तं सहते नेति नन्वित्येतेन कथ्यते ॥ *Nanrili* clearly means the whole passage of the *bhāṣya* beginning with ननु सर्व एव निरालम्बनः स्वप्नवत्प्रत्ययः etc. (p. 8. l. 21). Consequently Śabara gives only the *views* of the Vṛttikāra and not his very *words*.

¹ Chowkhamba edition of *Mīmāṃsāsūtrakramanīkā* with Dr. Jha's *pīkā*, p. 8.

² That much of what is given in the *vṛttikāra-grantha* is Śabara's own material, brought in just in connection with the Vṛttikāra's special interpretation of *Sūtras* 3-5, is shown by Śaṅkarācārya's reference to this passage in his own comments on V. S. III. 3. 53: ननु शास्त्रप्रमुख एव प्रथमे पादे शास्त्रफलोपभोगयोग्यस्य देहव्यतिरिक्तस्यात्मनोऽस्तित्वमुक्तम् । सत्यमुक्तं भाष्यकृता न तु तत्रात्मास्तित्वे सूत्रमस्ति । इह तु स्वयमेव सूत्रकृता तदस्तित्वमात्रेणपुरःसरं प्रतिष्ठापितम् । इत एव चाकृष्याचार्येण शबरस्वामिना प्रमाणलक्षणं वर्णितम् । The next sentence अत एव च भगवतोपवर्णेन प्रथमे तन्त्र आत्मास्तित्वाभिधानप्रसक्तौ शरीरके वक्ष्याम इत्युद्धारः कृतः seems to point to the brief remarks of the Vṛttikāra about the continuity of the soul which have given an opportunity to Śabara to discuss the question at some length. It also shows that the

It seems that according to the Vṛttikāra the fourth Sūtra is to be broken up into two parts (a) तत्सम्प्रयोगे पुरुषस्येन्द्रियाणां बुद्धिजन्म सत् प्रत्यक्षम् (with सत् and तत् transposed) and (b) तदनिमित्तं विद्यमानोपलम्भनत्वात्¹. The former means, 'That cognition is *real sense-perception* (*satpratyakṣam*) which appears when there is contact of the sense-organs *with the object perceived* (*tatsamprayoge*)². This view of Pratyakṣa enables the Vṛttikāra and Śābara to introduce the Mīmāṃsā doctrine of the *svatastva* (self-dependence) of *prāmāṇya* (validity) and *paratastva* (dependence on experience) of *aprāmāṇya* (falsity). Śābara here brings in an objection against the Mīmāṃsā view of *Pratyakṣa*, that it corresponds to objects as they actually exist, from a Buddhist point of view (ननु सर्व एव निरालम्बनः स्वप्नवत्प्रत्ययः etc., p. 8, ll. 21 ff.) The Buddhist denies that there can ever be any external object corresponding to our ideas. The position that is taken up by the objector is that of the idealist and the arguments that are urged all point that way. It is contended that there are no objects corresponding to the ideas of our waking consciousness, as there are none in dream. The Mīmāṃsaka replies that there is difference in the ideas in the two states: the ideas in dream are sublated immediately we wake up and we realize that we were having mistaken notion but there is no such contradiction of the ideas in the waking state. All mistaken notions are due to some defect somewhere. In dream, the mind is overpowered by sleep and that is responsible for our having ideas

Vṛttikāra is none other than Upavarṣa (an equation accepted by Dr. Jhā in *Prabhākara System of Pūrva Mīmāṃsā*, p. 113 and Translation of *Ślokarvārtika*, Introduction, p. iii, contra P. V. Kane in *J.B.B.R.A.S.*, Vol. 26, p. 84). Unfortunately I have no space here to discuss this latter problem. Keith also agrees (*Karma Mīmāṃsā*, p. 8) 'that the citation from the Vṛttikāra is only a résumé.'

¹ See *Bhāṣya*, p. 8, ll. 2-4.

² Dr. Jhā's translation of *Śābara-bhāṣya*, Vol. I, p. 10.

without real objects behind them. But in the waking state, we do not normally have any defect in the mental equipment and we get ideas corresponding to facts.

Here occurs the expression शून्यस्तु (p. 9, l. 12) which has given rise to a lot of misunderstanding. The Buddhist now gives up the analogy of dream and attacks the ideas of waking consciousness themselves. He says that we do not realize any difference between the form of the object and the idea, that we have direct apprehension of our ideas and that consequently they alone are real (अर्थज्ञानयोराकारभेदं नोपलभामहे। प्रत्यक्षा च नो बुद्धिः, अतस्तद्विन्नमर्थस्वरूपं नाम न किञ्चिदस्तीति पश्यामः). The Mīmāṃsaka replies that the psychology of *pratyakṣa* is quite different: the *form* belongs to the *objects* and not to our *ideas* and that we directly apprehend the objects and only have inference about the ideas. Consequently objects cannot be denied. This discussion shows that Śābara is refuting from p.8, l. 21 to p. 10, l. 10 only one doctrine, *viz.*, the *Vijñānārāda*. His concluding words अतो न निरालम्बनः प्रत्ययः, अतो न व्यभिचरति प्रत्यक्षम् (p. 10, ll. 9-10). 'therefore ideas are not without objective substratum, consequently *pratyakṣa* is not non-corresponding of objects', clinch the problem. शून्यस्तु of p.9, l. 12 must, therefore, mean बाह्यार्थशून्यता¹ and does not refer to the *śūnyarāda* of the Mādhyamika. The argument अर्थज्ञानयोराकारभेदं नोपलभामहे etc. of the Buddhists assumes the reality of *ideas*. Prabhākara in his *Brhatī* (Chowkhamba Edition p. 57) introduces शून्यस्तु thus, ननु च शून्यस्त्विति सैव निरालम्बनतोपन्यस्ता प्रत्ययस्यार्थशून्यतां वदता, and his commentator Śālikanātha specifically says in the *Rjucimalā* that it would be wrong to suppose that there

¹ See Dr. Jhā's translation of *Śābara bhāṣya*, I, p. 13, ll. 7-30.

² Cf. Dr. Belvalkar's remarks in his *Brahma Sūtras of Bādarāyaṇa* (II, 1-2), 2nd ed., *Notes*, pp. 170-1, with reference to the corresponding portion in the Vedānta Sūtras.

is any reference to Mādhyamika doctrine here (न चैवमाशङ्कनीयं—पूर्वत्र बाह्यालम्बनाभाव आशङ्क्य निरस्तः, सम्प्रति ज्ञानस्याप्यभाव इति माध्यमिकदर्शनमुपन्यस्य निराक्रियत इति—यस्मात्प्रत्ययस्यैवेयमर्थशून्यतोऽन्यस्ता, न पुनः प्रत्ययोऽपि नास्तीति । तस्माद् बाह्यालम्बनशून्यतैवेयमुच्यते *ibid.*). It is really a wonder that p.9, l. 12 to p. 10, l. 10 should ever have been taken to refer to Mādhyamika doctrines¹. Jacobi is also wrong, when he claims that according to Kumārila (pp. 268-354 of the Chowkhamba text and pp. 148-182 of Dr. Jhā's translation of the *Ślokaśārtika*) we have refutation of Mādhyamika nihilism here². Kumārila says nothing of the kind. The so-called *Śūnyarāda* section of the *Ślokaśārtika* is nothing but a continuation of the *nirālambanarāda* section. Kumārila there discusses the view that our ideas cannot apprehend any external objects. It is after he has finished, that he makes a reference to the Mādhyamika doctrine in a very summary manner in the last verse (no. 263, p. 194, of the Trivandrum text, part 2): इति बहिर्विषयप्रतिपादनात् तदभावकृता मतिसंवृतिः । उभयतत्त्वविदां परमार्थतः क्षममिदं धुरि धर्मविचारणे ॥³, which may be translated thus, 'As the reality of external objects has been thus established, one cannot contend that the very ideas are illusory for want of corresponding facts; consequently the Mīmāṃsakas who believe in the reality of both ideas and objects, can yoke both in the service of a discussion on *dharma*.'

Professor Jacobi is, however, right when he says (p. 21) 'The division of the whole passage into two parts

¹ The mistake in wrongly dividing the *śārtikā-grantha* of the *Ślokaśārtika* into *śārtikā-grantha*, *nirālambana-rāda*, *śūnyarāda* and other sections seems to go back to the manuscripts. It is certainly so with the mss. in the Government Sanskrit College Library at Benares, as I learn from the Librarian, Mr. S. N. Jharkhandi and Professor P. P. S. Shastri of the Presidency College, Madras, informs me that the same is the case with the manuscripts in Madras (Government Oriental Manuscripts Library and Adyar Library).

² P. 21. Keith (*Karma-Mīmāṃsā*, p. 7) has been misled by Jacobi.

³ See Dr. Jhā in *Modi Memorial Volume*, pp. 311-2.

of which the first combats the Nirālambana-vāda and the second the Sūnya-vāda, is quite arbitrary.' But the inference that he has drawn from this, *viz.*, that the whole gives a refutation of the Sūnya-vāda is wrong. We have here *vijñānacāda*, pure and simple, and not the slightest trace of Mādhyamika nihilism. The characteristic method of the Mādhyamika is to show the inherent contradictions in the nature of things and thence deduce the illusory character of everything. A Sūnyavādin would not for a moment care to establish the reality of *vijñāna* even though without any corresponding objects.

We have reference to Buddhist doctrines in two other places of the *ṛttikāragrahaṇa* (1) p. 14, l. 18 to p. 15, l. 12 and (2) p. 19, l. 3. to p. 24, l. 9. The fifth Sūtra, even according to the Vṛttikāra, shows how *śabda* is a valid source of knowledge for *dharma*, because its connexion with objects is natural. In this connexion arises the question, what is the connotation of the term *gauḥ*? The Mīmāṃsaka replies that it means the *universal cow* which is eternal and not any individual cow (p. 14, ll. 18ff.), because then alone can he support his doctrine of the eternity of *śabda*. Here an objector says that the class notion is mistaken, like the notion of a single entity, *forest*, when we really know of individual *trees* only. Śabara replies that the very notion of the 'forest' is a guarantee of its reality and if it be held that we can have the notion of the forest, though it does not exist apart from the trees, one may as well say that we have notion of trees though they do not exist. That is the position of the Buddhist idealist, which, the author says, he has already refuted. The words that he uses are प्रत्युक्तः स माहायानिकः¹ पक्षः, showing that he was referring to idealism as a

¹ The right reading in most manuscripts wrongly rejected by Pt. Maheshchandra Nyāyaratna for माहायानिकः.

(characteristic ?) Mahāyāna doctrine. It is not clear whose is the view referred to here, that the *whole* is unreal and the *parts* alone are real. This is certainly not a doctrine of the Buddhist idealist for he does not believe in the reality of even the part. If Śabara meant it as a Buddhist doctrine at all, it must be ascribed to the Hinayānists. The Sautrāntika, for example, rejects both the *universal* and the *whole*, though he accepts the reality of the external world. That is because one of the four cardinal doctrines ascribed by Buddhist philosophers to the Buddha was सर्वः स्वलक्षणम् and that, logically pressed, made the reality of the *positive universal* or of the *whole* impossible. Śabara seems to differentiate his opponent in p. 14, ll. 18 ff. from the Buddhist idealist whom he claims to have silenced earlier.

The last reference to Buddhist doctrines arises in this way. According to the Vṛttikāra, as I have mentioned already, the fourth *sūtra* is to be split up into two. The second half अनिमित्तं विद्यमानोपलम्भनत्वात् gives, according to him, an objection against the validity of the Vedas. It means that the Vedas cannot teach us anything valid because they speak of things that do not exist (p. 10, ll. 22 ff.). There are also impossible statements like the sacrificer going to heaven along with his sacrificial implements, when we actually find him burnt and reduced to ashes. Śabara sets about to show (p. 18, ll. 16 ff.) that this Vedic statement is quite all right, because it refers to the self of the sacrificer as opposed to his body. The body is destroyed, but the soul is not, which can go to heaven. Here a materialist claims that the body is the sacrificer himself and Śabara shows how it is not. He says that the body has colour etc. which others can see but the soul has ideas of pleasure, pain etc., which none else can realize

and this shows that the soul is distinct from the body. Here a Buddhist objects that there can be no *person* possessing those *ideas* of pleasure etc., that there is no *viññātr* beyond the *viññānas* (p. 19, ll. 3ff.). Our author gives a very elaborate refutation of the *non-ego* doctrine and establishes a 'soul', quite distinct from consciousness (तस्मादस्ति सुखादिभ्योऽन्यो नित्यः पुरुष इति p. 24, l. 2). Here also it is not clear to what specific school, if any, the Buddhist opponent belongs. All Buddhist schools are practically agreed on rejecting an ego distinct from the *viññāna-skandhas* and it is therefore likely that Śabara was demolishing the common notion of all Buddhist schools¹.

Let us now take stock of the facts learnt above. Śabara makes no mention of *Śūnyavāda*. He knows of the Buddhist rejection of the *whole*, as opposed to the *parts*, but not of the Mādhyamika inference therefrom that everything is void, for his opponent seems to accept the reality of the parts. Śabara knows also of the practically universal Buddhist view of non-ego. Above all, he shows himself as conversant with some kind of Buddhist idealism. I have purposely used the word 'some kind', because all the doctrines of the classical Viññāna-vādins are not found here. According to the classical Yogācāra system, *viññāna* has got a subjective aspect, called the *ālaya-viññāna* or *āśaya*, which is a series of momentary ego-notions, each moment in which inherits completely the experiences of the preceding moments². Śabara seems quite ignorant of any

¹ It is interesting to note that the chief argument that is used by Śabara to establish a continuous soul, viz.. it is the same person who has enjoyed some object in the past and has remembrance of it that can strive for it again, has got a parallel in the Vedānta Sūtra II. 2. 25, अनुस्मृतेष्व, seemingly refuting Sarvāstivāda doctrine.

² See Yamakami Sogen, *Systems of Buddhist Thought*, pp. 216 ff.

such doctrine. If he knew, he could not have so complacently believed that he had demolished the *anātman* theory of the Buddhist by urging: 'one cannot have desire for an object which another being has experienced' (नो खल्वन्येन पुरुषेणोपलब्धेऽपि विषयेऽन्यस्य उपलब्धुरिच्छा भवति, p. 20) and such like arguments. The *viññānavāda* that he knows of seems to be of a very primitive type. Consequently he seems to belong to a date prior to that of Asaṅga and Vasubandhu and, as he shows no knowledge of the *Sūnyavāda*, possibly before Nāgārjuna too. The same is the position with the *Vedāntasūtras*. V.S. II.2.18-17 give a refutation of the views of the Buddhist realists and Sūtras 28-32 of the Buddhist idealists¹. The arguments in the latter *adhikaraṇa* are, as Jacobi has rightly observed, the same as in Śābara. "नाभाव उपलब्धेः" ('objects are not non-existent, because we cognise them') cannot be meant against *Sūnyavādins* for *upalabdhi* itself is rejected by them. Unfortunately, I have no space here to discuss the *Nyāya* and *Yoga* passages believed to refute Buddhist doctrines and I must reserve their discussion for a different paper. The *Vedānta Sūtras* and Śābara seem to belong to a period before the time of Nāgārjuna but after some kind of *viññāna-vāda* had been evolved.

But this seems to launch us in a chronological difficulty. It is almost universally believed that *Vijñāna-vāda* is later than *Sūnya-vāda*². But is there any justification for such a view? We know that the

¹ The colourless Sūtra सर्वथानुपपत्तेश्च (32) sums up all that has gone before and does not refute the Mādhyamika doctrines, as Rāmānuja and Śrīkaṇṭha suppose.

² Yamakami Sogen, *op. cit.*, p. 186, Keith, *Buddhist Philosophy*, pp. 228, 230-1, Stecherbatsky, quoted by Jacobi in *J.A.O.S.*, *op. cit.*, p. 4. Keith, however, is not categorical in his view. Compare also Belvalkar's remarks on this question in his *Brahmasūtras*, 2nd. ed., Notes, p. 155.

Mahāyānaśraddhotpāda, ascribed to Aśvaghoṣa, who is two generations earlier than Nāgārjuna,¹ teaches the *viññāna-vāda*². People often reject the tradition of Aśvaghoṣa's authorship of the work on the ground of the alleged impossibility of *viññānavāda* doctrines before Aśaṅga and Vasubandhu³. But this impossibility is a mere assumption. A more cogent ground for doubting Aśvaghoṣa's authorship of this idealistic book would be the tradition that he helped in the redaction of the great *Vibhāṣā* on the Sūtras of the realistic Sarvāstivāda school⁴. But there is no inherent difficulty in believing that Aśvaghoṣa, once a sturdy Sarvāstivādin, later developed idealistic doctrines. The case of the conversion to Mahāyāna (of the Yogācāra school) of the (Sarvāstivādin) Hinayānist brothers, Aśaṅga and Vasubandhu, will be recalled by scholars⁵. We should note that Paramārtha in his *Life of Vasubandhu* does not say that Aśaṅga or Vasubandhu were the *founders* of the Viññāna-vāda, nor does Bu-ston say any such thing in his *History of Buddhism in India and Tibet*⁶. Besides the *Mahāyānaśraddhotpāda*, we have enough of idealism in

³ Anesaki also doubts the ascription of this work to the author of the *Buddhacarita* (*ERE*, II 159 b and 160a), though he does not state any grounds. Can it be the same work on *mokṣa*, which, Aśvaghoṣa says, he composed before the *Samudarananda* (Bib. Ind., p. 126)?

⁴ See Paramārtha's *Life of Vasubandhu*, translated by J. Takakusu, *T'oung-pao*, 1904, pp. 12-13. Rev. Rāhula Sāṅkṛityāyana notes in *JBORS*, Vol. XXI, 1935, p. 8, that the colophon of a Palm Leaf Sanskrit Manuscript in Tibet, containing a commentary by Aśvaghoṣa on some Sūtra of the Sarvāstivāda, mentions the author as *sarvāstivādī*.

⁵ Paramārtha's *Life of Vasubandhu*, pp. 7-9 and 24-26.

⁶ *Ibid.*, pp. 24 ff, Bu-ston, *History of Buddhism in India and Tibet*, Obermiller's translation, part 2, pp. 136-147. Anesaki admits that Aśaṅga was converted to idealism (*ERE* II 62a). That means, 'idealism' existed before him.

the *Laṅkāvatāra*¹, which may be earlier than even Aśvaghoṣa, for all that we know. The *Laṅkāvatāra* and the *Mahāyānaśraddhotpāda*, both mention the *ālaya-vijñāna*², of which Śābara seems quite innocent. Lastly, we find in Vasumitra's *Treatise on the Points of Contention by the Different Schools of Buddhism*, a book that was translated into Chinese sometime between 351 and 431 A.D.³ and whose author is believed to have been a contemporary of Aśvaghoṣa of c. 100 A.D.⁴, actually mentions a *Prajñapti-vāda* school which issued from the Mahāsaṅghika sect in the second century after Buddha's Nirvāṇa⁵. The text says that according to this *Prajñaptivāda* school, 'The twelve *āyatana*s are not real (entities)'⁶. The twelve *āyatana*s are, as Masuda points out, 'the six organs of sense and the six objects of sense.'⁷ We have thus *Vijñāna-vāda* doctrines several centuries before Asaṅga and Vasubandhu, even if we do not take as strictly correct the date given by Vasumitra (2nd century after Buddha). The doctrine of *ālaya-vijñāna* of which Vasubandhu gives very effective exposition seems also to have been borrowed from the old Mahāsaṅghika and Vātsīputriya schools⁸. Consequently the current notion that there was no Buddhist *vijñāna-vāda* before Asaṅga and Vasubandhu is without any foundation. They seem to have inaugurated only the

classical period of the Vijñānavāda school. There was also a school of *sarvāsūnya-vāda* in the Hīnayāna before the Mādhyamikas, viz., the Satyasiddhi school¹.

All this shows that the common practice of dating any work of Hindu philosophy which mentions any sort of *vijñāna-vāda* as necessarily later than the time of Asaṅga or Vasubandhu², simply on that account, is based on very wrong notions and the sooner we abandon it, the better for a correct view of Indian chronology.

THE NAKSATRAS OR THE CONSTELLATIONS IN JAINA ASTRONOMY

Dr. SUKUMAR RANJAN DAS, *Calcutta.*

The Jaina astronomers throughout employ twenty-eight nakṣatras of unequal extent, while the Vedāṅga, as well as the bulk of the later astronomical literature, makes use of twenty-seven nakṣatras of equal extent. With the Jainas the nakṣatras begin with Abhijit. The nakṣatras or constellations are divided into four classes. Firstly, there are those with which the moon is in conjunction during one ahorātra or thirty muhūrtas; to this class belong (1) Revatī, Aśvinī, Kṛttikā, Mṛgaśīras, Puṣya, Maghā, Pūrvaphalgunī, Hasta, Citrā, Anurādhā, Mūlā, Pūrvāṣāḍhā, Śravaṇa, Śraviṣṭhā and Pūrvabhādrapada. The one ahorātra for which the conjunction lasts may be expressed as $\frac{2019}{67}$ muhūrtas. The second class comprises those nakṣatras which are in conjunction with the moon for half an ahorātra = fifteen muhūrtas = $\frac{1005}{67}$ muhūrtas; to this class belong Śatabhiṣaj, Aśleṣā, Bharanī, Jyesthā, Ārdrā and Svātī. To the third division belong those nakṣatras with which the moon is in conjunction for one and a half ahorātra = forty-five muhūrtas = $\frac{3015}{67}$ muhūrtas; these nakṣatras are Uttarāṣāḍhā, Uttaraphalgunī, Uttarabhādrapada, Punarvasu, Viśākhā and Rohiṇī. The fourth division comprises one nakṣatra only, viz., Abhijit with which the moon is in conjunction for $9\frac{27}{67} = \frac{630}{67}$ muhūrtas. The reason for this is as follows:—The simā-viṣkambha or the diameter of the Abhijit circle is 630 in terms of muhūrta. This when divided by sixty-seven nakṣatra

months of a yuga is equal to $\frac{630}{67} = 9\frac{27}{67}$. Accordingly it is stated that the Abhijit remains with the moon $\frac{630}{67} \div 30$ or $3\frac{1}{3}$ parts of a day.

The nakṣatras are either "pūrvabhāga" *i.e.*, such as enter into conjunction with the moon during the forenoon; or "paścādbhāga" *i.e.*, such as enter into conjunction during the afternoon, or "naktambhāga" *i.e.*, such as enter into conjunction during the night, or "ubhayabhāga". The nakṣatras of the two first classes are called samakṣetras, those of the third class the apārdhakṣetras, those of the fourth class, the dvyardhakṣetras. Sūryaprajñapti says that Abhijit and Śravaṇa are paścādbhāga samakṣetra. To this the commentator, Malayagiri, objects that Abhijit is neither samakṣetra, since it occupies only $9\frac{27}{67}$ muhūrtas of the moon's periodical revolution, nor paścādbhāga, since at the beginning of the yuga the moon enters into conjunction with it in the early morning. However, the commentator goes on to explain that Abhijit and Śravaṇa, after having finished their conjunction with the moon, hand her over to Dhanīsthā at evening—Abhijit-śravaṇau dve nakṣatre sāyaṃ samayād ārabhya ekāṃ rātrim ekaṃca sātirekaṃ divasaṃ candreṇa sārḍhaṃ yogaṃ yuñktaḥ, etāvantāṃ kālāṃ yogaṃ yuktvā tadanantaraṃ yogamanuparivartayataḥ ātmanaś cyavayataḥ, yogaṃ cānuparivartya sāyaṃ divasasya katitame paścādbhāge candraṃ dhanīsthāyāḥ, samarpayataḥ. For this reason Dhanīsthā is also paścādbhāga. After having been in conjunction with it for thirty muhūrtas the moon enters Śatabhiṣaj at the time when the stars have already become visible (pariṣphuṭanakṣatramaṇḍalāvaloke); Śatabhiṣaj is, therefore, naktambhāga. Śatabhiṣaj being apārdhakṣetra, the moon remains in conjunction with it for fifteen muhūrtas only and enters on the next morning with Pūrva-proṣṭhapada, which being samakṣetra remains in conjunction during one ahorātra. On the following morning the moon

enters Uttarapros̥thapada, which, therefore, would be pūrvabhāga. But the matter is looked at in a different light. Uttarapros̥thapada is dvyardhakṣetra, i.e., remains in conjunction for forty-five muhūrtas. If we now deduct from this duration the fifteen first muhūrtas and imagine Uttarapros̥thapada to be samakṣetra, the conjunction of the moon with it may be said to take place at night and in consequence, the real one conjunction takes place during the day and the other fictitious conjunction takes place at night; therefore the nakṣatra is called ubhayabhāga: idaṃ kilottarabhādrapadākhyam nakṣatram uktaprakāreṇa prātas candreṇa saha yogam adhigacchati, kevalam prathamān pañcaviṃśa muhūrtān adhikān apanīya samakṣetram kalpayitvā yadā yogaś cintyate tadā naktam api yogo'stītyubhayabhāgam avaseyam. Uttarabhādrapada remains in conjunction for one day, one night and again one day, on the evening of which the moon enters Revatī; Revatī is therefore paścādbhāga. After it has remained in conjunction for one ahorātra the moon passes into Aśvinī at evening time. Aśvinī is therefore also paścādbhāga. From it the moon passes on the next evening into Bharanī, at the time, however, when the stars have become visible and when night may be said to have begun; Bharanī is therefore naktambhāga. Being at the same time apārdhakṣetra, the moon leaves it on the next morning to enter Kṛttikā, which, therefore, is pūrvabhāga. On the next morning the moon enters Rohiṇī which is dvyardhakṣetra and, on account of that, ubhayabhāga. As the moon enters Mṛgaśīras forty-five muhūrtas later at evening that nakṣatra is paścādbhāga; Ārdra which enters into conjunction thirty muhūrtas later when the stars have come out, is naktambhāga. Punarvasu into which the moon enters on the next morning, being dvyardha, is ubhayabhāga. Puṣya comes into conjunction on the evening of the following day and is paścādbhāga; Aśleṣā comes into con-

junction thirty muhūrtas later, when the stars have come out, and is naktambhāga; Maghā and Pūrvaphalgunī into which the moon enters into conjunction on the mornings of the two following days are pūrvabhāga; on the morning after that Uttaraphalgunī comes into conjunction and is ubhayabhāga, because it is dvyardhakṣetra; Hasta and Citrā enter into conjunction on the evenings of the two following days, before night has set in, and are therefore Paścādbhāga. Then again follows one naktambhāga nakṣatra, viz., Svātī which enters into conjunction after nightfall, and upon this a dvyardhakṣetra and consequently ubhayabhāga nakṣatra, viz., Viśākhā. Then comes Anurādhā which is paścādbhāga, after this Jyeṣṭhā, apārdhakṣetra and naktambhāga, remaining in conjunction from nightfall to the morning only; after this two samakṣetra and pūrvabhāga nakṣatras, viz., Mūla and Pūrvāṣāḍhā. Finally Uttarāṣāḍhā, which enters into conjunction on the morning, is, as a dvyardhakṣetra, reckoned among the ubhayabhāga. It remains in conjunction for one ahorātra and the following day, in whose evening the moon arrives at Abhijit whence she had started a periodical month ago.

Again the nakṣatras or constellations are divided into four classes according to their union with the sun. Firstly, there is one constellation, viz., Abhijit, which lasts in union with the sun for four days and six muhūrtas. The rule regulating the combination of the constellations with the sun is as follows:—“Jaṃ rikhaṃ javayiye vajjayi chandena bhaga sattatthi tam paṇa bhage rāyindivassa sūrena tavayiye”—“That constellation which unites with the moon for a number of sixtyseventh divisions of a whole day, the same constellation unites with the sun for one-fifth of so many days and nights”. For instance, Abhijit combines with the moon for twenty-one times of one-sixtyseventh division of a whole day, therefore Abhijit remains with the sun for one-fifth of twenty-one days or four days and six

muhūrtas. Secondly, there are six constellations which remain in union with the sun for six days and twentyone muhūrtas, for each of them remains with the moon for $\frac{33\frac{1}{2}}{67}$ part of a day and night. Hence one-fifth of $33\frac{1}{2} = \frac{67}{2} \div 5 =$ six days and twentyone muhūrtas. These are Śatabhiṣaj, Bharanī, Ārdrā, Aślesā, Svāti and Jyesthā. The third division comprises those nakṣatras which combine with the moon for complete 67 parts and therefore combine with the sun for one-fifth of sixtyseven parts, i. e., thirteen days and twelve muhūrtas. To the fourth class belong those which unite with the moon for fortyfive muhūrtas or $\frac{30\frac{1}{2}}{67 \times 30}$ parts of a day and therefore unite with the sun for $\frac{1}{5}$ of $\frac{30\frac{1}{2}}{30} = \frac{60\frac{1}{2}}{30}$ days or 20 days and three muhūrtas.

The nakṣatras are again divided into kulas (houses), upakulas (apparent houses), and kulopakulas (petty apparent houses). There are twelve kula constellations, twelve upakulas and four kulopakulas. Those like Śravisthā, Bhādrapada, Āśvinī, etc., which complete a lunar month are kulas; those which nearly complete the month are upakulas; and those, like Abhijit, Pūrvabhādrapada, Śatabhiṣaj and Anurādhā, which are far removed from the moon at the close of corresponding months, are kulopakulas.

The names of months terminating with full moons (and also new moons) in particular constellations are derived from corresponding constellations. There are twelve full moons and twelve new moons, as Śravisthī, Prauṣṭhapadī, etc. Śravisthī is that which takes place in Śrāvaṇa month and Prauṣṭhapadī is that which takes place in Bhādrapada month. Likewise Āśvayujī is that which occurs in the month of Āśvayuk. It is to be noted that as many as three constellations may alternately unite with the moon to make a full or new moon; for example, Abhijit, Śrāvaṇa, Dhanisthā may come in contact with the

moon to make the full moon of Śraviṣṭhī month. Abhijit, however, does not at all combine with the moon ; still, because it is so near the Śravaṇa star, it is also considered as making that particular full or new moon.

Now, to determine the constellation in which a particular new moon takes place, it is necessary to ascertain the Parva constant called Parva Dhruva rāśi. Since in the course of 62 synodical months or 124 parvas — one synodical month being equal to 2 parvas — the sun performs five sidereal circuits, i. e., there are five sidereal years in one yuga, then in two parvas, i. e., in one synodical month, the sun performs $5\frac{32}{67}$ circuits. Now $27\frac{1}{67}$ is the duration in ahorātras of the periodical month, or the extent of the nakṣatras, 27 entire nakṣatras plus the fractional nakṣatra Abhijit which is $\frac{1}{67}$ part of each nakṣatra. Therefore $5\frac{32}{67}$ circuits $= \frac{19}{24} \times 27\frac{1}{67}$ day circuits $= \frac{19}{24} \times 1830$ day circuits $= \frac{9150}{62} \times 30$ muhūrtas $= 66$ muhūrtas $+ \frac{5}{62} + \frac{1}{62 \times 67}$ muhūrtas. This is the Parva constant.

If now the place of the moon at any new moon or full moon (amāvasyā or pūrṇamāsī) is wanted, the above quantity has to be multiplied by the number of the parva ; for instance, by one if the moon's place at the first full moon after the beginning of the yuga is wanted. The product shows how far the moon at the time has advanced beyond the place she had occupied at the beginning of the yuga, if full moons are concerned, beyond the place she had occupied at the new moon preceding the beginning of the yuga, if new moons are concerned (the new moon immediately antecedent to the beginning of the yuga having been selected as the starting point for all calculations concerning new moons). So far the place of the moon is expressed in muhūrtas only ; now in order to find from these the nakṣatra in which the moon stands at the time, we should have to deduct from the muhūrtas found

the extent of all the nakṣatras through which the moon has passed one after the other, until the sum would be exhausted.

The nakṣatra corrections vary with each nakṣatra. They are as follows :—

For Punarvasu it is 22 muhūrtas and $\frac{4}{6}\frac{6}{2}$ of a muhūrta.

For constellations from Punarvasu to Uttaraphalgunī it is 172 muhūrtas + $\frac{4}{6}\frac{6}{2}$ of a muhūrta.

For constellations from Uttaraphalgunī to Viśākhā it is 292 muhūrtas + $\frac{4}{6}\frac{6}{2}$ of a muhūrta.

For constellations from Viśākhā to Uttarāṣādhā it is 442 muhūrtas + $\frac{4}{6}\frac{6}{2}$ of a muhūrta.

The correction is thus obtained :

If in 124 parvas the sun completes five sidereal circuits, then in one parva there will be $\frac{5}{124} \times 1830$ day circuits = $\frac{4}{6}\frac{5}{2}\frac{5}{2}$ day circuits = $\frac{4}{6}\frac{5}{2}\frac{5}{2}$ day sidereal circuits. Now $\frac{2}{6}\frac{3}{7}$ of muhūrta parts of Puṣyā unite with the sun in the final parva of the previous yuga. This is to be deducted from the above. That is $\frac{4}{6}\frac{5}{2}\frac{5}{2}\frac{5}{2} - \frac{2}{6}\frac{3}{7} = \frac{3}{6}\frac{1}{2}\frac{4}{9}\frac{9}{7}$ day sidereal circuits = $\frac{3}{6}\frac{1}{2}\frac{4}{9}\frac{9}{7} \times 30 = \frac{9}{6}\frac{4}{2}\frac{4}{2}\frac{7}{6}\frac{9}{7}$ muhūrta sidereal circuits = 22 muhūrtas and $\frac{4}{6}\frac{6}{2}$ of a muhūrta. This is the correction (or Śodhanaka) for Punarvasu constellation. Then for Abhijit it is 9 muhūrtas and $\frac{2}{6}\frac{4}{2}$ of a muhūrta and $\frac{6}{6}\frac{6}{7}$ of 62nd of a muhūrta, for Proṣṭhapada 159 muhūrtas, for Uttarabhādrapada 159 muhūrtas. Then for stars up to the end of Rohiṇī it is 309 muhūrtas, for stars up to the end of Punarvasu 399 muhūrtas, for stars up to the end of Uttaraphalgunī 519 muhūrtas, for stars up to the end of Viśākhā 669 muhūrtas, for stars up to the end of Mūlā 744 muhūrtas, and for stars up to the end of Uttarāṣādhā 819 muhūrtas. In all these, $\frac{2}{6}\frac{4}{2}$ of a muhūrta and $\frac{6}{6}\frac{6}{7}$ of 62nd part of a muhūrta are also to

be included. Thus the constant (parva dhruva-rāśi), viz., 66 muhūrtas, 5 sixty-secondths of a muhūrta and $\frac{1}{67}$ of sixty-secondth of a muhūrta, multiplied by the number of the new moon in question minus the two corrections will give the particular constellation from Abhijit, in which the new moon happens.

Likewise to ascertain the constellation making a full moon, the same constant is to be multiplied by the number of the full moon and the correction from Abhijit to the end of Uttarāśādhā should be applied but not the correction from Punarvasu and onward (*i e.*, the first correction).

If it is questioned where the first Śraviṣṭhī new moon happens, the procedure is as follows:—

The constant is $66 + \frac{5}{62} + \frac{1}{67 \times 62}$, which multiplied by one is the same. Then deduct from it Punarvasu correction $22 + \frac{45}{62}$ m. The remainder is $43 + \frac{21}{62} + \frac{1}{67 \times 62}$ m. Then deduct 30 muhūrtas of Puṣyā. The remainder is $13 + \frac{21}{62} + \frac{1}{67 \times 62}$ m. Aśleṣā being of half union area its space comes to 15 muhūrtas. Hence when $1 + \frac{40}{62} + \frac{66}{67} + \frac{1}{62}$ remain in Aśleṣā, the first Amāvāsyā is completed.

For the second Śraviṣṭhī new moon, the constant is multiplied by 13. (The constant is multiplied by 13 since the second Śraviṣṭhī moon is the thirteenth from the first.)

Then the corrections are made as follows :-

$(66 + \frac{5}{62} + \frac{1}{67 \times 62}) \times 13 = 858 + \frac{65}{62} + \frac{13}{67 \times 62}$. Then deduct $442 + \frac{45}{62}$ being the correction up to Uttarāśādhā. The remainder is $416 + \frac{19}{62} + \frac{13}{67 \times 62}$. Then deduct $399 + \frac{24}{62} + \frac{66}{67 \times 62}$, being the correction up to Punarvasu from the above. Then remain $16 + \frac{56}{62} + \frac{14}{67 \times 62}$. Hence in Puṣyā the new moon occurs when there remains 16 muhūrtas and $\frac{56}{62} + \frac{14}{67 \times 62}$ of a muhūrta in that constellation,

For the third new moon in Śraviṣṭhā multiply the constant by 25. The result is $1650 + \frac{125}{62} + \frac{25}{67 \times 62}$. Deduct $442 + \frac{46}{62}$, being the correction up to Uttarāṣādhā from the above. The remainder is $1208 + \frac{79}{62} + \frac{25}{67 \times 62}$. Deduct again $819 + \frac{24}{62} + \frac{66}{67 \times 62}$, being one sidereal circuit. The remainder is $389 + \frac{54}{62} + \frac{26}{67 \times 62}$. Then deduct $309 + \frac{24}{62} + \frac{66}{67 \times 62}$, being the circuit correction from Abhijit to Rohiṇī. Then deduct 30 muhūrtas for Mṛgaśīras and 15 for Ārdṛā. Then when $35 + \frac{29}{62} + \frac{27}{67 \times 62}$ muhūrtas are elapsed in Punarvasu, the third Śraviṣṭhī new moon happens.

Likewise the fourth new moon occurs when $\frac{7}{62} + \frac{41}{67 \times 62}$ muhūrtas have elapsed in Aśleṣā and the fifth new moon when $3 + \frac{42}{62} + \frac{54}{67 \times 62}$ muhūrtas have passed in Pūṣyā.

Prausthapadī new moon happens in Maghā, Pūrvaphalgunī or Uttaraphalgunī. The first occurs when $4 + \frac{26}{62} + \frac{2}{67 \times 62}$ have elapsed in Uttaraphalgunī. The second occurs when $7 + \frac{61}{62} + \frac{15}{67 \times 62}$ have elapsed in Pūrvaphalgunī and the third when $11 + \frac{34}{62} + \frac{28}{67 \times 62}$ have elapsed in Maghā.

The Āśvayujī new moon occurs in Uttaraphalgunī, Hastā, or Citṛā. The first occurs when $25 + \frac{31}{62} + \frac{3}{67 \times 62}$ have elapsed in Hastā, the second when $44 + \frac{4}{62} + \frac{15}{67 \times 62}$ have elapsed in Uttaraphalgunī and the third when $17 + \frac{39}{62} + \frac{29}{67 \times 62}$ have passed in Hastā. And so on for the new moons.

Now in what nakṣatra does the first full moon Śraviṣṭhī get completion? The constant is $66 + \frac{5}{62} + \frac{1}{67 \times 62}$. Multiplied by one it is the same. Deduct from it $9 + \frac{24}{62} + \frac{66}{67 \times 62}$, being the correction for Abhijit. The remainder is $56 + \frac{42}{62} + \frac{2}{67 \times 62}$. Then deduct the 30 muhūrtas of Śravaṇā. This will give $56 + \frac{42}{62} + \frac{2}{67 \times 62} - 30 = 26 + \frac{42}{62} + \frac{2}{67 \times 62}$. This again when deducted from 30 muhūrtas of Dhanīṣṭhā will give $\{30 - (26 + \frac{42}{62} + \frac{2}{67 \times 62})\} = 3 + \frac{19}{62} + \frac{55}{67 \times 62}$. That is, when 3 muhūrtas, $\frac{59}{62}$ of a muhūrta and $\frac{65}{67}$ of the 62nd part of a muhūrta remain in Śravaṇā, then the full moon happens.

Now, if the question is where the second Śraviṣṭhī full

moon gets completion, the answer is this : The constant is $66 + \frac{5}{62} + \frac{1}{67 \times 62}$. Multiply this by 13. (The constant is multiplied by 13 since the second full moon in Śraviṣṭhā is the thirteenth from the first). The result is $858 + \frac{85}{62} + \frac{13}{67 \times 62}$. Now deduct from this $819 + \frac{24}{62} + \frac{66}{67 \times 62}$, which is equal to one sidereal circuit. The remainder is $39 + \frac{49}{62} + \frac{14}{67 \times 62}$. Deduct from this the correction for Abhijit which is equal to $9 + \frac{24}{62} + \frac{66}{67 \times 62}$. The result is $30 + \frac{15}{62} + \frac{15}{67 \times 62}$. From this deduct 30 muhūrtas of Śravaṇā. This gives $\frac{15}{62} + \frac{15}{67 \times 62}$. Then when $30 - (\frac{15}{62} + \frac{15}{67 \times 62}) = 29 + \frac{46}{62} + \frac{52}{67 \times 62}$ muhūrtas remain in Dhanīṣṭhā, the second full moon is completed. Likewise for the third Śraviṣṭhī full moon. It is the twentyfifth full moon from the first one. Hence multiply the constant $66 + \frac{5}{62} + \frac{1}{67 \times 62}$ by 25. This gives $1650 + \frac{125}{62} + \frac{25}{67 \times 62}$. Deduct from this $(819 + \frac{24}{62} + \frac{66}{67 \times 62}) \times 2$, being two sidereal circuits. Then the remainder is $12 + \frac{75}{62} + \frac{22}{67 \times 62}$. Then apply Abhijit correction, which is $9 + \frac{24}{62} + \frac{66}{67 \times 62}$. The result is $(12 + \frac{75}{62} + \frac{22}{67 \times 62}) - (9 + \frac{24}{62} + \frac{66}{67 \times 62}) = 3 + \frac{50}{62} + \frac{28}{67 \times 62}$, i.e., when $30 - (3 + \frac{50}{62} + \frac{28}{67 \times 62})$ or $26 + \frac{11}{62} + \frac{39}{67 \times 62}$ muhūrtas remain in Śravaṇā the third full moon is completed. Likewise, the fourth full moon happens when $16 + \frac{33}{62} + \frac{25}{67 \times 62}$ muhūrtas remain in Dhanīṣṭhā. Thus Śraviṣṭhī full moon happens either in Śravaṇā or in Dhanīṣṭhā.

Likewise, Bhādrapadī full moon happens in Śatabhiṣaj, Proṣṭhapada, or in Uttaraproṣṭhapada. The first full moon happens either when $27 + \frac{14}{62} + \frac{64}{67 \times 62}$ remain in Uttarabhādrapada, the second when $8 + \frac{41}{62} + \frac{51}{67 \times 62}$ remain in Pūrvabhādrapada and the third when $5 + \frac{6}{62} + \frac{28}{67 \times 62}$ remain in Śatabhiṣaj.

Likewise, the first Āśvayujī full moon happens when $21 + \frac{63}{67 \times 62}$ remain in Āśvinī, the second full moon when $17 + \frac{36}{62} + \frac{50}{67 \times 62}$ remain in Revatī and the third when $11 + \frac{1}{62} + \frac{37}{67 \times 62}$ remain in Uttarbhādrapada. And so on.

A REFERENCE TO THE MAHĀNĀTAKA

DR. S. K. DE, M.A., D. LITT.,

Head of the Department of Sanskrit, Dacca University.

In the recently published *Bhāra-prakāśana* of Śāradātanaya (Gaekwad's Oriental Series, No. xlv, Baroda 1930), there is an interesting reference to a somewhat peculiar classification of the Nāṭaka said to have been given by an older writer on Dramaturgy named Subandhu; and in this connexion the *Mahānāṭaka* is cited as an illustration of one of the varieties of the Nāṭaka. As Śāradātanaya belonged in all probability to the first half of the 13th century, it would be interesting to draw attention to this reference to the *Mahānāṭaka* in connexion with my previous studies on the subject in the *IHQ*, vii (1931), pp. 537f.

Śāradātanaya informs us that Subandhu classified the Nāṭaka type of Sanskrit drama into five kinds; and from his account it seems that the distinctions rested chiefly upon the Vṛttis and Rasas employed and the peculiar Sandhis or dramatic junctures adopted in each. These Sandhis correspond to the five generally recognised Sandhis of Mukha (Opening or Protasis), Pratinukha (Progression or Epitasis), Garbha (Development or Catastasis), Vimarśa (Pause or Peripeteia) and Nirvahaṇa (Conclusion or Catastrophe); but they are differently designated and sometimes differently defined in each case. As Śāradātanaya's summary of Subandhu's classification is merely incidental and necessarily brief, and as some of the plays which are cited as examples of the different kinds are no longer existing, it is not easy to make out the

distinctions fully and clearly; but there is enough to indicate generally Subandhu's notion of the character of the different types of the Nāṭaka.

The five classes of the Nāṭaka, in Subandhu's opinion, are respectively called Pūrṇa (Complete), Praśānta (Tranquil), Bhāsvara (Brilliant), Lalita (Sportive) and Samagra (Entire), these names being obviously meant to be descriptive. The Pūrṇa or Complete kind contains all the five orthodox Sandhis of Mukha etc., and it is possibly meant to include the usual or normal type of the Nāṭaka. A drama entitled the *Kṛtyārāṇa*, which is known to us only from such incidental references in dramaturgic and rhetorical works, is given as an example of the Pūrṇa type. The chief characteristic of the Praśānta is that the Quietistic Sentiment or the Praśānta Rasa is abundant (*bhūyiṣṭha*) in it, and the dramatic Vṛtti here, according to Drahiṇi, is Sātvatī. The *Svapnavāsavadattā* is taken as representing this type. Although the predominant sentiment in such a theme as the story of Udayana and Vāsavadattā would be the Erotic or Śṛṅgāra, the Nirveda-Vyabhicārin involved in it is obviously regarded as important enough, being often raised to the relish of the corresponding Praśānta Rasa. This type of the Nāṭaka also contains five Sandhis, respectively called Nyāsa, Nyāsa-samudbheda, Bijokti, Bija-darśana and Anuddiṣṭa-saṃhāra. These are not clearly defined, but they are illustrated by means of the different episodes of the play which is cited as a typical specimen. The Nyāsa and Nyāsa-samudbheda apparently correspond to Mukha and Pratimukha, but the idea as well as the designation is obviously deduced from the opening episodes of the *nyāsa* or deposit of Vāsavadattā and its consequence in the illustrative play itself. The Bijokti appears to consist of the episode of the hero's anxious repetition of the heroine's name on half-recognition (*utkaṇṭhitena sodvegam bijoktir nāma-kīrtanam*), like

“Come, O Vāsavadattā, where, where are you going” (*ehi vāsavadatte kva kva yāsityādi drśyate*). The Bijadarśana is the natural development of this episode and consists of the mutual search of the hero and the heroine, who are indeed thrown together but who are still without access to each other (*sahāvasthītagor eka-prāptyaṅyasya gavesanam*). But the last Sandhi, the Anuddiṣṭa-saṁhāra, seems to consist of nothing more than the mere non-mention, at the end of the drama, of the usual prefatory words to the Bharata-vākya viz., *kim te bhūyaḥ priyam kuryām*.

In the Bhāsvara Nāṭaka, of which the *Bāla-rāmāyaṇa* is taken as typical, the dramatic Vṛtti is Bhārati and the sentiments prescribed are the Heroic (Vīra) and Wonderful (Adbhuta). The five Sandhis in it are called respectively Mālā, Nāyaka-siddhāṅga, Glāni, Parikṣaya and Mātrāvaśiṣṭa-saṁhāra, all of which again are deduced from an analysis of the particular illustrative play. The Mālā consists of the opposing of the well reputed hero by an equally powerful rival (Pratipakṣa), but the example cited is not that of Rāma and Rāvaṇa, but, curiously enough, that of Candragupta and Candana. The next Sandhi occurs when the object of the rival hero is for the time being fulfilled by practising deception on the hero, as in the case of Rāvaṇa’s employment of Mārīca. The description of the Glāni Sandhi is not clear, but it appears to consist of the attainment of partial success by the hero, for the illustration given is the episode of the surrounding of Laṅkā by the Monkey-host after crossing the ocean. The Parikṣaya occurs when there is a partial setback through the temporary overpowering of the hero, such as the episode of the binding of Rāma and Lakṣmaṇa by Nāga-pāśa. The somewhat clumsily named last Sandhi of the Bhāsvara type of the Nāṭaka is also not defined, but it is described, with the example of the fire-ordeal of Sītā, as the testing of the

heroine who had been imprisoned by the enemy after the denouement of the enemy's destruction.

The dramatic Vṛtti in the Lalita type of the Nāṭaka is Kaiśikī, and the only permissible sentiment is the Erotic or Śṛṅgāra. An unknown *Urvaśi-vipralambha*, which probably closely followed Kālidāsa's well known *Troṭaka* on the same theme, is cited an example of this kind. The five Sandhis are respectively named Vilāsa, Vipralambha, Viprayoga, Viśodhana and Uddiṣṭārthopasaṃhāra, the nomenclature being obviously derived from that of the different stages or aspects of the course of Love as a sentiment. The Vilāsa is the episode of the erotic enjoyment of the hero suitable to the various seasons (e.g., Vasantotsava). The Vipralambha is separation of the young couple, which may be either voluntary or may occur through jealousy. The Viprayoga consists of involuntary separation, through curse etc., of a temporary character. The Pariśodhana is the removal of a stain or obloquy, such as Rāma's purification of Sītā by the fire-ordeal. It is curious to note, however, that the illustrations of these four kinds of Sandhis in the Lalita Nāṭaka are drawn not from the illustrative play, *Urvaśi-vipralambha*, but by a reference to some incidents in the stories of Vatsarāja, Yayāti and Rāma. The last Sandhi, Utsrṣṭārthopasaṃhāra, however, refers directly to the story of Urvaśi, and is said to consist of such happy conclusion as indicated by the message of Indra to Urvaśi permitting her to remain on earth as a wife to Purūravas.

The fifth kind of the Nāṭaka, *viz.* the Samagra, is rather vaguely defined. It is said to possess all the dramatic Vṛttis fully developed (*sarva-vṛtti-viniṣpannam*) and all the technical Nāṭaka-lakṣaṇas (*sarva-lakṣaṇa-saṃyutam*), but there are formal requirements of a somewhat conventional nature. The *Mahānāṭaka* is cited as an example of this

kind, but it is not shown how far this play conforms to the requirements of the definition. As a matter of fact, Śāradātanaya does not think it necessary to devote more than one short stanza or two lines to this type of the Nāṭaka, and it is not clear in what way the *Mahānāṭaka* can be regarded as a representative of this indefinitely defined type of the Nāṭaka. But he adds at the conclusion of his treatment that in the Samagra Nāṭaka are to be found the various characteristics of all the types of the Nāṭaka (*sarreṣāṃ yatra rūpāṇi dṛśyante vicitrhāni ca*). This remark, no doubt, applies in a general way to the *Mahānāṭaka* as we know it, which is chiefly a compilation from different known and unknown Rāma-dramas ; but it does not bring out the essential character of the play itself. It is also difficult from the meagre account to conclude with confidence that the present *Mahānāṭaka* was at all meant by Śāradātanaya or Subandhu. A further remark is added : *nāṭakam nṛttacārākhyaṃ* (v. l. *nṛttavārākhyaṃ*) *tat samagram ilīritam* ; but it is not clear whether this sentence means that the Samagra type of the Nāṭaka was also known by the name of Nṛttacāra Nāṭaka, or, as the editor of the *Bhāra-prakāśana* takes it, Nṛttacāra was the name of a specific play which is also given as an example of the Samagra Nāṭaka. At any rate, if the latter interpretation is correct, it does not help us very much, for we have unfortunately no information, here or elsewhere, about this play.

It is clear from the above account that Subandhu's classification has the merit of distinguishing Nāṭakas on the basis of their underlying sentiments and employment of dramatic modes ; but it can hardly be taken as possessing any great interest or importance from the point of view of Sanskrit dramatic theory. Subandhu is also peculiar in inventing special Sandhis for his different types ; but it

appears that these Sandhis consist of nothing more than certain characteristics deduced from the episodes of some well known dramas, and as such can scarcely be generalised into clearly marked differentiating principles of the employment of dramatic junctures in the Nāṭaka. It is also a pity that Śāradātanaya could not say more about the Samagra type and illustrate it in connexion with the *Mahā-nāṭaka* which he cites as a typical specimen of this variety. What he actually says is too indefinite to be of any use for conclusions regarding his views about this play. But it is highly probable, even from his meagre account, that the *Mahānāṭaka* known to him was probably different from the drama of the same name which now exists; and even if it be conceded that it were the same, the drama probably existed in a different form in his time, for there is nothing to warrant our taking the extant play as representative of what is conceived to be the Samagra variety of the Nāṭaka.

ARE THE SĀMĀKHYA AND THE NYĀYA-VAIŚE- ŚIKA REALISTIC?

DR. A. B. DHRUVA, M.A., D.LIT.,

Emeritus Professor of Sanskrit, Benares Hindu University

It is usual to characterize the Sāṃkhya and the Nyāya-Vaiśeṣika—two of the most influential schools of Indian metaphysics—as ‘realistic.’ But are they so? A categorical answer to this question it may be hazardous to give without first defining what we mean by “realistic.” This, however, would be a long process worthy of an elaborately worked-out thesis, rather than of a short article designed for a Commemoration Volume. I shall, therefore, start with the assumption that we all have a fairly correct idea of what is “real” as opposed to the “ideal”; and so I go straight to the problem—how far is the external world a creation of, or dependent upon, me or my mind, in the two systems of Indian Philosophy mentioned above?

I

That the Nyāya-Vaiśeṣika should have been regarded as ‘realistic’ is not surprising, although this view, too, on careful scrutiny, will be found to be in certain respects erroneous. But it is difficult to understand why the Sāṃkhya should be described as ‘realistic’ and set in opposition to Vedānta which is described as ‘idealistic.’

The ‘Puruṣa’ of the Sāṃkhya is, in truth, transcendental; that is to say, he stands or rather ought to stand, aloof from the stream of Prakṛti, with which he confounds himself and thereby makes himself, apparently at any rate, an empirical entity. Prakṛti is the fountain-head of cosmic evolution, the root-cause of the empirical

world which in the Sāṃkhya system includes much more than the world of external reality. The first emergent evolute of Prakṛti, which is the active or dynamic principle of the evolution of all empirical reality, is “ Mahat ”—the Great Principle, *viz.*, Intelligence, which is at the root of the Universe, but is still unindividualised. The next step in the emergent evolution is ‘ Ahaṃkāra ’ or Egoism. From Ahaṃkāra there springs the ‘ group of the Sixteen,’ *viz.*, the five senses of perception, the five organs of bodily activity, ‘ manas ’ or mind, and the five ‘ tanmātras ’ or pure and unmixed principles (what others call “ qualities ”— śabda, sparśa, rūpa, rasa and gandha) which when combined in different proportions give rise to Pañca-Mahābhūtas, the five ‘ great kinds of matter.’

Here observe : The whole world of empirical reality proceeds from Prakṛti. Now, whatever be the original sense of Prakṛti—it may well be root-nature—there is no doubt that when the earlier speculations became crystallized in the Sāṃkhya system as sketched in the later chapters of the Mahā-Bhārata and in Sāṃkhya Kārikās, Prakṛti was understood as the permanent possibility of ‘ sukha,’ ‘ duḥkha ’ and ‘ moha ’, also of ‘ jñāna,’ ‘ kriyā ’ and ‘ jādya.’ Thus the whole world of experience is an outcome of Puruṣa confounding himself with this permanent possibility of pleasure, pain and dulness, of knowledge, action and inertness. While the ordinary “ idealist,” whether intellectual or spiritual, regards the so-called world of reality not as the cause but as the product of the ‘ Idea,’ the Sāṃkhya regards it as the product of Passion, taking the word in its widest sense, that of being affected by the permanent possibility and ever-changing activity of the empirical world, which in its ultimate analysis, consists of sukha, duḥkha and moha. or jñāna, kriyā and jādya. Be it noted that the empirical

world is here conceived not as the source of sukha etc., or the object of jñāna etc., but as the expression or embodiment of those very realities which in other systems are regarded as its effects. If this is “adharottaram” (no idealist will admit that it is so), it is no more so than in those other systems which are universally recognized as “idealistic”, such as those of Plato, Vasiṣṭha, Śāṅkara, etc.

“Mahat-Tattva” or the Great Principle of Intelligence unindividualized, which contains the possibility of the nexa evolute, *viz.*, Ahaṁkāra or Egoism, *i.e.*, the sense of personal individuality, and personal individuality itself are made the precursors of man’s empirical life which consists of the working of his senses and his mind, which in their turn demand the world of matter and have it.

Thus, the evolution of the Sāṁkhya system proceeds from *within* to *without*. It is hardly correct to characterize such a system as “realistic.” It may be argued against this view, that the Sāṁkhya system is not materialistic, yet it is realistic, inasmuch as it posits Prakṛti not as a creation of Puruṣa, but as an independent reality. This is no doubt true, and it is precisely this that gives the Sāṁkhya doctrine the semblance of Realism. But a deeper scrutiny will show that this involves a misapprehension. We should have felt justified in regarding the Sāṁkhya as a system of Realism, had its Prakṛti been connected *directly* with external reality. But it is not so. Here the whole ideal world consisting of Intelligence, Personality and Mind is interposed between Prakṛti and the external world, which necessitates the conclusion that it is more correctly described as Idealism than as Realism. Secondly, the Prakṛti, too, is conceived not as a permanent possibility of the external world, but first and foremost, as that of sukha, duḥkha and moha

or jñāna, kriyā and jādyā—which unmistakably marks it off as a type, though a unique type, of Idealism.

II

What about the Nyāya-Vaiśeṣika? It is no doubt realistic, so far as its first three padārthas, Dravya, Guṇa and Karman are concerned.

But the same can hardly be said, without a certain qualification, about the remaining categories, *viz.* Sāmānya, Viśeṣa and Samavāya. One crucial question should suffice to clear up the position: How is it that “Sattā” which must mean existence, real existence and nothing else, is predicated of dravya, guṇa and karman only? Later Naiyāyikas will glibly quote:

(१) व्यक्तेरभेदस्तुल्यत्वं सङ्करोऽथानवस्थितिः ।

रूपहानिरसम्बन्धो जातिबाधकसंग्रहः ॥

(२) द्रव्यादित्रिकवृत्तिस्तु सत्ता परतयोन्यते ।

But how do the quotations help? Let us go behind the quotations, and try to understand the position. Three stages in the history of Vaiśeṣika thought are here clearly discernible. In the first stage, only three categories were recognized as objectively real, Sāmānya and Viśeṣa being regarded as *logical* categories only. This is evident from the fact that what was Sāmānya with reference to the individuals of a group was at the same time understood to be Viśeṣa with reference to the individuals of a different group. Moreover, it is distinctly stated by the author of the Vaiśeṣika Sūtras that the idea is logical (बुद्ध्यपेक्षम्), that is, to use the nomenclature of Mediæval European Philosophy, it possesses “conceptual” as distinguished from “real” existence. In the next stage of the Nyāya-Vaiśeṣika school, the “conceptual existence” of Sāmānya and Viśeṣa was elevated to the position of “real” existence, provided certain conditions were

fulfilled. These are summed up, in the case of Sāmānya, in the famous verse व्यक्तेरभेदः etc. It is easy to see how these are just those conditions which Sāmānya must fulfil if it is to obtain a place in the world of objective reality. Similarly, every Viśeṣa is not objectively real, but only those which cannot be explained except by assuming that they possess objective reality. Sāmānya, similarly, is a hypothetical category assumed to explain the peculiar relation of Guṇa, Karman, Sāmānya, Viśeṣa and Avayavin with their substratum. Similarly, Abhāva, too, like Sāmānya, Viśeṣa and Samavāya, does not possess "Sattā" or full reality, but only an upādhi. In the third stage of the history of the Nyāya-Vaiśeṣika school, distinction between the reality of Dravya, Guṇa and Karman, and the ideality of Sāmānya, Viśeṣa, etc., is discarded and conceptual and hypothetical reality is treated on a par with objective and categorical reality, so that all the padārthas are regarded as equally real. The peculiar doctrine of 'Sattā' residing in Dravya, Guṇa and Karman, which was at first not a dogma but a thoroughly intelligible proposition, is the sole survivor of the original partial Idealism, or if you prefer, the more correct characterization, Conceptualism.

THE SITUATION OF RĀVAṆA'S LĀNKĀ

THE LATE RAJ BAHADUR DR. HIRALAL, B.A., D.LITT.

It is a somewhat curious event that Ceylon should have been credited with the seat of Rāvaṇa's capital for centuries together, in spite of the clear indications of its situation, which the Vālmīki Rāmāyaṇa and the Purāṇas afford. The point attracted the attention of various scholars years ago with the result that they with cogent reasons discredited the popular belief so deeply rooted and endeavoured to lay the scene of Rāvaṇa's activities in places so far apart as Assam, Maldives and Malaya Peninsula. All these have however presented difficulties, which cannot be easily explained. A new theory, however, started about 15 years ago locating Lāṅkā on the Amarakaṇṭaka peak of the Mekala range of the Vindhya mountains in Central India appears to be the most natural one and shows that Rāma who was banished for 14 years to live in jungles spent the whole of that time in Chitrakūṭa and the adjoining Daṇḍaka forests without going out of it during the whole period of his exile. It was in that forest that his wife Sītā was abducted by Rāvaṇa and it was within its limits that the great battle between him and Rāma took place, with the help of the leading aboriginal tribes inhabiting that wild region. Apparently the latter was divided into several *Janapadas*, a glimpse of which may be obtained from the Matsya¹ and Vāyu Purāṇas. Amongst the dwellers

¹ मालवाश्च करुषाश्च मेकलाश्चोत्कलैः सह ।
औण्ड्रा माषा दशार्णाश्च भोजाः किष्किन्धकैः सह ॥५२॥
स्तोशला कोसलाश्चैव त्रैपुरा वैदिशास्तथा ।
तुमुरास्तुम्बराश्चैव पद्गमा नैषधैः सह ॥५३॥

of the Vindhya mountains (विन्ध्यपृष्ठनिवासिनः) the mention of the Mekalas and the Kishkindhakas is very important in view of the part they played in the Rāmāyaṇa. The identification of these *Janapadas* was never critically examined, especially that of the latter, which in fact furnished the key to the location of Rāvaṇa's habitat. The cue was taken not from the Purāṇas referred to above, but from the statement of the Vālmīki Rāmāyaṇa itself, which Rao Bahadur Sardar Madhava Rao Kibe of Indore was the first to detect. He pointed out that Sugrīva, the Lord of Kishkindhā, while giving instructions to his Vānaras to go in all directions in search of Sītā after her abduction ordered the party going to the south to look well into the Narmadā, the Godāvarī, Mekhala, Utkala and a host of other rivers, mountains and countries.² From this the conclusion was unavoidable that Kishkindhā, the residence of Sugrīva, whence the order was delivered, lay to the north of the Narmadā. The Matsya and Vāyu Purāṇas corroborate this location, in that Kishkindhā was associated with Mekhala or Mekala, still going by that name and described in the latest Imperial Gazetteer as 'a range of hills in the Central Provinces and Central India. It is the connecting hill between the great hill system of the Vindhyas

अरूपाःशौण्डिकेराश्च वीतिहोत्रा अवन्तयः ।

एते जनपदाः ख्याता विन्ध्यपृष्ठनिवासिनः ॥५४॥

—Matsya Purāṇa, Chapter 113.

These very ślokas are found in Chapter 45 of the Vāyu Purāṇa (see verses 132 to 134) with slight variations due to misreading of the text.

² सहस्रशिरसं विन्ध्यं नानाद्रुमलतायुतम् ।

नर्मदां च नदीं रम्यां महोरगनिषेविताम् ॥८॥

ततो गोदावरीं रम्यां कृष्णां वेणीं महानदीम् ।

—Vālmīki Rāmāyaṇa, Kishkindhā Kāṇḍa, Sarga 41.

and Satpuras forming respectively the northern and southern walls of the Narmadā valley. Starting in the Khairāgarh state of the Central Provinces, the range runs in a general south-easterly direction for the first 46 miles in the British territory and then entering the Sohagpur pargana of Rewah state, terminates 84 miles farther at Amarakaṇṭaka, one of the most sacred places in India, where the source of the Narmadā river is situated. Unlike the two great ranges which it connects, the Mekala forms a broad plateau of 880 square miles in extent, mostly forest country inhabited by Gonds.' 'Local tradition relates that in the 4th and 5th centuries A.D., during the Gupta rule, this plateau was highly populated and the Rāmāyaṇa and the Purāṇas mention the Mekalas as a tribe of the Vindhya range.' With the Mekalas thus identified it is now easy to find out the position of Kishkindhā somewhere in the Bilaspur district, as it was almost contiguous to the former. This explodes the popular belief that Kishkindhā lay on the banks of the Tungabhadra near the famous Vijayanagara, bordering on the southern-most corner of the Nizam's dominions, some 500 miles away to the south of the Narmadā. The whole of the Vindhya mountains and forests, in fact the whole of the Daṇḍakāranya which covered a major part of the present Central Provinces was inhabited by aboriginal tribes, chief of whom were the Gonds, the Oraons and the Śabaras, of which the last find mention even in the Vedic literature. Gonds exceed 20 lakhs in the Central Provinces alone and are closely connected with Rāvaṇa, to whom they trace their origin. In the Census of 1891, when sub-castes were ordered to be recorded, several lakhs of Gonds returned themselves as Rāvaṇa-vaṁśis and the greatest Gond king who ruled about 400 years ago inscribed his name on gold coins as "Śri Sangrāma Shāh, Paulastya-vaṁśa," thus mention-

ing prominently his connection with Rāvaṇa, as Paulastya-vaṁśa is an alternative name for Rāvaṇa-vaṁśa. Eaters of offal of almost every kind including kine, which they even up to day kill by way of an offering to the manes of their dead and do not hesitate to use cows for ploughing, which is extremely repugnant to the Hindus, combined with shocking uncleanness, as they still in certain wild tracts continue to clean with a stone without using any water after easing themselves, there is nothing to wonder at the Aryans calling Goṇḍas as Rākshasas or demons. This was accentuated by their personal deformity, which was aggravated by their ornaments of horns, which they still use by way of decoration in the Bastar state on occasions of rejoicings, dances, etc. So it is clear that Rāvaṇa was the king of these Rākshasas, which attendant circumstances confirm. For instance, Rāvaṇa had his armies stationed in the Daṇḍakāraṇya under Khara and Dūshaṇa and even his female relative like Śūrpaṇakhā and Tāḍakā were found wandering in that jungle, whose audacity compelled Rāma to engage with them. If Rāvaṇa had no connection with Daṇḍakāraṇya and lived in Ceylon why should the royal ladies and armies have been found tramping a forest like this? Daṇḍakāraṇya was not the frontier of his kingdom, which, if it was Ceylon according to the popular belief, was over 800 miles away from the island and there is absolutely no proof that the intervening Madras Presidency and Nizam's dominions were ever under his sway.

The fact that he was called king of Laṅkā has been the source of all the confusion in locating his capital and country. Laṅkā really means a high place, an elevated ground and as such an island. It is still found used in this sense in the Uriya and Telugu countries. The peak of a mountain is as much a *laṅkā* as an island in the sea.

Therefore there is nothing inappropriate in calling the highest peak of the Mekala range, *viz.*, Amarakaṇṭaka as Laṅkā, which finds a mention even in aboriginal songs.³ For instance, the Korkus found only in the Betul and adjoining Amraoti districts, speaking a Muṇḍāri language, sing a song the purport of which is:—"Rāvaṇa has come from Laṅkā and is standing on the village wrestling ground, 'Mothers and sisters! come out and see.' 'We have no proper ornaments and clothes, how are we to come out?'" The implication is that Rāvaṇa being their king, they could not appear before him without proper dress and ornaments. Had he been a foreigner, they would not have cared to observe such an etiquette. It is curious that in these tracts an annual ceremony called Meghanāda, after the name of Rāvaṇa's son, is still performed and is reminiscent of the cruelties of the Crown Prince. "It consists in swinging a man in the air. A high pole is erected and a cross-bar turning in a socket is secured to the top of it . . . The Bhumkā (village priest) is tied to the cross-bar and ropes are secured to it and held by the people, who pull the cross-bar round five times in a circle in its socket. In former times the Bhumkā was swung round suspended by a hook fixed in his back and the ceremony is supposed to exercise an important influence in the direction of securing the success of the crops.⁴ Many persons who wish to get issues or similar other objects undergo a similar ordeal, which is now toned down to a mockery and of which the underlying idea was the performance of a penance whose efficacy increased in proportion of its severity. Hook-swinging seems to have originated from Meghanāda,

³ For the actual song and its translation see Linguistic Survey of India: Gramophone records of Languages and Dialects spoken in the Central Provinces and Berar, supplied by the Central Provinces and Berar Administration, 1920, pp. 24-25.

⁴ Russell's Betul District Gazetteer, pp. 56-57.

whose name it continues to bear. Close to the Betul district where Korkus of Muṇḍā origin (and as such predecessors of the Dravidian people like Goṇḍs) live, lies the district of Nimar with a sacred place Māndhātā on the banks of the Narmadā, which has been identified with Māhishmatī, the capital of Sahasrārjuna Kārtavīrya, who was a contemporary of Rāvaṇa. The former had once captured the latter and kept him bound for a considerable period. He finally let him go on the intervention of others. This points to quarrels which usually arise between neighbouring states and incidentally indicates the western limit of Rāvaṇa's kingdom.

Now let us examine the question with reference to the wanderings of Rāma and their indications. On leaving Ayodhyā Rāma went to Chitrakūṭa and stayed there for some time before entering the Daṇḍaka forest, which lay to the south of Chitrakūṭa. He proceeded from one Ṛishi's *āśrama* to another Ṛishi's, until he reached Sutīkshṇa's hermitage where he stayed for some time, as apparently he had a liking for it, in as much as he returned to it once more after an absence of several years. On leaving it a second time he proceeded to Agastya's *āśrama*, which was only 5 or 6 *Yojanas* away. There he was shown a suitable place for dwelling at Pañchavaṭī on the Godāvarī, only about two *Yojanas* from Agastya's hermitage. Rāma's party built a hut at Pañchavaṭī, from where Sītā was later on abducted by Rāvaṇa. From the distances and indications given in the Rāmāyaṇa it is clear that Sutīkshṇa's *āśrama* lay about 30 miles from Chitrakūṭa and Pañchavaṭī was 48 miles further on. Kishkindhā was situated 18 miles still further. Thus the distance from Chitrakūṭa to Kishkindhā could not have been more than a hundred miles. This tallies well with the description given in

the Rāmāyaṇa, that Sītā was carried by air route weeping and throwing out ornaments and clothes which were picked up at Kishkindhā and shown to Rāma, when he reached there in search of his wife. The one difficulty which presents itself in this connection is the absence of the Godāvarī, in the tract where Pañchavaṭī stood, 18 miles to the north of Kishkindhā. It is this which led to its location at Nasik or Parṇasālā in the Bastar state, the latter situated just on the bank of the Godāvarī, separating it from the Nizam's dominions. With this location Kishkindhā had to be placed at the southern end of the Haidarābād state in order to justify the course of events, which followed the abduction of Sītā as narrated in the Rāmāyaṇa. But this was all unnecessary in view of the fact, that there is still a Godāvarī, 11 miles from Chitrakūṭa, which has now lost itself in a well, like the Sarasvatī which originally flowed up to Allahabad joining the Ganges and Jammā at the Trivenī, but has now lost itself in the sands of Rajputana. It is very probable that the Godāvarī of Chitrakūṭa flowed past the Pañchavaṭī or a grove of five banyan trees where Rāma built his hut and subsequently changed its course and accidentally fell into a pit or well. It thus carried its waters through some sub-terranean passage to some unknown place. Its former channel during the march of centuries of course disappeared and the river thus became *gupta* (hidden), which its present name "Gupta Godāvarī" most appropriately represents. The great Godāvarī passing through Nasik and Parṇasālā is situated about 400 miles away from Agastya's *āśrama*, which was within 10 miles of Pañchavaṭī.

Another difficulty which oppresses the minds of the diehards is the absence of a *Sāgara* over which Rāma built a bridge to reach Laṅkā. The nearest *Sāgara* in the sense of a sea to the south is the Indian Ocean which

necessitated Laṅkā to be placed on the Ceylon or Siṃhala island, though Varāha-mihira and others clearly mention them as two distinct *dvīpas*. The last designation seems to them to further confirm their notion as they think a *dvīpa* cannot exist out of the sea. But both these ideas are incorrect. A *sāgara* does not necessarily mean a sea. It is also applied to any big reservoir of water, tank or lake, for instance, the *Kirāta-sāgara* of Mahobā, a tank built by Chandellās, the *Lachhamana-sāgara* of Bilahri, excavated by a Kalachari Rājā, whose name it bears, the *Sāgara* or tank which has given its name to a town and district in the northern-most corner of the Central Provinces and so on. Amarakaṇṭaka even at the present day retains a big marsh on its southern scarp, while on the northern side there are marks of ripples formed on the rocks showing the existence of long standing water contact there. Geological investigations show that formerly a sea existed separating Northern India from the southern peninsula, of which the Rajputana desert is shown to be a remnant. But whether this sea existed or not during Rāma's time there can be no doubt about the existence of a large collection of water on the northern side of Amarakaṇṭaka peak, while the southern side, was protected by marshes, etc., and the eastern by the sea-like expanse of the Son river which rises from the peak it protected. Any of these apparently could not be crossed over without the help of a bridge. Rāma was compelled to build one in order to reach Laṅkā. It is worthy of note that Amarakaṇṭaka abuts on the Chhattisgarh Division of the Central Provinces. The latter is a land of water, full of tanks of which, 1400 existed in its former capital. Many have disappeared, but they have left names which are significant, like Mahāsamunda (Head-quarters of a tahsil of that name in the Raipur district). Nearer to Amara-

kaṇṭaka than Mahāsamunda lies the Lavana *parganā* with low lands suggesting its reclamation from water-clogged area, which may have been a part of the traditional Lavaṇa Sāgara, within which Laṅkā was traditionally situated. Again a *dvīpa* in the Indian sense did not connote land surrounded on all sides by water, for instance, Śaka-dvīpa was an inland tract, the Jambudvīpa was bounded on its north side by a mountain, and so on. *Dvīpa* used for Laṅkā on the Amaraṇṭaka derived as it is from a source meaning anything surrounded by water on two sides, would thus satisfy the susceptibilities of even a scrupulous Sanskritist, though it is not necessary to do so, in view of the explanation given before.

Having now explained the main difficulties which one has to face at the out-set, and having shown that Laṅkā was really “कुम्ध्ये” or in the centre of land as stated by Varāha-mihira and not in the sea, I will now proceed to identify the local tribes that took part in the fight between Rāma and Rāvaṇa. These as I have indicated before were Rākshasas or Goṇḍas on the one side and Oraons and Śabarās on the other, whom Rāma took into his confidence. The whole country belonged to the Goṇḍas, once called Goṇḍwānā after them. Their number exceeds 20 lakhs in the Central Provinces alone. To these must be added those living in the Rewa state in which Amaraṇṭaka is situated. The Vānaras are the present day Oraons who inhabit the neighbouring Bilaspur district and adjoining states and number about 9 lakhs. They are apparently the Bandarwas, who were described by Sir Richard Jenkins, Resident at the Court of the Rājā of Nagpur in 1827 A.D., as residing in the hilly and woody country near Ratanpur (in the Bilaspur district). Says Sir Richard “They go entirely naked, are armed with bows and arrows, never build any huts,

or seek other shelter than that afforded by the jungles." Sir Charles Grant in his Gazetteer of the Central Provinces 1872 (see p. 108) wrote that "a sub-division of them was addicted to living up the trees and to wandering about, both men and women, in a state of nature." The renowned anthropologist Rai Bahadur Sarat Chandra Roy of Ranchi who has written a big monograph on Oraons also holds the same view that their ancestors were the Vānaras of the Rāmāyaṇa. Their language shows that they are a Dravidian people like Goṇḍṣ. But they had a very strong reason to join Rāma's forces in view of the fact that Rāma had helped their chief Sugrīva in getting the Kishkindhā throne. Śabarās numbering about 6 lakhs belong to the Muṇḍā stock and were ascendant before the Dravidians. They were apparently ousted by the Goṇḍṣ and were looking forward for an opportunity to wreak vengeance on their old enemies. This was afforded by Rāma's visit to Daṇḍaka, for which they eagerly waited, as is evident from the devotion displayed by Śabarī, a woman of their tribe, who made preparations to welcome Rāma long before he reached her place, and received him with a warmth which secured for her the high honour of a Bhakta.

We have seen why the Oraons were classed as monkeys, but it is not known why Śabarās were put down as Rikshas or bears, unless it was due to the comparative darkness of their colour accompanied with a comparative exuberance of hair on their bodies. It may be noted here that horns and tails assigned to the tribal people were not totally a myth. They really formed a part of the equipment of soldiers or warriors, as is still found to be the case amongst the Nāgās of Assam. Mr. Hodson's account of the latter will convince any sceptic on these points. He writes "On gala days the costume of a warrior is most handsome. The cane helmet which is sometimes

covered with tiger or leopard skin bears a brass disc in front and thin crescents of buffalo horn tipped with red hair are fastened to it in front. I have seen a red and yellow painted structure made of thin lath worn on the helmet rising at least 2 feet above the peak of the cane helmet. This looks like a pair of horns which it may be intended to imitate. From the sides hang solid wooden discs decorated with red seeds, with the wings of the green beetle and with pendants of hair which also fringe the helmet at the back The most curious ornament on these occasions is the caudal appendage with its curve upwards and a long hair fringe of the usual colours . . . The " tail " serves as a useful purpose, for it has a space hollowed out in which *pangis* (sharpened bamboo spikes) are kept by the warriors."⁵

ÆSTHETIC “ SATKĀRYAVĀDA ”

K. A. SUBRAHMANIA IYER, M.A.,

*Head of the Department of Sanskrit,
Lucknow University.*

While studying Alaṅkāraśāstra, one often forms the impression that the śāstra is mainly concerned with the creation of the parts of a literary composition and has only stray and casual remarks to offer regarding the unification of these parts into a whole. One gets the impression that the critic, whether he be an ālaṅkārika or a mere commentator, is mainly conscious of the individual stanza, which is the unit of a literary composition. The alaṅkāraśāstra, from its beginning till almost the present day, has much to say about the individual stanza. It has tried to set up a high standard of beauty for its workmanship. To the question : when is a stanza beautiful ? different answers can be given from the point of view of the different schools of alaṅkāraśāstra. The sounds which go to make up a stanza, the meanings of the words entering into its composition, the sentiments which it evokes in us, the metres in which it can be composed, all this has been minutely analysed and definite opinions have been expressed as to what is good and what is bad, what is beautiful and what is ugly.

But a literary work only begins with the stanza or, if it is in prose, with the paragraph. Until the stanzas or paragraphs have been knit together into a whole, forming a Mahākāvya or Khaṇḍakāvya or Kathā or Cāmpū or Nāṭaka, as the case may be, the creation of the work is not over. It is obvious that unless this unification is carried out well, the work will be spoiled. Parts, in

themselves beautiful, cannot form a beautiful whole, unless they are strung together beautifully. It is only natural therefore that literary criticism should take up the question : when can the unification, the stringing together of the parts be said to be beautiful? It would be wrong to say that the *ālaṅkāraśāstra*, using the word in its widest sense, so as to include *Nāṭyaśāstra* also, does not contain any ideas on the subject. It would be strange indeed if it did not. It can, however, be maintained without fear of contradiction that this question did not occupy such a large place in the critical consciousness of our *ālaṅkārikas*, as that of the creation of the parts.

Ideas on the subject are, however, found either explicitly stated or implied in the rules and remarks made by the *ālaṅkārikas* or commentators. The object of this paper is *not* to put all such ideas together and build up a system out of them. All that I wish to do is to draw the attention of the reader to *one* such idea, which is sometimes explicitly stated, but much more often implied in the practice of the authors and in the remarks of critics. I believe that the value of this idea for the understanding and appreciation of Sanskrit literary works has not yet been sufficiently stressed.

The question might be stated as follows : The history of Sanskrit literature reveals the development of different species of literature : Popular Epics, Court Epics, Drama, Prose Romance, Historical Romance, Fables, Hymns, etc. All these different varieties of literature imply putting together of parts, in other words, composition. What is the principle which is considered essential or at least important in this art of the unification of the parts, the principle which, if not observed, would make the work defective?

The earliest answer to this question is found in the *Nāṭyaśāstra* of Bharata, in the theory of the five *Sandhis*

and their aṅgas. The theory is set forth rather elaborately in Bharata's work, which the later writers follow. Bharata had chiefly, if not exclusively, the drama in mind. The details of the theory are not of a very great interest. The main principle underlying the whole theory is that of *unity of action*. The hero wants to achieve a definite purpose (ārambha) and makes a determined effort (prayatna). Success seems, at first, possible (prāptyāśā) and then becomes certain (niyatāpti) and finally the object is attained (phalāgama). Corresponding to these five states of mind of the hero, the drama should have five divisions or junctures, mukha (opening), pratimukha (progression), garbha (development), vimarśa (pause), and nirvahaṇa (conclusion). The drama should reflect, in the development of its plot, the stages through which the human mind naturally passes in the achievement of an object and herein lies the unity of action. Everything must be subordinate to the “*dénouement*” of the drama. Whether the details of this theory relate to the essentials of a drama or only to its accidental features may be disputed; but it cannot be denied that the main principle is based on truth.

Though Bharata had only the drama in mind when he propounded this principle of unity, it was very soon extended to other kinds of literature also. Dhvanyāloka III, 10—14 enunciate the principles by following which a composition taken as a whole (prabandha) can be made suggestive of the sentiments (rasa) and no distinction is there made between a drama and other kinds of literature. One of these principles is the judicious combination of the Sandhis and their aṅgas, with a view to evoke the right kind of sentiment in the minds of readers or spectators.

संधिसंध्यङ्गघटनं रसाभिव्यक्त्यपेक्षया ।

न तु केवलया शास्त्रस्थितिसंपादनेच्छया ॥

Similarly, while defining a *Sargabandha*, Viśvanātha, the author of the *Sāhityadarpaṇa*, explicitly extends the principle of the Sandhis to this kind of literature. He says :—

शृङ्गारवीरशान्तानामेकोऽङ्गी रस उच्यते ।

अङ्गानि सर्वेऽपि रसाः सर्वे नाटकसंघयः ॥

Kuntaka also, while discussing *prabandhavakratā* refers to the *Śiśupālavadha* in connection with the use of the Sandhis.¹

In addition to this main principle of the Sandhis, certain dramatic devices, required by theory and used by all writers, are also connected with unity of action. I have chiefly the *Patākāsthānaka* of a drama in mind. Bharata recognises four varieties of it, all of which are mentioned in such a late work as *Sāhityadarpaṇa*.² Each one is an indication, by means of an ambiguous speech or situation, of what is coming. It is recognised that such a device can be made use of at any stage in the development of a drama. In other words, the theory provides that, at different stages in the development of a drama, the spectator's interest must be aroused and kept alive by giving him an indication of what is coming. Sometimes this is done by an equivocal speech. Words having more than one meaning are used, one meaning being applicable to the context and the other giving an indication of what is coming. When, in *Veṇīsaṃhāra* II, Duryodhana is told that the fierce (bhīma) wind has broken his standard, it is an indication of the breaking of his thigh by Bhīma. When in Act III of the *Śākuntala*, Priyamvadā tells the female Cakravāka to bid farewell to her spouse, it is an indication of the coming separation of the king and Śākuntalā. Sometimes it is

¹ *Vakroktijīvita*, p. 238 (Calcutta Oriental Series No. 8).

² *Bharata-Nāṭyaśāstra*, XXI, 31—35 (Benares Edition).

an ambiguous situation that foreshadows the future. When in Ratnāvalī, Act III, the king hastens to save Vāsavadattā, as he thinks, from committing suicide and finds, to his joy and surprise, that he has saved none other than Sāgarikā, it is an indication of the coming anger of the queen.³

But Patākāsthānaka, with its varieties, is not the only device recognised by theory for giving indications to the spectator of what is coming. There is the Aṅkamukha or anticipatory scene in which, at the close of one act, a character alludes to the subject of the following act. At the end of Act II of the Mahāvīracarita. Sumantra announces the arrival of Vasiṣṭha, Viśvāmitra and Paraśurāma and these three open Act III. Still more indicative of this desire to foreshadow future events is the practice of mentioning the important characters or the subject-matter of the drama in the opening verse or *maṅgala-śloka* often by means of a play on words. The definition of *Nāndī* as अर्थतः शब्दतो वापि मनाङ्गाव्यर्थसूचनम्, often quoted in commentaries, refers to this characteristic of the opening verse. Practically all the plays attributed to Bhāsa mention the names of the characters in the opening verse, of course, with the help of a play on words. Even in the straightforward opening verse of the Uttararāmacarita, the commentator Ghanaśyāma sees a reference to Sītā and Rāma, the main characters of the drama, in the words *kalā* and *ātman*.

It is not merely in a drama that theory provides devices for the indication of coming events. Viśvanātha mentions this point in his definitions of Sargabandha and Ākhyāyikā. In his definition of Sargabandha he says :—

सर्गान्ते भाविसर्गस्य कथायाः सूचनं भवेत् ।

Sāhityadarpaṇa, p. 208 (Cal. ed.)

³ Rasārṇavasudhākara (Trivandrum Sanskrit Series) III, p. 211.

This is often the actual practice of the poets. Similarly, while defining Akhyāyikā, he says :—

अन्यापदेशेनाश्वासमुखे भाव्यर्थसूचनम् ।

Sāhityadarpaṇa, p. 210 (Cal. ed.)

In the Harṣacarita, the well-known Ākhyāyikā of Bāṇa, this is actually done. At the beginning of each *ucchāsa*, there are some verses which give an indication of what is coming.

So far we have been considering the devices provided by the theory itself for the foreshadowing of coming events in the course of the development of a literary work. But when we study the works themselves, we find that authors have not contented themselves with merely observing these devices provided by theory, nor do commentators think they have done their duty when they have pointed out such formal respect for theory on the part of writers. There seems to have been a strong tendency on the part of writers not to limit themselves in this matter. They seem to have cultivated the art of indicating coming events even when demands of theory or the exigencies of plot development did not require it. Commentators also point out such indications, even where we least expect to find them. We may not always be able to agree with them when they credit the authors with a desire to foreshadow coming events in particular passages; but their very eagerness to see such indications and to point them out with evident approval and appreciation is significant to us. It is a proof that they consider it a point of beauty in the art of developing a plot or of telling a story. And if we do not *always* agree with the commentators, we have to agree with them *sometimes*. A few examples will make our point clear.

Act I of the Uttararāmacarita ends in the banishment of Sītā, after Rāma has heard from Durmukha the

scandal about her in the country. But long before the arrival of Durmukha, the poet gives an indication of what is coming. The very first verse which Rāma utters in Act I is as follows :—

किं त्वनुष्ठाननित्यत्वं स्वातन्त्र्यमपकर्षति ।
संकटा ह्याहिताग्नीनां प्रत्यवायैर्गृहस्थता ॥

This verse, which is an explanation of the absence of Janaka and others and of their departure from Ayodhyā, is also supposed to contain an apology for Rāma's banishment of Sītā. It is supposed to suggest that in abandoning Sītā, Rāma was obeying the call of duty which had to be obeyed. If it be said that the allusion here to the coming banishment of Sītā is rather farfetched, the same cannot be said about the next sentence uttered by Sītā :—
जाणामि अज्जउत्त, किन्दु सन्दावआरिणो बन्धुअणविप्पओआ होन्ति ।
Not much subtlety is required to see that this sentence foreshadows the coming abandonment of Sītā. Nor have the commentators failed to point this out. Nārāyaṇa says in his Bhāvārthadīpikā :—अत्र गुरुबन्धुविप्रयोगा इति मातृणामरुन्धत्याश्च गमनमभिप्रेत्य कथितमिति द्रष्टव्यम् । एतच्च भाविनो विरहस्य बीजम् । Though he points out that there is here an indication of what is coming, he does not attempt to bring it under *Patākāsthānaka*.

As another illustration of this principle from the same drama might be taken the last remark of the Nāṭa in the *Prastāvanā* सर्वथा ऋषयो देवताश्च श्रेयो विधास्यन्ति । In the context where it is found, it cannot be an open reference to incidents in the development of the drama, but there can be no doubt that the poet had in mind the part which Vālmīki, the Ṛṣi, and the goddesses, Pṛthivī and Bhāgīrathī are going to play in bringing together Rāma and Sītā at the end of the drama.

We may now take a few examples from the Śākuntala of Kālidāsa. It is not possible to assert positively whether

Kālidāsa was familiar with the theory of Dhvani, as it is propounded in the Dhvanyāloka and later works. One thing is, however, certain : Kālidāsa's verses have, as a matter of fact, a remarkable power of suggestion. Even if we cannot follow some commentators in seeing all kinds of suggested meanings in some passages of the Śākuntala, it would be a mistake not to recognise that for a full understanding of Kālidāsa, it is necessary to peep behind the explicit meaning of words. When we do so, we find that the suggested meaning is often in the nature of *an anticipation of coming events*. That the power of suggestion of words can be used for foreshadowing coming events is well recognised in the definition and illustrations of *Patākāsthānaka* but when Kālidāsa uses suggestion, he not only goes beyond the needs of theory, he is also very subtle. Let us take a few examples. There are five verses in the Prastāvanā of Śākuntala, including the Nāndī-śloka. The first one या सृष्टिः etc., has been explained not merely as a prayer and benediction, but also as containing a reference to the principal events and characters of the drama. One commentator⁴ writes :—

अत्र काव्यार्थसूचनमपि व्याचक्षते । तथा हि पंचभूतात्मिकया यजमान-
रूपया तेजोविशेषात् सूर्यचन्द्ररूपया अष्टाभिरित्यष्टदिक् पालमात्रात्मिकया
तन्वा प्रपन्न ईशो राजेति कथानायकः । तथा तस्य भरतवंशादित्वं यथावत्
करादानं यज्ञाद्यनुष्ठानं राजा कालस्य कारणमिति नाट्यवेदादिप्रतिपादितगुण-
समग्रतया लोकप्रसिद्धिः प्रजानां भरणविनयाधानादिकं तासां संरक्षणं च
सप्तभिर्वाक्यैः सूच्यन्ते । अथ च येत्यादिना युवतिविषये सृष्टिराद्येव धातुरिति-
वत् लोकोत्तरस्त्रीरत्नत्वेन नायिका । विधिना गान्धर्वेण हुतं निषिक्तं
हविस्तत्तुल्यं रेतो वहतीति तस्या गान्धर्वो गर्भश्च । होत्रीति कण्वः । ये द्वे
स्त्रियौ कालं शापान्तकालं विधत्तः संपादयत इति सख्यौ, दुर्वासःशापमोक्षौ
च । श्रुतिविषयाः प्रसिद्धा यद्वा वेदाश्रयाः श्रुतिविषयस्य कण्वस्य वा गुणा
अप्रधानभूताः शिष्या इति यावत् । ते सहायतया यस्याः सा विश्वं विश्वा-

⁴ K. Rama Pisharoti, author of Sārārdhadīpikā on Śākuntala (Mangalodayam Press, Trichur—Cochin).

धिपं राजानं प्राप्य स्थितेत्यन्तर्वल्या नायिकायाः शार्ङ्गरवादिभिः सह राज-
सन्निधिगमनम् । यामाहुर्गित्यादिना चक्रवर्ती भरतः । यया यत्प्राप्या जनाः
प्राणवन्तः इति राज्ञः सपुत्रायाः प्रियाया लाभः । तनुभिः प्रकृत्यादिभिः
प्रपन्न इति तत्सम्बन्धः अवधार्ताः प्रीत्यर्थकतया नायकादेरन्ततः परमानन्द-
प्राप्तिश्च व्यज्यन्ते इति ।

I find it difficult to agree with the commentator that Kālidāsa meant to convey all this; but, as I pointed out above, that does not really matter as far as the point I want to establish is concerned. What is significant is that critics and commentators *expect* the poet to use the power of suggestion of words to foreshadow coming events. It was considered an essential principle in the art of writing, in the art of unifying the different parts of a literary composition.

The second verse is : आ परितोषान् etc. The first meaning is quite obvious : the poet expresses the hope that the spectators would appreciate his work. The same commentator, however, adds : अत्रापि विदुषां कण्वस्य प्रयोगो राज्ञो गान्धर्व इति काव्यार्थसूचनम् । Here again, I am not able to follow the commentator, but his remarks only confirm the point which I am trying to make. He assumes in the poet a constant desire to anticipate the future.

The next verse is : सुलभसलिलावगाहाः etc. The avowed purpose of this verse is to describe the summer season. After explaining it in that sense, the commentator adds : किं च कृताभिषेकस्य प्राप्ततपोवनस्य गान्धर्वसुलभशकुन्तलस्य स्वसंसर्गतदाहितशुभगर्भस्य शापमूलतद्विस्मरणस्य शापावसानप्रतिलब्ध-पुत्रकलत्रस्य नायकस्य प्रतीत्या काव्यार्थोऽप्यासूच्यते ।

This suggested meaning, if it was really intended by the author, is a very subtle one and here I am *not* prepared to say that the poet did not intend it. Why not ?

The next verse is : इसिचुंबिआइं etc. This is also a description of summer and here also, the commentator adds :— अत्रापि विश्वामित्रकामितमेनकाजनितसमुज्जितायाः शकुन्तैः

किञ्चिल्लालितायाः पुनः संजातसुभगयौवनाया मुनिकन्यकाभिराहतायाः
शकुन्तलायाः प्रतीत्या काव्यार्थः सूच्यते ।

The final remark of the Sutrādhāra in the *Prastāvanā* is :—

आर्ये सम्यगनुबोधितोऽस्मि । नन्वस्मिन् क्षणे विस्मृतं खलु मया तत्
etc. The commentator remarks :— अत्रानेन शकुन्तलाविस्मरणं
पश्चादंगुलीयदर्शनेन तत्स्मरणं चेति वक्ष्यमाणः काव्यार्थः सूच्यते ।

It is not merely in the *Prastāvanā*, i.e., at the beginning of a drama, that this takes place. It goes on right through the work.

We are now in a position to give an answer to the question which I raised at the beginning of this paper : What is the principle which is considered essential or, at least, important in this art of the unification of the parts, the principle which, if not observed, would make the work defective? The answer is : The parts must be so unified that, at every stage the poet gives the reader an idea of what is coming. The development of the story must be a progressive unfolding of what is already latent in the earlier stages. The opening must contain the climax and the ‘*dénouement*.’ The later stage must be present in the earlier stage. *The effect must be present in the cause.* This is not stated as a principle in so many words in the Śāstra, but seems to be implied in the creative activity of the authors and the critical activity of the ālaṅkārikas and the commentators. Will it be improper to give this principle the name : Aesthetic “ Satkāryavāda ”?

SOME URDU LYRICS OF TODAY

AMARANATHA JHA, M.A.

Professor of English, Allahabad University.

Urdu poetry has had a curiously chequered career. In many ways its progress reminds one of the stages through which English poetry had passed. It is of course possible to push parallelism too far; but does not Wali represent Chaucer, and does not Meer correspond to the free and generous Elizabethans? Ghalib may be said to stand for Milton, and the Augustan poets bear a resemblance to the mechanical, correct and formal school of Atish and Nasikh. Mainly as a revolt against convention a school of Urdu poets grew up, who sought inspiration from nature and familiar matter of today. Simplicity was their Keynote, and the ideal that they set before themselves was that of plain language, unadorned verse, contact with reality, absence of hyperbole, and freedom from the shackles of artificial rules. The only law is that which is capable of universal and eternal application—that which directly moves the heart and worthily animates it is good poetry. This law was recognised by the poets of Urdu once they had discovered the futility and danger and corroding influence of rules and conventions. Critics averred that a change was inevitable—according to the old scholars, a change for the worse. Gone was the glory of Urdu poetry, they said. The charm, the melody, the symbolism of poetry was all disappearing, and it would be bold, bare and base. It had fallen from its high state.

If by this kind of observation they implied that traditional Urdu poetry was to be written no more, their fears were groundless. Change of form was inevitable, was a sign of advance. But there are not wanting, today,

poets who in essentials belong to the old guard, and preserve its continuity. Even while Akbar was busy harnessing English and Hindi words into the service of Urdu, and modernising in many ways the outlook of the Urdu-reading public, he did not altogether discard the traditional methods, but used them when he found them most serviceable. He could write a verse like :

جو ذبح کرتا ہے، پر کھول دے مرے صیاد
کہ رہ نہ جائے ترپنے کی آرزو باء

or like :

حیا سے سر جھکا لینا، ادا سے مسکرا دینا
حسینوں کے لئے کیا سہل ہے بجلی گرا دینا

Then there were the lyrists—Chakbast, Hasrat, Iqbal, two of them still happily in the land of the living. I attempt in this paper to translate a few Urdu verses to demonstrate that the lyric fervour has not abated and pure poetry continues to be written. I have selected them from the published works of some poets, the name of one of whom will be familiar to my father as that of an old friend and colleague of his, now, alas, gathered to his fathers. I make no attempt to include all the leading poets of today, nor do I claim that those mentioned in the following lines are all stars of the first magnitude, judged by their work as a whole. But that at their best they have the accent of authentic poetry cannot be disputed.

Nāṣiri

ہر کس و ناکس پہ اب تم مہرباں ہونے لگے
کیا خبر تھی آہ کا ایسا اثر ہو جائے گا

Little did I anticipate how effective my sighs were to become. You have already started being kind to all and sundry.

جو کچھ آپس میں شب بھر شمع اور پروانہ کہتے ہیں
اکیلے آپ کے عاشق وہی افسانہ کہتے ہیں

What the moth and the candle say to each other the whole night long, that your lover keeps muttering to himself.

مجھکو میرا ہی دل ستاتا ہے * امتحان بارہا کیا میں نے
I have tested again and again; it's my own heart troubles me, none else.

آپ نے پروا نہ کی میں قید ہستی سے چھٹا
مہربانی ہو گئی نامہربانی آپ کی
You took no notice of me, and so I was freed from the prison-house of life. Your cruelty proved in truth a blessing, and your indifference makes me grateful.

دنیا کو حسینوں کا دیدار مبارک ہو
ہم کو تو جہاں دل ہو، اُس سمت نظر کرنا
Let the world enjoy the panorama of beauty and loveliness. For me a generous heart is worth all the beauty of the world.

اپنے بندوں پہ ظلم کرتے ہیں * ان بتوں نے نئی خدائی کی
The idols exercise a novel sort of divine right—they are cruel to their worshippers.

تجھ تک آنا ہے حرم ہو یا کہ دیر
یہ فقط سب راستے کا پھیر ہے
You are the ultimate goal. Temple and tavern are different pathways leading to the journey's end.

ہر چمن سے یوں گل و بلبل گئے
پتیوں کا اور پروں کا ڈھیر ہے
Flowers and nightingales departing left behind in the garden a heap of leaves and feathers.

سیر دریا کرنے والے! ہم بھی یاد آئے کہیں
کوئی تکرر یا سفینہ کیا لب ساحل نہ تھا

Oh, you that stroll along the river bank, do you ever remember me? Do you ever see a straggling wave breaking against the bank?

عبرت ہے شب غم میں تاروں پہ نظر کرنا
جل جل کے فنا ہونا، مر مر کے سحر کرنا

How wonderful is a sight of the stars during the night of separation? They burn themselves to death, they die many a time ere the approach of dawn.

برسات ختم ہوگئی، بادل برس گئے
رو جائے جس طرح سے کوئی دل بھرا ہوا

The rains are over, the clouds have burst—a full heart has cried itself out.

مر کے آنکھیں ہوئیں روشن، ترے جلوے دیکھے
زندگی نام تھا شاید شب تنہائی کا

After death I saw the light. Life was perhaps another name for the night of dark separation.

موت کے پردے میں پنہاں، زیست کا انجام تھا
کچھ اندھیرا بیچ میں، آگے خدا کا نام تھا

Under cover of death was hidden the goal of life: darkness for a while and then the name of God.

کبھی ترچھی نگاہیں ہیں، کبھی نیچی نگاہیں ہیں
یہی وہ تیر ہیں کرتے ہیں جو گھائل خطا ہو کر

The glance is sidelong, and then the glance is low. This dart alone can hit even when it is not straight.

نہ پوچھو کس نے مارا بے خطا یارو ادھر آؤ
دکھائیں تم کو اک تصویر اپنی چشم حیراں میں

Ask me not, my friends, who has wounded me. Come and find the answer in my eyes.

کبھی مسجد میں پکارا، کبھی بتخانے میں
ہوش کی باتیں ہیں ساری ترے دیوانے میں

Now he shouted for you in the mosque, and again in the temple. How wise is he who has turned insane for you?

ہم تو سمجھے تھے کہ دنیا سیر گاہ حسن ہے

عشق نے مارا، دھائی مالک تقدیر کی!

I had thought the world was a pleasure-ground of beauty. May Heaven protect me, Love has changed my world.

صدا لگانے ترے در پہ تو گئے تھے مگر

ہم اپنے ہی دل بیتاب کو پکار آئے

I went to your gates to cry for mercy : I only cried aloud for my own lost heart.

Jigar

واعظ نہ ذرا مجھ کو قیامت کے بیاں سے

دیکھی ہے ان آنکھوں نے قیامت کی سحر بھی

I am not frightened, oh preacher, at your account of Doomsday; for these eyes have even seen the morning after the Day of Judgment.

چمن دور، اشیاء برباد، یہ توتے ہوئے بازو

مرا کیا حال ہو، صیاد اگر مجھ کو رہا کر دے

The groves are distant, my nest is destroyed, and my wings are broken; of what avail will my freedom be to me?

سب ہو گئے اُٹھ اُٹھ کر اک بار نثار شمع

بروانوں نے کیا جانے کیا وقت سحر دیہکا

I wonder what the moths saw at dawn; one by one they all threw themselves at the feet of the lamp.

عشق میں سیر گل و لالہ ہے تمہید جنوں

چاہیے ایک بیاباں بھی گلستان کے قریب

For a lover wandering near flowers marks the beginning of insanity : it is meet that there should be an asylum near a flower-garden.

پکڑ کے لے تو چلا ہے، مگر مرا ذمہ

بنا نہ دوں جو قفس کو بھی اشیاء، صیاد

You are taking me captive, but depend on my making my cage as pleasant as my nest.

صیاد اگر ہو سننا شوخی مری زباں کی
رکھ دے قفس میں لا کر اک شاخ اشیاں کی

If you desire, oh hunter, to listen to my best notes, bring, oh bring a twig from my nest and place it near my cage.

Asghar

کیا مستیاں چمن میں ہیں دوش بہار سے
ہر شاخ گل ہے ہاتھ میں ساغر لیے ہوئے

Oh, see the intoxicating effects of the spring! Each twig has a wine-cup in its hands.

میری نگاہوں نے جھک جھک کر دیے سجدے
جہاں جہاں سے تقاضے حسن یار ہوا

Whencesoever beauty demanded worship my eyes bent low in adoration.

بہت لطیف اشارے تھے چشم بساتی کے
نہ میں ہوا، کبھی بیخود نہ ہوشیار ہوا

How glorious were the messages from the Cup-bearer's eyes. I neither lost nor retained my full senses.

کیا درد ہجر اور یہ کہا لذت وصال
اس سے بھی کچھ بلند ملی ہے نظر مجھے

Oh, talk not of the pain of separation and the pleasures of union. The glances vouchsafed to me transcend both.

خاک پروانے کی دریاں نہ کر باد صبا
یہی ممکن ہے کہ کل تک مرا افسانہ بنے

Oh spring breeze, destroy not the ashes of the moth. Who knows by tomorrow these alone may tell the world my story.

روان چمن سننا ہوں اس طرح قفس میں
چیسے کبھی آنکھوں سے گلستاں نہیں دیکھا

In my captivity I listen to the happenings in the garden
as though I had never set my eyes on it.

سنتا ہوں بڑے غور سے افسانۂ ہستی
کچھ خواب ہے، کچھ اصل ہے، کچھ طرزِ ادا ہے

How intently I listen to the story of life: It is part
dream, part reality, and part a flourish in the telling.

Chakbast

مقدر دیکھنا شبِ نم کا: پھولوں میں ہوئی پیدا
پیام آیا فنا کا جلوۂ نور سحر ہو کر

How enviable is the destiny of the dewdrop!--born among
flowers and facing death in the form of the beauty of the
morn.

Majid

دل میں میرے ہے ذوق فنا بعد مرگ بھی
کرتے وہ کاش گل مری شمع مزار کو

I have an ambition for annihilation even after I am dead.
How happy would I be if my beloved should put out the
light on my tomb!

THE RELIGIOUS ASPECT OF THE SEA-VOYAGE

RĀMABHADRA JHĀ, M.A., LL.B.

Minister of Justice, Alwar State.

The subject of ' sea-voyage ' has aroused some controversy among Sanskrit scholars of India, the orthodox section clinging to the popular belief that such voyage tends to the loss of caste. The liberal view, however, does not place it in the category of sins of such consequence. It would, therefore, be interesting to examine the texts available and see what conclusions are logical.

Before dealing with the scriptures that have a direct bearing on the subject a critic would naturally ask himself if sea-voyage was undertaken in ancient times. The first thing that occurs to him is the following stanza from the Raghuvamśa which certainly derives its authority from the Purāṇas :—

संग्रामनिर्विष्टसहस्रबाहुरष्टादशद्वीपनिखातयूपः ।

अनन्यसाधारणराजशब्दो बभूव योगी किल कर्तवीर्यः ॥

It is clear from the above that the well-known Kārtavīrya established sacrificial posts in eighteen islands and it would indeed be wrong to say that he got this done through his employees not necessarily belonging to high castes, because the function of fixing such posts devolves on the Yajamāna (the performer of the sacrifice) himself and cannot be delegated. The epithet 'अष्टादशद्वीपनिखातयूपः' is significant of the fact that the act of fixing such posts was performed by none other than himself. We know that an island is surrounded on all sides by water and it could not, therefore, have been possible to

land in any island without crossing the sea not to speak of going from island to island.

This in itself may not be fully convincing for the reason that it leaves room for supposing that Kārtavīrya might have got there by air route, but the following stanza from such a reliable authority as the Veda itself cannot fail to establish beyond doubt that sea-voyage was undertaken by the high caste people :—

तुम्रो ह भुज्युमश्विनोदमेघे रयिं न कश्चिन् ममृवां अवाहाः ।

तमूहथुनैर्भिरात्मन्वतीभिरन्तरिक्षपृष्ठिरपोदकाभिः ॥१॥

तिस्रः क्षपस्त्रिरहाति ब्रजद्विर्नासत्या भुज्युमूहथुः पतङ्गैः ।

समुद्रस्य धन्वन्नाद्रस्य पारे त्रिभी रथैः शतपद्भिः षष्ठश्वैः ॥२॥

अनारम्भणे तदवीरयेथामनास्थाने अग्रभणे समुद्रे ।

यदश्विना ऊहथुर्भुज्युमस्तं शतारित्रां नावमातस्थिवांसम् ॥३॥

(ऋक्संहिता)

There was a certain Rājarshi (Royal Sage) named Tugra. When he was greatly disturbed by his enemies residing in other islands he sent his son Bhujyu in a boat with his army to conquer them. The boat, however, capsized on account of storm in the midst of the sea. Bhujyu then readily prayed to the two, Asvins. They were pleased and took Bhujyu in their own boats to his father in three days. Does it not mean that Bhujyu undertook sea-voyage ?

Here are yet other stanzas from the Veda :—

आ यद् रुहाव वरुणश्च नावं प्र यत् समुद्रमीरयाव मध्यम् ।

अधि यदपां स्नुभिश्चराव प्रेङ्ग ईङ्गयावहै शुभे कम् ॥१॥

वसिष्ठं ह वरुणो नाव्याधादृषिं चकार स्वपामवोभिः ।

स्तोतारं विप्रः सुदिनत्वे अह्नां यान्नु यावस्ततनन्यादुषासः ॥२॥

The above lays down in unambiguous terms that the sage Vasiṣṭha himself crossed the sea.

The Mahābhārata abounds in references to the Pāṇḍavas' visiting islands, while the Rājatarāṅgiṇī mentions that the king Jayāpīḍa undertook sea-voyage :—

सान्धिविग्रहिकः सोऽथ गच्छन् पोतच्युतोऽम्बुधौ ।

प्राप पारं तिमिग्रासात् तिमिमुत्पाठ्य निर्गतः ॥

It would be interesting to observe that the instances quoted above appertain to all the four ages from Kṛita Yuga down to Kali Yuga. There is at the same time absolutely no mention made by any one of these persons having fallen from caste, or having had to undergo expiation. This being so, it cannot but be admitted that sea-voyage was undertaken in all times. In other words, it was warranted by tradition and was an approved practice. Nor is it necessary to emphasise that such practice (*sadūchāra*) has been enumerated to be one of the sources of Dharma.

It remains for us now to consider the import of texts which, as has been mentioned in the beginning, are directly related to the subject, but which being misinterpreted have caused a wide-spread misunderstanding. These are :—

समुद्रयात्रास्वीकारः कमण्डलुविधारणम् ।

द्विजानामसवर्णासु कन्यासूपयमस्तथा ॥१॥

देवराज सुतोत्पत्तिः मधुपर्के पशोर्वधः ।

मांसदानं तथा श्राद्धे वानप्रस्थाश्रमस्तथा ॥२॥

दत्ताक्षतायाः कन्यायाः पुनर्दानं परस्य च ।

दीर्घकालं ब्रह्मचर्यं नरमेधाश्वमेधकौ ॥३॥

महाप्रस्थान्गमनं गोमेधश्च तथा मखः ।

इमान् धर्मान् कलियुगे वर्ज्यानाद्दुर्मनीषिणः ॥४॥

The clear meaning is that the acts enumerated—and sea-voyage is one of them—have ceased to be treated in

Kali Yuga as religious performances. That this is the right interpretation can be easily grasped in the light of the following :—

चातुर्विद्योपपन्नस्तु विधिवद् ब्रह्मघातके ।
समुद्रसेतुगमनं प्रायश्चित्तं विनिर्दिशेत् ॥१॥
दशयोजनविस्तीर्णं शतयोजनमायतम् ।
रामचन्द्रसमादिष्टं नलसञ्चयसञ्चितम् ॥२॥

This means that one who has committed the sin of *brahmahatyā* (Brahmanical homicide) should undertake to go to sea by way of atonement. If so, it is not difficult to understand that sea-voyage which was supposed to wipe off the heinous sin of Brahmanical homicide in other ages has been denounced as an act of expiation in this Kali Yuga. But for this the word धर्मान् in the last line (*vide* इमान् धर्मान् कलियुगे etc.,) would lose its significance. So the text “समुद्रयात्रास्वीकारः” etc., does not mean simply that sea-voyage is forbidden, but that it is forbidden to be held as a prescribed remedy.

It will not only be far from truth but seriously misleading to take this text to mean that sea-voyage has been condemned as a general rule. If an act prescribed under special circumstances has been prohibited under other peculiar conditions, surely it does not mean that general prohibition of the act does follow. For that inference will be most illogical and verily against all rules of interpretation. This is why Nandanāchārya, the learned commentator on Manusmṛiti, explains it in the following terms :—

“ Sea-voyage should not be practised ‘ by way of religious performance.’ ”

This is further corroborated by the following text of Āditya Purāṇa :—

विधवायां प्रजोत्पत्तौ देवरस्य नियोजनम् ।
द्विजस्याब्धौ तु नौयातुः शोधितस्यापि संग्रहः ॥१॥

एतानि लोकगुप्त्यर्थं कलेरादौ महात्मभिः ।
निवर्तितानि कर्माणि व्यवस्थापूर्वकं बुधैः ॥

Here again the sea-voyage mentioned has been specified to be one undertaken as an atonement for sin.

(2) Let us now pass to another prohibitive text :—

समुद्रयायी वन्दी च तैलिकः कूटकारकः ।
एतान् विगर्हिताचारानुभयत्र विवर्जयेत् ॥१॥
समुद्रयायी कृतहा रथ्यासमयभेदकः ।
द्विजनिन्दारतश्चैव ते वर्ज्याः श्राद्धकर्मसु ॥२॥
श्रुतिविक्रयिणो ये च परपूर्वाः समुद्रगाः ।
असमानान् याजयन्ति पतितास्ते प्रकीर्तिताः ॥३॥

The above in the first place enumerates what people ought not to be invited to the Śrāddha (offer of oblations to the Manes). And then again the expression समुद्रयाय which grammatically has been formed by the suffix णिनि means one who goes to sea very often, that is to say, by profession and as it occurs along with वन्दी and तैलिकः (bard and oil-man) it is obvious that समुद्रयायी in this text cannot but mean one who is a sea-man by profession, say a sailor or a pearl-fisher and so forth. So this text again has a restricted meaning and cannot be quoted as an authority for prohibiting sea-voyage in general.

(3) We may now examine yet another text which is still more direct, *e.g.*,

समुद्रयानगमनं ब्राह्मणस्य न शस्यते ।
संभवेद् यदि मोहेन पुनः संस्कारमर्हति ॥

अथ पतनीयानि—समुद्रसंयानं ब्रह्मस्वन्यासापहरणं भूम्यनृत-
वदनं सर्वपण्यैर्व्यवहरणं शूद्रसेवनं यश्च शूद्रायामभिजायते तदपत्यञ्च भवति ।
तेषाञ्च निर्देशः एषामन्यतमं कृत्वा—

चतुर्थकालं मितभोजिनः स्युरपोऽभ्युपेयुः सवनानुकल्पम् । स्थाना-
सनाभ्यां विहरन्त एते त्रिभिर्वर्षैस्तदपहन्ति पापम् ॥ इति ।

The meaning is obvious. Parāśara enjoins *punaḥ-saṁskāra* (repetition of the sacramental ceremonies) to a Brahman by way of expiation, while Baudhāyana lays down certain other penances to be observed for three years for wiping off the sin of sea-voyage. The inference is apparent that sea-voyage is a sin and must be avoided. But that is not all. We have yet to reconcile the above with the other pertinent texts which are quoted below :—

पंचधा विप्रतिपत्तिर्दक्षिणतस्तथोत्तरतः । यानि दक्षिणतस्तान्यनु-
व्याख्यास्यामः । तथैतदनुपनीतेन सह भोजनं स्त्रिया सह भोजनं पर्युषित-
भोजनं मातुलसुतागमनं पितृस्वसृदुहितृगमनमिति । अथोत्तरतः ऊर्णा-
विक्रयः सीधुपानं उभयतोदद्भिर्व्यवहारः आयुधीयकं समुद्रसंयानमिति ।
तदितर इतरस्मिन् कुर्वन् दुष्यति देशप्रामाण्यात् ।

अब्रह्मचारिदाराद्यैः सार्धं भोजनकर्म च ।

मातुलादिसुतायाश्च विवाहः शिष्टसंमतः ।

एतानि दक्षिणात्यानामविगीतानि धर्मतः ॥१॥

समुद्रयानं मांसस्य भक्षणं शस्त्रजीविका ।

सीधुपानमुदीच्यानामविगीतानि धर्मतः ॥२॥

Are not these clear enough to point out that the restrictions regarding sea-voyage are confined to the Dākṣiṇātyās (residents of Southern India) alone?

Apparently, therefore, we have two views, *viz.*, one of Parāśara and Baudhāyana who point out the sea-voyage to be sinful, and the other of Vyāsa and Marīchi who have pointed out in unequivocal terms that those living in the North would not be contaminated with a sin by undertaking the voyage; and in the act of reconciling these statements we are to be guided by the rules of interpretation as laid down in the Mīmāṃsā.

Prohibition according to the same is six-fold, *viz.*,

- | | |
|--------------------------|-------------------------|
| (i) सामान्यप्रतिषेध | (ii) विशेषप्रतिषेध |
| (iii) प्रतिप्रसवप्रतिषेध | (iv) अभ्यनुज्ञाप्रतिषेध |
| (v) उपसंहारप्रतिषेध | (vi) व्यवस्थाप्रतिषेध, |

and without going into the details of all these, I may only point out that the prohibition of sea-voyage comes under the category of अभ्यनुज्ञाप्रतिषेधः. The following may be quoted as a popular instance of this class of prohibition :

(काले एव दद्यात्), “काले न दद्यात्”

This means that one reduced to poverty should not give alms. Now inspite of the fact that charity has been prohibited during indigency no giver of alms during his poverty would make himself a sinner by violating this rule of conduct in the face of yet another maxim to the contrary where it has been said that no alms can stand in comparison with a handful of saktu (fried grain powdered), “सक्तुप्रस्थस्य वो विप्रा न यज्ञः सदृशो मतः”, which form of charity is certainly recommended to one in the most indigent circumstances. So the apparently contradictory statements are reconciled if our interpretation of the prohibition काले न दद्यात् is not literal, but liberal and in keeping with the spirit of the other rule सक्तुप्रस्थस्य etc.

Similarly, then we have to understand the spirit of Parāśara and Baudhāyana in conjunction with that of Vyāsa and Marīchi and arrive at the conclusion that it is only the Southerners who have been debarred from undertaking the sea-voyage and not the Northerners. This will leave no room for doubt if we understand that the statements of Vyāsa and Marīchi serve only as supplementary and not as contradictory to those of Parāśara and Baudhāyana.

The question as to why the residents of Southern India alone were debarred from crossing the sea is natural enough. But it is not difficult to answer. We cannot shut our eyes to the hard fact that the law-givers never failed to attach proper importance to the needs of time and laid down rules of conduct that were calculated to keep the society in peaceful harmony. They knew

how to weigh the advantages and the disadvantages of a particular action and allowed or disallowed the same according as it was ultimately beneficial or detrimental. Instances are not wanting where they have made sacrifices to any extent and the fact that the marrying of a maternal uncle's daughter has been allowed as an approved custom among the Dākṣiṇātyas (residents of Southern India) may be quoted as one. There was a time when these people with the high and insurmountable barrier of the Vindhyas and without the facilities of communication had to choose between two evils, *viz.*, either to marry within the prohibited degrees or to die out as a race. The law-givers, however, saw the danger of the latter and came to their rescue by countenancing the matrimonial alliance which is certainly not only repugnant but outrageous from the stand-point of Dharma in its general aspect.

It is, therefore, just common sense to conclude that unless the residents of Southern India had some risk from which the North Indians were free in crossing the seas the scriptures could not have made this distinction; and if the geographical conditions be not lost sight of one would not hesitate in believing that in the absence of restrictions imposed the people of Southern India could have emigrated very freely to East and South Africa and the islands Sumatra, Java, etc., that were so close, and with what disastrous results it is not difficult to imagine. The temptation to pay frequent visits to these lands inhabited by the Mlechhas would have been too strong to resist and our people would have by constant association with them certainly degenerated spiritually, and what wonder if they would have become one with them, and been ultimately lost to us. The present day emigration to Africa is a concrete instance. The menace to the North Indians on the other hand was not so grave. Their visits, if any,

would have been short and the object not likely to be beyond conquering the foes, if any, and returning home. There was no apprehension of their emigration to and settlement in those lands, and that made all the difference.

The staunchest believer in Dharma would not hold that the injunctions of the Śāstras have got no principles underlying them. They are on the other hand strictly scientific and can always stand unfallacious reasoning. What is wanted is earnest application as also an unprejudiced mind, and it is not difficult to find a solution which in the present case is that sea-voyage in itself is no sin and has not been forbidden.

Note.—The writer is greatly indebted to Vidyāvāchaśpati Śrīmān Pandit Madhusudanji Ōjha whose *Pratyantaprasthānamīmāṃsā* has furnished materials for this article.

THE MARRIAGEABLE AGE OF GIRLS IN ANCIENT INDIA

P. V. KANE, M.A., LL.M.,

Advocate, High Court, Bombay.

The Child Marriage Restraint Act (Act XIX of 1929), popularly known as the Sarda Act, has excited the minds of orthodox Hindus and even of Musalmans. One may question the advisability and propriety of bringing such a piece of legislation before the composite Legislatures of our times. The present paper is not concerned with that aspect of the opposition to this Act. The principal argument of orthodox Hindus is that the Act is a serious interference with their time-honoured religious practices which are hallowed by the backing of ancient and revealed texts. Dispassionate examination of this claim is necessary in the interests of all concerned. Every brāhmaṇa is supposed to belong to one or other of the Śākhās of the four Vedas and the foundations of all his religious ceremonies are to be seen in the Śrauta and Gṛhya Sūtras of his sūtra-caraṇa. In the following an attempt is made to bring together the passages of the gṛhya and dharma sūtras and of some of the smṛtis bearing on the age of marriage for girls.

All the gṛhya and dharma sūtras prescribe that *upanayana* for a brāhmaṇa or kṣatriya should be performed at a certain definite age (*viz.*, eight and eleven respectively) and the maximum age up to which *upanayana* may be performed is also generally prescribed (*viz.*, sixteen and twenty-two respectively). It is a remarkable fact that as regards the marriage of women no such minimum and maximum limits of age are prescribed by the gṛhya and dharma sūtras. Some of them no

doubt vaguely say that they (women) should be married before puberty and others say that a girl should be married while she is 'nagnikā.' For example, Hiranyakeśi-gr. I. 19-2 "One should take as wife a girl of the same caste, but of a different gotra, who is continent and a nagnikā."¹ The commentator Mātrdatta explains 'nagnikā' as 'one who is near puberty' (āsannārtavā) and also as 'one who is fit for sexual intercourse.' The Gobhilagr̥hya III. 4.6 says "a girl that is 'nagnikā' is the best of all" (as a bride). The Gr̥hyāsamgraha which is much later than the Gobhilagr̥hya explains 'nagnikā' as one who has not yet reached puberty.² The Mānavagr̥hya I. 7-8 says "One should marry a maiden who had no sexual connection with another, who has a brother, who is of the same caste and of a different pravara, who is younger than himself, who is a nagnikā and is very beautiful."³ The commentator Aṣṭāvakra gives two explanations as 'one who has not yet reached the impulses and emotions of youth' or as 'one who looks pretty even without clothes' (joining the word to śreṣṭhām).

There are indications in the ancient gr̥hya-sūtras that girls were married generally at the time of puberty or after it. The Pāraskaragr̥hya-sūtra says "The married pair should (after marriage) not eat kṣārā⁴ (certain cereals like Māṣa, mudga etc.) and salt for three

¹ तान्यामनुज्ञातो भार्यामुपयच्छेत्सजातां नमिकां ब्रह्मचारिणीमसगोत्राम् ।
Mātrdatta says 'नमिकामासन्नार्तवाम् ।...तस्माद्ब्रह्मविच्छेपणार्हा नमिका मैथुनाहेत्यर्थः ।'

² नमिकां तु वरेत्कन्यां यावन्नर्तुमती भवेत् । ऋतुमती त्वनमिका तां प्रयच्छेत् नमिकाम् ॥...कुचहीना च नमिका ॥

³ बन्धुमतीं कन्यामस्पृष्टमैथुनामुपयच्छेत् समानवर्णामसमानप्रवरां यवीयसीं नमिकां श्रेष्ठाम् ।

⁴ 'Akṣārā-lavanāśīnau' has been explained in various ways which it is not necessary to set out here.

nights, should sleep on the ground (and not on a cot) and should not have sexual intercourse for a year, twelve nights, six nights, three nights in the last resort.”⁵ The Gobhiliya-gr̥hya II. 3·15 says “ The two (newly married couple) from that day (of marriage) should for three nights not partake of *kṣāra* and *lavana*, should be continent and should sleep on the ground together.” Similar prescriptions occur in Āśvalāyana-gr̥. I. 8·10, Āpastamba-gr̥. III. 8·89, Śāṅkhāyana-gr̥. I. 17, Mānavagr̥hya I. 14·14, Kāṭhaka-gr̥hya 30·1, Khādīra-gr̥. I. 4·9. and others. It is worthy of note that the celebrated commentator Haradatta on Āśvalāyana-gr̥hya I. 5·2 ‘*yat-tu samānam tad-akṣyāmaḥ*’ remarks “ This sūtra indicates that when there is a conflict between the rules that will be declared (by Āśvalāyana) hereafter and the practices of the common people, then what will be declared by the Ācārya (will be the dharma to be followed). For example, in certain countries sexual intercourse is begun immediately (after marriage) which is opposed to the prescription of *brahmacarya* for twelve or three nights that will be declared (by the Ācārya in I. 8·10).” This shows that even so late as the times of Haradatta (about 1200 A.D.) the age of girls in certain countries at the time of marriage must have been at least fourteen. The same conclusion is forced upon us by the rule about observing at least three days’ *brahmacarya* after marriage.

This is another matter which leads us to the same conclusion. In most of the dharmasūtras there is a certain rite called *cathurthīkarma* which corresponds to the Garbhādhāna of other treatises like Yājñavalkya (I. 11). This rite was performed after three nights from marriage

⁵ त्रिरात्रमक्षारालवणाशिनौ स्यातामघः शयीयातां संवत्सरं न मिथुनमुपेयातां द्वादशरात्रं...त्रिरात्रमन्ततः ।

and hence was called *cathurthīkarma*. The Gobhilagrhya (II. 5. 1, 7, 8.) says, “ Now therefore (is stated) the rite of the fourth (night after marriage). Some (ācāryas) hold that sexual intercourse is allowed after three nights (from marriage). The proper time for (first) sexual intercourse (after marriage) is when the woman becomes free from the flow of blood after menses.”⁶ To the same effect are Śāṅkhāyana-grhya I. 17-19, Pāraskara-grhya I. 11, Āp.-grhya III. 8-10-11, Hiraṇyakeśi-grhya I. 23-11.

In some of the grhyasūtras a slight *prāyaścitta* is prescribed if the bride has menstruation during the progress of the marriage ceremonies. *Vide* Baudhāyana-grhya IV. 1-10, Kauśikasūtra 79-16, Vaikhānasa-smārtasūtra VI. 13.

There are passages in the dharmasūtras and the Manusmṛti which recommend that a girl should wait for three years or three months after attaining puberty and then seek her husband for herself. The Gautama-dharma-sūtra (18. 20—23) says “ A maiden, after passing three menstruation periods, should herself unite (in marriage) with a man who has estimable virtues and should restore the ornaments that the father put on her (when a maiden). Marriage (of maidens) should (ordinarily) take place before menstruation. (A father) not giving her away (at that time) incurs blame (or sin). Some (ācāryas) say that a girl (should be given away in marriage) before she begins to put on a garment.”⁷ This passage shows that even so early as Gautama there were ācāryas who advocated child marriages, but Gautama disapproved of their views and fixed puberty as the upper

“ अथातश्चतुर्थीकर्म... ऊर्ध्वं त्रिरात्रात्संभव इत्येके । यदर्तुमती भवति उपरत-

limit as a general rule, though he was not horror-struck if a marriage took place some time after puberty. The Baudhāyana-dharmasūtra IV. 1.12--16 is to the same effect. Manu (IX. 89-90) goes further and says "A maiden may indeed stay in (her father's) house even till her death, though she may have attained puberty; but (the father) should never give her away to one who is devoid of good qualities. A maiden after attaining puberty should wait for three years; but after this period elapses, she should seek a husband who is similar to her (by caste and qualities)." Anusāsanaparva 44-16 is to the same effect.

We perceive, however, that gradually the age limit for the marriage of women was brought down lower and lower. Laugākṣigṛhya (19.2) says 'brahmacarya for girls lasts till the 10th or 12th year.'⁸ The Vaikhānasa-smārta (VI. 12) says that a brāhmaṇa should marry a nagnikā or a gaurī and then defines 'nagnikā' as a girl beyond eight years and less than ten and *gaurī* as one who is between 10 and 12 and has not yet had menstruation.⁹ In spite of Manu IX. 89-90 quoted above we are told in the code (IX. 94) "A man of thirty should marry a charming maiden of twelve or a man of twenty-four, if he is in a hurry (to become a householder) because religious rites (in his family) are being cut off, should marry a girl of eight."

The culmination of this tendency towards bringing down the age is seen in certain verses of Parāśara, Yama and Saṁvarta. Parāśara, (Chap. VII) says, "A girl eight years old is called *gaurī*, but one who is nine years old is *rohini*, one who is ten years old is a *kanyā*; beyond

⁸ दशवार्षिकं ब्रह्मचर्यं कुमारीणां द्वादशवार्षिकं वा ।

⁹ ब्राह्मणो ब्राह्मणीं नम्रिकां गौरीं वा कन्यां...वरयेत् । अष्टवर्षाद्वादशमान्नम्रिका । रजस्यप्राप्ते दशवर्षाद्वादशद्गौरीत्यामनन्ति ।

this (*i.e.*, after tenth year) she is a *rajasvalā*. If one does not give away a maiden when she has reached her twelfth year, his *pitṛs* have to drink every month her *rajas* (menstrual discharge). The mother, the father and also the eldest brother—these three go to hell on seeing an (unmarried) girl reaching the state of a *rajasvalā*. That brāhmaṇa who deluded by ignorance marries such a girl should not be spoken to, should not be admitted to the same row at the time of dinner; he becomes the husband of a *vṛṣālī*.” Sainivarta (Ānandāśrama edition, verses 65-66) has the same two verses (*viz.* Parāśara VII. 6 and 8) and proceeds (verse 67) “Therefore one should give away in marriage a girl before she has menses; for the marriage of a girl of eight is highly commended.” Yama (Jīvānanda’s edition of *smṛtis*, part I, page 562, verses 22—24) has the same three verses that are found in Parāśara VII. 7—9. In the Rāmāyaṇa (Aranyakāṇḍa 47.10-11) the ages of Rāma and Sītā are said to have been respectively thirteen and six at the time of marriage. It will be noticed that the definition of *gaurī* in Parāśara is different from that of Vaikhānasa-smārta-sūtra. Further the three *smṛtis* last mentioned make the marriage of a girl after puberty an extremely sinful act, while earlier writers like Baudhāyana were content with a light *prāyaścitta* even if there was menstruation during marriage ceremonies.

The foregoing brief discussion shows that in the times of the early sūtras, no marriageable age was fixed, that generally marriages took place about the time of puberty or after it, that early sages contemplated with equanimity the marriage of a girl several months or years after puberty and that no blame attached to the parents, the girl or husband by reason of a post-puberty marriage. It must however be said that even in early times there were people who advocated infant marriages as Gautama

testifies. Gradually the age of marriage for girls was brought down so that marriage of a girl at eight years was recommended as the best and marriage after twelve became unthinkable and dire consequences awaited those who dared to run counter to these dicta. This change in the attitude of the sages must have been due to some urgent and pressing needs of society at that time. What the causes of this change might have been it is beyond the the scope of the present paper to investigate.

NEW THEORIES AS TO BRAHMAN

DR. A. B. KEITH, M.A., D.C.L., D.Lit.,

Regius Professor of Sanskrit, University of Edinburgh.

The *Rgveda* affords to us a very interesting glimpse of a highly developed religion, representing no doubt the results achieved by intensive cultivation of worship by a priesthood. It is inevitable that efforts should be made to penetrate beyond the system presented in the *Rgveda*, and to reconstruct the earlier form whence this elaborate religion has developed. But the task is one of the greatest difficulty. It is far from easy to understand precisely what the religion of the *Rgveda* was, and to assert what preceded it becomes a matter of conjecture as to whose truth no certainty is possible. It may, however, be feared that those who indulge in conjectures are seldom willing to admit the insecurity of the systems which they put forth, though it might serve as a warning against over-confidence that very distinct and inconsistent views are put forward with at least equal assurance of certainty.

I. The position is excellently illustrated by the three efforts recently made to determine in the period before the *Rgveda* the nature of the conception Brahman. The obscurity of the term is undeniable, and the temptation to seek aid in elucidating it from etymology is great. But it may be doubted whether it is wholly wise to expect enlightenment of value from this source. Professor Hertel,¹ however, has no hesitation in declaring that Brahman is to be understood in the light of the Greek *phlegma*, which in the *Iliad* xxi. 337 appears to mean "flame," and is held to be connected with Latin *flamma*

¹ *Indogerm. Forsch.* xli 185 ff., *Die arische Feuerlehre* I (1925). Cf. Keith, *Religion and Philosophy of the Veda*, ii, 447—9.

and *fulgeo*. We are invited to believe that Brahman denotes primarily and properly the cosmic fire which exists beyond the stone heaven and which is revealed by breaks in that barrier as the sun, moon, constellations, and so on. This cosmic fire is present also in the microcosm, man, as the Ātman, and thus the oldest form of religion reached presents us implicitly with the identification of which the Upaniṣads make so much, that of Brahman and Ātman. The doctrine is also Indo-Iranian, for the *Avesta* has the same doctrine of the cosmic fire. It is not claimed that the sense "fire" is living in the *Rgveda* in its simplest meaning. The sense there is that fire which incorporates wisdom and appears in the cosmic Brahman as the power of thought, which is located in the heart, the seat of thought in the view of Indo-Europeans. These ideas Professor Hertel has developed at very considerable length, and with vigour of denunciation of those who do not know enough of things Indian and Iranian and of comparative philology to accept his dicta.

There is, of course, a serious preliminary difficulty, the acceptance of the etymology proposed for Brahman. It is impossible to ignore the fact that the comparison of the terms is far from cogent. If it were correct, it would have to be added to the list of those cases in which Indian *h* corresponds unexpectedly to Greek *g*. It is not surprising that the late Professor Johansson dismissed the comparison as the fancy of a dilettante who was not master of the principles of linguistic science.² It is fair to note that Professor Hirt³ has treated the suggestion as worth notice, but it is clear that it has no probative power. If Brahman denotes "fire," then that must be

² Cited by Charpentier, *Brahman* (1932), p. 13, n. 1. I owe this work to the author's courtesy.

³ *Indogerm. Gramm.* i, 248.

established from other evidence first; then and then only would it be worth while considering the validity of the proposed connection with *phlegma*. Unfortunately, when the use of Brahman in the *Rgveda* and later is considered, it is absolutely clear that "fire" cannot have been the root idea of the term. We have to reconstruct the meaning of the *Rgveda* to meet Professor Hertel's views, and the task is useless. The same consideration applies to the other terms to which in pursuance of his plan Professor Hertel has been compelled to assign meanings connected with fire. In the terms *yakṣa*, the Avestan *aitra*, the Indian *dhenū*, Avestan *daēnā*, the Indian *vasu*, Avestan *rohu*, there is no conceivable reason for seeing the sense of light or fire. *Yakṣa*, whatever its origin, plainly means something like "wonderful thing," and Varuṇa as *yakṣin* (Rv. vii. 88·6) is clearly a parallel to Varuṇa as *māyīn* "master of magic." *Dhenū* presents many difficulties, but none are aided by Professor Hertel's views. It is quite possible that we must distinguish two words *dhenū*, one of which may be the Avestan *daēnā*, but I much doubt if in Rv. i. 141·1 *ṛtasya dhenū anayanta sasrutaḥ* can mean the "spirits of righteousness," that is, the righteous who honour the gods and bring them offerings. *Vasu* clearly cannot well be connected with *ras*, "to shine," but it is not at all clear that it is really akin to *ras*, "to dwell," denoting the wealth that is connected with the land as opposed to mobile things. That root seems rather to go back to *ar-es*, while *vasu* seems by reason of Gothic *insiza* to be connected with *ar-es*.⁴ It is impossible to accept Professor Hertel's claim that the root *pū* is connected with Greek *pūr*, "fire," or his view that the roots *dhī* and *dī* have but one meaning "shine." It is rather unfortunate thus completely to

⁴ Cf. Walde, *Vergleichendes Wörterbuch*, ii, 310.

have to reject the efforts of Professor Hertel to illumine the early history of Vedic religion, but there is no possibility of doubting that his versions of these and other terms will not stand detailed investigation.

II. There is much less that is revolutionary in the contribution of Professor Jarl Charpentier to the discussion of the meaning of Brahman. Like his predecessor, however, he is convinced of his ability to establish his thesis, though in this case it is the doctrine that Brahman is identic with Avestan *barəsmān*, and that originally it meant nothing more than the bundle of grass used by the priests in the ritual. It is suggested⁵ that there was an Indo-Iranian *bharz̥h-man* and *bharz̥h-is* which are represented in Avestan by *barəsmān* and *barəziš*, while the Vedic gives us *brahman* for *barhman*, and *barhis*. There is clearly nothing very cogent regarding this conjecture; all that can be said is that it is not impossible that the words *brahman* and *barəsmān* are identic. But there is no probability in the suggestion, and it is much more likely that there is no connection between *brahman* and *barhis*, and that the two go back to different roots. If the view of the identity of *brahman* and *baresman* is to be found valid, it must rest not on etymological possibilities, but on evidence that the supposed sense of Brahman explains satisfactorily its later uses, and that the explanation is more probable than others current.

It is to Haug⁶ that we owe the suggestion that in the identity of Brahman and the Iranian Barsom is to be found the solution of the meaning. Brahman thus to him meant "Gewächs, Spross," then "Gedeihen"; as the prosperity of the sacrifice depends on its elements, any one of these, and in special the song of praise, may be

⁵ *Brahman*, p. 62.

⁶ SBBAW, 1868, ii. 80 ff; *Brahma und die Brahmanen* (1871).

styled Brahman, and that term naturally is accorded the meaning of that which lies at the base of all things. This development of thought is not by any means easy, and it is not surprising that his view has seldom been accepted. It has, however, been adopted by Professor Hillebrandt,⁷ who develops the senses of Brahman as follows: the bundle of plants used as a spell to secure growth or fertility; the magic power which permeates the sacrifice; the several kinds of magic, such as formula, recitation, or song; and creative power in general, which develops into Brahman as creative. The view taken by Professor Charpentier is analogous. We are to suppose that at an early period priests in India and Iran performed magic rites with bundles of plants, etc., accompanying their performance with magic formulae; these were the Brahman rites, and their performers were the Brahmans. As the ceremonial developed, the connection between the idea of Brahman and the grass, etc., relaxed, and the term came to mean magic rite of any kind, which is the sense found primarily in the *Rgveda*. It may there also denote the magic spell or song. It will be seen that in this formulation the idea is far more defensible, for it operates with real meanings found in the *Rgveda*. But on the other hand there is no proof that the term Brahman originally denoted the "Opferstreu"; that becomes a mere matter of conjecture, and it is open to accept another explanation of the way in which Brahman develops its meaning.

It is, therefore, of great importance to see if there is in the *Rgveda* anything to indicate that the sense "Opferstreu" clung to Brahman, for, if it did not, the probability that this was the real sense is very slight.

⁷ *Festgabe Jacobi*, pp. 265 ff. At one time he held that Brahman was "das magische Fluidum ritueller Zauberkraft": *Vedische Mythologie* (1910), p. 61.

The passages adduced in this regard are far from supporting the idea that at one time *brahman*, *veda* and *barhis* meant very much the same thing. In Rv. ii. 18·7 *mama brahmendra yāhy achā* the suggestion that *brahman* might be the same as *barhis* is sufficiently disproved by the next line *purutrā hi ciharyo babhūtha*. Clearly *brahma* denotes the prayer of the singer, which is to bring to his offering Indra as against the claims of other devotees. It is indeed admitted that the sense may be "Zauberlied," an admission which is based on the conviction^s that in the *Rgveda* all sacrifice is magic, all prayers are spells. This view of religion is doubtless common, but perhaps rather old fashioned. The conception that man originally was a magician, whose conversion to a sense of dependence on external powers, and therefore to religious reverence, was due to proof that magic might fail, is rather naive. Magic and religion may be inextricably combined in any man's belief, but there is no reason to suppose that either springs from the other, and the belief that the priests of the *Rgveda* were magic workers, instigated by craving for Dakṣiṇās, is probably a wholly one-sided way of looking on their activities. There is at present a certain inability among disillusioned modern thinkers to envisage the nature of prayer and the relation of him who prays to the object of prayer. It seems unreal and irrational, and it is tempting to replace it by the simple formula of magic, but the tendency is due to a false and narrow psychology which ignores the higher elements in thought.

Other passages adduced equally lend no aid to the theory that Brahman has ever the sense of *barhis*. In Rv. vii. 28·1 we have again the invitation to come to our Brahman, followed by the quite decisive words *niṣve cid dhi tvā cihacanta martāh*, showing that what is meant is

^s *Brahman*, pp. 83—5.

prayer, not strew. In Rv. iii. 8·2 the sacrificial post is described as *brahma vanvāno ajaram surīram*, and it is an impossible *tour de force* to imagine that here the grass wound round the post is meant. More interesting is the suggestion⁹ that *brahmacārin* is to be explained as *brahmaṇā saha carati*, the reference being to the girdle of *muñja* grass, which is the characteristic sign of the initiated youth. It is an ingenious, but no doubt untenable, suggestion, for a more plausible sense and construction can be easily worked out. When in Rv. vii. 35·7 *soma* and *brahma* are combined, it is the most natural thing in the world, the one is the material offering, the other the prayer. So in Rv. i. 10·4 the combination of *brahma* and *yajñam* is not “spell” and “sacrifice,” but “prayer” and “sacrifice.” The meaning is seen clearly in such a passage as Rv. i. 47·2 *Kaṇvāso rām brahma kṛṇvanty adhvarā teṣāṃ su ṣṇutam havam*. The sense is not “magic rite,” but, as *havam* shows, simply “prayer,” the sound of which is to be heard. When we find *brahmaṇā randamānaḥ* Rv. i. 24·11 the plain sense is “praise” including prayer, not “spell.” It is a complete misunderstanding of early thought to ignore the fact that prayers can strengthen the gods; when in Rv. viii. 62·4 we have *ā yāhi kṛṇavāma ta Indra brahmāṇi cardhanā*, there is no need to suppose that magic rites are meant rather than prayers. If Atri (Rv. v. 40·6) frees the sun from the darkness of eclipse it may as well be by prayer as any spell, and Vasiṣṭha’s deeds (Rv. vii. 18·4; 33·3) like those of Viśvāmitra (Rv. iii. 53, 12 and 13), in favour of his patrons may just as well have been accomplished by the efficacy of his prayers as by spells. Neither, in the view of modern science, could have any effective result, and we have not the slightest reason to

⁹ *Ibid.*, p. 76, n. 5.

suppose that the Indian mind was devoted to spells, to the exclusion of prayer. There were doubtless then as now two types of mind, those who believed that the divine could be affected by elaborate ritual of magic type, and those who upheld the power of supplication not to compel but to persuade the divine grace.

It would serve no purpose to go over all the passages adduced; when *brahma kr* is found, it may well mean "offering prayer" and not "performing magic rites," and in many passages the choice of the rendering must remain doubtful, for it is not disputed that there is magic beside religion in the *Rgveda*, while in the *Atharva-veda* we may often render Brahman simply by "charm." Nor is it doubtful that the Brāhmaṇa texts indicate that the magic view of religion was prevailing among those responsible for these works. But that helps us little to determine the earlier sense of Brahman. Dogmatism in face of the counter dogmatisms above discussed is unwise, but there seems much to be said for the old fashioned idea that the essential meaning of Brahman in the *Rgveda* is drawn from the higher side of man's nature, and that it denotes the devotion in man which expresses itself in prayer. Brahman then denotes these subjective and objective sides of one idea, the feeling and its expression. Hence it is easily used for the holy texts, a meaning which Dr. Griswold¹⁰ and Professor Oldenberg¹¹ recognise as fundamental in the *Rgveda*.

From this personal sense, how are we to pass to the cosmic force of the term?¹² It is natural to base this upon the importance of the sacred text or in its lower sense the spell; what accomplishes divine grace, or compels the

¹⁰ *Brahman: a Study in the History of Indian Philosophy* (1900).

¹¹ GN. 1916 pp. 715 ff.

¹² Keith, *Religion, and Philosophy of the Veda*, ii, 441—5.

gods, can be regarded by the priestly mind as the vital element in the world, and becomes the term to express the cosmic essence. But it is not improbable that a psychological element of the highest importance is also operative. It must be remembered that in devotion the experience of mystics points unmistakably to the sense of unity with the divine, however difficult it is to formulate this conception. It is possible, therefore, that the term for devotion should come to be applied to that essence with which the devotee is united in the devotion, and that Brahman should acquire the sense of "holy power," which appears to me to be very common in the Brāhmaṇas. That explains also simply the employment of the term in these texts for the Brahman class. They are the living embodiments of the holy power, just as the Kṣatriyas embody the Kṣatra, "ruling power."

Professor Charpentier¹³ is well aware of the difficulty of developing from the use of Brahman as "spell" the cosmic sense. He suggests that there is a transition in the use of Brahman occasionally as "Zauberwesen." But the evidence for such a use is minimal, and far from cogent. When we are told in Rv. x, 61·7 of the incest of Prajāpati, the text continues *svādhyo 'janayan brahma devā vāstoṣ patiṁ vratapām nir atakṣan*. It is suggested that the gods are described as producing a magic being, namely the dread Rudra, here described as Vāstoṣpati. But the point of the verse is lost in this rendering; the word *svādhyo* is significant; the gods applied the holy power that is within them, and so created Vāstoṣpati; whether Rudra here be thought of or not, matters little. Similarly there can be no reason to suppose that in the assertion (TS. v. 4·4·4) that the *kṛṣṇājina* is the symbol (*rūpa*) of the Brahman we have any reference to a "Zauberwesen."

¹³ *Brahman*, pp. 133—7.

It is plain that the sentence merely means that the black antelope skin is a characteristic of the Brahman class, the incorporation of the holy power.

It is easy on this understanding of the term to understand the term *Brahmacārin*. It does not denote one who practises abstinence or celibacy, meanings which Brahman cannot have; it means one who practises holiness, one who busies himself about the holy power, or who walks in the path of holiness. Whether the compound is to be resolved *brahma* or *brahmaṇā carati* matters nothing to the sense. What is practically impossible is to suppose that this obviously far from early term maintains a meaning of Brahman which admittedly can be conjured only for other instances where the word is used.

III. Since the views above rejected were expressed a still more revolutionary doctrine has been propounded, which allows room for acceptance of the doctrine of Professor Charpentier. M. Dumézil devotes a study, *Flamen-Brahman*¹⁴ to establishing the existence of a root *bhelgh* whence can be derived *brahman*, *barhis*, *barha*, 'tail of a peacock,' *upabarhaṇa*, 'mattress,' in Latin *flamen*, and in Greek *pharmakós*, applied to a scapegoat, *phármakon*, 'remedy.' The root in question would have a religious, magic meaning, which he does not undertake to determine. Now as regards comparison with *flamen* there is the authority of so good an authority as Kretschmer for its possibility.¹⁵ It is, of course, objected that, if *flag-ma* gives *flamma*, then *flag-men* would not be represented by *flamen*; on the other hand Vergilian manuscripts have the form *flammen*, which would be in order. The comparison with *pharmakós*, *phármakon*, assuming that the words are the same—the Ionian poets

¹⁴ *Annales du Musée Guimet*, Li (1935).

¹⁵ *Einleitung*, p. 127. Cf. Meillet, *Histoire de la langue latine*, p. 78.

have a long *a* in *pharmakós*, and the Attic short *a* may be due to the analogy of the neuter—is untenable as a matter of strict comparison. M. Dumézil¹⁰ naturally takes refuge in the contention that we have in Indo-European unaccountable divergences in words which must be ultimately the same as in the word for ‘liver,’ Sanskrit *plihā*, Greek *splēn*, Latin *lien*, Irish *selg*, Lithuanian *bluznìs*, and so on. The difficulty of this argument is obvious. Where there is essentially sameness of meaning, we may have to accept, despite difficulties, identity of origin for words; where there is no immediate sameness of meaning and divergence of form, we are not entitled to seek to reconstruct sameness of signification on the assumption of ultimate identity of the words.

M. Dumézil’s effort to find sameness of signification rests on a reconstruction of religious beliefs. Fascinated by Sir J. Frazer’s evidence in *The Golden Bough* of the connection between the king and vegetation and the death of the king to revive life in nature, he stresses the legend of Çunaḥçepa as suggesting the former practice of slaying the son of the king or a substitute. With this he connects the accounts of victims treated as kings before sacrifice, and so evolves the theory that the Brahmans achieved their historical position, as originally the substitutes for the royal victim, treated for a time as royal, and thus made equivalent in value to the king for sacrificial purposes. The actual sacrifice would be performed, to judge from the Çunaḥçepa legend, by other future victims of whom there would be a number, since the kingly sacrifice is needed to counter famine, epidemic among men and beasts, and perhaps periodically to strengthen the life of nature. Gradually actual sacrifices cease to claim human victims; the Brahman, however, *sacraçus et*

¹⁰ Op. cit. p. 95.

sacrans, the recognised mediator between men and supernatural powers, has secured his position and the caste is established. He had already drawn to himself concern with other sacrificial rites; he is the living aspect of those magic practices which are in some measure his equivalent, since they are called Brahman in the neuter; both are remedies to secure good. From this history we can understand the relation of the Brahmans and the Kṣatriyas in Indian history. The former claim, the latter concede, pre-eminence, but it is never carried into actuality; this is a reminiscence of the time when the real king and the fictive king, the permanent and the temporary substitute, coexisted as indispensable to each other, but the substance of authority rested with the former, while the latter was accorded in theory higher or coequal rights. Further, the original character of the Brahman explains the position assigned in the texts¹⁷ to the Brahman priest in the narrow technical sense at the sacrifice. Thereat he neither acts nor speaks, but watches its course, prepared to intervene to remedy errors. But he obtains half the sacrificial gifts. Does this not denote that, unlike the other priests, he is consubstantial with the sacrifice which he himself once was? Moreover, in the famous Puruṣa hymn, *Rgveda*, x, 90, we have in mythical form a reflex of the ancient rite of the slaying of the king, transformed into a picture of the creation of the universe, and of the Brahman as the highest of the castes, from the sacrifice of Puruṣa, who is none other than the Brahman par excellence.¹⁸

All this is admirably ingenious, but its weakness becomes obvious when the foundation on which the structure is based is closely scrutinised. What is the evidence for the death of a royal victim to revive the life

¹⁷ Keith, op. cit. i, 296, 297.

¹⁸ Op. cit. pp. 86—96.

of nature? The Ānahaṣṭepa legend says nothing of the kind.¹⁹ It is simply absurd as it stands; the king anxious for a son promises to slay him in return. If the story is not a priestly imagining, it points rather to the type of legend where the death of a son is offered as the price of some greater boon. There is not the slightest trace of the idea that the king must periodically be slain or some member of his house in lieu. Rohita seeking a substitute, of course, falls into the normal pattern of substituted victims, and Varuṇa's acceptance of a Brahman as a more than worthy equivalent follows immediately from the Brahman authorship, without any need to appeal to fictive kings, of whom Vedic literature has no trace. No further evidence is afforded by the treatment in the Aṣvamedha of an Ātreya as a scapegoat; the suggestion that he was originally killed has no support in the texts, still less the idea that he was a representative of the king, who originally was offered to Varuṇa, the rite ultimately going back to mere slaying of the king as nature magic. The Puruṣamedha²⁰ is of no value as evidence; it is clearly a hypothetic rite, built by the Sūtra makers on the Aṣvamedha; of an actual offering of Brāhmaṇa or Kṣatriya therein the Brāhmaṇas have no hint. No value whatever attaches to the tale of Manu's proposed sacrifice of his wife, found in the *Maitrāyaṇīya Saṃhitā*²¹ and elsewhere. To deduce from it the view that the king was at one time compelled to sacrifice his wife is a mere flight of imagination, as is the further suggestion that Indra's action, related in the *Kāṭhaka Saṃhitā*²² in slaying the two Brahmans who advised Manu's evil deed, reflects the

¹⁹ Keith, op. cit. i, 262, 263, 282, 283; *Rigveda-Brāhmaṇas*, pp. 61 ff.

²⁰ Keith, op. cit. i, 347-348.

²¹ iv, 8, 1.

²² ii, 30.

offering of Brahmans as substitutes. We certainly do not need this theory to explain the high rank of Brahmans or their entertainment by kings which brings the latter the profits set out in the *Rgveda*.²³ The position of the Brahman priest at the sacrifice is naturally explained by his later introduction into the rites, and his claims for a special share of the gifts were no doubt essentially based on his magic powers. The sacrifice of Puruṣa is of much disputed origin;²⁴ the theory suggested by M. Dumézil is far from being the most probable.

The effort to find a parallel development through which the Roman Flamen, originally a victim substituted for the King, became the *flamen sacrorum populi Romani* seems wholly unsuccessful. The endeavour to connect him with human sacrifice has to rest on the presence of his wife as a spectator at the festival in May when scapegoats represented by dummies were hung up and finally thrown into the Tiber.²⁵ The purificatory and rain-making character of the rite is plain; whether it was ever connected with human sacrifice is disputed and doubtful, but the Flamen has nothing to do with it, and it is a Vestal virgin who throws the dummies into the stream, the Flamen's wife naturally attending. The only other point adduced is the assertion of Dion Cassius²⁶ that in 46 B.C. Caesar sacrificed two soldiers, the sacrificers being the Pontifices and the priest of Ares, presumably the Flamen of Mars. It suffices to note that no other connection between this Flamen and human sacrifice is even hinted at, and Caesar's action, if real and not a mere rumour put about by his critics, was plainly no proper sacrifice but a wholly abnormal proceeding.

²³ iv, 50, 8.

²⁴ Keith, op. cit. ii, 619—21.

²⁵ Warde Fowler, *The Roman Festivals*, pp. 111—21.

²⁶ XLIII, 24.

Needless to say, activity in sacrificing, had it been proved, would not in the least have pointed to the original sacrifice of the Flamen himself.

In the relations of the Rex and the Flamen there is nothing whatever to suggest sacrifice of the latter in lieu of the former. M. Dumézil can only find it in the fact that the wife of the Flamen offers to Jupiter a ram *in regia*, 'in the royal house,' whence Jullian²⁷ naturally suggests that the sacrifice may originally have belonged to the Rex or his wife. This accords excellently with the traditional origin²⁸ of the Flamen, to share the sacrificial burden of the Rex, a fact which explains all those privileges which the Flamen shares with the historic Rex sacrificulus.

M. Dumézil's further efforts to find essential parallels between Brahman and Flamen are inconclusive. Similarities between ancient priesthoods, Indian, Latin or Jewish are numerous, and there are many significant distinctions between Brahman and Flamen pointing to divergence of ideas. A Brahman does not cease to be one, if his wife dies nor does his wife play any part similar to that of the wife of the Flamen. The Flamen must marry a virgin, a Brahman may marry a woman even if she has had ten non-Brahman spouses before.²⁹ The Flamen dialis may not spend a night outside the city; wherever a learned Brahman is, there is a city. There is nothing whatever to prove original identity of the Brahman and Flamen. Nor is the case improved by referring to *barhis* and Avestan *barəsmān*, the bundle of leaves held by the priest, which is compared with the twigs which, tied up, appear in the coiffure, the

²⁷ Article *Flamen* in Daremberg and Saglio's *Dictionnaire*, i, 1163a.

²⁸ Dumézil, *op. cit.* pp. 50, 51.

²⁹ *Atharvaveda*, v, 17, 8, 9.

characteristic part of the costume of the Flamen and his spouse. This remarkable view is supported by evidence of a Celtic tale,³⁰ which relates the healing of the king of the Tuatha Dé Danann by the physician Dian Cecht, who supplies a silver hand to replace that lost in battle and also slays in anger his son Miach, who had been experimenting with the hand. This, we are to believe, is a relic of sacrifice of a substitute necessary to restore the vigour of the king. From Miach's grave grow herbs of all kinds. This, we are assured, helps us to understand how the vegetation *barasman* of the Iranians can in essence be the same thing as the human Brahman of the Indians. The argument is hopelessly farfetched; the growth of herbs from the tombs of the dead is world-wide, and the link with *barhis*, the sacrificial strew, is simply non-existent. In the Pharmakoi rituals³¹ of Athens, Kolophon, Abdera, and Marseilles, we have admittedly not a trace of connection with former kingship. We have simply rites of expulsion of evils and vegetation magic. Hellenic as opposed to non-Hellenic origin is wholly problematic, and we cannot say if the name used is really cognate with *phármakon*, or if it is a case of an Asianic word altered by folk etymology to accord with the well-known *phármakon*. That word itself seems to have absolutely nothing to do with Brahman, but to be cognate to Lithuanian *burìù*, 'to practise magic.'³²

The new attempt, therefore, seems to fail as completely as those of Professors Hertel and Charpentier to throw fresh light. Brahman, whether cognate or not with Old Irish *bricht*, 'spell,' and Old Icelandic *bragr*,

³⁰ MacCulloch, *Myth. of All Races*, iii, 25—8.

³¹ Gilbert Murray, *The Rise of the Greek Epic*, Appendix A.

³² Walde, *Vergleichendes Wörterbuch*, ii, 161. Connection with the root seen in Sanskrit *bhar*, so that it would denote 'what the earth bears,' 'plant,' is much less plausible.

'poetic art,'³³ seems naturally to denote prayer and the mental attitude which induces prayer. In this sense we may find a solution to the question of the original meaning of the divine name, Br̥haspati. On the whole it is improbable that he is the "lord of the high heaven";³⁴ the word seems a late formation, and probably denotes rather "lord of prayer,"³⁵ like Brahmanaspati, though conceivably in either case the sense might be "lord of holy power."³⁶ In these issues where certainty is impossible, the claim to achieve it marks a failure to recognise the bounds to our knowledge set by the nature of our materials. When these limits to our knowledge are passed, for a scholar to feel certainty is legitimate, to demand acceptance of that certainty from others is unwise.

³⁵ Cf. Macdonell, *Vedic Reader*, p. 84. Wackernagel, *Altind. Gramm.* ii, 246, has "Herr der Opferkraft." See Keith *op. cit.* ii, 438.

³⁶ Hopkins, *Ethics of India*, p. 85, holds that Brahman primarily denotes power, but this is on the whole improbable. Cf. his *Origin and Evolution of Religion*, pp. 308, 309.

MEDHĀ AND MAZDĀ

PROF. DR. STEN KONOW,

Ethnographiske Museum, Oslo.

The word *medhā* is of frequent occurrence, especially in Vedic literature, and there does not seem to be much doubt about its meaning. Monier Williams translates 'mental vigour, intelligence, prudence, wisdom', eliminating the rendering 'vitality, power, vigour' given as the first one by Roth. An examination of the Rigveda passages where the word occurs shows that it is nowhere necessary to adopt the latter explanation.

Medhā was evidently considered an important asset : I. 18. 6, *súdasah pátim...sanīm medhām ayāsisam* 'I have gone to the great Lord for gain and *medhā*'; II. 34. 7, *tām no dāta maruto...sanīm...medhām*, 'give us, O Maruts, gain and *medhā*'; V. 27. 4, *dādad rāñ sanīm yaté dādān medhām rtāyaté*, 'giving gain to him who goes with a hymn, giving *medhā* to the pious'; IX. 32. 6, *asmé dhehi...sanīm medhām utá śrávaḥ* 'place with us gain, *medhā* and fame'. It will be seen that the word is often found together with *sani* and the two terms are also found continued in the other texts. In IX. 9. 9, *sani* is replaced by *gām ásvam* and *sear* is added : *pávamāna máhi śrávo gām ásvam rāsi vīrávat | sánā medhām sánā svāḥ* 'O Soma, thou givest great fame, cow and horse, possessed of heroes, give *medhā*, give light'. Here *gām ásvam*, with or without *śrávaḥ*, looks almost like an explanation of *sani*. Wealth and *medhā* were consequently associated in the pious wishes.

In several places *medhā* is connected with designations of the hymn or used to denote the hymn itself : I. 165. 14, *ā gād...asmāñ cakré mānyāsya medhā*, 'since Mānya's *medhā* has brought us hither'; IV. 33. 10, *yé hárī*

medháyokthā mādanta indrāya cakráh, 'who, revelling in *medhā*, in hymn, made the two bays for Indra'; V. 42. 13, *prā sū mahé suśaraṇāya medhām gīraṁ bhare*, 'for the great well-protecting one, I bring forward my *medhā*, my song'; VII. 104. 6, *iyām matth...yām vāṇi hótrām parihiṇómi medháyā*, 'this mental product which I emit is an invocation to you with *medhā*'; VIII. 52. 9, *stotūr medhā asṛkṣata*, 'the worshipper's *medhās* were produced'; IX. 26. 3, *tām vedhām medháyāhyan pávamānam álhi dyávi* 'that disposer, being purified, that urged with *medhā* towards heaven'; IX. 65. 16, *rājā medhābhir īyate*, 'the king proceeds through *medhās*'; IX. 107. 25, *pavamānā asṛkṣata...medhām abhi prayāmsi ca*, 'being purified they have been emitted towards the *medhā* and enjoyments.'

Finally *medhā* is ascribed to *ṛta* in VIII. 6. 16, *ahám id dhī pitūṣ pári medhām ṛtasya jagrábha | ahām sūrya iwājani*, 'as I have received from the father Truth's *medhā*, I was born like the sun.'

It is evident that *medhā* is a mental force, which enables its possessor to handle the hymn and turn it to account as a means of acquiring gain and wealth, and that it is as valuable as riches themselves. 'Insight', 'wisdom' and especially 'prudence' are English equivalents. It is apparently an abstract term, but such terms were generally conceived as forces with independent existence. And in an ancient pastoral society prudence would be highly valued and very important.

This conception is certainly pre-Indian, derived from the period when Indians and Iranians had not finally separated. For we apparently trace the same word with a similar original meaning on Iranian soil, where it was destined to play a great rôle. It must, so far as I can see, be identified with Avestan and Ancient Persian *mazdāh*, but known from the compound *Ahuramazda*, the highest god, *mathishta bagānām*, of the ancient Persians.

The usual translation of the designation *Ahuramazdāh* is 'the Wise Lord', *mazdāh* being explained as a base ending in *ah*, corresponding to Indian *as*, and meaning 'wise', connected with the verb *mazdā*, 'to take to heart', 'to mind'.

Such a formation is no doubt possible; cf. Skt. *vedhas*, Avestan *vazdah*, 'leader', 'disposer'. But the inflexion of the word in Iranian dialects points in another direction.

In Avestan we have nom. *mazdā* < **mazdāh*, acc. *mazdām* dat. *mazdāi*, gen. *mazdā*. voc. *mazdā*. They are exactly parallel to forms such as nom. *-shtā*, acc. *-shtām*, dat. *shtāi*, gen. *-shtā* of the *ā*-base *-shtā*, 'standing'. The natural inference is that *mazdā* is an old *ā*-base and not an *ah*-base.

In Ancient Persian, it is true, we have the genitive *mazdāha*, which points to an *ah*-base. But then the Ancient Persian form *Auramazdā* is a later development, being no more, as in Avestan, two separate words, *ahura* and *mazdā*, both inflected, and in the *Gāthās* more frequently arranged in the sequence *mazdā ahura*, but having become a single word, the name of a strongly personified god. And the long *ā* of *mazdāha* shows that we have not before us an old inherited genitive of an *ah*-base.

Moreover, the word *mazdā* is also known from another, comparatively old, Iranian dialect, where it has been developed in quite a different way. In Saka the word *urmaysda*, i.e., *auramazdā*, means 'Sun', and it forms the nom. *urmaysde* < **auramazdāh*, but the gen. *urmaysdānū* and the nom. pl. *urmaysdāna*. In other words, the base is treated as ending in *ān* and not in *ah*.

Within Sanskrit itself we have an exact parallel to this double modification of an old *ā*-base. In the word *panthā*, path, we seem to have a very irregular inflection. In the singular we find nom. *panthāḥ*, acc. *panthām* and *panthānam*, gen. *pathas*, etc., in the plural nom. *panthāḥ*, *panthāsah* and *panthānaḥ*, acc. *pathaḥ*, instr. *pathibhiḥ*. So far as I can see, the only satisfactory explanation of this state of things

is that we have to do with a base *panthā*, with the corresponding weak form *pathi*, before vowels *path*. Forms such as *panthānam*, *panthānaḥ* are due to a contamination with the inflection of *an*-bases such as *adhvan*, while *panthāsah* owes its existence to the influence of themes ending in *as*, which would coincide with *pantha* in the nom. sing.

I think that we must assume a similar development in the case of Iranian *mazdā*. It is originally an *ā*-base and if it is identical with Indian *medhā*, it must from the beginning be a feminine noun, meaning 'wisdom', 'prudence', formed in the same way as the old word *śradhā*, 'faith'. And then the Iranian *h*-termination must be secondary.

The necessary inference is that *medhā*, *mazdā*, is an ancient Aryan term, denoting a mental form which was highly valued as an important factor in the Aryan's life. If he was filled with *medhā* he might hope to succeed in cattle-breeding and husbandry, just as 'vigour' was his support in fights and struggles.

It is a well-known fact that the ancient Aryans looked on such apparently abstract conceptions as universal forces and almost as substances, which had their own independent existence, and which could be propitiated and utilised by human beings. In the Nirukta we read: *yāca kāca balukṛtir Indrakarmaiva tat*, 'wherever there is a mighty deed, that is Indra's work'. Here we still seem to feel the original conception of Indra: he is vigour personified. And we get the same impression from the frequent association of Indra's name with words such as *narya*, from the base *nar*, which is still at the present day used as a verb meaning 'to be able', 'to be powerful' in Parachi¹. Indra's name has long ago been explained by Professor Jacobi², as derived from this very base.

¹ Georg Morgenstierne, *Indo-Aryan Frontier Languages*, Vol. I, Oslo 1929, p. 276.

² *Kuhn's Zeitschrift*, xxxi, p. 316.

In a similar way Varuṇa and Mitra are *ṛtasya gopau* 'Truth's herdsmen', divine personifications of the notion and forces constituting *ṛta*.

It is *a priori* not unlikely that 'prudence' was hypostasized in a similar way. There is, it is true, scarcely anything in the Rigveda which points to such a state of things. *Medhā* is usually spoken of more or less as a personal asset, though VIII. 6. 10 connects it with *ṛta*. But then our general impression of the conditions prevailing in the period represented by the Rigveda is that 'vigour' then played a greater rôle than 'prudence'.

The state of things seems to have been different in the pastoral and agricultural milieu to which Zarathushtra belonged. Vigour and physical power there was, but such forces were more dangerous than beneficent for the common people, whose chief aim was peaceful husbandry. Their higher ideals were apparently better covered by notions such as *ārmaiti*, or, more correctly, *aramati*, 'proper thought,' *vohu manah*, 'good mind,' *aməretāt*, 'freedom from death', *haurvatāt* 'health', etc. And here *mazdā*, 'prudence', probably also had its place.

Similar forces are also sometimes spoken of as semi-divine powers in the Rigveda: *aramati* (*Avestan ārmaiti*), *anumati* 'consent', *aditi* 'infinity', *śraddhā*, 'faith', etc. But *bala* 'vigour' and similar forces are much more prominent to the mind.

Zarathushtra's system is in full agreement with the state of things we have assumed for his surroundings. Most of his moral and religious conceptions were no doubt taken from the prevailing notions of his people. But his system bears a strongly personal stamp, and it seems probable that his own inspiration prompted him to proclaim *mazdā* as the highest principle, as the Lord Mazda, *mazdāh ahuro* or *ahuro mazdāh*. He rejected the worship of the daevas, the deified physical forces in life and the universe, and took his

stand on another conception of divinity, which also belongs to the ancient Aryan period, the conception covered by the term *asura*, 'lord', of which the eternal *ṛta* 'truth and established order', formed a prominent part.

It is probable that even in the Aryan period people had begun to believe in a single, highest, *asura*. We may draw that inference from a comparison of the *asura* Varuṇa, the great *Samrāj*, and Ahuramazda, the sole god. But we have not the slightest indication to the effect that this great god was designated as *medhas*, *mazdah*. It seems more probable that this combination is due to Zarathushtra. He singled out *mazdā*, 'prudence', among the mental and moral forces which were felt to be the surest assets in daily life, characterized it as the Lord, and so the god Ahuramazda became the only one. And this led to *mazdā* itself being conceived as a god, and the masculine nominative termination *h* was added.

If I am right, we seem to be justified in drawing the conclusion from the occurrence of the name *Mazdaka* in an Assyrian inscription of the eighth century B.C., that Zarathushtra cannot belong to the sixth.

THE DATE OF TĪVARADEVA

PROF. V. V. MIRASHI, M.A.,

Morris College, Nagpur.

The date of Tīvaradeva has till now remained an unsolved problem of ancient Indian history. While editing the Kudopali plates of Mahābhavagupta II Prof. Kielhorn remarked, "The Rajim copperplate inscription of Mahāśiva Tīvaradeva undoubtedly belongs to about the middle of the eighth century."¹ This date has been accepted by other scholars like Dr. D. R. Bhandarkar,² Prof. R. D. Banerjee³ and R. B. Dr. Hiralal⁴ without further examination. As the date of Tīvaradeva forms the central pivot on which turn the dates of not only the Somavamśī kings of Kosala (Chhattisgarh) and Orissa, but also those of Vishnukundin, Śarabhapura and Śailodbhava Kings, who were connected with him in some way or other, it is necessary to examine the question in the light of new evidence that has recently become available.

Prof. Kielhorn assigned the above date to Tīvaradeva on the evidence of palaeography, language and style.⁵ Only two charters of Tīvaradeva have been discovered till now—the Rajim plates edited by Dr. Fleet⁶ and the Baloda plates edited by Dr. Hultzsch.⁷ Both these

⁶ Gupta Inscriptions No. 81.

⁷ Ep. Ind. VII p. 102.

charters are inscribed in box-headed characters which closely resemble those of the Vākāṭaka and Śarabhapura kings. When Prof. Kielhorn wrote the relation of Vākāṭaka and Gupta kings was not known. He, therefore, accepted Dr. Fleet's identification of Mahārājādhirāja Devagupta, the maternal grand-father of the Vākāṭaka king Pravarasena II, with Devagupta of Magadha, the son of Ādityasena, mentioned in the Deo Barnark inscription⁸ and assigned the Dudia plates of Pravarasena II to the beginning of the 8th century and Balaghat plates of Prithvīsheṇa and the Rajim plates of Tīvaradeva to the second half of the same century.⁹

Since then the Poona and Riddhapur plates of Prabhāvatīguptā have definitely proved that Mahārājādhirāja Devagupta was none other than Chandragupta II. The Vākāṭakas were thus contemporaries of the Early Gupta Kings and their records must, therefore, be referred to the fourth and fifth centuries of the Christian Era. As stated above they are inscribed in box-headed characters. The plates of Tīvaradeva which are also incised in similar characters can no longer be referred to the 8th century on palæographic grounds.

Nor is the evidence of language and style in favour of the late date. The charters of Tīvaradeva are, indeed, composed in a style of high flourish, full of long compounds and puns,¹⁰ but so are those of many kings of Valabhī who flourished in the sixth and seventh centuries

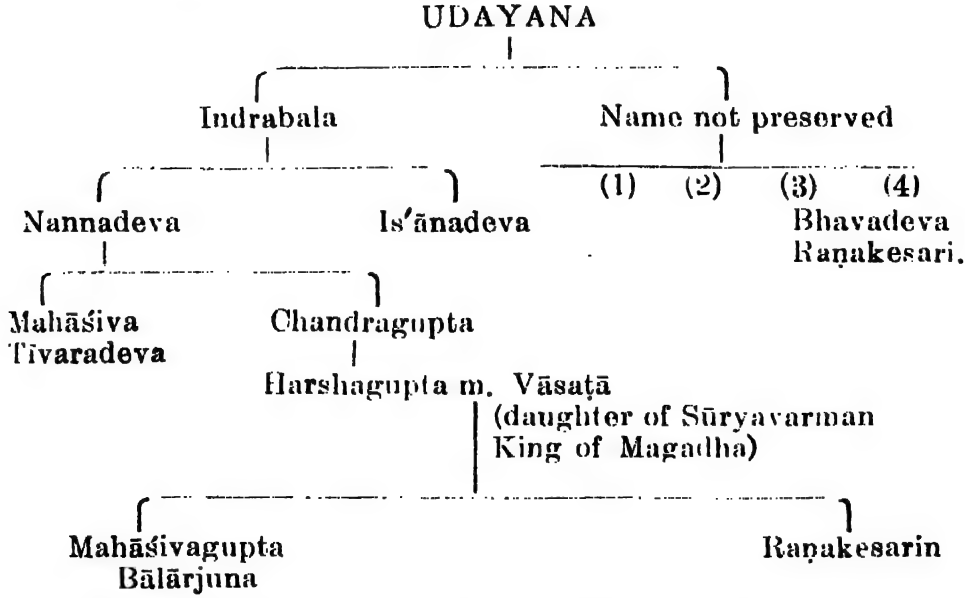

⁸ Gupta Inscriptions, Introduction p. 15.

⁹ Ep. Ind. IX p. 270.

भुजङ्गोद्धारचतुरः etc. in Gupta Inscr. No. 81.

A.D.¹¹ We must, therefore, look elsewhere for a more reliable evidence for fixing the date of Tivaradeva.

From several inscriptions found at Bhandak and Sirpur, we get the following genealogy of the Somavamsi Kings of Kosala (Chhattisgarh)¹² :—

From the Sirpur stone inscription of the time of Mahāśivagupta Bālārjuna, we learn that Bālārjuna's mother Vāsaṭā was the daughter of Sūryavarman 'who was born in the spotless family of the Varman Kings great on account of their supremacy over Magadha.'¹³ There is no king of this name in the dynasties of Magadha

¹¹ Compare for instance प्रकृतिभ्यः परं प्रत्ययमर्थवन्तमतिबहुतिथप्रयो-जनानुबन्धमागमपरिपूर्णं विदधानः सन्धिविग्रहसमासनिश्चयनिपुणः स्थानेऽनुरूपमादेशं ददद् गुणवृद्धिविधानजनितसंस्कारः साधूनां राज्यशालातुरीयतन्त्रयोरुभयोरपि निष्णातः etc. in the description of Dhruvasena II of Valabhī—Boṭāḍ Plates G. E. 310 (= 629-630 A. D.).

except the Maukhari prince Sūryavarman whose Haraha stone inscription, incised in the reign of his father Isānavarman, is dated (Mālava) Samvat 611 (555 A.D.). The name of this prince is not known from other records of the Maukharis. As Sūryavarman is called King in Sirpur stone inscription above referred to, he may have succeeded his father and ruled for a short time, though being a collateral his name is not mentioned in the records of his brother or his descendants. Chandragupta, the grandfather of Mahāśivagupta Bālārjuna was thus a contemporary of Sūryavarman and flourished probably from 550 to 570 A.D. and his elder brother Tīvaradeva from 530 to 550 A.D.

The date thus arrived at for Tīvaradeva is corroborated by the evidence afforded by the records of Vishnukundin Kings. After examining all the available charters of these kings Mr. Dinesh Chandra Sircar has given the following genealogy¹⁴ :—

Mahārāja Mādhavavarman I was the most powerful King of the dynasty. He is described in his as well as his successors' records as one who had performed a thousand (Agnishtoma) sacrifices and eleven asvamedhas

¹⁴ Indian Historical Quarterly Vol. IX p. 278.

¹⁵ Pulomburu Plates of Mādhavavarman, Journal of Andhra His. Res. Society Vol. VI p. 20.

(Horse Sacrifices). He is also described in his plates as

त्रिवरनगरभवनगतपरमयुवतीजनविहरणरतिः or

त्रिवरनगरभवनगतयुवतिहृदयनन्दनः ,

i.e., one who delighted the hearts of (or sported in company of) the best ladies in the mansions of the city of Trivara. This expression has not yet been satisfactorily explained. Dr. Hultsch took it to mean that Mādhavavarman I lived at Trivaranagara but he could not identify the city. It seems clear, however, that Trivaranagara means the city of Trivara, *i.e.*, Tivaradeva, King of Mahākosala. But then what does the above expression signify? It cannot mean that Mādhavavarman married a lady from the family of Tivaradeva; for the expression refers to a number of ladies (युवतीजन) in the mansions of the city of Trivara whom he delighted. Besides Mādhavavarman is not known to have married any lady from the family of Tivaradeva. On the other hand he is said to have married a Vākāṭaka princess, whose son Vikramendravarman is described in his son's charter as one who adorned both the families of the Vishnukunḍins and Vākāṭakas. We must, therefore, take the expression to refer to Mādhavavarman's victory over Tivaradeva. Tivaradeva was a powerful King. He describes himself in his charters as प्राप्तसकलकोसलाधिपत्यः 'one who attained suzerainty over the whole Kosala country.' A victory over such a great king must be a source of pride to Mādhavavarman. Hence we find it referred to again and again in his inscriptions, much in the same way as Pulakeśin the Second's victory over Harsha, the lord paramount of North India, is mentioned in the records of his descendants. The idea that a victorious king

¹⁶ *Ipur Plates of Mādhavavarman, Ep. Ind. XVII p. 234.*

¹⁷ विष्णुकुण्डिवाकाटकवंशद्वयालङ्कृतजन्मनः in the Chikkulla Plates, *Ep. Ind. Vol. IV p. 193.* Also cf. उभयवंशात्मजालङ्कारभूतः in the Ramatirtham plates, *Ep. Ind. XII p. 133.*

captivates the hearts of young ladies of the enemy's city—nay even of the enemy's family—occurs sometimes in Sanskrit and Prakrit literature.¹⁸ It would not, therefore, be wrong to suppose that Mādhavavarman I vanquished Tivaradeva. In any case, he was his contemporary.

When did this Mādhavavarman flourish? His Pulomburu plates¹⁹ record that when he crossed the Godāvarī to conquer the eastern region, he donated the village Pulomburu in the Guḍḍavādivishaya to Śivaśarman, the son of Damaśarman and grandson of Rudraśarman of the Gautama gotra and Taittirīya Śākhā on the occasion of a lunar eclipse which occurred on the full moon day of Phālguna. Again the Pulomburu plates²⁰ of the Eastern Chālukya King Jayasimha I, which were discovered along with the above plates of Mādhavavarman, record the grant of the same village to Rudraśarman, the son of Śivaśarman and grandson of Damaśarman, of the Gotama gotra and Taittirīya Śākhā. From the details given above it is quite clear that Śivaśarman, the donee of Mādhavavarman's plates, was the father of Rudraśarman who received the village from Jayasimha I. It seems that Rudraśarman, who is called 'pūrvāgrahārika' (former owner of the donated village)

lost possession of the village in the troublous times due to the invasions of Pulakeśin II in the beginning of the seventh century A.D. He, therefore, seems to have made representations to Jayasimha I some time after peace and order had been established in the Kingdom and received the Agrahāra village again from him.

If we calculate the interval between the reigns of Mādhavavarman I and Jayasimha I, we find that a period of about sixty years must have elapsed between these two rulers. Mādhavavarman's Pulomburu plates are dated in the 40th year of his reign.²¹ They were, therefore, issued towards the close of his reign. He seems to have ruled over an extensive empire, for he performed as many as eleven aśvamedhas. Three of his sons are known from inscriptions. 1. Devavarman, 2. Mañchaṇṇabhaṭṭāraka²² and 3. Vikramendravarman. As Mādhavavarman had a long reign of more than forty years, none of his sons seems to have succeeded him.²³ In any case we do not know of any plates issued by them. Mādhavavarman II, the grandson of Mādhavavarman I, who calls himself the lord of Trikūṭa and Malaya mountains, seems to have held possession of the western provinces after the death of Mādhavavarman I, while another grandson Indravarman seems to have succeeded him in the East. His plates are dated in the 27th regnal year. He is not likely to have reigned much longer for his son Vikramendravarman is said to have come to the throne when he was a mere boy.²⁴

²¹ I have accepted the view of Mr. D. C. Sarkar (I.H.Q. IX p. 275).

²² The name of this prince occurs towards the end of the four plates (First Set), Ep. XVII p. 334. None of his descendants are known.

²³ It is noteworthy that no royal titles are prefixed to their names even in the records of their sons.

²⁴ परममाहेश्वरस्य महाराजस्य श्रीइन्द्रमहाराकवर्मणः प्रियज्येष्ठपुत्रो गरिष्ठः शैशव एव सकलगुणालङ्कृतस्य सम्यगध्यारोपितसकलराज्यभारः परममाहेश्वरो महाराजः श्रीमान् विक्रमेन्द्रवर्मा एवमाज्ञापति ।

Vikramendravarman's plates were issued in his tenth regnal year. The reigns of Indravarman and his son thus cover a little more than 37 years. As no successor of Vikramendravarman is known, he seems to have been dethroned by Pulakeśin II, who placed his brother Kubjavishṇuvardhana in charge of the Eastern province. He reigned for about 18 years (615—633 A.D.). As the Pulomburu plates of Jayasimha I referred to above are dated in the fourth regnal year, we can calculate the interval between the two sets of Pulomburu plates as follows :—

Indravarman	27	years.
Vikramendravarman		...	10	years.
Vishṇuvardhana		...	18	years.
Jayasimha	5*	years.
			<hr/>	
			60	years.

As Mādhavavarman I, Indravarman and Vikramendravarman may have continued to reign for some years after their respective plates were issued, this figure may have to be increased by about ten years, *i.e.*, a period of about seventy years may have elapsed between these two gifts. It appears that Śivaśarman was a young man, say 25 to 30 years of age, when he accompanied Mādhavavarman in his expedition to the east and received his charter on the bank of the Godāvarī while his son Rudraśarman was an old man of fifty or sixty, when he regained the lost Agrahāra village from Jayasimha. Now Jayasimha issued his plates in circa 637 A.D. Deducting 70 years from this we get c. 567 A.D. as the approximate date of Mādhavavarman's plates. We find that there was a lunar eclipse in the month of Phālguna in 565 A.D. This may, therefore, be accepted as the date of Mādhava-

* Agreeing with Mr. Somaśekhara Sharma I read the numerical symbol in Jayasimha's Pulomburu plates as 5.

varman's plates. As these plates were issued in his 40th regnal year, we may accept 525-568 as the probable duration of Mādhavavarman's reign.²⁵ We have fixed above 530 to 550 A.D. as the date for Tivaradeva on the evidence of the Sirpur inscription, which we thus find corroborated by the date of Mādhavavarman, who, as described in his charters was a contemporary of Tivaradeva.

We must next proceed to consider the arguments advanced by some scholars to corroborate Kielhorn's date for Tivara. (1) Rai Bahadur Dr. Hiralal places the Sirpur Laxman Temple inscription of Tivaradeva's brother's grandson Mahāśivagupta Bālārjuna in the eighth or ninth century A.D.²⁶ But the characters of the inscription are decidedly earlier. R. B. Hiralal himself has drawn attention to what he calls the antiquated forms of the letters इ, ए, स, ध, थ, भ, ज. The forms of म, र, ल, ट, द, and ह show that it must be placed earlier than the 8th century. They closely resemble the letters in the Ganjam plates of the time of Śaśāṅka (dated 619-620 A.D.). It would not therefore be wrong to refer it to the first half of the 7th century A.D.

(2) The Sanjan plates of Amoghavarsha I (Śaka Samvat 793) mention that Govinda III first encountered and defeated Nāgabhaṭa and Chandragupta when he

²⁵ Agreeing with Mr. D. C. Sarkar I have identified Mādhavavarman of Pulomburu plates with Mādhavavarman I mentioned in the Chikkulla and Ipur plates (First set) on the ground of similarity of description. M. J. Dubreuil who distinguishes between them places Mādhavavarman about 450 A.D. The tradition in the Sthalamāhātmya of Śrī Parvata on which he relies is worthless for historical purposes (Ancient History of the Deccan p. 73). Prabhāvatīguptā was not known as Chandrāvatī and was moreover a devotee of Viṣṇu and not of Śiva. See her Riddhapur plates. If Mādhavavarman I owed his throne to a Vākāṭaka prince, it must be to Harishena (c. 500—530) who conquered the Āndhra country. The Vākāṭaka princess whom he married was probably Harishena's own daughter.

²⁶ Ep. Ind. XI p. 184.

started for *digvijaya* in the North.²⁷ Dr. D. R. Bhandarkar who has edited these plates has identified Nāgabhaṭa with the well-known prince of that name in the Gurjara Pratihāra dynasty, and Chandragupta with the brother of Tīvaradeva. As the certain dates of Govinda III vary from 794 to 814 A.D. he places Tīvara the elder brother of Chandragupta in the eighth century A.D. Prof. R. D. Banerjee also has supported this view.

The identification proposed above is, however, open to serious objections. Chandragupta is not mentioned in the Sanjan plates as King of Kosala. As he was defeated along with Nāgabhaṭa of Gujerat he was probably a king of Central India. Besides, the same plates mention later on that Govinda III, after his victories in the North, returned to the Narmadā and following its bank, acquired among others the country of Kosala, which he made his servants enjoy.²⁸ If Chandragupta whom he had already defeated had been a king of Kosala, it would have been redundant to mention that country again in the description of his later conquests.

(3) Many records of Śailodbhava kings mention a king named Trīvara, with whom Mādhava, a Śailodbhava prince allied himself to oust his elder relative Dharmarāja alias Mānabhīta from the throne.²⁹ Both of them were

Kondedda, Nirvina and Puri plates of Dharmarāja

defeated by Dharmarāja. Mādhava was, thereafter, obliged to spend his last days at the foot of the Vindhya mountain, probably in the Kingdom of his ally Trīvara. R. D. Banerjee, Chakravarti and others have identified this Trīvara with King Tīvaradeva of Chhattisgarh. The dates of Śailodbhava Kings are not yet settled. Their records are generally dated in regnal years. The only exception so far known for certain,³⁰ is the Ganjam plates of Mādhavarāja II, which were issued when the year 300 of the Gupta era (*i.e.*, 619-20) was current. R. D. Banerjee's proposed identification of Mādhavarāja II of the Ganjam plates (619-20 A.D.) with Sainyabhīta II alias Mādhavavarman of Buguda plates is plausible.³¹ Dharmarāja alias Mānabhīta, the grandson of Mādhavavarman, who issued the Kondedda and Puri plates must therefore be referred to circa 650—675 A.D.

³⁰ Mr. Rajaguru reads Sainvat 512 as the date of the Puri copper plates of Dharmarāja and refers it to the Śaka Sainvat (J.B.O.R.S. June, 1930). This reading has been questioned by R. D. Banerjee (Hist. of Orissa, I p. 134). The first symbol appears to denote 300. In that case this date also would have to be referred to the Gupta era.

³¹ See the following genealogies:—

The Characters of his plates support this conclusion, for they closely resemble the Apsad stone inscription of Ādityasena which is assigned to the last quarter of the seventh century. As seen above Dharmarāja was a contemporary of Tīvaradeva of Chhattisgarh. So Tīvaradeva also must be placed in the latter half of the seventh century.

This undoubtedly conflicts with the date 535—555 A.D. proposed above for Tīvaradeva on the evidence of paleography and historical references, for there is a difference of more than 125 years which cannot be satisfactorily accounted for. This later Tīvara may have been a remote descendant of the earlier Tīvara who was a contemporary of Vishṇukunḍin Mādhavavarman. We know of several instances of such repetition of names in the dynasy of Somavamśi Kings of Kosala and Orissa, to which Tīvaradeva belonged.

The date of Tīvaradeva has also a bearing on those of Kings of Śarabhapura, but it would be better to discuss their relation in a separate article.

The difficulty presented by the palaeography of Buguda plates to which R. D. Banerjee has referred (*History of Orissa* I, p. 130) is not insurmountable. While editing the Buguda plates Kielhorn had drawn attention to the fact that the plates, on which the inscription is written, originally bore another inscription, the letters of which probably were beaten in to make room for the new inscription. If so, the new inscription may have been engraved on the plates later on, when the original plates were lost or destroyed.

DEOGARH IN MEDIÆVAL TIMES

(In the light of a poem by Amir Khusrau)

DR. M. WAHID MIRZA, M.A., PH.D.,

Reader in Arabic, Lucknow University.

Very few cities in mediæval Indian history attract our attention so forcibly and so consistently as does the fortress-city of Deogarh, or Deogīr¹ as the Mohammadan historians are fond of calling it. There was, of course, the capital of northern India, Delhi, with its kaliedoscopic career under successive dynasties and under various names, a city that conjured up before the hungry eyes of the trans-border hordes visions of palaces and gardens, of treasures untold, and of mighty kings reclining on gorgeous thrones each one of which cost the tribute of an empire. There was, too, the ancient city of Kannauj, the seat of ancient Hindu civilisation and grandeur and the home of the blue-blooded Brahmins, and several other important cities and towns that have figured more or less prominently in the history of that period.

Yet Deogarh has, to my mind, more of romance and interest about it than most of those cities. The very fact of its being situated so far away from the northern political centres and yet attracting successive waves of invasion would show the peculiar charm it exercised on the minds of kings and princes, and it was this charm that in the later part of the so-called Pathan period tempted the able, though eccentric, monarch, Moḥammad Tughlaq, to select it as the seat of his government and to try the disastrous experiment of making the whole popula-

See p. 238 *infra*.

tion of the three cities of Delhi² move to it bag and baggage.

But what was the secret of this peculiar charm? Was it the strong and inaccessible site of the city that made it a desirable possession for launching raids further south, or the rich and precious spoils contained within the strong walls of the fortress? Mohammadan historians give glowing accounts of the immense wealth that fell into the hands of the invaders. Thus 'Alāuddīn in his first raid on the city is said to have brought back with him six hundred '*mans*'³ of gold, seven '*mans*' of pearls, two '*mans*' of diamonds, emeralds and rubies, a thousand '*mans*' of silver, countless bundles of silk and other rich fabrics and numerous elephants and horses.⁴ This, even after making due allowance for the probable exaggeration on the part of historians fired with a zeal to glorify the exploits of the heroes of Islam, is sufficient to give an idea of the extreme affluence of the Deccan cities and of Deogarh particularly. One could, therefore, reasonably surmise that lust of plunder was the main attraction that drew the Mohammadan soldiers to Deogarh.

But was that all? Did the Mohammadans just want to plunder and lay waste the rich country and found no more beauty and interest in it than does a dress-maker in the brilliant plumage of a bird of paradise or in the luxuriant coat of a silver-fox? Did they not, on the other hand, feel a genuine admiration for Deogarh and wanted to possess and guard it with the sympathetic and loving concern of a father rather than with the gluttonous

² Sīrī, Jahānpanāh and Dihlī. See Ibn Battūṭa's description of the city (Defremery III, p. 146).

³ Not 'maunds'; a '*man*' (Persian weight) was equal to 8 lbs.

⁴ Firishṭa: Lucknow (I. 96). Barnī (p. 222 *seq.*) 1864.

greed of a cannibal? When Qutbuddīn Mubārak Shāh named the city after his own name as Qutbābād,⁵ surely he was not fathering a place that had already been drained of all its wealth and despoiled of all its resources. When again Moḥammad Tughlaq, giving the city the happy title of Daulatābād (the Abode of Prosperity), adopted it as his capital, he could not have been moved to take that step by mere greed of plunder.

I think, it was more the charm of the fine culture and the high grade of economic and social development of Deogarh that captivated the hearts of the Mohammadans, and fortunately we have, in the writings of the famous poet, Amīr Khusrau, ample proof of the great admiration and genuine respect that the Mohammadans felt for the city. That poet in his voluminous compositions has given us very important and first-hand information about the political condition of India in his times, and that information has been proved to be strikingly accurate. Of Deogarh he speaks more than once and as we have reasons to believe that he visited the place himself, his narrative becomes all the more interesting, and it is the purpose especially of this paper to quote some of those interesting facts about Deogarh that one does not find in other contemporary historians but which serve to shed

⁵ No historian, strangely enough, has noticed this name. But Khusrau says clearly in his poem in praise of Deogarh written after the reign of Mubārak Shāh (*Nihāyat-ul-Kamāl*, Brit. Museum Ms. No. 25,807, fol. 459 b. seq.):—

زهی مبارک شهری شه خلجسته بلاد
که نام یافت ز قطب سپهر "قطب آباد"

See also Thomas' *Chronicle of the Pathan Kings*, pp. 179-180, where a gold coin of Mubārak Shāh's reign is described; the coin struck in 718 H. bears the following legend ضرب هذه السكة بقلعة قطب آباد (This coin was struck in the fortress of Qutbābād). Thomas supposes Qutbābād to be a part of Delhi, but it is clear that the coin was struck at Deogarh which was a place of mintage in the time of Qutbuddīn's predecessors as well as his successors.

more light on the old civilisation of the Deccan than does anything else.

When in 722 H. Ullugh Khān, later Mohammad Tughlaq, led an expedition to the south with the object of punishing Rudradeva⁶ of Warrangal who had shown signs of refractoriness, he selected Deogarh as the centre of his operations. Khusrau seems to have accompanied that prince, and Deogarh appears to have captured the poet's fancy. In a panegyric addressed to the prince on that occasion he describes its charms at great length, and it will not be out of place to give here translations of some of the passages.

“Wonderful and auspicious city,” he says, “the queen of the blessed realm which received the name of Qutbābād from the ‘Pivot of the world.’⁷ When infidelity prevailed here, people were tormented by demons and that is why the ancient Deo⁸ named it ‘Deogīr.’⁹ Now that it has become the ‘egg’ of Islam no bird other than the phoenix of happy augur can take its birth in it. It would be no flattery to call it ‘the garden of Eden’ but I do not call it that lest it be confused with the paradise of Shaddād.¹⁰ The city was surely destined to become a paradise under Islamic rule, for why else has it been so carefully adorned? It is, perchance, due to hearing the fame of this city that Cairo has dipped her robe in indigo

⁶ Called ‘Luddardeo’ by Khusrau and other Mohammadan historians.

⁷ Qutb-i-‘Ālam, i.e., Qutbuddīn Mubārak Shāh, see *supra*.

⁸ ‘*Div-i-kuhan*,’ probably Mahādeo is meant.

⁹ A curious interpretation of the name. Deo or Div in Persian is a demon and gīr is from Persian ‘giriftan,’ to seize.

¹⁰ Mythical king of South Arabia alluded to in the Koran and supposed to have built the ‘garden of Eden,’ a presumptuous act for which he had to suffer drastic punishment.

(*nīl*)¹¹ and Baghḍād has split in two¹² . . . The air here is so pleasant that it imparts a pleasure similar to that promised to men of virtuous deeds, in the next world . . . How shall I describe its fruit? It is the envy of the fruit of the whole world. There are the bananas curved like the crescent-moon and as pleasant as the day of 'Id. There is again the mango the sweetness of which delights every palate and which looks like a golden casket full of milk and honey and makes the mouth of the sugar-candy water There is, then, the wonderful leaf *tambūl* (betel) that intoxicates hearts with its pleasant taste . . .

The city has so many pearls and precious stones that the ocean and the mines are now unable to produce any more.

The fineness of its cloth is difficult to describe: the skin of the moon removed by Mars would not be so fine. One could compare it to a drop of water if that drop, contrary to nature, fell from the font of the sun. A hundred yards of it can pass through the eye of a needle, so fine is its texture, and yet the point of a spear can pierce through it only with difficulty. It is so liaphanus and light that it seems as if one is wearing no dress at all but has merely smeared one's body with pure water¹³

The music is such that each stroke of the musician's plectrum makes Venus cry, in jealous anguish, like her own harp.

¹¹ A pun on the word '*nīl*' that means indigo and is also the Arabic form of the Nile. Dyeing a garment in indigo would show mourning.

¹² Alluding to Baghḍād being divided into two portions.

¹³ This is '*divgīrī*' or '*deogīrī*,' a very fine cloth of which Khusrāu speaks at many places. He declares it to be finer than even the '*katān*,' a Persian fabric of phenomenal lightness that is said to be too delicate to bear even the moonlight. He says in one of his mathnavis: *که لعاف دیوگیری از کتان به* ("for *deogīrī* is finer than the *katān*").

If I depict its inhabitants on the canvas, the pen of ' the master ' would derive inspiration from my painting In point of beauty they are all divine and of houri descent."

This is how Khusrau praises Deogarh. A more lavish encomium he has not deigned to bestow even upon Delhi that was given in his times the proud title of ' Dārul-Khilāfat ' (the seat of the Caliphate). Could we doubt the genuineness of his admiration and could we still say that it was nothing more than mercenary motives that took the Mohammadans to Deogarh? I do not think so.

MAHĀMAHOPĀDHYĀYA CANDRA

UMESHA MISHRA, M.A., D.Litt., Kāvya-tīrtha,
Lecturer in Sanskrit, University of Allahabad.

It is a fact that even now a vast literature of Indian thought is lying in the dark unknown to the literary world. Except certain references either by contemporary or by later writers we do not know of several works and scholars of name and fame. Efforts in the field of research lead us to unearth every day some fresh material, fragmentary though it may be, of almost forgotten schools of Indian thought. This is not merely true of the several schools of philosophy but of all the branches of learning some of which are practically lost to us. Of the several reasons why Indian literature suffered so much, a few are advanced here with reference to the school of Pūrva-Mīmāṃsā with an aspect of which the present paper deals.

India essentially being a country of Religion, it is but necessary that a system of thought should deal with the nature of *Dharma* in all its bearings. Here in India, every school of philosophy aims at *Mukti* either by getting rid of pain, or by the attainment of *Tattvajñāna*. Whatever may be the means of it, it is a fact that it can be realised through the *Law of Karman*. Hence, a system dealing with *Dharma* in all its aspects which includes the *Law of Karman* must have pre-eminently occupied the attention of the people. Over and above these, we know that the Buddhists had severely attacked the performances of Vedic rites and rituals and there was every danger of losing the influence of Vedic culture for ever. It was therefore, necessary that a revival should take place and the importance of the Vedic rituals and rites should be

preached against Buddhism. This was perhaps the reason why Mīmāṃsā was once so widely read and several scholars with their individual differences wrote on it.

There were two main schools of Pūrva-Mīmāṃsā, namely, the Bhaṭṭa school and the Prabhākara school. To study Mīmāṃsā was considered an essential part of study even very lately. This must have given fresh impetus to every centre of learning. But it appears that in Mithilā its study reached its zenith. We find that during the reign of Rānī Viçvāsa Devī, wife of Rājā Padma Sinha, brother of Rājā Çiva Sinha, the patron of Vidyāpati Thakkura, there was a gathering of Paṇḍitas in Mithilā in which some fourteen hundred Mīmāṃsakas alone were invited.¹

Of these two schools of thought, the school of Prabhākara Miçra became more and more popular.² It attracted the attention of scholars from different parts of the country. There was hardly a scholar of Pūrva-Mīmāṃsā who did not study and write on this school of thought. But several of these scholars preserved their own individuality and created several subdivisions under this school. The reason why this school became so popular seems to be that, unlike the Bhaṭṭa school, it had more scope for independent reasoning.

But as time went on, things changed. Perhaps due to the fresh impetus given to Nyāya, Vaiçṣika, Vedānta and several Vaiṣṇava schools, the school of Pūrva-

¹ Puruṣaparīkṣā along with Maithilī translation, (Darbhanga edition), p. 262, Ft. Note.

² The following verse current in Southern India also speaks of its popularity:—

गथा तथागतानाङ्गलति गमनिका कापिली कापि लीना,
क्षीणा काणादवाणी द्रुहिणहरगिरः सौरभन्नारभन्ते ।
क्षामा कौमारिलोक्तिर्जगति गुरुमतङ्गौरवाददूरवान्तं,
का शङ्का शङ्करादेर्ब्रजति यतिपतौ बद्धवेदीन्त्रिवेदीम् ॥

Dr. Jhā's Prabhākara-Mīmāṃsā, p. 10.

Mīmāṃsā suffered much in later centuries of the Christian Era. The system of Pūrva-Mīmāṃsā, in fact, is not a philosophical system. It mainly deals with the consideration of the practices of Vedic rites and rituals, the regular performance of which requires a regular life full of patient activities. There is no freedom of thought and activity under this system. Hence, this sort of bondage would have been felt very much and consequently it could not continue for a long period. The zeal for the study and performance of Vedic rites and rituals gradually gave way and scholars took pleasure in concentrating their attention on the subtleties of Nyāya and Vedānta. Again, perhaps it might be due to the fact that people did not like to work under the yoke of *Authority* which Pūrva-Mīmāṃsā preached. They did not like to see reason sacrificed. Hence, the change was inevitable. The age of *Reason* prevailed. This should not be taken to mean that *Authority* was disregarded altogether. It occupied only a place of secondary importance later on. Due to these and several other similar reasons the regular practice of the Vedic rites and rituals and consequently the study of Pūrva-Mīmāṃsā became neglected.

Under such circumstances, there flourished one of the well-known Mīmāṃsakas of the Prabhākara school, Mahāmahopādhyāya Candra. He was the son of Mahopādhyāya Guṇarati who was well-known in the society of the learned. He belonged to the family of Poṣālī(?) in Mithilā.³ No more about his family history is known to us. That he was held in great respect by

Maithila scholars is clear from the fact that Caṇḍeçvara Ṭhakkura, the great Maithila Nibandhakāra, speaks of him as *Gurumatācārya*.⁴

Nothing can be definitely said about the exact time of this author. But references of contemporary and later writers are not wanting. Thus Murāri Miçra II⁵ refers to his views and refutes them.⁶ Varadarāja, son of Raṅganātha, grandson of Devarāja, great grandson of Praṇatārtilhara and pupil of Sudarçana,⁷ while commenting upon the *Nayariveka* of Bhavanātha Miçra, refers to Candra.⁸ Caṇḍeçvara Ṭhakkura refers to him in supporting his own statement.⁹ Çaṅkara Miçra, the well-known author of the *Upaskāra*, refers to his views in his *Vādicinoda*.¹⁰ And lastly, Jayarāma Bhaṭṭācārya also refers to his views in his *Nyāya-Siddhānta-Mālā*.¹¹

I have already pointed out elsewhere that Murāri II cannot be later than the 12th century A.D. Varadarāja is also an old writer. Caṇḍeçvara lived in 1324 A.D.¹² Besides, the Ms. of which a transcript is with me is itself dated as 258 La. Saṁ.,¹³ which comes to 1377 A.D. These

data show that 12th century is the *terminus ad quem* of Candra's date.

Again, when we study the fragmentary work of his available to us, we find that Candra refers to the *Vivaraṇa*, *Çrīkara*, the *Viveka*, and the *Pañcikā*. He also refers to the *Bhāṣya* and *Guru*. Of these, the *Vivaraṇa* is considered to be another name of the *Bṛhatī*, the work of Prabhākara himself.¹⁴ About *Çrīkara* we know that his earliest reference is found in the *Mitākṣarā* on the *Yājñavalkya Smṛti* of the 11th century. Hence, he must have lived either in the latter half of the 10th century, or in the beginning of the 11th century, if Vijñāneçvara be placed in the latter half of the 11th century. The *Viveka* is believed to be the same as the *Nagariviveka* of Bhavanātha Miçra, who is considered to have lived about 1200 A.D., or the beginning of 1400 A.D.¹⁵ But this date will have to be pushed back at least by one century or even more in the light of our researches that Murāri II who must have lived in the 12th century A.D. has referred to this very *Viveka* in his *Tripādīnītinayanam*. Again, we know that this very Candra who has been referred to by Murāri Miçra II, quotes the views of the *Viveka* very often. So that, either we shall have to believe that the *Viveka* referred to by Murāri Miçra II and Candra is altogether a different work written before the 11th century, or the date of the author of the *Viveka*, namely, Bhavanātha Miçra, will have to be pushed back by two centuries at least. These facts disprove the view that both the author of the *Viveka* and the father of Çaṅkara Miçra, the author of the *Vaiçeṣika-Upaskāra* are the same person. Lastly, we

¹⁴ Vide Proceedings of the Third Oriental Conference, pp. 477-478.

¹⁵ Vide the Princess of Wales Saraswatibhawan Studies, Vol. VI, p. 169.

come to the *Pañcikā*, also spelt as *Pañjikā*. It is another name of the *R̥juṣimalā*, a commentary on the *Bṛhatī* of Prabhākara Miśra by Ṣālikanātha Miśra who, most probably, belonged to the middle of the 10th century. Now considering all these facts, we may say that the 11th century is the *terminus a quo* for the date of Candra. We might, therefore, place him at present before 1100 A.D.

About his literary activities we know that he was a Mīmāṃsaka of the Prabhākara school and held an independent view of his own. The only work of his, so far known to us, is a commentary on the Jaiminiya Sūtras in the *Adhikaraṇa* form. Most likely, Candra wrote a complete commentary of which only a portion is found as yet. He himself in his commentary on *Adhyāya* XI seems to have made references to his commentary on the previous *Adhyāyas*. Murāri Miśra II refers to his (Candra's) views on the first *Adhyāya* of the Jaiminiya Sūtras. No more proof is available at present. This commentary is named as *Nyāyaratnākara* or *Nayaratnākara*. This is perhaps the second commentary on a work of Pūrva-Mīmāṃsā which is so named, the other being the *Nyāyaratnākara* of Pārthasārathi Miśra on the *Ślokaṇṭika*. There are two more works, so far known, named as *Nyāyaratnākara*—a work by Kṣemānanda Dikṣita on Yoga and the other by Vanamālī Miśra on Mādhva School.¹⁶

In this portion of the commentary Candra refers to *Gr̥hikara*, the *Vireka*, the *Vicaraṇa*, *Guru*, the *Bhāṣya*, the *Bhāṣyakāra*, the *Pañcikā* and several others as *anye*, *apare*, *kecit* etc. These latter references show that after Prabhākara and before Candra there were several other independent writers on Pūrva-Mīmāṃsā of whom we

¹⁶ Vide Cat. Catalogorum by Th. Aufrecht, Vol. I, p. 309 and Vol. III, p. 66.

have no knowledge as yet. It also proves that this school of thought was very popular amongst the scholars of those days. He also quotes a line from some Smṛti.¹⁷ The commentary is written *Adhikaraṇa*-wise but is very lucid and complete in itself. In almost every case, the author refers to the views of others before giving his own. He sometimes differs from the old reading of some of the Sūtras and also in dividing the *Adhikaraṇas* after a particular Sūtra.¹⁸

In this fragmentary work of his we do not get any information as to his philosophical views. So that all our knowledge regarding this point is from other sources. Thus Caṅkara Miśra¹⁹ and Jayarāma Nyāyapañcānana²⁰ tell us that Candrar holds that there are eleven *Padārthas* (categories), namely, *dravya* (substance), *guṇa* (attribute), *karman* (action), *sāmānya* (generality), *saṅkhyā* (number), *samarāya* (inherence), *sādṛśya* (resemblance), *śakti* (capacity) in common with others of the Prabhākara school, while *krama* (succession), *upakāra* (auxiliary) and *saṁskāra* (impression) as his own addition to the above mentioned eight categories.

AN IRANIAN PRINCE OF THE PARTHIAN DYNASTY AS THE FIRST PROMUL- GATOR OF BUDDHISM IN CHINA

Late Shams-ul-Ulema DR. SIR JIVANJI
JAMSHEDJI MODI.

Dr. Leo Wieger has recently published an excellent History of the Religious Beliefs of China in French and Mr. E. C. Werner has given us a good Introduction. translation of it.¹ He has written it in the form of Lessons at the request of the Catholic Institute of Paris. The History is divided in four periods of which the third period treats of "Buddhism and Taoism," from the year 65 to the year 1000 A.C. During this period, in the second century after Christ, it was a Parthian prince, An-shihkao, who is said to have produced, for the first time, translations into Chinese of some Buddhist texts, and thus, to have been the first promulgator of Buddhism. The object of this paper is to determine who this Persian prince was and to give an account of what may have led him to Buddhism.

China was known to the Early Persians even of the Avesta times.² The relations between the two countries of those times may be taken as pre-historical. The first historical relations are said to have begun in 140 B.C. when "under the Han dynasty missions were

Early Relations
between China and
Persia.

¹ "A History of the Religious Beliefs and Philosophical Opinions in China from the beginning to the present time" by Dr. Leo Wieger, S. J. (1917). Translated by Edward Chalmers Werner (1927).

² Vide my paper "References to China in the Ancient Books of the Parsees," read at the International Congress held at Hanoi

despatched in every direction, and more than one of these penetrated as far as Parthia, which is termed An-Sih—the Chinese form of Arsaces as Kingsmill first pointed out. The Chinese description of Parthia is to the effect that rice, wheat, and the vine were cultivated, that the cities were walled and that it was a very great country.”³ Reference, moreover, is made to the use of silver coins bearing the effigy of the reigning monarch.

As said by Rev. Wigram, “The Chinese knew the Parthians, as men who coined silver money with the head of their King Al-Sak (Arsaces) upon it. They had mastered the art of writing, and so were not without some tincture of the civilization that is lawfully only the heritage of the Celestial Kingdom.”⁴ Again “The Parthians were received as allies by the Chinese Emperor in the East.”⁵

Buddha, according to Dr. Rhys Davids, lived in the 5th Century B.C. and died, at the age of about 80 in 400

B.C. or a few years later.⁶ The first

Pioneers of
Buddhism in China.
pioneers of Buddhism in China were two monks. Emperor Ming of the second Han dynasty, having heard of the spread of Buddhism at Khotan and in its neighbourhood at the doors of China, wished to know something more of the religion and sent for some monks to explain the religion. Two went to China and were welcomed by the King who

caused to be built for them, in 67 A.C., “at the capital Lo-yang (now Honan Fu) the convent of the White Horse.”⁷ Both the Indian monks were of the Brahman caste. Both these monks died in China,—one Moteng or Matang at the end of 67 A.C., and the other Fa-lai (the Indian name, perhaps may be Dharma-aranya) about 70 A.C. “There remains to us, from these two men, a single pamphlet, and four titles of lost works. They did not translate Indian treatises in their entirety, but set forth briefly the fundamental doctrines of Buddhism. And that, for obvious reasons. First, that was all that the emperor desired. He had caused them to come, not in order to make a thorough study of Buddhism, but to learn approximately what it was about. It is clear also that they were unable to acquire a very extensive knowledge of the Chinese language, during the short time they lived in China.”⁸ They, therefore, contented themselves by making a few summaries of (a) the account of the life of Buddha, (b) of the principles of Buddhism, (c) of a discourse of Buddha and (d) of the rules of ascetic life. These monks did no propaganda work. All the above summaries are said to have been lost. Only “a short exposition of Buddhist principles called ‘*the Sūtra in 42 articles*’ has remained.”

Then, for more than 70 years, no body went to China. Then “finally, in 148 (A.C.), there arrived at the Chinese Court a man, whose personality and work are of great interest.”⁹ This man was a Parthian prince, “an authentic Arsacide, who yielded the throne to his uncle, the younger brother of his father, became a Buddhist monk,

An Iranian
Prince, the first
promulgator of
Buddhism.

⁸ *Ibid.*, p. 343.

⁹ *Ibid.*, p. 351.

for a long time led a wandering life, arrived at Lo-yang in 148, settled there and died there in 170. Some beings to whom he had done injury, pursued him, he said; and he predicted that he would die a violent death. In fact, one day, when he was interposing to stop a fight, a projectile thrown by chance struck his head, and killed him. He bore in China the name An-shihkao."¹⁰ "An" in the name is a contraction of Arsace. The name means "he who had been great in the world."

Revd. Dr. Wieger says that this Parthian Prince An-shihkao was Parthamasiris or Psarmatossorim, the son of the Parthian King Pacorus II.

Who was this Persian-Parthian prince An-shihkao? He had not come to the throne of his father, but had become the king of Armenia. He had, under certain circumstances, to give up the throne of Armenia. This young prince, having met with misfortunes, seems to have renounced the world and become a monk. He came to India and thence went to China. The story of his life, as briefly described by Dr. Wieger, runs thus:—

"Pacorus II ascended the royal throne of the Parthians in A.D. 90. In 97, he had as successor, not his son, but his younger brother, whose name has been variously written by the authors, Osroes, Osdroes, Cosdroes, Chosroes (not to be confused with the Sassanide king of that name), and finally Corroes. This Corroes had as successor, in 134, his son Vologes II. Pacorus II had been the friend and ally of Decebalus, the famous king of the Dacians. He had an only son, Theodosius Minor says expressly. The name of this son was Parthamasiris according to Pausanias, Xiphilinus, Theodosius Minor, Capitolinus, S. Rufus; Psarmatossorim, according to Aelius Spartianus. Why did he

¹⁰ *Ibid.*

not succeed his father? Very probably, because he was too young. The times were unsettled. The enterprises of Decebalus caused Trajan to march against the Dacians in 101-102, and in 105, Corroes having afterwards made his nephew Parthamasiris King of Armenia, Trajan who considered Armenia as a dependency of Rome, marched against the Parthians and defeated them. At an interview at which he humiliated him as he pleased, he extorted from the young king the cession of Armenia, and then pretended that he wished to make him King of the Parthians in place of his uncle Corroes, but abandoned that project when he found that the Parthians held him in but slight estimation. In 114, near Susa, a Roman troop made a prisoner of Corroes's own daughter, who was sent to Rome as a hostage (Dion Cassius in Trajano). Trajan having died in 117, his successor Hadrian showed himself more tractable. Peace was at length concluded, and the daughter of Corroes, a hostage at Rome for sixteen years, was sent back to him in 130 (L. Aelius Sparthianus in Hadriano). Of Parthamasiris there is no further mention. If, as Theodosius Minor expressly states, Pacorus II had only one son, one must believe that this son Parthamasiris, and An-shihkao, are one and the same person. Where and when did he become a Buddhist and a monk? Probably after his misfortunes. It is credible that he avoided his uncle, to whom Trajan had wished to oppose him, and that he did not see his cousin who had returned from Rome. The Buddhist historians insinuate, without saying it clearly, that he went to India, and thence to China. He could have heard mention in Central India of the two monks who had formerly gone from there to the capital of China, and tried the adventure. Intelligent and a worker, he soon managed to make himself understood, and set himself to translate, with the aid of interpreters, Buddhist texts,

for the emperor. The Buddhist catalogues attribute to him 176 works, of which 55 still exist."¹¹

The above identification of An-shihkao being the same as Parthamasiris is not supported by what we read in Lt. Col. Sykes's History of Persia.

The story of the Prince as given by Western Historians.

Sykes's account of the events in Persia is as follows:—Vologes I (Vulhash of the Pahlavi books) had a war with the Romans, especially for the throne of Armenia, which the Romans claimed. He had appointed his brother Tiridates (Tirdad) on the throne of Armenia. The Romans under Nero (55—63 A.C.) opposed him. Vologes gave way because his hands were weakened by the rebellion of his son Vardanes. Three years later, having subdued his son, he again put Tiridates on the throne of Armenia. In the subsequent war, Tiridates was defeated, and peace was made on the term, that Tiridates may be put on the throne of Armenia which was known as the "cockpit of the Near East,"¹² as a tributary of Rome and that he was to receive the crown of Armenia at the hands of Nero in Rome. Tiridates did not go immediately to Rome, by sea-route as desired, having sacerdotal objection. But, a little later on, in 66 A.C., he went to Rome by land-route with an escort of 3000 horsemen. He was received with honour. The cost of his journey to Rome and back and the stay there, altogether a period of nine months, cost the Roman Empire £6000 a day, *i.e.*, the total expenses to the Roman Empire is said to have come to about (£6000 × 30 days × 9 months =) £1620000. Vologes died in 77 A.C. and was succeeded by his son Pacorus II. Pacorus died in 105 A.C. His reign was not a successful one. He was succeeded by Osroes, also

¹¹ Wieger's History, *op. cit.*, pp. 351—53.

¹² Sykes's History of Persia, Vol. I, p. 407.

spoken of by various authors as Osdroes, or Cosdroes or Chosroes or Corroes.¹³ He ruled from 100 to 129.

Upon the death of his brother Tiridates in 100 A.C., Pacorus had placed on the throne of Armenia his son Assidares without any recognition by Rome. Emperor Trajan resented this. To win over Trajan, Osroes sent an Embassy to Rome with rich presents and a message, that Asirades, who was put on the throne of Armenia without the recognition of Rome, was recalled, and that Osroes would put on the throne of Armenia, with the recognition of Trajan, Parthamasiris, the only son of the late Parthian King Pacorus II. As Trajan "was burning to imitate the career of Alexander the Great, he declined the gifts and replied that on reaching Syria, he would do what was right."¹⁴

On reaching Antioch, Trajan had a letter from Parthamasiris, who wrote to him as the King of Armenia. Trajan gave no reply. So Parthamasiris (also spoken of by some writers as Psarmatossorim) wrote another submissive letter without calling himself "King of Armenia." Trajan replied to this letter, saying that he must receive the crown of Armenia at the hands of the Roman Emperor. When Trajan went to Armenia in the spring of 115, the Parthian Prince went to him and placed his crown at the feet of Trajan in expectation that he would immediately receive it back from the hands of Trajan. But no. Trajan not only deprived him of the crown, "but after his departure even stooped so low as to have him pursued and murdered. It is satisfactory to know that public opinion in Rome condemned this gross act of treachery."¹⁵

¹³ Dr. Wieger's History of China, *op. cit.*, p. 351.

¹⁴ Sykes's History of Persia, I, p. 411.

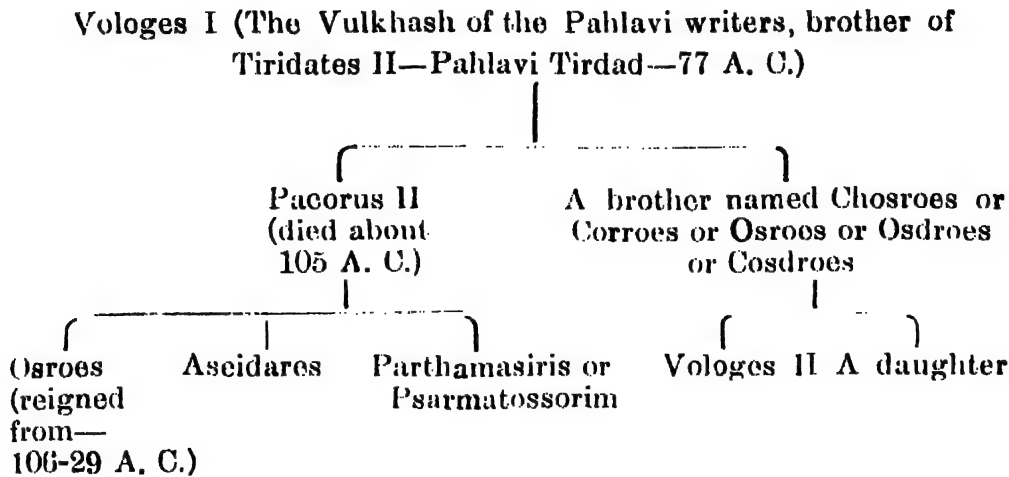

¹⁵ Sykes's History of Persia, p. 411.

The above Vologes is the Vulkhash of the Pahlavi Dinkard. He is referred to in the Pahlavi Bahman Yasht.¹⁶ There, a tree is referred to as having seven branches, which symbolized seven coming periods. They are the following:—(1) The Golden period when Zoroaster revealed his religion in the reign of Vishtasp. (2) The Silver period of Vohuman (Bahman), the son of Spendadad, also known as the Kayanian Ardashir. (3) The Brazen period of Ardashir Babagan the founder of the Sasanian dynasty. This includes the period of the time of King Shapur and the time of Adarbad (Marespand). (4) The Copper period in the time of the Askanian King. (5) Tin period of Behramgore. (6) The Steel period of the reign of Khosru Kobad (Noshirwan the Just). (7) Iron period ending with the millenium of Zoroaster.

The question is, why is the time of Vologes I (Vulkhash) taken by the predictionary writing of the Pahlavi Bahman Yasht as a critical time in the religious history of Iran? I think, that that was owing to the inroads of Buddhism in Iran. It was, as the result of this inroad, that the Iranian prince of his family turned a Buddhist and went even to China as a propagandist. The following table shows the relationship of Parthamasiris (the An-shihkao of the Chinese writers) to the other members of his family. The name, as we find it in Western writers, is not in its real Iranian form. It is a corruption. The proper Iranian name seemed to begin with Pahlava.

The Time of Vologes I is referred to as Critical in Parsee books possibly on account of the inroads of Buddhism.

¹⁶ Chap. II, 19. S.B.E., Vol. V, p. 201.

The above referred to visit of Tiridates to Rome was "as a sop to Roman *amour propre*, the prince in question was allowed to pay a visit to Rome and receive a crown there :- the sort of sham triumph that might appeal to Nero."¹⁷

The reference in the Chinese books to the figure of the Persian King on the Coins is significant, because the Parthians are said to have had an instinct as it were for king-worship or extreme reverence to the King. Rev. Wigram in his history of the Assyrians says "The instincts of the (Parthian) race seem to have been for king-worship, the head of the Arsacid house being regarded as personally semi-divine."¹⁸ When the Parthians came into closer contact with the Magi, the latter led them to keep this view of king-worship within proper limits.

From this brief survey, we see that it was a Persian prince, who first promulgated Buddhism in China. His western name was Parthamasiris. His exact Iranian

¹⁷ The Assyrians and their Neighbours by Rev. W. A. Wigram, (1929), p. 22.

¹⁸ The Assyrians and their Neighbours by Rev. W. A. Wigram (1929), p. 32.

name is not known but it seems to be something like Pahlavasara.

The Renaissance in the time of Vologeses (Vulhash) requires to be explained. It seems that by the time of

The Iranian Renaissance in the time of Vologeses (Vulhash), perhaps, aimed against Buddhism.

his reign Buddhism had arrived at the gates of Persia and had even entered it here and there. The conversion of the above referred to Parthian prince to Buddhism, seems to have been the result of this entry. So, to protect the people against its entry, the house had to be set in order, and it seems, therefore, that Vologeses or Vulhash made such an attempt to set the house in order, and tried to help the Renaissance of Zoroastrianism begun by Ardashir Babagan.

GOTAMA ON THE PROBLEM OF VALIDITY

ANUKUL CHANDRA MUKERJI, M.A.,

Reader in Philosophy, Allahabad University.

The problem of the ultimate basis of proof which is still in the region of unsettled controversy is undoubtedly the most basic problem of epistemology. As is well-known, it has been the subject of an age-long controversy in Indian philosophy as well where it led to the formulation of a number of warring theories that are roughly classified under four heads in the well-known verses quoted by Āchārya Mādhava, in his *Sarva-Darśana-Saṅgraha*. Of these, the most important logical issues are involved in the controversy between the Naiyāyika theory of *parataḥprāmāṇya* and the Mīmāṃsā doctrine of *svataḥprāmāṇya*. Yet, on a closer scrutiny, it may perhaps appear that the barrier which has obstinately separated the disputants for centuries is deplorably transparent, or it has at least lost a good part of its opacity during the battle.

Gotama formulates the problem in the form of a dilemma. The validity of a particular cognition is either self-established or it stands in need of an external justification. In either case it leads to difficulties. If the validity of the cognitions is to be established *ab extra*, we are inevitably led to the awkward *regressus ad infinitum* or *anavasthā*. On the other hand, if they are to be accepted as possessing an intuitive certainty, we are thrown on the other horn of the dilemma, and then it would be idle to insist on the need of proof even in the case of objects of cognition. In other words, the first alternative would make the process of logical justification impossible, for, that which is advanced in support of the validity of the

cognitions must itself show its logical credentials by reference to something other than itself and this process must continue *ad infinitum*. The second alternative, on the other hand, would make the logical process redundant, for, if the validity of the cognitions be accepted without a logical proof, there is no reason why the process of proof should be thought to be indispensable for establishing the reality of the objects or prameyas.

(प्रमाणतः सिद्धेः प्रमाणानां प्रमाणान्तरसिद्धिप्रसङ्गः तद्विनिवृत्तेर्वा
प्रमाणसिद्धिवत् प्रमेयसिद्धिः—2. 1. 17-18)

Gotama's own reply is that the only way out of this logical *impasse* is to recognise clearly that the validity of the cognitions is established much in the same way as that of the lamp-light. (न, प्रदीप प्रकाशसिद्धिवत् तत्सिद्धेः, 2. 1. 19)

This reply, for a man unsophisticated by party prejudices and unaffected by the battle-cries of the fighting armies, would be very plain. Gotama here seeks to steer clear of the two horns of the dilemma. None can deny, and Gotama the least, the necessity of logical justification at least in certain cases, in so far as he admits the facts of erroneous perception and fallacious inferences. On the other hand, logic would render but poor service to the cause of knowledge and truth if every logical demonstration had to remain incomplete despite all that could possibly be done by the most careful logician. But these difficulties do not exist for one who could see clearly that though nothing can be accepted dogmatically without sufficient reason, yet in the ultimate analysis knowledge cannot be criticised *ab extra*, much as the lamp-light which reveals the things need not itself be revealed by something other than itself. Put thus, Gotama's position comes perilously near the Mīmāṃsā view of *svataḥ-prāmāṇya*; and in fact this plain interpretation has been accepted by a number of ancient thinkers who are referred to by Uddyotakara and Vāchaspati Miśra.

(ये तु प्रदीपप्रकाशो यथा न प्रकाशान्तरमपेक्षते, एवं प्रमाणान्तरमपेक्ष-
माणान्यपि सन्ति भविष्यन्ति इत्याचार्यदेशीया मन्यते—Tātparyaṭikā
p. 256, Viz. ed.).

Gotama's commentators, however, for reasons best known to themselves, have found the plain interpretation to be too big to swallow. And in their zeal for the slogan of *parataḥ-prāmāṇya* they have evidently forced Gotama to say what perhaps he had never intended to say; and the consequence is that the real difficulties of the problem as stated by the original philosopher are not infrequently flung to the winds. Gotama's problem is evidently one of validity, but it is overshadowed in the commentaries by discussions on the problem of the psychological conditions of knowledge, while the real question is handled in a summary fashion that is as unsatisfactory as it is incomplete. Thus, Vātsyāyana, for instance, thinks that what Gotama actually intended to convey by his reply is that no knowledge is intuitively certain but stands in need of proof by reference to another cognition, much as the lamp-light which is the indispensable psychological condition of perceptual knowledge has itself to be perceived by the visual sense-organ.

(यथा प्रदीपप्रकाशः प्रत्यक्षाङ्गत्वात् दृश्यदर्शने प्रमाणम्, स च प्रत्यक्षान्तरेण
चक्षुषः सन्निकर्षेण गृह्यते—Bhāṣya on 2. 1. 19).

Then arises a host of psychological problems about the possibility of the cognition of cognitions and about the sufficiency of a bare instance, such as the lamp-light, for establishing a conclusion without the necessity of a general proposition or *vyāpti*, and so on. And the immediate purpose of the commentators after Vātsyāyana reduces itself to patching up the gaps in the arguments of the latter rather than coming to a closer grip with the problem of Gotama. But how do they reconcile the theory of *parataḥ-prāmāṇya* with their anti-dogmatic attitude? Is it possible to avoid the *regressus ad infinitum* while

sticking to the belief that every thing or object must be proved by the four-fold source of knowledge and that no knowledge is intuitively certain? The real problem is only pushed back when Vātsyāyana argues that the validity of a given perception is established by another perception, and not by another type of cognition or entirely without any proof.

(सेयं प्रत्यक्षादिभिरेव प्रत्यक्षादीनां यथादर्शनमुपलब्धिर्न प्रमाणान्तरतो न च प्रमाणमन्तरेण निःसाधनेति Bhāṣya on 2. 1. 2. 1. 19)

For, even if it be granted that a given perception is established by another perception and not by a cognition belonging to a heterogeneous class, that does not show how the process of proof can be completed if the series is once started. In fact the logical difficulty arising out of an infinite series remains intact in either case. Probably the weakness of this argument is realised by the Naiyāyikas themselves, and hence they proceed at this point to give a new turn to their contentions. The *anavasthā* can be easily terminated, they contend, if we remember that though in certain cases the knowledge of *pramāṇa* is necessary in order to arrive at the knowledge of the *prameya*, yet this is not a universal rule; for the cases are not rare in which the knowledge of the *prameya* does not presuppose a knowledge of the *pramāṇa*. The fatal *regressus* would be inevitable only if the knowledge of the *prameya* had been always conditioned by a knowledge of the *pramāṇa*.

Now, this line of argument seems to be a sophistical side-tracking of the real issue. When the question at issue is how the *anavasthādoṣa* should be removed from a position that insists on the necessity of establishing the validity of a given knowledge by another knowledge, it is practically no answer to say that in some cases the validity of a knowledge is established without a consciousness of the validating reason. It must at least be granted that

even here there does not exist the validating process but as no process can *ex hypothesi* be true in its own right it must hang on another process and that on another, and so on *ad infinitum*. So the *anavasthā* is not affected by the consciousness or the unconsciousness of the *pramāṇa*. It is not easy to understand why even such a careful logician as Vāchaspati Miśra did not hesitate to lean upon a such a broken reed.

It is, however, interesting to note that despite the apparent ingenuity with which these arguments are developed by the Naiyāyikas, they do not stop here but proceed to explore new lines of defence. And it is only then and not before that they show signs of earnest fighters and cease to play fast and loose with their opponents. And the result is that they either admit a defeat or adopt the ways of ordinary common-sense people, *i.e.*, it is either admitted that all knowledge is not to be established externally, or they content themselves with the pragmatic answer that that knowledge is valid which leads to a successful activity. It is rather incomprehensible why such an elaborate arrangement of dialectical weapons should have been thought to be necessary if such a fate had awaited the whole fight. To admit the necessity of even a single case of intuitive knowledge is to give the doctrine of *parataḥprāmāṇya* a decent burial, yet the admission is unequivocally made by no less a logician than Vāchaspati Miśra. On the other hand, the pragmatic test of *pravṛttisāmarthyā* is admittedly not a universal test of knowledge. Even if it be granted that the truth-value of my perception of water is established when the perceived water quenches my thirst, this pragmatic test is hopelessly inadequate to establish, for instance, the validity of the inference by which I know the reality of the sense-organs; much less does it help us when we are concerned with the validity of a scientific theory or a law

of thought. It is true that for the practical transactions of our daily life, as argued by Vātsyāyana, it is enough to have a clear consciousness of the things and the immediately preceding *pramāṇa*, or, as it is often put, *vyarāsāya* and *anuryarāsāya*; but to think further that what is competent to regulate practical life is equally competent to remove a theoretical perplexity is to discredit philosophy in general. In fact the *anarasthā* is a purely theoretical difficulty, and this remains unsolved if it is said that न चास्ति व्यवहारान्तरमनवस्थासाधनीयं येन प्रयुक्तोऽनवस्थामुपाददीतेति.

It seems impossible to conceive of a clearer admission that the problem is insoluble and that the *anarasthā* is ingrained in the doctrine of *parataḥprāmāṇya*.

Even this brief consideration of some of the outstanding arguments of Gotama's commentators should be sufficient to make one pause before reading the theory of *parataḥprāmāṇya* into the Sūtras. To do so would be, to say the least, to show scant respect to the dialectical insight of Gotama. In default of any very cogent evidence to the contrary, we contend, therefore, that the theory has been wrongly foisted on him by his commentators. It follows from our contention that the so-called Sūtra, *viz.*, कचिन्निवृत्तिदर्शनादनिवृत्तिदर्शनाच्च कचिदनेकान्तः—2. 1. 20. is in reality a link in the argument of Vātsyāyana and not an aphorism of Gotama, and here Viśvanātha is right over against Vāchaspati who ascribes it to Gotama in his *Nyāyasūchīnibandha*. For, it is evidently inconsistent with the preceding Sūtras when the latter are interpreted plainly and directly.

YĀJÑAVALKYA AND THE PHILOSOPHY OF FICTIONS

R. D. RANADE, M.A.,

Professor of Philosophy, University of Allahabad.

1. It is fortunate that the present writer should have found a topic, namely one dealing with the philosophy of Yājñavalkya, as a topic peculiarly fitted to go in the commemoration volume in honour of Dr. Ganganatha Jha. The propriety of the theme. The life and work of Dr. Ganganatha Jha remind us of the sage Yājñavalkya at every stage. Like Yājñavalkya, Dr. Ganganatha Jha hails from Mithilā, and like Yājñavalkya, he is an Advaitin. Any one who might have read his recent lectures on Advaita philosophy delivered at Baroda might find how much justification there is in calling Dr. Jha a present-day representative of the philosophy of Yājñavalkya.

2. It would not be improper here to go into a very short résumé of the philosophical teachings of this great ancient Maithila Philosopher, the philosopher of the Bṛihadāraṇyakopanishad, Yājñavalkya. A short résumé of the philosophical teachings of Yājñavalkya. For a full account of his personality and teachings, the reader may be referred to the present writer's "*Constructive Survey of Upanishadic Philosophy*," pp. 19--21, and 55-59. In order, however, to understand the full significance of Yājñavalkya's philosophy of Fictions, which is the topic of the present essay and which has been scarcely dealt with in that volume, it would just be well to begin by noticing a few points of his philosophy to serve as a background for the picture of his fictionalistic philosophy. We know how Yājñavalkya regards the Ātman as both

the ontological substratum of all existence, as well as the epistemological nucleus of all knowledge.¹ He is the *fons et origo* of all existence, and is also the source to whom all perceptions are to be referred. Another way of stating his ontological doctrine is his very characteristic theory of Emanations. This involves, that the only reality in the world belongs to the Ātman, everything else being merely derivative, and a fatuity (Ārta).² From the heights of his Advaitic philosophy, as has been pointed out in the “*Constructive Survey*,” Yājñavalkya is led even to regard Transmigration as unreal; for as the Soul is eternal, from what would it transmigrate, and to what?³ Also we know, how he regards consciousness itself, from the purely philosophic point of view, as a fleeting phenomenon.⁴ This however, does not prevent him from regarding the Ātman as *νόησας νοησέως* the eternal self-spectator,⁵ the only reality in a world of phantoms.

3. The passage in which Yājñavalkya's philosophy of Fictions comes out particularly is the celebrated one

from the second chapter of the Bṛihadāraṇyakopaniṣad, 4th *Brāhmaṇa*, which runs as follows:—

Yājñavalkya's use of the word 'Iva' to enunciate a philosophy of Fictions.

यत्र हि द्वैतमिव भवति तदितर इतरं जिघ्रति, तदितर इतरं पश्यति, तदितर इतरं शृणोति, तदितर इतरमभिवदति, तदितर इतरं मनुते, तदितर इतरं जानाति, यत्र वा अस्य सर्वमात्मैवाभूत्तत्केन कं जिघ्रेत्तत्केन कं पश्येत्तत्केन कं शृणुयात्तत्केन कमभिवदेत्तत्केन कं मन्वीत तत् केन कं विजानीयात् । येनेदं सर्वं विजानाति तं केन विजानीयाद्विज्ञातारमरे केन विजानीयात् ॥१४॥

Yājñavalkya is telling his wife Maitreyī that it is only where there is an as-it-were duality, that one is able to

¹ Bṛih. II. 4. 11.

² Bṛih. III. 4. 2, and III. 5. 1.

³ Bṛih. II. 4. 13.

⁴ Bṛih. II. 4. 12.

⁵ Bṛih. IV. 3, 1—6.

see another, to hear another, to smell another, to know another; but where, to the realiser, the whole world is the Ātman, by what and what could he perceive, by what and what could he think, by what and what could he hear? How could he know the Knower who knows all things? This passage has got an eschatological context no doubt, because Yājñavalkya is having a conversation with his wife Maitreyī in regard to departing consciousness, but it could as well be extended to the epistemological sphere. Just before this passage, Yājñavalkya had almost confounded Maitreyī by telling her that after death it seemed as if consciousness was itself lost. Maitreyī felt perplexed and asked him how this came to pass. Yājñavalkya hastily excused himself from answering the question by saying that sufficient unto the day was the wisdom thereof,⁶ and then, as if by a tangent, gave out his great fictionalistic doctrine which is couched in the passage above referred to. Yājñavalkya tells us that because all perception, audition, thought, imagination, and so forth, take place only when there is as-it-were an "other," in the absence of such an "other" such acts of perception and the rest would be impossible altogether. Hence, Yājñavalkya's philosophy requires that there must be an as-it-were, a semblant duality, before any psychological act like that of perception or thinking becomes possible. But experience shows that this "other" is of an unenduring and perishable character. Hence, we have to conclude that for the epistemological act, the duality presented must be only an as-it-were duality, and not a real duality at all: it is only as-if there was an "other," pitted against the "one." The object is a non-ent, if taken away from the subject; it is only the One that exists. This is what we might call the nucleus of Yājñavalkya's philosophy of fictions.

⁶ Brih. II. 4. 13.

4. In regard to the position thus reached there are two further points worthy of note. In the first place, the philosophy of fictions is connected with the impossibility of making the Knower the object of knowledge. He, who is the supreme knower of all things, how is it possible for him to be known? This is the first chief strand in Yājñavalkya's epistemological doctrine. Another is the modification which Yājñavalkya later introduces in the same Upanishad, wherein he relieves his original absolutistic solipsism by granting that when it is said that we do not know any other object, in fact, we know it and yet know it not. We see and see it not; we hear and hear it not; and so forth. Hence, the original philosophy of fictions which threw a doubt upon the existence of objective reality by making it only an appearance has later to be modified by the recognition that to objective existence some sort of reality may be granted for psychological purposes; this is possible because, says Yājñavalkya, the instruments of perception, namely the organs of sense, do not cease to function. Hence, because, the energies of the senses remain in the act of perception, we must grant that there must be some sort of existence for psychological purposes; but as the only real existence for all ontological purposes could be the Ātman, the external reality that we are talking about must be of the nature of a mere fiction or an appearance.

5. This is the outcome of understanding the full implication of the particle '*iva*' in the passage of the Bṛihadāraṇyakopaniṣad which is the main topic of the present essay. Let us see how the passage originally quoted is interpreted by the three great commentators on the Upanishad, Śaṅkara, Raṅga-rāmānuja, and

Different interpretations of the Yājñavalkyan dictum.

Madhva. The passage has, as we have pointed out above, an eschatological context no doubt, as it comes immediately after the exclamation of Yājñavalkya to Maitreyī that there may be no consciousness after death. But it is not necessary to restrict it to the eschatological universe of discourse. The question of Ātman, according to Yājñavalkya, could be discussed not merely from an eschatological point of view, but even legitimately from an epistemological point of view. Śaṅkara recognises this, and tells us that two states of knowledge could be conceivably imagined, one the state of Vidyā, and the other the state of Avidyā. In the state of Vidyā there is absolutely no existent outside the Ātman; but in the state of Avidyā we might suppose that there is a “heteros” apart from the perceiving subject. But this “heteros,” says Śaṅkara, is only of a fictional character :—

यत्र यस्मिन्नविद्याकल्पिते कार्यकरणसंघातोपाधिजनिते विशेषात्मनि
खिल्यभावे, हि यस्मात् द्वैतमिव परमार्थतोऽद्वैते ब्रह्मणि द्वैतमिव भिन्नमिव
वस्त्वन्तरमात्मन उपलक्ष्यते.....इतरो घ्राता इतरेण घ्राणेनेतरं घ्रातव्यं
जिघ्रति तथा । सर्वं पूर्ववत् । इयमविद्यावदवस्था । यत्र तु ब्रह्मविद्ययाऽविद्या
नाशमुपगमिता तत्र आत्मव्यतिरेकेणान्यस्याभावः । यत्र वा अस्य ब्रह्मविदः
सर्वं नामरूपाद्यात्मन्येव प्रविलापितमात्मैव संवृत्तं, यत्र एवमात्मैवाभूत्तत्तत्र
केन करणेन कं घ्रातव्यं को जिघ्रेत् ? तथा पश्येद्विजानीयात् ।

Hence, Śaṅkara concludes that real knowledge is knowledge where the trinity of the perceived, the perceiver, and the perception vanishes :—

तस्मात्परमार्थात्मैकत्वप्रत्यये क्रियाकारकफलप्रत्ययानुपपत्तिः । अतो
विरोधाद् ब्रह्मविदः क्रियाणां तत्साधनानां चात्यन्तमेव निवृत्तिः ।.....
केनचित् कथंचित्कश्चित्कथंचिन्न जिघ्रेदेवेत्यर्थः ।

Raṅga-rāmānuja agrees with Śaṅkara that the passage need not be interpreted merely from an eschatological point of view, but he tells us that the particle ‘*iva*’ may

be understood as implying the inconceivability of the independence of external reality :—

एवं मुक्तौ देहात्मभ्रमनिवृत्तिमुक्त्वा स्वनिष्ठता भ्रमनिवृत्तिं प्रतिपादयति । यत्र हि द्वैतमिव भवति तदितर इतरं जिघ्रति । यत्र यस्यामवस्थायां द्वैतमिव भवति स्वनिष्ठतया परमात्मनः पृथगिव भवति स्वतन्त्र इव भवतीति यावत् । स्वातन्त्रस्याप्रामाणिकत्वद्योतनार्थं इवशब्दः ।

He furthermore tells us that it is only when the individual soul receives grace from the Paramātman that he is able to know all things, or even the Paramātman himself :—

येन परमात्मना प्रसन्नेनानुगृहीतः सर्वज्ञो भवति ।..... परमात्मप्रसादमन्तरेण परमात्मा दुःखबोध इत्यर्थः ।

Madhva, on the other hand, restricts the passage to the eschatological sphere, substitutes the concept of positive dependence for Raṅga-rāmānuja's inconceivability of independence, and tells us that it is impossible to know God Hari, a personal Being, through whom the individual soul knows all things :—

इवशब्दः पारतन्त्र्यार्थः । । यत्र यदि मुक्तौ अस्य ज्ञानिनः सर्वकरणादिकमात्मैवाभूत् । स्वव्यतिरेकेण किमपि नासीत् । तत्तर्हि केन करणेन किं जिघ्रेदित्यादि ध्येयं गन्धादिविषयभोगो न स्यादित्यर्थः । येनेश्वरेण इदं सर्वं जीवो विजानाति तं हरिं केन विजानीयात् तज्ज्ञानं च न स्यादित्यर्थः ।

We thus see from a review of the different expositions of the Yājñavalkyan dictum how the particle ' *iva* ' has been interpreted in different senses by the three great commentators : by Śaṅkara, as implying a theory of semblance; by Raṅga-rāmānuja, as designating the inconceivability of the independence of external reality; and by Madhva, as implying the positive dependence of reality upon a personal being.

6. A justification for the way in which Śaṅkara has tried to interpret the Yājñavalkyan dictum comes from an altogether unexpected quarter, the philo-
A justification for a fictionalistic interpretation from an altogether new quarter. logico-philosophical. Vaihinger, an acute German philosopher, pointed out some years ago that exactly analogical expressions were used to designate the fictitious character of reality in the four chief European languages. We have, for example, the *quasi* in Latin, *comme si* in French, *ὡς ἐάν* in Greek, and *als ob* in German, from which last, Vaihinger christens his philosophy. It is unfortunate that Vaihinger did not know the use of the particle ' *ica* ' in Sanskrit exactly on the same lines as the above usages. It would have been a matter of great interest to Vaihinger to note in the passage of Yājñavalkya, which we have above quoted, that the particle ' *ica* ' is used exactly in the same sense in which *als ob* is used in German. As we shall see a little later, by reference to certain passages from Kant, as well as to Vaihinger's philosophy of fictions, there is no escape from or no alternative to, interpreting Yājñavalkya's dictum in a like fictional manner.

7. In his work "*Die Philosophie des Als Ob*," which was first penned in 1876, but which for various reasons, could not see the light of day till some years later, Vaihinger, while illustrating his philosophy of fictions, draws upon the various works of Kant to show how he first received the inspiration for his fictionalism from Kant. Kant to Vaihinger was a great luminous orb, at which he could light his own philosophical torch. By reference to the different works of Kant, Vaihinger points out that the only real interpretation of Kant is a fictional interpretation. It is neither an idealistic, nor

The inspiration to Vaihinger's fictionalism in the philosophy of Kant.

a rational, nor an empirical, nor a properly critical interpretation, which, according to him, would give the real explanation of the philosophy of Kant. This, according to him, must be explained only from the fictional point of view. Kant's belief in the dual world of *noumena* and *phenomena* supplies us with the basis wherein to seek the roots of the fictionalistic philosophy. When Kant tells us that we must suppose "as if" there is a Creative Reason in the world,⁹ when he tells us that the will must be regarded "as if" free even though we cannot say anything about it from the phenomenal point of view,¹⁰ when he says that each man should behave "as if" he were a member of the kingdom of ends, a kingdom which represents the idea of a complete totality of ends combined in a system,¹¹ when he says that we should regard the Moral Law as sacred "as if" it were a Divine Commandment,¹² when, finally, in the Critique of Judgment he tells us that we must suppose "as if" there was a Perceptive Intelligence for which there would exist no contingency for adapting particular laws of nature to the understanding,¹³ we see how Vaihinger wants to stress the purely fictionalistic trend running throughout the Critiques of Kant. It was this philosophy, he tells us, which was his primary inspiration for fictionalism. We may see likewise how Yājñavalkya's philosophy of 'īca' exactly corresponds with such a fictionalistic interpretation. Though there is no actual "heteros," we have heard Yājñavalkya tell us that we must suppose "as if" there was one for the different processes of perception;

¹³ Watson, *Selections from Kant*, p. 339.

how, in fact, the Ātman is to be regarded as the sole reality, while all other things are merely "ficta."

8. The question arises what is the nature of these fictions? Vaihinger has taken great pains to discrimi-

nate the nature of these fictions. He tells us that a fiction is a conscious and unreal assumption¹⁴ made for practical purposes. It differs from a hypothesis,¹⁵ inasmuch as a hypothesis can be verified, but a fiction can never be verified. Hence, even though a fiction is a conscious assumption like a hypothesis, it is unreal because it cannot be verified, while a hypothesis may be real because it is capable of verification. All scientific discoveries are made of hypotheses; but fictions do not enable us to make discoveries. All the human sciences are replete with illustrations of such fictions. Mathematics, Physics, Logic, Ethics, Metaphysics, Religion, in fact, all sciences are infected with ficta.¹⁶ All the sciences take certain unreal assumptions for granted, and weave their superstructures thereon. The nature of the sciences themselves is as fictitious as the assumptions which they make. Vaihinger points out how the concept of a point in mathematics and of an atom in physics is a fiction: there is nothing in reality to correspond either to a point or to an atom. Concepts and judgments, individuals and universals, are equally fictitious. The syllogism of Logic is evidently a fiction. Matter and Mind are fictions. The monad, which is so much talked about in philosophy, is of a fictitious character. The Divine Right of Kings is a fiction. The War of All against All, upon which Hobbes dilated, is also

¹⁴ Vaihinger, *The Philosophy of 'As If,'* Autobiographical Introduction, p. xlii.

¹⁵ Vaihinger, *The Philosophy of 'As If,'* Autobiographical Introduction, p. xlii.

¹⁶ Robinson, *Anthology of Recent Philosophy*, p. 588.

fictitious. The Absolute, which is regarded as the highest notion of philosophy, is of the nature of fiction. Value and End are fictions likewise. Infinites and infinitesimals equally share in the nature of fiction. All averages, all types, all symbols are fictitious in character. All categories, all concepts like Duty and God, are equally well fictions. Thus, says Vaihinger, all Logics and Epistemologies, all Metaphysics and Ethics, all Mathematics and Physics, in fact all sciences are infected with ficta. These are conscious errors made only for "practical" purposes. In the latter point he agrees with Pragmatism,¹⁷ but he differs from Pragmatism in his conception of Double Truth,¹⁸ about which presently.

9. It is needless to say that if Yājñavalkya had lived in these days, he would have given us the very expressions which Vaihinger has used as illustrations of the philosophy of fiction from the various sciences. Yājñavalkya concerned himself only with the subject-object relation in the various psychological processes, and told us that the subject alone was real, while the object was

The relation of
Fictionalism with
Sensationalism and
Ātmanism.

of a fictitious character. There is, however, one important difference between the fictionalism of Vaihinger and the fictionalism of Yājñavalkya. While Vaihinger's fictionalism is sensationalistic,¹⁹ Yājñavalkya's fictionalism is Ātmanic. When Vaihinger was asked as to what remained when all his facts became fictions, and when the challenge was thrown at him that all ficta thus become facts *optimi juris*,²⁰ Vaihinger retorted by saying that there were two entities about the reality of which we

might say we were certain, namely, the flux of sensations, and the laws of identity and contradiction.²¹ Now, every psychologist tells us that a bare sensation²² is a mere fiction. What, then, would prevent us from saying, when Vaihinger tells us that the "flux" of "sensations" is the ultimate reality, that he is dealing with a double instead of a single fiction? The "change" as well as the "sensations" are fictions, and hence the flux of sensations must be a double fiction. This is not so with Yājñavalkya's Ātmanic experience, where the eternal Knower is the *fons et origo* of existence, as of all experience. Thus, even though Vaihinger posits a double truth like Yājñavalkya, there is an important difference between the two. Vaihinger's double truth consists, as he elsewhere inconsistently puts it, of the world of matter and the world of consciousness.²³ It is this very conception of "double truth" in Vaihinger which the Pragmatists were concerned to refute. The Pragmatists only say that truth is successful error, and error is unsuccessful truth. Thus all truths, according to them, are some kind of error and all errors some kind of truth. To Vaihinger, there is a double reality. On the other hand, to Yājñavalkya reality consists of a lower and a higher kind, the lower being the world of human experience, and the higher the world of Ātmanic experience. This double truth of human and Ātmanic experience, of Avidyā and Vidyā, corresponds closely to the phenomenal and the noumenal of Kant. Kant has thus far greater linkage with Yājñavalkya in the matter of this doctrine of double truth than Vaihinger can ever have. Vaihinger's fic-

tionalism is sensationalism gone mad and become inconsistent, while Yājñavalkya's fictionalism is based upon the rock of Ātmanic experience. Both are fictionalisms no doubt, but the one is a sensationalistic fictionalism, while the other is an Ātmanic one. There is as little similarity and as much difference between the fictionalism of Vaihinger and the fictionalism of Yājñavalkya as between Dog and God, the same alphabets no doubt, but the one an absolute anti-type of the other.

HENRY LORD AND HIS DISCOVERIE OF THE BANIANs

DR. H. N. RANDLE, M.A., D.PHIL.,
Librarian, India Office, London.

The Court Minutes of the East-India Company,¹ under date January 7, 1624, record: "Messrs. Lord, Benson, and Morehouse present their services as preachers into the Indies, the Court having particular recommendation of Mr. Lord from Dean White,² under whom he served as curate, and from Mr. Shute³ and others; entertained him at £60 per annum; he is to give bond not to exercise any private trade,⁴ and appointed to preach on Sunday sennight at Great St. Helens⁵ and to take for his text, 'Have no fellowship with the works of darkness, but rather reprove them'." On January 16 there is another record: "Mr. Lord, lately entertained to go a preacher, having given testimony of his sufficiency by a sermon preached at St. Helens, to have £20 to buy him books, and two months pay by way of imprest." Again

¹ Calendar of State Papers, Colonial, 1622—24, pp. 229—232, and 240.

² Francis White, Dean of Carlisle, afterwards Bishop of Carlisle, Norwich, and Ely. The record of Lord's curacy under him has not been traced. ([S.] *see* concluding footnote).

³ Josias Shute, Rector of St. Mary's Woolnoth, Lombard Street, 1611—1643, who acted as Chaplain to the East-India Company from 1632. [S.]

⁴ For an account of the early chaplains appointed as preachers into the Indies and the terms of their employment *see* the first chapter of the Rev. Frank Penny's *The Church in Madras* (3 Vols., London, 1904).

⁵ The trial sermons were preached in this Church from 1621, when the Company's offices were moved to Crosby Hall which was in the Parish of Great St. Helen's, Bishopsgate. The church survived the fire of London; but the present pulpit, which is figured in Penny's work, is dated 1633, and is therefore not the one from which Lord preached. (Penny, *op. cit.*, p. 2.)

on January 28: 'Request of Mr. Lord, the preacher, to be allowed a boy to attend him the voyage; was told he might make choice of sundry boys already shipped, whom he shall find appareled to his hand, and when he came in the country he may take liking of some Indian boy, as others of his profession have done before him, with which answer he rested satisfied.' Lord's career before he presented his services as a preacher into the Indies has not been traced,⁶ but Factory records make references to him after his arrival in India. He sailed in Weddell's fleet, which left the Downs on March 28, 1624.⁷ In a letter of November 1625 we read: "'Padre' Lord, Mr. Young, and Mr. Woolhouse are to return to England in the *James*." The *James* was to return to England in February, 1626. But a letter of December 23, 1625, states that "Kerridge refused Lord permission to go, saying, 'hee would not have it reported that a padre should forsake India for such slight matters'." Lord had had some difference with members of the Council, but the President, Kerridge, reconciled them, 'and so he still stayeth.' How long did he stay? In the French translation⁸ of Lord's

⁶ The writer in the *Dictionary of National Biography* (Vol. xxxiv, p. 134) identifies him with a Henry Lord who figures in the records of Oxford University as having been born in Oxfordshire in 1563 and having matriculated from Magdalen Hall in 1580. Magdalen Hall passed through many vicissitudes, in the course of which its records were lost, as I am informed by the courtesy of the Librarian of Hertford College, its present representative. The identification of this Lord with the author of the *Discoverie of the Banians* is very unconvincing, for the reason that he would have been sixty-one in 1624. It is improbable *a priori* that a man of this age would have been sent to India; thirty is the average age, on first appointment, of six preachers whose birth-dates are calculable, among those mentioned by Penny (*op. cit.*, chapter I) as appointed between 1607 and 1621. On this point see also the concluding foot-note, *infra*.

⁷ For this and the references to Lord in the Factory letters I am indebted to Sir William Foster's *English Factories in India*, volume 1624—1629, pp. 103 and foot-note, and 114.

⁸ *Paris*, 1667.

two tracts it is said that he applied himself to getting a thorough understanding of the beliefs of the people during his eighteen years' residence in Surat. This statement has misled a later writer⁹ but is plainly wrong. Lord's book was published in 1630, five years after his first arrival in Surat. Lord himself, in the second Epistle Dedicatorie¹⁰ prefixed to the *Discoverie*, says: "I hope it hath crost the Aequinoctiall and the Tropicks happily to come to your hands, amongst other newes from the forraigne parts of India", which implies that the manuscript was sent to England before he left India. But he must himself have returned to England not long afterwards,¹¹ for the engraved title to his publication describes him as 'sometimes resident in East India.'

In his Introduction Lord says that some of his predecessors had been "scrutinous to bring this religion to light" but had been deterred, and that "the Président, Mr. Thomas Kerridge, was urgent with me to redeeme their omissions." Therefore, says he, "I . . . essayed to fetch materials for the same out of their manuscripts, and by renewed accesse, with the help of Interpreters, made by collections out of a booke of theirs called the *SILASTER*, which is to them as their Bible, containing the grounds of their Religion in a written word."

⁹ Anderson assumes that Lord was transferred from the ships to Surat in 1616 (Philip Anderson. *The English in Western India*. London, 1856, pp. 51--3). [S.]

¹⁰ "To the Honourable and Worthy Knight, Sr. Maurice Abbot, Governor of the Companie of Merchants trading to the East Indies: Christopher Cletherow Alderman of the City of London, and Deputie of the said Company, and to all the worthy Adventurers, Members of the same Society." Sir Maurice Abbot was a brother of George Abbot, Archbishop of Canterbury (1610--1633), to whom Lord addressed the first of his two dedicatory epistles.

¹¹ The absence of references to Lord's return to England is explained by the loss of the *Court Minutes* from July 1629 to July 1632, and of the *Surat Consultations* and *Letters* from 1628 to 1635. [S.]

There is no reason to suppose that Lord had any knowledge of Indian languages.¹² Like Abraham Roger¹³ twenty years later, he must have depended entirely upon Indian informants, who would seem (in Lord's case) to have been Nāgar Brahmans. Kerridge, he says, "interested himselfe in the worke by mediating my acquaintance with the *Bramanes*: whose eminence of place was an attractive to draw on this discovery." In other words Kerridge, as President, used his influence to induce these Brahmans to 'discover' to Lord the teachings of the *sāstras*. The introduction to the other tract which Lord published at the same time indicates a similar method. "I joyned myselfe with one of their Church men called their *Daroo*, and by the interpretation of a *Persee* whose long imployment in the Companies service had brought him to a mediocrity in the *English* tongue . . . I gained the knowledge of what hereafter I shall deliver, as it was compiled in a booke writ in the *Persian* character containing their Scripture, and in their owne language called their ZUNDAVASTAW." Whatever may be the value of the material which Lord collected it seems to have been collected by himself, and to owe nothing either to the writings included by Samuel Purchas in the collection referred to in both of Lord's dedicatory epistles,¹⁴ or to an-

¹² The writer in the *Dictionary of National Biography* credits Lord with some knowledge of Hindustani and Persian. There seems to be no evidence that he had any such knowledge.

¹³ *De open-deure tot het verborgen heydendom* (Leyden, 1651). Roger collected remarkably detailed information from his informant, a Brahman named Padmanābha, including translations of Bhartṛhari's *Nīti-* and *Vairāgya-śataka*, which appear to be the first translations from Sanskrit into a European language. His book was translated into German (1663) and French (1670), and has been edited by W. Caland (*Tinschoten-vereeniging*, Vol. X, 1915).

¹⁴ He proffers his first tract to the Archbishop as an "Inditement against the Banian, whose cause hath formerly had some reference to your Grace by the labours of Mr. Purchas, whose evidences being *nihil praeter auditum* . . . I have brought them

other contemporary whom he names in his tract on the *Persees*, namely Edward Grimstone.¹⁵ Lord's book has a decorated general title, and separate title-pages to each of the two tracts which it contains. The general title is : " A display of two forraigne sects in the East Indies, *ciz.*, the sect of the Banians the Ancient Natives of India and the sect of the *Persees* the Ancient Inhabitants of Persia together with the Religion and Manners of each sect Collected into two Bookes by Henry Lord Sometimes resident in East India and Preacher to the Hoble Company of Merchants trading thether . . . London . . . 1630." The separate title of the first tract, with which alone this paper is concerned, is as follows : " A Discoverie of the sect of the Banians. Containing their History, Law, Liturgie, Casts, Customes, and Ceremonies. Gathered from their Bramanes, Teachers of that Sect : As the particulars were comprized in the Booke of their Law, called the Shaster : Together with a display of their Manners, both in times past, and at this present. . . . London. . . . 1630."

Lord's book schematises itself into sections corresponding to the four ages, which he duly names (p. 91, Chapter XV) : " the first, *Curtain*; the second, *Drauper*; the third, *Tetraioo*; the fourth, *Kolee*." (It may be noted in passing that the inversion in the order of the Tretā and Dvāpara yugas indicates that Lord knew enough to

to a second examination." He hopes that the tract will be welcome to the Company, instancing the Company's " forward helps and Afordments to Mr. Purchas in the producement of his Voluminous worke called the Posthumus of Hacklewite." *Purchas his Pilgrimes* was published 1624—26.

¹⁵ In chapter II of the *Religion of the Persees* (p. 9) after a passing reference to the ancient kings of Persia he adds : " The Abridgement of which Chronicle I would have gathered from them but that I found it to agree punctually . . . with that translation of Mr. Grimstones called *Estates and Empires, etc.*" Grimstone's translation (*London*, 1615) was from a French work by d'Avity, published in 1614. [S.]

feel that Tretā had something to do with the numeral three and Dvāpara with two). His first section (Chapter I—VI) purports to be an account of the Kṛta-yuga; the next, of the Dvāpara-yuga (Chapters VII—XIII); the next, of the Tretā-yuga (Chapter XIV); and the last, of the Kali-yuga (Chapter XV, the last). But he connects with the second part what purports to be an account of the ‘Shaster,’ but really embodies his own observations on caste and custom in Gujarat (Chapters VIII—X and XII—XIII); and a slight history of Gujarat, brought up to date, in Chapter XI. There has been, and is to be, a destruction of the world at the end of each age: the first was by water; the second by wind; the third by earth; and the fourth shall be by fire. Whereupon Lord comments: “How Pythagorically they stand upon the number of four; the world was formed of four principles; divided into four points of the Compasse; to endure for four Ages; planted by four men, matched to four women; restored again by four; and to be demolished by four several destructions” The Pythagorical four-ness seems to be partly his own invention. He was, besides, temperamentally a romantic, and in his account of the first age gives free rein to his fancy so as to turn the first creation into four love-stories.

In the first creation God, having fashioned the world of four elements, made man, and ‘seconded him with a companion, which was Woman . . . And the first mans name was *Pourous*, and the womans name was *Parcoutee*.’ Puruṣa and Prakṛti had four sons: ‘the first was called *Brammon*, the second *Cuttery*, the third *Shuddery*, the fourth *Wyse*.’ These are *primâ facie*, the eponymous ancestors of the four *varṇas*; but if *Shuddery* stands for *Śūdra*, it seems surprising that Lord should make him the representative of the third or merchant class. “And because *Shuddery* was of a nature mild and converseable,

it was thought meete that he should be a Merchant . . . as a monitour to put him in minde of which course of life, he had a paire of Ballances put into his hand, and a bagge of weights hung at his girdle, instruments most accomodate to his profession." He makes *Wyse* the representative of the 'Mechanicke or handy-crafts man,' because he was not thinking of the *Vaiśya-varṇa* at all, but of the Vaish or carpenter sub-caste of Gujarat; which figures also in the accounts of Arab travellers to western India.¹⁶ And so Lord connects him with Viśvakarman: his 'disposition to meditate things for mans convenience gave him the name *Viskermah*, which is as much as the Handsman, because he could do anything to be done by the hand.'

These four went respectively to the East, West, North and South, and there, after appropriate adventures, met and won the four women appointed for them: *Savatree*, *Toddicastree*,¹⁷ *Visagundah* and *Jejunogundah*.¹⁸ *Cut-*

¹⁶ See the article "Arab References" contributed by Fazlul-lah Iutfullah Farīdī to the *Bombay Gazetteer*, Vol. I, Part I, (History of Gujarat), p. 530. "Khurdadbah (A.D. 1912) describes the Hindus as divided into seven classes. Of these the first are Thākarias or Thākurs . . . The second are the Barāhmas . . . the third are the Katariyas or Kshatrias . . . the fourth are the Sudaria or Shudras, husbandmen by profession; the fifth are the Raisura or Vaish, artificers and domestic; the sixth Sandalia or Chandala, menials; and the seventh the 'Lahūd,' whose women adorn themselves . . ." Here too 'Shuddery' takes precedence of 'Wyse.'

¹⁷ 'Toddicastree' is Lord's own contribution to Indian nomenclature. But her genesis is plain. Lord's informant was at a loss for the name of 'the woman appointed for Cuttery,' and so he called her *tad-dik-stri*, the woman of that quarter. Lord reproduced the sound with commendable accuracy. In passing it may be noted that his informant seems to have had a tendency to pronounce the vowels *a* and *ā* in the Bengal way. (Cf., for instance, '*Bremaw*').

¹⁸ I cannot suggest equivalents for *Visagundah* and *Jejunogundah*. There is a Visakanyakā in chapter 61 of the Nāgarakhanda of the Skanda-purāṇa, where one is tempted to look for these legends, if Lord's informant was a Nāgar Brahman: but the tale has no connection; and Lord's *-gundah* would suggest *-gandha*. *Yajña-* seems the nearest sound to *Jejuno-*. [Is *Jejuno-*

tery and ‘*Toddicastree*,’ for example, ‘as desirous to make experiment of each others fortitude upon their meeting together,’ fought for three days before they joined in amity; for ‘in her right hand she bare a *Chuckerey*,¹⁹ which is an instrument of a round forme, and sharp-edged in the superficies thereof, so accommodate for offence, that by a hole in the midst thereof, being whirled about the finger and flung off, in the quicknesse of his motion, it is able to deliver or convey death to a farre remote enemy.’ *Shuddery* passed beyond a mountain called *Stachalla*²⁰ and discovered pearls and a diamond-mine before he met *Visagundah*. *Wyse* passed over seven seas, the last of which was called *Pashcurbatee* (Puṣkarāvātī), and came to the land called *Derpe*. ‘There by the Sea side hee built him a faire house . . . a comely habitation, with rooms lightsome, and broad taraffes or roofes aloft, for pleasure and prospect delightfull . . .’ *Jejunogundah*, the woman appointed for *Wyse*, came wandering by, and was drawn to satisfy her admiration with a nearer view of this new edifice. *Wyse* ‘descended to take a fuller contemplation of her beauty, whose feature deserved his better notice; for she was of body amiably white, and her tresses were scattered with powdered Saunders,²¹ and other odors, the scent of which the blasts of the winde dispersed in such manner that he became partaker of them by his approach . . .’ And so the world was populated by these four pairs in the first age. But “length of time

gundhah to be equated with *Yojanagandhā*, a name of *Satyavati*, mother of *Vyāsa*? Before she received the favour of *Parāśara* she was *Matsyagandhā* or *Amisagandhā*, in which may we look for the original of Lord’s *Visagundah*?—K.C.]

¹⁹ Lord did not invent the *cakra*, and his *Toddicastree* should be found as a *cakreśvarī*. There is a Jaina *Vidyā-devī* so named. Lord’s informant may have inserted some Jaina legends in the general framework of a Hindu *purāṇa*.

²⁰ *Iṣṭācala*?

²¹ Sandal, *candana*.

. . . began to confound all goodnesse . . . For *Brammon* grew neglective of his piety; and *Cutlery* grew cruell and full of usurpation; and *Shuddery* grew deceitfull in the waights and ballances; and *Wyse* lost his conscience in his dealings. And so God grew angry, and “there came a Flood, that covered all nations in the depths.” Thus ended the first creation.

“Seeing the first Age miscarried by their sinfulness . . . the Almighty determined to beginne the second Age by three persons of greater perfection and excellency than the other, called *Bremaw*, *Vystney*, and *Ruddery*.²² The Almighty, therefore, descending . . . upon . . . *Meropurbatee*²³ . . . said, Rise up *Bremaw* . . . and by a second and third command . . . raised up *Vystney*, and *Ruddery* . . . To the first hee gave the power to make the Creatures . . . to the second . . . the charge to preserve the Creatures . . . But to the third . . . hee gave power to destroy his Creatures . . . *Bremaw* . . . grew extraordinarily afflicted in his body . . . such travaile as happeneth to women in labour seazed him . . . till the burthen . . . made two ruptures . . . when behold two Twinnes, the one male the other female, to wit, Man and Woman . . . The man was by him named *Manow*, and the woman *Ceteroupa*²⁴ . . . They were

²² The spelling of *Brahmā*, *Viṣṇu*, and *Rudra* is characteristic. The -aw sound for -ā (compare here *Soomerant*, etc.) has been remarked on above. The -t- between cerebral s and ṇ recurs in *Kystney* (compare the river, *Kistna*). For *Ruddery*, compare *Shuddery* and *chuckery*. Lord's -u stands both for -ū and for ā.

²³ *Meru-parvata*.

²⁴ *Manu* *Svayambhuva* and *Śatarūpā* are so related in, for example, the *Brahma-purāṇa* (chapter II). But this *purāṇa* makes *Vīra* (a son of *Śatarūpā*) and *Kāmyā* (Lord's *Cammah*) the parents of *Priyavrata* and *Uttānapāda* (Lord's *Priauretta* and *Outanapautha*). It makes *Samrūṭ* (Lord's *Soomerant*) another son of *Kāmyā*. It agrees in making *Sūnṛtā* (Lord's *Soomerettaw*) the wife of *Uttānapāda*, as do other *purāṇas* (see H. H. Wilson's

sent to the East, to a mountaine called Munderpurvool²⁵
 . . and *Ceteroupa* brought forth three sonnes and three
 daughters . . . *Priauretta*, *Outanapautha* . . . *Soomeraut*;
 . . . *Cammah* . . . *Soonerettaw* . . . *Sumboo*²⁶ . . . They
 were dispersed . . . *Priauretta* and *Cammah* to the West,
 to the Mountaine called *Segund*; *Outanapautha* and *Soone-*
rettaw to the North, to the Mountaine *Bipōla*; *Soomeraut*
 and *Sumboo* to the Mountaine *Supars* . . ."²⁷

Lord then relates how the Almighty provided for the establishment of religion in the second age by a book delivered to *Bremaw*. This book is the *Shaster*, which is represented as consisting of three 'tracts,' dealing with the moral law, the ceremonial law, and the four 'tribes.' Lord follows this threefold division of subjects in the account of the manners and customs of the 'Banians' which fills the next five chapters (VIII--XIII): but it does not seem to correspond with any possible division of the literature.²⁸ Lord's own 'busie observation' is the source of much of this account. And, as Jainas were very much in evidence in Surat, much of what he says is an account (apparently the earliest European account) of

translation of the *Viṣṇu-purāṇa* I. xi, p. 86, foot-note 1). The *Viṣṇu-purāṇa* II. i agrees with Lord's account in making Samrāt a son of Priyavrata and Kāmyā.

²⁵ Mandara-parvata.

²⁶ Sambhū?

²⁷ In the description of Hāvṛta, as given in, e.g., the *Viṣṇu-purāṇa* (II. ii), Meru is in the centre, Mandara on the east, Gandhamādana on the south, Vipula on the west, and Supārśva on the north. *Segund* (Sagandha?) is perhaps Gandha-mādana. *Bipola* and *Supars* are plainly Vipula and Supārśva.

²⁸ Perhaps it reflects an enumeration of the Vedas as three (omitting the *Atharva-veda*). Bernier knew of, and names, four *Beths* (*Vedas*). European ideas of the character of the Vedas were altogether vague up to the end of the 18th century. This made possible the publication of such a work as the French *Ézour-vedam* ('Yajur-veda') in 1780. Voltaire saw it in manuscript and accepted it as a Veda: although, as Ellis pointed out in *Asiatic Researches*, it is really a criticism of Hinduism in the form of a purāṇa.

Jainism, and his 'Banian,' although to some extent a composite picture, represents on the whole a Jain merchant. Lord is himself aware that the term *baniā* is not accurately used in the title of his work as covering all classes, and he indicates the right use of the term towards the end of the book (p. 86). "Under the name of *Banians* is comprised . . . Merchants only, or Brokers for the Merchant . . ." In the latter part of the book he therefore uses *Banian* as synonymous with *Shuddery*, the merchant.²⁹

There is nothing very characteristic in the eight commandments which Lord represents as comprised in the first tract, except that *ahimsā* takes precedence, as the first commandment, and control of the five senses is emphasised as the second. Lord himself singles these out: "The principall part of their Law admitting nothing prodigious to opinion we passe over, onely that which commeth into exception is that which is laid down in the first and the second Commandment." He discusses these two at some length, with particular reference to the doctrine of metempsychosis. Among the ceremonies spoken of by him in treating of the second tract are: bathing in rivers "whilst the *Bramane* iterateth the name of the river . . . called *Tappee*, with the name of other rivers in India celebrated for these customary washings, as *Gonga* and *Nerboda*"; the use of a "certaine Unction in the forehead of red painting, that having certaine graines stucke in the glutinous matter is their testimony that God hath marked them out as his people: and the tendering of offerings and prayers under trees" so that the *Bramanes* under such greene Tree erect temples to Pagods . . . The tree peculiarized for this worshippe is called by some . . .

²⁹ And so he leaves himself without a generic name. His contemporaries tended to call Indians exclusive of 'Moors' by the name of Gentiles. But Lord uses this term too in a restricted sense. See below.

Ficus Indica . . . and by Goropius Becanus affirmed to be the tree of life that grew in the Garden of Eden . . .” In connection with the “second tract” he gives a fairly detailed account of the naming of children, marriages, and funerals. In connection with what he calls the ‘Invocation of Saints’ he says: “They . . . that would be happy in Marriage, invoke *Hurmout*; they that are to begin the workes of architecture, *Gunnez*; they that want health, *Vegenant*; the souldier in his assault . . ., cries, *Bimohem*; the miserable invoke *Syer*; and they that are in prosperity, give their Orisons to *Mycasser*.” The names appear to stand for Hanumān, Gaṇeśa, Baijnāth, Bhīmasena, and possibly Īśvara and Maheśvara. At namings “some of the kindred . . . menaceth the point of a writing penne against the forehead of the Child, with this short prayer, That God would write good things in the front of that Child.” In connection with marriage there is an account of the nuptial procession—“the Bridegroom is distinguished from the rest by a crowne on his head, decked with Jewels very rich . . . Dowry there is none given, that the drifts of Marriage might not be mercenary . . .” When a man is dying “they injoyne him to utter *Narraune*, which is one of the names of God, importing Mercy to Sinners . . . His spirits languishing, they stretch out his hand, pouring faire water into it . . . praying to *Kistneruppon** the God of the water, to present him pure to God . . .” After describing the funeral rites he adds: “Since these lawes and injunctions, there hath sprung up a Custome amongst them, that the women that survive their husbands should offer themselves up alive to be sacrificed in the flames with them, which to this day is observed in some places and for some persons

* [We must trace it to the formula *Kṛṣṇārpanam (astu)*.—K. C.]

of greater worth, though the examples be more rare now than in former times, of which custome Propertius thus speaketh": and he proceeds to quote and translate the eight lines of Propertius (49—15 B.C.) which speak of the custom.

Four chapters (X—XIII), concluding with the destruction of the world at the end of the second age, should be concerned with the third tract of the *Shaster*, but contain in fact Lord's own account of the four castes, as he himself admits: "If I shall somewhat digresse from their particular injunctions . . . to a more particular display of their manners, I shall better discharge the parts required in this Tract." He is not sure whether the name of the first caste is derived from *Brammon*, or from *Bremaw* "by adjection of this particule (*ues*)."³⁰ He notes that "Suidas is of opinion that they are called *Bramanes* of one *Brachman* that was the first prescriber of their rites," while "Postellus affirmeth them to bee descended from Abraham by Cheturah,³⁰ who seated themselves in India, and that so they were called *Abrahmanes*." Brahmanes are of two sorts: the more common Brahmanes, of which there are a great number in India; and the more special who "are called by the Banians, *Verteas*, by the Moores, *Serraks*." "The common Brahmane hath eighty two Casts or Tribes . . . which were so many wise men or Schollers . . . called *Augurs* or Soothsayers of such a place . . . Thus the prime of them was called *Visalnagrananger*, that is, the Augur of Visalnagra, the 2 *Vulnagrananger*, that is the Auger of Vulnagra, a towne so called . . ." Lord is of course speaking of the Nāgar Brahmanes. He drops the initial N., and proceeds to make an equation with the Latin word *augur*. But he correctly gives Vīsal-

³⁰ Keturah. *Genesis*, 25. i.

nagar (Visnagar) and Vadnagar as two chief centres or places of origin of Nāgar Brahmans. Later on he observes that the divisions of the Banians or *Shudderies* (by whom he may mean either Hindu or Jainā Vaiśyas) correspond in number to those of the *Bramanes*, "chusing either to be under their discipline that are Visalnagranaugers, or Vulnagranaugers, from the peculiar instruction of which Bramanes they are guided in matters belonging to religious worshippe." Lord's "more speciall Bramanes" are, as will be clear from the following citations, Jainas. "The more speciall Bramane . . . is some man of the Cast of Shudderies . . . who for devotion taketh this condition on him . . . weareth a woollen garment of white . . . his heade is always uncovered . . . they do not shave but pluck off all the hair save some small remainder on the crowne . . . They have a festival called *Putcheson* . . ."³¹ More strict they seem to be than the common *Bramanes* . . . More cantelous they are for the preservation of things animate . . . and they keep a hospital of lame and maimed flying fowle." They have several divisions: "One is called the *Soncaes*, and these go not to Church, but perform divine rites at home. Another is of the *Tuppaes*, these go to Church to pray. A third is of the *Curthurs*, and these pray by themselves, without society. A fourth is called the *Onkeleaus*, and these endure not images. A fifth called the *Pushaleaus*, the most strict of them all." These are names of *gacchas* of the Jainas: the *Tapa-gaccha* and the *Kharatura-* (*Khad-tar-*) *gaccha* being plainly recognisable, whilst in the *Onkeleaus* we may perhaps see the *Lonka-gaccha*, which "endures not images."

Passing to the second caste, the *Cutteryes*, Lord says: "That particular of *Bremawes* booke that concerned this Cast or Tribe, contained certaine precepts of government

³¹ The *Paryusana* observed by Jainas.

and policie, the knowledge of which being but of common import I rather chuse to omit." Instead, he gives in this chapter (XI) some account of the Rajputs of Gujarat and adjacent parts. He mentions the names of five Rajput clans: *Chaurah*, *Solenkee*, *Faggela*, *Dodepuchacs*, and *Paramars*. The 'Cutteryes' were the ancient kings of India, and were called Rajahs. "These Rajahs had principally foure men about them of eminency . . . the *Bramanes*, who by Southsaying and Augury did show the Kinges what time was most meet to begin their designs . . . the *Pardon*,³² which was a man of policy in the State businesse . . . the *Moldar* or the Kings Chamberlain . . . (and) the Generall of the Kings Armies in the field called *Disnucke*."³³ "Now touching their declining state. One *Rannederill*³⁴ a vertuous woman did at her death prophecy the decline of the Banian State, in the time of *Rarisaldee*³⁵ chiefe Rajah, the beginning of which should be in his next Successors daies . . ." Ravisaldee's successor, *Syderaaisaldee*,³⁶ had erected a monument in his fathers honour at *Sythepolapore*.³⁷ A Brahman, *Madenanger*,³⁸ told him that one *Sultan Alaudin*, a *Patan*, King of *Delee*, should deface the monument and conquer *Guzzarat*. So he sent his *Pardon* to search out the youth,

³² Pradhāna.

³³ Deśanāyaka?

³⁴ Rānī Devī, "The Queen"? Or Ranik Devī (Forbes *Ras Mala*, I. IX)?

³⁵ Rai Visaldeva, said to have founded Visnagar in 1046; or else Bisaldeo Chauhan who took Delhi in 1153? But neither comes near the time of Alāuddīn (1298), and there may be some confusion.

³⁶ Siddharājadeva (1094—1143. See *Ras Mala*, I. x)?

³⁷ Perhaps Sidhpur in Baroda State, where there is a Rudra Māla built by Mūlraj and reconstituted by Siddharāja Jayasinha.

³⁸ Mahādeva Nāgara? Forbes, *Ras Mala* I. xv, tells a similar tale.

who was at that time with his father, a wood-gatherer of Delhi. They persuaded him to accept a sum of money and in return he gave them "an Escript that albeit the heavens had decreed that he should scatter some stones of that building yet hee would picke them out of the Corners thereof" so as to spare the building. In due course *Alaudin* invaded *Guzzarat*, but growing weary of the long war, and many Rajahs fleeing to inaccessible places, he committed the further management of the wars to one *Futtercon*, his Cupbearer. "And the said *Futtercon* did further invade *Guzzarat*, and so did the rest of the *Mahoometans* that succeeded him, to the decline of the Banian State." Lord adds that "some of the Rajahs flying to retyrements impregnable . . . could not be conquered even to this day; but, making outroades, pray on the *Caffaloes*³⁹ passing . . . having many resolute Souldiers . . . called *Rashpootes*,⁴⁰ which implyeth as much as the sonnes of Kings: for being of the east of *Cutteries* it is like they were nobly descended" Among those that remained unconquered in his time Lord mentions *Rajah Surmulgee* of *Raspeeplaw*;⁴¹ *Rajah Berumshaw*⁴² of *Molere*; *Rajah Ramnagar*; *Rajah Barmulgee*; and "the great *Rannah*,⁴³ who hath fought many set battles with the *Moguls* forces."

³⁹ Kāfilas.

⁴⁰ The word Rajput was commonly so spelled in Lord's time. But Lord at least knew what it meant.

⁴¹ Rājpipla. Bardie chronicles make Surmalji the second successor after Jayasinghji, who was the chief of Rājpipla in the time of Akbar. (*Bombay Gazetteer*, Vol. VI, p. 109).

⁴² Bairām Shāh of Mulher, which was not reduced until 1637.

⁴³ The Rānā of Udaipur, Amar Singh I, to whom this statement would apply, had made peace with Jahāngīr in 1614, and died in 1620. His successor, Karan Singh (1620--28) waged no wars. Lord's statement perhaps has no one Rānā particularly in view.

The next chapter (XII) relates to the *Shudderies*, or *Banians* properly so called,⁴⁴ but it contains little which has not been already noted. Chapter XIII however gives additional information about the *Wyse*s. "The name Wyse implyes as much as one that is servile or instrumentary . . . these people are at this present most ordinarily called by the name of *Gentiles*. Which *Gentiles* are of two sorts (1) the purer *Gentile*, such as liveth observant of the dyet of the *Banians* . . . (2) the *Gentile Visceroun*, called the impure or uncleane . . . Such are the husbandmen or inferior sort of people called the *Coulees*."⁴⁵

The remainder of this chapter (XIII) reverts to the original plan of the work, after this long digression about caste, and tells of the destruction of the world at the end of the second age. Chapter XIV gives an account of the third age. The *Cutteryes* were "utterly raced out," and "The Lord appointed that from the *Bramanes* the line of the Kings should be renewed . . . The chief of the *Bramanes* that was then preserved . . . was called *Ducerat*;⁴⁶ the next child that was borne after this destruction and which was the youngest of foure, was chosen to propagate the line of their Kings . . . and his name was *Ram*; who became so memorable for his worthy deeds . . . that . . . even to this day . . . whensoever they meet and salute one another, they cry *Ram, Ram* . . ." Of the fourth and last age of the world, described in the following chapter (XV), Lord has not much to say: " . . . The Almighty againe commanded that the world should bee peopled by those that were reserved, amongst whom there

⁴⁴ See p. 287 *supra*.

⁴⁵ These are apparently the Kolis, who form a quarter of the population of Gujerat. They are husbandmen in central and south Gujerat, but are said to approach nearer to Bhils in the north. The Bombay Gazetteer states that the word is sometimes used in the sense of bastard or half-breed: which may be the origin of Lord's "impure Gentile."

⁴⁶ Daśaratha.

was one *Kystney*, a famous Ruler and pious King, of whose vertues they have ample record, as being one most notable in the last Age . . . He did wonderfully promote Religion, upon which there was a reformed beginning of goodnesse."

Lord's book comes in point of time midway between those of Edward Terry and Abraham Roger; and it is at least as superior to the former as it is inferior to the latter in the extent of its information about Hinduism. It marks therefore an interesting and very definite advance: and it is surprising that Lord is almost entirely ignored by recent historians of 'Indology.'¹⁷ There were certainly Portuguese, and one Englishman, who knew more than Lord ever learned, and before Lord's time: but if we except the Englishman's book, there seems to be no printed book dating from before Lord's time which gives so much information. The Englishman referred to is Thomas Stephens (Padre Estevão), who arrived in India in 1579 and spent the rest of his life in Goa as a member of the Society of Jesus. He perhaps knew some Sanskrit; and, in a letter, he notes the connection between Indian and European languages. He shares, besides, with Beschi and Roberto dei Nobili, the distinction of having made a contribution of importance to the vernacular literature of India: for he wrote a long epic in the Konkani dialect of Marathi on the whole Bible-story, which was originally printed at Goa in 1615, and has not long ago (1907) been edited and published at Mangalore under the title of "*The Christian Puranam*." But, apart from Thomas Stephens, it can be claimed that Lord was the first Englishman who made a systematic attempt to acquire knowledge of "the Bani-ans," not to mention "the Persees." His immediate successors fully recognised the value of his publication. Thomas (afterwards Sir Thomas) Herbert included in a

¹⁷ He is not mentioned in Windisch's *Geschichte der Sanskrit Philologie* (Grundriss I. i. B., 1917, 1920).

book first published four years after Lord's the detailed content of both Lord's tracts, with an inadequate acknowledgment which admits indebtedness only in respect of his account of the 'Persees.'⁴⁸ Yet in his account of the Banians we meet with all the personages of Lord's *Discoverie*, including 'Toddicastree' and the other 'women appointed'; and, throughout it, Herbert merely epitomises Lord. Bernier, writing in 1667, gives of course an independent account, more complete than Lord's; but he nevertheless makes generous acknowledgment. "I shall here add a few words to declare that I am no lesse obliged to Monsieur *Henry Lor* and to Monsieur *Abraham Roger* than to the Reverend Fathers *Kircher* and *Roa*. I had compiled an hundred things relating to the *Gentiles*, which I found in the Books of those Gentlemen, and which would have been a great trouble to me to range them as they have done."⁴⁹

⁴⁸ The engraved title of the revised and enlarged edition reads: "Some yeares travels into Africa and Asia the Great. Especially describing the famous empires of Persia and Hindustan . . . By Tho: Herbert Esqre . . . London, 1638." The first edition was published in 1634. His epitome of Lord's tracts occupies pp. 40—54 of the 1638 edition. On p. 48 he begins to speak of the Persees "whose life and doctrine (as it is gathered from the *Dara* or Priests of this sect by Master *Lord* a worthy minister for some years resident in the Factory of *Surat*) I will epitomize."

Herbert began his travels on Good Friday, 1626. He reached Surat in December. The year is not very clear; but, since news of the crowning of Prince Khurram at Agra reached Surat while he was there, and since the date of Jahāngīr's death was Oct. 18, 1627, the December of 1627 must be meant. There is however a difficulty, because he says that Wylde was President when he arrived. But the Factory Records show that Wylde did not take over office from Kerridge before April, 1628. See Foster's *English Factories in India 1624—1629*, p. xxviii, footnote.

The presidents were: Kerridge, 1616—23; Rastell, 1623—25; Kerridge (for the second time) 1625—28; and then Wylde.

⁴⁹ I quote from the *Continuation of the Memoirs*, Vols. III and IV, "English'd out of French by H. O.," London, 1671. The passage will be found at p. 157 of the section entitled "The

It is a matter for regret that efforts to trace the career of this 'worthy minister' outside the short period of his service in India have not succeeded.⁵⁰ Lord himself expresses (in words which close his *Epistle Dedicatorie*, and which may serve as a fitting epilogue on the present occasion) his sense that these were his memorable years: "Accept it then Right Honourable so . . . composed as it may bee, of such materialls, and let it be as an Attestate of my Acknowledgments to you, the Achme and flourishing part of whose best being I confesse to have had beginning and growth in your imployment . . ."

Gentils of Indostan," which was written as a letter to Chapelain in 1667.

⁵⁰ I desire to express by obligation to Mr. W. T. Ottewill, M.B.E., Superintendent of Records, India Office, who very kindly searched the records himself, and brought to my notice the files of a previous enquiry relative to Henry Lord. A memorandum on the subject drawn up by Miss E. B. Sainsbury in 1920, which is included in the file, was of much assistance to me. I have indicated information derived from this source by "[S.]." I may add that Mr. Ottewill agrees that it is improbable that the East-India Company should have appointed a man of sixty-one to go to India; and that Sir William Foster, who was Superintendent of Records when the previous enquiry was made, then expressed the opinion that the writer in the *Dictionary of National Biography* had confused two persons in his account of Henry Lord.

THE QUR'ĀN ON NIMROD'S FIRE

M. NAIMUR REHMAN, M.A.,

Lecturer in Arabic and Persian, Allahabad University.

Of the bewilderingly enormous mass of the Jewish lore consisting of legends and stories about their prophets, sages and kings, quite a large volume has been ascribed to the great patriarch Abraham, and perhaps quite befittingly, as he was the "father of a multitude of nations." Apart from the detailed account of the life and work of Abraham supplied to us by the Mosaic scripture, there is a considerably large volume of the apocryphal superstructure and rabbinical tradition that rose up later.

Abraham claims a double greatness and importance. He is the father of the great Hebrew nation, and through his son, Ishmael, *i.e.*, a progenitor of the northern Arabs. Even in Arabia such traditions regarding Abraham were continuously handed down by word of mouth long before the era of Islam. The Muslims of Arabia were interested in the Patriarch as being the father of their progenitor Ishmael and the co-founder and builder with him of the Ka'ba, "the house" which the father and son were commanded by God to build and consecrate for His worship¹ Abraham became to the Muslims the very model of a true believer, who had advanced by slow but sure degrees to the sound and staunch belief in and devotion to the One God, and to whom Islam itself was attributed, for to him they owed the epithet *Muslim*.²

¹ See the Qur'ān, II, 126—129; III, 96; XIV, 35; XXII, 26.

² The Qur'ān, II, 130, 135; III, 94; IV, 95; VI, 162; XII, 38; XVI, 123; XXII, 78.

The Qur'ān mentions Abraham by name in about seventy places in various connections, and a whole chapter (XIV) of the Book has been named after him. It recognises him as one of the greatest of the prophets and apostles of yore, and his works form one of the chief means of inspiration to the new nation which the great Arabian prophet was seeking to raise up. The Muslims naturally accepted as true all that was said of "the father" Abraham in the Qur'ān, which derives its material mainly, of course, from the Old Testament and also from the rabbinical tradition. The Qur'ān has characteristically given such report of him and has adopted only such details of his life and work as suited its purpose. Whatever it has to record about him is in simple and straightforward language. The omission of all useless details has surely some good reason behind it. The hearers of the Prophet would have certainly followed the purpose and intention of their Master, if only they had not supplemented this information with the knowledge they already possessed of Abraham through the oral traditions then rife in their own country. And the matter became worse still when after the death of the Prophet the Book had to be studied, understood, followed and acted upon by the non-Arab nations, especially the Persians, who were pioneers in the field of Qur'ānic exegesis. In their sincere devotion to the Book and their earnest desire to grasp the fullest significance of every iota of it, these zealous students of the Qur'ān could not but resort to the learned rabbis for the explanation of all that they clearly saw was based on the versions of the Old Testament, or of their own brotherhood of the rabbis. The exegesists of the Qur'ān meant well; and the learned rabbis and Jewish scholars too perhaps meant equally well. A whole-hearted and unflinching faith in the learning and veracity of the directors led the zealous seekers of know-

ledge to accept as true all the information they received from them, and they innocently incorporated the whole volume of it in their works. This is easily illustratable in the case of the interesting legend regarding the tyrant Nimrod who cast Abraham into the huge fiery furnace, which not only could not injure the Patriarch but turned into a veritable paradise for him. The Qur'ān records the story in Chapter XXI, entitled "The Prophets," in verses 51 to 71. It introduces the story with a mention of Abraham's protest against image worship, and eventually his practical step in demolishing all the images in the pantheon save one, the biggest of them. The whole community of the "idol-worshippers" rises against him, and they conspire to burn him. But God saves him from the calamity, and he leaves the place for another "blessed land." I quote the entire story below :

" 51. And certainly we gave to Abraham his guidance before, and we knew him well.

52. When he said to his father and his people : What are these images to whose worship you cleave ?

53. They said : We found our forefathers worshipping them.

54. He said : Certainly you have been, you and your forefathers, in manifest error.

55. They said : You have brought to us the truth, or are you one of the triflers ?

56. He said : Nay, your Lord is the Lord of the heavens and the earth, who brought them into existence, and I am of those who bear witness to this.

57. And by Allah ; I will certainly strive against your idols after you go away, turning your back.

58. So he broke them into pieces, except the chief one of them, that haply they may return to it.

59. They said : who has done this to our gods ? Most surely he is one of the unjust.

60. They said : We heard of a youth called Abraham speak of them.

61. They said : Then bring him before the eyes of the people, perchance they may bear witness.

62. They said : Have you done this to our gods, O Abraham ?

63. He said : Surely some doer has done it. The chief of them is this. Therefore ask his lordship if he can speak.

64. Then they turned to themselves and said : Surely you yourselves are the unjust.

65. Then they were made to hang down their heads : Certainly you know that they do not speak.

66. He said : What ! do you then serve beside Allah what brings you not any benefit at all, nor does it harm you ?

67. Fie on you and on what you serve beside Allah ! What ! do you not then understand ?

68. They said : Burn him and help your gods if you are going to do anything.

69. We said : O fire, be a means of coolness and comfort and peace to Abraham.

70. And they desired a deceit with him, but We made them the greatest of losers !

71. And We delivered him as well as Lot, (removing them) to the land we had blessed for all people ! ”

The commentators, however, wax more eloquent than the Book itself, and follow the legend in greater (and wholly unnecessary) details. I take up, as an example, the eminent commentator Ṭabarī, who names all the authorities for his assertions. Let us take up the last three verses (69--71) which form the material part of the whole story. The story runs, says Ṭabarī, that a Kurd,

Hayzan³ by name, suggested to the people that Abraham should be burned alive. King Nimrod agreed with the brilliant suggestion. Abraham was accordingly bottled up in a house, and in the meantime an edifice was built up, and therein was gathered an enormous mass of wood to create a veritable hell for Abraham to burn. So much were the people excited over the matter that there was a woman who was in sick-bed, and she said, 'If God give me health I will collect timber for Abraham!' When all was ready they caught hold of Abraham and, raising him up above the edifice, lowered him into the fire that was burning furiously . . . At this juncture the learned commentator suggests that the Qur'ān has here omitted to mention the fact, which however follows from its words, that they did kindle a fire to burn Abraham and did throw him into it, whereat God intervened saying: "We said: O fire, be a cooling comfort and safety to Abraham" (v. 69). . . . He then continues the story thus. When Abraham was being lowered into the fire he raised up his head to the heavens, saying: "O Lord! Thou art the One alone in the heavens, and I am quite lonely here on the earth, where there is no one else beside me to worship Thee. God is enough for me, and He is the best one to rely on!" And the heavens, the earth, the mountains and the angels, all conjointly appealed to God for His mercy to Abraham, and God bade them help His "friend" if he called upon them to do so. When Abraham got into the furnace, Gabriel (or God) called upon it, commanding it to become all coolness and safety to Abraham. And lo, the flames got all extinguished, and with them all the fires on the earth went out too, and that huge furnace became so very intensely cold that if in the

³ God, however, punished this wicked man by causing him sink deep below the earth, where he is damned to bear this torture till the day of judgment. Tabarī, *hoc loco*.

wordings of the command the word سلام were not added to the word ذریعہ. Abraham would have died of cold! And when the fire was extinguished they advanced to witness the plight of the culprit. They found him still there, all safe. And there was also seen with him the Angel of Shade (ملائکة الظل) who held Abraham's head in his lap and was wiping the sweat from off the face of Abraham. He was taken out, and on examination it was found that fire had failed to scorch Abraham, having touched only the band with which he was tied. Thus did God save Abraham, who thereafter left his home (at Ur) and gave up the faith of his fellowmen, and migrated to Shām.

Now all this is very much the repetition of exactly the same tradition as is met with in the accounts left to us by the ancient rabbis. Yet all this is said on the authority of such eminent personages as 'Alī b. Abu Ṭālib, 'Abdullāh b. 'Abbās, 'Abdullāh b. 'Umar, Qatāda, Ka'b, Mujāhid, Ishāq and others. Later writers give greater details of this wonderful incident in the life of the Patriarch, telling us how not only the flames got quenched, but that the whole scene got changed into a lovely garden bearing all the sweetest and loveliest fruits, and how all the servants and deputies of Nimrod got burnt by that fire, and so on and so forth, details which conform to a still greater degree with the rabbinical lore.

And all this for the love of the wonderful! For even the apocryphal and legendary accounts of this great event as given by the ancient Hebrew writers have two versions, in one of which this episode of the terrible trial by fire finds no room whatsoever.¹ But the innocent and child-like fancy of our commentators and their readers could

¹ See A. S. Rappoport, *Myths and Legends of Ancient Israel*, London, 1928), I, 228—233 and 246—253.

hardly be satisfied with the simple and highly chaste and sensible account given by the Qur'ān.

Let us now turn to the facts and see what justification we can find for these explanations and comments so devoutly indulged in by a whole army of commentators. The surest testimony in the matter is naturally that of the Old Testament. A reference to Chapters XI to XXV of the Book of Genesis will easily solve the question. Abraham lives with his father Terah (and not Ādhar, who was his uncle and not father) and his brothers Haran and Nahor at Ur, the well known "Ur of the Chaldees," which was the place of his nativity. Terah was an idolator, and wanted his sons to be like unto himself. Of the three brothers only Abraham seems to have revolted. Observation, contemplation and experience had taught him that the images or even the bright heavenly bodies did not deserve to be adored and worshipped as gods. He "believed in the Lord; and he counted it to him for righteousness" (Gen. XV, 6). It is quite possible, therefore, that this apostacy of Abraham from the faith of his forefathers might have gained fame and would have consequently given rise to an opposition from his compatriots, who can even be conceived as having taken up the cudgels against him. It is here, however, that the story-mongers connect up the story with the name and person of king Nimrod (Namrūd of the Arabs) and bring him to the enactment of the interesting drama of the Furnace.

The Qur'ān takes up the same legend; but there is no mention of Nimrod, nor of the fact that Abraham was actually thrown into the fire. It only mentions the design on the part of the people: "They said, Burn him . . ." (XXI, 68). Then comes the verse which is the pivot of the whole story, *viz.*, "We said: O fire! be thou a means of coolness and comfort and peace to Abraham." (69). It is here that the fancy of the commentators runs wild,

and they feel compelled to resort to legend and conjure up the whole scene of the drama in which Nimrod also plays a part. A close study of its phraseology will reveal what its Author wished it to imply.

The verse contains three important words: نَار and بَرْد and سلام. The first of these—نَار—is perhaps the most important word in this sentence, as it is this word that has led the commentators to accept the whole legend of the “furnace.” Now the word نَار does not only signify “fire,” but also (i) light,⁵ (ii) the internal fire, a biting and gnawing anxiety and care,⁶ and (iii) opinion, counsel;⁷ beside other implications which need not engage our attention at present. The use of the word as meaning ‘fire’ and ‘light’ is remarkably masterly, as the word UR, the name of Abraham’s birthplace, also means (among other meanings) both ‘fire’ and ‘light’, and as Barry so well suggests,⁸ it is this sense of the word UR that has given rise to this legend. And نَار has been so admirably put in the dative case, thus implying, among other things, a direct address to the city of Ur. In the second sense it refers to the grave anxiety and anguish that these councils of their enemies must have been causing to Abraham and his father; and it is this anxiety that is required to change itself into perfect coolness of the mind and safety. In the third sense the word has evidently a reference to the conferences of the heathens and their decision to burn Abraham. This conference came to naught, and all their resolutions failed, for Terah and Abraham had decided already to quit the place.

⁵ *Tāj al-‘Arūs*, art. نَار. Cf. the Qur’ān XXVII, 8.

⁶ Cf. the Qur’ān CIV, 6, 7.

⁷ Ibn Athīr, *Nihāyah*, and *Qāmūs* (art. نَار), both of which quote the Prophet’s words لَا تَقْضُوا بِنَارِ الْمُشْرِكِينَ which are said to imply لَا تَقْضُوا لَهُمْ, the word نَار meaning opinion and counsel.

⁸ Smith’s *Dictionary of the Bible*, art. *Abraham*.

Thus the word **برد** suggests that the very torturesome feeling of anxiety and that gnawing care at last gave way to perfect calmness and safety.

The word **برد** implies coolness, calmness, as also pleasantness, enjoyment, ease and comfort; while the phrase **برد امرنا** means "Our affair or case became easy."⁹ The words **كوفي برداً** will, therefore, show that God (as the subject of **قلنا**) consoled the mind of Abraham and changed his anxiety into a calm and pleasant ease; while the phrase may also suggest the idea of departure on a journey, for **برد مضجعه** (lit. His bed or place of sleeping became cold) implies "He went on a journey."¹⁰

سلام primarily signifies "escape" (**نجاة**) and "rescue" (**تخليص**), as also safety and freedom from evils of any kind, or from trial and affliction . . . and particularly safety, security and freedom from evils of all kinds for a traveller. Again, **سلام** (as also) **تسليم** signifies "saluting or greeting one with a prayer for his life."

Let us read on. The next verse is, "And they desired a deceit with him, but We made them the greatest of losers." This clearly shows that Abraham's enemies were so miserably defeated in their designs of inflicting a killing torture upon Abraham, who was all the time cool and calm and peaceful, for he and his father had already decided to secure safety for their person and life by leaving Ur for some other land. This fact is justified by the very next verse: "And We delivered him as well as Lot, (removing them) to the land we had blessed for all people" (71). This is corroborated by the O.T. account, where we read: "And Terah took Abraham his son, and Lot the son of Haran his son's son, and Sarai his

⁹ *Tāj al-'Arūs*, art. **برد**

¹⁰ Lane, *Lexicon*, art. **برد**

¹¹ *Tāj al-'Arūs* and Lane, *Lexicon*, art. **سلام**

daughter-in-law his son Abraham's wife; and they went forth with them from Ur of the Chaldees, to go into the land of Canaan, and dwelt there " (Gen. XI, 31). And afterwards the Lord spoke to Abraham and " said unto him. I am the Lord that brought thee out of Ur of the Chaldees, to give thee this land to inherit it " (Gen. XV, 7).

To sum up. No doubt the Qur'ān does adopt the legend, but while it recognises that Abraham's serious disbelief in his forefathers' faith and even his practical iconoclasm did attract the attention of all around him to the extent of making him a target for general criticism and universal animadversion and malice, yet it does not seem to recognise or lend support to the belief that he was actually thrown into fire. This because, as the Qur'ān seems to have it, he and his father had already decided to bid farewell to Ur for some other land offering happy prospects. Thus was the *fire* quenched; thus did it change into coolness and safety; and thus were the malicious designs of the enemies frustrated. Nimrod and his *furnace* have no place in the Qur'ānic text of the story.

As has already been pointed out above, the phraseology of the Qur'ān is remarkably expressive and eloquent. That Abraham should be " burned in fire " might have meant nothing more than that he and his father should be annoyed and harassed to such an extent as to make Ur quite *hot* for them to live in. An unceasing volley of relentless criticism against father and son, a general taboo, recurring threats of injury to their person and life, a constantly agonising discomfort caused by all this should have been enough to render Ur a veritable *furnace* for them. And the words *بريد* and *سلام* indicate the intended departure of the family, that not only ended all this opposition and rancour against them, but also became a cause of their security, peace and prosperity. They

were out of *fire* (Ur), safe and secure. This change of *fire* into a *garden* could have by no means been an instantaneous one, as it is alleged to have been, for the actual departure of Abraham's family from Ur must have surely been preceded by a considerably long period affording a good study, by all means available in that age, of the new home, its surroundings, its conditions, and of the prospects it could hold out to them of a happy and prosperous life. Various and numerous too would have been the causes that led ultimately to their determination of quitting the place where they had lived so long. And when they did leave the place, their enemies would have been sore indeed to find themselves all lost and hopelessly dismayed.

It is one of the characteristic features of the style of the Qur'ān that whenever it cites or quotes anything from the Old Testament on the ancient time-honoured legends and fables of the Hebrews, its purpose is to narrate the life-story of any particular person as an example, or to explain a point of character—national or individual—or to prove the victory of truth over falsehood. It is always to point a moral, and never to adorn a tale. It takes as much of the story as suits its special and definite purpose at the moment, and the narrative is always couched in a language which, though apparently conforming to the prevalent version of the story, really goes counter to it. And this is secured by the use of exquisitely chiselled phraseology, of words that easily and effectively blot out the merely playful and frivolous element and renders it highly forcible and instructive by giving the whole story an altogether new interpretation. Exactly the same is the case with the story of Abraham's supposed ordeal. And it is by no means difficult to gauge why the Qur'ān has brought in this narrative. Abraham's rejection of the long established idolatrous faith of his forefathers, his boldness and undaunted

courage which took the shape of actual iconoclasm, his unhesitated departure from his home, his adoption of the new home that gave him cheer and plenty, his subsequent arrival in Arabia and the building of the "House of God" at Mecca, which was to be for all time the centre of the universal Muslim polity, all this must certainly have gone a great way on the one hand in strengthening the hearts of the Muslims, infusing in them still greater courage and energy, a more brilliant hope for the bright future, a firmer belief in the truth of their cause; and on the other hand it must have dealt a deadly blow to the activities of the enemies of Islam, who would have realised the utter futility of all their misguided and ill-advised designs against the new faith, which, like Abraham's, sought to put an end to the existing heathenism in Arabia and the more or less universal misbelief in the world. And the pages of history bear eloquent testimony of the success of this policy, of the grand and remarkable effect this style of expression had on the people, on the history of Arabia, nay on the history of the whole world!

THE *TUHFATUL-HIND* (OR INDIA'S PRESENT):
AURANGZEB'S INTEREST IN INDIAN
LITERATURE

SYED MASUD HASAN RIZVI, M.A.,
Reader in Persian, Lucknow University.

The Mughal Emperors of India were, in many respects, Indianised. They were in genuine love and real sympathy with India and things Indian; and the literature of India both classical and vernacular was not an exception.

The very founder of this dynasty, Babur, himself acquired such taste for Hindustani poetry and such command over the Hindustani language that we possess at least one couplet composed by him in mixed Hindustani and Turki.

The Persian translations of Sanskrit classics such as the *Mahābhārata* and scientific works such as the *Līlāratī* made by the order of Akbar the Great, and the impetus given to 'Hindi' poetry by him and his accomplished general Khān-i-khānān 'Abdu'r-Raḥīm are facts well known to every student of Indian history. This helped a great deal in creating an interest in and encouraging the study of Sanskrit and Hindi among Muslims. One tangible result of this was that the number of Muslims knowing Sanskrit literature and composing poetry in 'Hindi' in those days was far greater than it is now.

The traditions established by Akbar and his courtiers passed on to his successors. Jahāngīr "took delight in Hindi songs and munificently rewarded Hindi poets." Once by the order of that emperor Puhkara Kavi was, for some offence, put into prison. There he composed his well-known *Rasa Ratna* and regained his freedom as a

reward for that work. Such was Jahāngīr's love for Hindi poetry.

In my collection there are at least two manuscripts, showing that Shāhjahān also, like his illustrious father and more illustrious grandfather, was a patron of the indigenous literature of India. One of these manuscripts is the Persian translation of a Sanskrit book on horses made by the order of that emperor.

The other manuscript is a copy of the *Sundara-siṅgāra* composed by Sundara Kavi in Samvat 1688 and dedicated to the Emperor Shāhjahān.

In his Preface to the book the author, after eulogising his imperial patron, says :---

‘ Shāhjahān tehi kabina ko dene aganita dān
Tina meñ Sundara sukavi ko kiyo bahuta sanumān
Naga bhūkhana manasaba dae hai hāthe sarupāy
Prathama diyo kavirāja pada bahura mahākavirāy.’

The language of this book is ‘ Hindi,’ but the characters in which this manuscript has been transcribed are Persian. This is, however, by no means an isolated phenomenon. There was a time when Persian script was so popular that books in ‘ Hindi ’ were generally written in that script even by Hindus. In my collection alone there is a considerable number of such manuscripts, as the following list will show :---

1. *Rasārṇava* by Sukhdeo Kavi on Nāyikā Bheda, transcribed by Gangādhara in A.H. 1213.

2. *Bhūkhā-bhūkhana* on Alaṅkāra, transcribed in A.H. 1213.

3. *Amara-Chandrikā* by Amareśa on rhetoric.

4. *Rasika-priyā* by Keshodās, composed in Samvat 1648.

5. *Rasa-rāja* by Matirām, transcribed by Mannu Lāl, Śiva Prasād, Ummed ‘Alī and Tālib Haq in A.H. 1218

6. *Alaṅkāra-muktārālī* by Rājādhirāj Singh, transcribed in Saṁvat 1859.
7. *Rāma-chandra-chandrikā* by Keshodās, composed in Saṁvat 1658 and transcribed in Saṁvat 1860.
8. *Anekārtha* by Nandūdās.
9. *Nāma-mālā*, transcribed in A.H. 1215.
10. *Anwara-chandrikā* by Anwara.
- 11-12. Two unknown treatises on Nāyikā-bheda.
13. A miscellany, containing the *dohās* of Raḥīm, Aḥmad, Tulsī Dās, etc.
14. *Līlāratī-Ṭīkā* by Vidyādhara.
15. *Bhagavad-Gītā* by Hariballabh, transcribed in Saṁvat 1874.
16. A book in Hindi verse by Bihārī Lāl.

With an apology for this digression I return to my subject. The love, rather devotion, of prince Dārā Shikoh to Sanskrit literature is only too well-known.

Even Aurangzeb was not without sympathy for Indian literature. A convincing proof of this fact is a rare Persian work entitled *Tuḥfatul-Hind*, a manuscript copy of which is in my collection, and a description of which I propose to give in the following pages. This book was written by Mirzā Muḥammad Ibn Fakhrū'd-dīn Muḥammad for Aurangzeb in compliance with his desire to study the peculiarly Indian 'sciences,' and at the request of his foster-brother and vizir, Kokaltāsh Khān. The book comprises an Introduction dealing with the Deva-nāgarī script and Bhākhā Grammar; seven chapters on

- (1) *Pīṅgal* (or prosody);
- (2) *Tuk* (or rhyme);
- (3) *Alaṅkāra* (or rhetoric);
- (4) *Śṛīṅgār Ras* (or the Indian conception of Love);
- (5) *Saṅgīt* (or Indian music);
- (6) *Koka* (or sexology);

(7) *Sānudrik* (or physiognomy); and a conclusion dealing with words, technical terms and allusions commonly used by 'Indians.'

The Introduction has been divided into two parts.

Part I dealing with Hindi script is again divided into four sections as follows :—

Section 1.—Hindi letters according to Persian terminology.

Section 2.—The Hindi alphabet; the consonants common in Hindi, Persian and Arabic, and those peculiar to Hindi; the forms of Hindi letters.

Section 3.—The Hindi vowel sounds.

Section 4.—The Hindi vowel symbols.

Part II of the Introduction deals with the 'Bhākhā' grammar. In the introductory remarks the author says that the languages used by the Indians are many. But those in which books have been written and poetical works have been composed, and which have been approved by good taste and sound judgment are three. Firstly Sanskrit, in which books on various sciences and arts are written, and which is believed by the Indians to be the language of the Upper World, and is, therefore, called *Ākāśa-Vāṇī* or *Deva-Vāṇī*, which means heavenly language or the language of the gods. Secondly Prakrit, in which the praises of kings, ministers and great men are mostly sung. It is supposed to be the language of the Nether World, and is, therefore, also known as *Pātāla-Vāṇī*. It is a mixture of Sanskrit and Bhākhā. Thirdly Bhākhā, in which charming poems are mostly composed and descriptions of lovers and beloveds are generally given. It is the language of the world in which we live. The term Bhākhā is applied generally to all the languages except Sanskrit and Prakrit, and particularly to the language of Braj, which is a tract of land lying around Mathurā within a radius of four miles. The language of

Braj is the sweetest of all languages, and the language of the places lying in the Doab, *viz.*, the land between the Ganges and the Jumna, for instance Chandwar, is also considered to be sweet.

The author says that he undertook to write this grammar of Braj Bhāshā because that language possessed charming poems, sweet compositions and beautiful descriptions of the Lover and the Beloved, and because it was generally used by poets and men of genius. It is to be noted that the author claims to be the first to write on this subject.

In the chapter on Hindi Prosody one point of special interest is that in discussing the Hindi metres the author gives what could be the corresponding Arabic metres and illustrates them by Persian lines composed by himself. This shows that he had not only a thorough knowledge of Hindi and Arabic prosody but could also put his knowledge of the subject into practice.

In the chapter on Tuk or rhyme it is to be noted that the author says that as he could not find any very systematic book on the subject, he studied all the scattered rules about Tuk and systematised them into a science.

In the chapter on Alaṅkāra or rhetoric the author, giving a brief account of the *rasas*, similes, *etc.*, gives the definitions of 17 well-known rhetorical artifices and illustrates them by Hindi and Persian lines, some of which have been composed by the author himself. In the latter part of this chapter the author claims to have invented or discovered four new *alaṅkāras* to which he gives the following names :—

(1) *Ādanta alaṅkāra*;

(2) *Palthā alaṅkāra*, which is of two kinds *Sarra Palthā* and *Viral Palthā*. Each of these two kinds is further divided into two kinds, *Samāta* and *Nimāta*, thus dividing the *Palthā alaṅkāra* into four kinds, *Samāta*

Sarra Palthā, Nimāta Sarra Palthā, Samāta Viral Palthā and *Nimāta Viral Palthā*;

(3) *Jadhāo alaṅkāra*; and

(4) *Kāntā alaṅkāra*.

The author then proceeds to enumerate and explain the twenty recognised defects of composition. These he generally illustrates by Persian lines or sentences.

In the remaining four chapters I have not been able to find out anything of special importance which I should bring to the notice of the readers.

One remarkable thing about the book is that the author has taken special care to give, wherever possible, Arabic equivalents of the Sanskrit terms which he has used.

FANCIFUL ETYMOLOGIES IN THE DHAMMAPADA

BABU RAM SAKSENA, M.A., D.LITT.,
Reader in Sanskrit, Allahabad University.

1. The ancient texts of Indian literature, Sanskrit, Pāli and Prākṛit, sometimes give very fantastic and popular etymologies while exposing the nature of certain technical terms. For instance, in the Chāndogya Upaniṣad (I. 2. 10-11) it has been laid down that the sages *Aṅgiras*, and *Bṛhaspati* studied *Prāṇa* and then the names of the sages themselves have been applied to *Prāṇa* in the following words :

‘ *etamu evāṅgirasam manyante'ṅgānām yadrasaḥ
etamu eva bṛhaspatim manyante rāgḥi bṛhaṭi tasyā
eṣa patiḥ* ’

This (*Prāṇa*) they consider *Aṅgiras* as it is the life-fluid of the limbs.

This (*Prāṇa*) they consider *Bṛhaspati*, as speech is *Bṛhaṭi* and it is her master.

Sometimes the expositor may be clear in his mind about the correct derivation of his terms but at other times he might not have been so. For instance, when the average astrologer reads the following Mantra for propitiating the wrathful *Budha* he forgets that the verse originally was clearly applicable to sacrificial purposes only and that in putting it to his own use he has been led away by the similarity in sounds :

‘ *udbudhyasvāgne pratijāgṛhi tramīṣṭāpūrtte sām-
jethāmayam ca. asmin sadhasthe adhyuttarasmin riśve
devā yajamānaśca sīdata.*’—Ś. Yajur. 15. 54.

Arise, O Agni, awake and may you and This create *Iṣṭa* and *Pūrta*. In this, the best of sacrifices, may all the deities and the Sacrificer sit down.

Here the astrologer has been visibly led away by the words *budha* and *budhya(sca)* both of which he probably pronounced as *buddha*.

2. In Pāli and Prākṛit literature the possibilities of fanciful etymologies were greater than in the case of Sanskrit works as in many cases the writers in the popular language were ignorant of Sanskrit. In the Dhammapada, there are a number of verses which explain the import of the terms used by the Buddhists. *e.g.*,

Verse 218—

*Chandaajāto anakkhāte manasā ca phuṭo siyā
kāmesu ca appaṭibuddhacitto ‘uddhamso’ ti
cuccati.*

Verse 222—

*Yo ve uppatitum kodham ratham bhantam va dhāraye
tam aham sārathim brūmi rasmiggāho itaro jano.*

These verses are introduced either by *brūmi* ‘I say’ or by *cuccati* or *paruccati* ‘is called’ and may be termed Declaratory. Dhammapada has the following Declaratory verses :

218, 222, 257, 258, 261, 263, 265, 266, 269, 270, 352, 367, 370, 378, 385, 386, 388, 391, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421 and 422

3. In these Declaratory verses one meets with not only fanciful etymologies but also with the denial of correct or incorrect etymologies. The following are the instances of denial found in the Dhammapada :

(a) *na tena bhikkhu hoti yāratā bhikkhate pare*

—Verse 266.

(b) *na monena munī hoti*

—Verse 268.

(c) *na tena ariyo hoti yena pāṇāni hiṃsati*

—Verse 270.

4. The following are instances of the establishment of fanciful etymologies :

(a) *samaṇa* corresponds with Sanskrit *śramaṇa* (*śram* plus *yuc*) but here on account of the similarity in sounds the word has been connected with *śama* (peace) or with *sama* (equality)

*yo ca sameti pāpāni . . . samitattā hi pāpānaṃ
samaṇo*

—Verse 265.

samacariyā samaṇo ti ruccati

—Verse 388.

(b) *munī* corresponds with Sanskrit *muni* derived by the grammarians as *man* plus *in* (*manerucca* . . . Unādi sūtra 4. 123) but here the word is connected with *munāti* ‘ knows ’

yo munāti ubho loka munī tena pa ruccati

—Verse 269.

(c) *brāhmaṇo* corresponds with Sanskrit *brāhmaṇaḥ* derived as *brahman* plus *aṇ* but here it is connected with *bāhita* (Skt. *rāhita*) ‘ banished ’

bāhitapāpo ti brāhmaṇo

—Verse 388.

(d) *pabbajita* corresponds with Sanskrit *prarajita* ‘ one who has gone forth ’ but here the word is derived from the causal form of the root in order to give a peculiar meaning

pabbājayam attano malaṃ tasmā pabbajito ti ruccati

—Verse 388.

(e) *bhikkhū* corresponds with Sanskrit *bhikṣuḥ* derived from *bhikṣ* ‘ to beg ’ but as shown above the correct etymology has been denied in Verse 266 and an entire-

ly fantastic explanation offered in the following words :

vissam̐ dhammam̐ samādāya bhikkhu hoti na tārātā.

Similarly, a fantastic explanation of the term *ārya* has been given as follows :

ahiṃsā savvapāṇānam̐ ariyo ti paruccati

— Verse 270.

4. The derivation of *brāhmaṇo* from *bāhita* suggests the possibility of the actual pronunciation being *bahmaṇo* and not *brāhmaṇo* as found in the manuscripts. The possibility of the pronunciation having changed before an emendation in the written form cannot be denied.

5. The commentary of the Dhammapada, like all other commentaries, abounds in such fantastic etymologies as have been instanced above. Only one example will suffice :

mahesiṃ (Verse 422) which corresponds with Sanskrit *maharṣiṃ* has been explained as

mahantānam̐ sīlakkhandaḍḍīnam̐ esitattā mahesiṃ

—Vol. IV, p. 232

SOME DISPUTED DATES IN RAJPUT HISTORY,
1741 --1761

SIR JADUNATH SARKAR, KT., C.L.E.,
Darjeeling.

1741

12 May.—Peshwa Bālāji Bāji Rāo visits Sawāi Jai Singh. Next day J. S. returns the visit. On 20 May Peshwa takes leave to depart. [*SPD.* xxi. 2.]

28 May.—Battle of Gangwana between Jai S. and Bakht S. [*Vir.*]

4 July.—Imperial farman issued granting the deputy subahdari of Malwa to Bālāji, under Jai Singh. [*SPD.* xv. p. 86.]

1743

21 Sep.—Sawāi Jai S. dies, Ishwari S. succeeds at Jaipur. [*Vir* and *Vamsa* 3323.]

1744

10 July.—Hādā army besieges Jaipur qiladar in Bundi. They storm Bundi; repulse Fakhruddaulah (*en route* to Gujrat as newly appointed subahdar, on a pilgrimage to Ajmer) who had been hired as a partisan. Ummed S. occupied all Bundi territory. Ishwari S. goes to Delhi, war in Bundi suspended for some months. [*Vamsa.* 3354 *et seq.*]

1745

Feb.-March. - Marathas besiege Kota for two months; Jayapa Sindhia's arm wounded by a bullet. [*Vamsa.*]

c. 5 April. - Durjan Sal Hāḍā makes peace by ceding Kāprani to the Marathas.

18 Aug. and following. - Ummed S. Hāḍā defeats Nandram (the Jaipur agent) at Bichḍi, and recovers Bundi fort. But after 16 days another Jaipur army defeats Ummed at Devpur and recovers Bundi. [*Vamsa.* 3401 *et seq.*]

1747

9 Feb. - Rājāmal [or Āyāmal] the Jaipur diwān dies at Delhi. [*SPD.* ii. 1., xxvii. 24.]

1 March. - Haragovind Nātāni, the minister of Ishwari Singh, defeats Madho S., Khande Rao Holkar, Ummed S. and the Maharana at Rajmahal. [*SPD.* ii. 3, 4, 11, xxi. 24; *Vamsa* year wrong, should be 1803.]

March-Sep. - No rain, famine in Rajputana, Udaipur evacuated. [*SPD.* ii. 4, xxi. 19, *Vamsa.* 3449.]

23 Oct. - Kota Rao goes to Nathdwara; Maharana and Madho S. join him. [*Vamsa.* 3355.]

6 Dec. - Maharana's agents (Kishor Pancholi and Jai S. Sagtāwat of Pimpri), with Madho Singh's envoy Kanirām, meet Malhar Holkar at Sātgaon in pargana Ner, and buy his aid. [*SPD.* xxi. 17.]

1748

- 11 Jan.—Ahmad Shah Abdali seizes Lahor.
- 2 Mar.—Abdali captures Sarhind.
- 11 Mar.—Battle of Manupur, Abdali repulsed; Ishwari S. flees away from battle.
- 15 April.—Emperor Muhammad Shah dies; Ahmad Shah succeeds.
- 11 May.—Peshwa Bālāji in Jaipur territory. [*SPD.* xxvii. 30.]
- 29 June.—Bakht S. appointed subahdar of Gujrat. [*DC.*]
- 1 Aug. *et. seq.*—Battle of Bagru, Ishwari S. defeated. Heavy rain for days together. [*Vamsa*, 3496; *Rajwade*, vi. pp. 291-'92 and 648-'9.]
- 23 Oct.—Ummed S. recovers throne of Bundi. [*Vamsa*, 3542.]

1749

- 21 June.—Abhay S. dies; Ram S. succeeds at Jodhpur. [*DC. Vir* gives 19 June.]
- Aug.—Ummed S. Hādā starts for Satara; *via* Bafgaon (the home of Holkar) reaches Satara, where Rajah Shahu Chhatrapati dies (15 Dec.). [*Vamsa*, 3587.]
- 9 Dec.—Salabat Kh. Zulfiqar Jang, Mir Bakhshi of the Delhi Empire, reaches Pataudi *en route* to Rajputana.

1750

- 1 Jan.—Suraj Mal Jat fights Salabat Kh. near Narnol (sarai Sabhachand). [*SPD.* xxi. 26; सुजान चरित्र page 41.]

14 April *et seq.*—Ishwari S. (with Ram S. and Khande Rao Holkar) confronts Salabat Kh. near Riān (south of Merta); artillery duel, peace negotiations. [*SPD.* ii. 16, xxi. 27, 35, *Siyar*, iii. 39.]

May.—Ishwari S. makes peace with Salabat, promising to pay 27 lakhs. [*SPD.* xxi. 25.]

12 July.—Ummed S. returns to Bundi from Puna. [*Vamsa*, 3603.]

July-Aug.—Ishwari S. joins Keshodas Khatri, son of Aya Mal. [*SPD.* ii. 16, 19, xxi. 34, *Vamsa* 3600.]

Sep.—Heavy rain; rivers and nalas in flood. [*SPD.* xxi. 31.]

Sep.—Salabat stays in Ajmer, collecting contributions; leaves for Delhi early Oct. [*SPD.* ii. 23, xxi. 31, 32.]

29 Sep.—Malhar Holkar starts from Khandesh and begins his march on Jaipur. [*SPD.* ii. 19, 22, 23.]

Ishwari S. starts against Rupnagar, to intervene in dispute between brothers. [*SPD.* xxi. 31, 38, ii. 17, 31.]

27 Nov.—Bakht S. defeats Ram S. at Dudāsar tank near Merta. [*SPD.* ii. 15, 17. *Vir* gives 28 Oct., and *Dayal S. Khyat*, 11 Nov.]

12 Dec.—Ishwari S. commits suicide. [*SPD.* ii. 31, 29, *Vamsa* 3611.]

14 Dec.—Khanderao Holkar enters Jaipur city.

27 Dec.—Madho S. arrives at Jaipur, is crowned. [*SPD* ii. 31.]

1751

- 4 Jan.—Jayapa Sindhia arrives near Jaipur. [*SPD.* ii. 31, but xxvii. 65 gives 6 Jan.]
- 10 Jan.—Massacre of Marathi visitors by mob in Jaipur city. [*SPD.* ii. 31.]
- c. 12 Feb.—Holkar and Marathi army retire from Jaipur territory in order to join wazir Safdar Jang in invasion of Rohilkhand.
- 5 June.—Maharana Jagat S. II. dies; Pratap S. II. succeeds.
- 21 June.—Bakht S. drives Ram S. out of Jodhpur; crowns himself. [*Vir* gives 8 July O.S.]

1752

- 6 March.—Ahmad Shah Abdali enters Lahor, annexes subahs Lahor and Multan.
- July.—Bakht S. expects a Maratha invasion in favour of Ram S. near Ajmer. [*TAhS.* 101*a*, corrected.]
- 21 Sep.—Bakht S. dies at Sonoli village; Bijay S. succeeds in Marwar. [*Vir*, which almost agrees with *Tarikh-i-Ahmad Shahi*, f. 43*b*, which says “Bakht S. was attacked with vomiting on 21 Sep. and died in a few days.” *Dayal S.* gives 26 Aug. (wrong).]

1753

- 9 May.—Civil war between Safdar Jang and Emperor (led by Imad-ul-mulk, Mir Bakhshi) begins.
- 21 July.—A Bikaner contingent under Bakhtawar S. (diwān of Gaj S.) reaches Delhi to assist the Emperor. [*Tarikh-i-Ah. S.*, 65*b*.]
- 30 Oct.—Raghunath Rao (brother of the Peshwa) with a vast army enters Kota territory [full itinerary in *SPD.* xxvii. 79.]

16 Dec.—Haragovind Nātāni interviews Raghunath and settles the Jaipur tribute. 17 Dec. Ram S. waits on Raghunath.

1754

10 Jan.—Maharana Pratap S. II. dies [*DC.*]

c. 15 Nov.—Khande Rao Holkar slain at the siege of Kumbher. [*TAhS.*, but 19 March acc. to *D.C.*]

1 July.—Raghunath (at Delhi) detaches Jayapa Sindhia to Marwar to restore Ram S.

End of July.—Jayapa overcomes first Rathor opposition near Kishangarh, and advances.

6 Aug.—Jayapa Sindhia with a Maratha army reaches Merta, to assist Ram S. [*Rajwade*, i. letter no. 37.]

15 Sep.—Ram S. and Jayapa defeat Bijay S. and Gaj S. near Merta [at Chorāsan?] On 17 Sep. Ram S. and Jayapa sack Merta city for three hours. [*Tarikh-i-Alamgir Sani*, 21a and b.] Nāgor is besieged by them immediately after. [*Lekh* no. 124.]

1755

c. Feb.—Haragovind Nātāni (diwān of Jaipur) dies, Kanirām succeeds. [*SPD.* xxvii, 106, 107.]

21 Feb.—Jayapa's lieutenant captures Ajmer. [*SPD.* xxvii. 105.]

12 Apr.—Jayapa sets out for Marwar. [*Lekh*, 143.]

24 July.—Jayapa murdered in camp before Nāgor. [*T.AhS.* 59a, *D.C.*, *SPD.* ii. 48, xxvii. 116, *Lekh* no. 143.]

Early Oct.—Dataji Sindhia defeats Bijay S.'s force near Godowaz. [*SPD.* ii. 49.]

16 Oct. and 20 Oct.—Dataji defeats Anurudh S. Khangarot (Jaipur general) in March to Didwana [*SPD.*]

5 Nov.—Bijay S. escapes from Nāgor to Bikaner, but returns early in Dec.

1756

c. 28 Feb.—Peace between Sindhia and Bijay S. concluded. [*SPD.* ii. 60.]

5 May.—Dataji Sindhia lays siege to Rupnagar, is joined by Shamsheer Bahadur; early in June goes to Ujjain. [*SPD.* ii. 62, 63, 65, xxi. 85.]

1758

15 May.—Jankoji Sindhia near Kota. [*SPD.* xxvii. 221.]

Sep.—Jankoji Sindhia and Malhar Holkar go towards Jaipur *via* Malpura. Dataji Sindhia at Rupnagar. On the death of the Rao of Kota, Malhar goes to Kota. [*SPD.* ii. 94, 98, xxvii. 230, 236.]

1759

c. Nov.—Malhar Holkar fights Madho S. [*SPD.* ii. 107, 113.]

Dec.—Malhar captures Balvada. [*SPD.* xxi. 177.]

1761

3 April.—Maharana Raj Singh II dies, Ari S. II succeeds.

28-29 Nov.—Battle of Mangrol; Malhar routs Jaipur army. [*SPD.* ii. 5, 6, 7, xxi. 92, 93.]

ABBREVIATIONS

[I have given dates in the Old Style or unreformed calendar, which was followed in England till 2 Sep., 1752, when the New Style or reformed calendar was adopted by *adding eleven days*, so that the next day was counted as 14th Sep. The continental nations had reformed their calendar long before 1752. *Vīravīnod* gives Christian dates in the New Style, which I have converted here to the Old Style in order to avoid confusion.]

MĀYĀ IN SĀṆKARA-VEDĀNTA : ITS OBJECTIVITY

KOKILESWAR SASTRI, VIDYĀRATNA, M.A.,
Lecturer, Calcutta University.

We find Prāṇa thus described by Śaṅkara in his commentary on the Māṇḍūkya Upaniṣad . . . “ The term Prāṇa is the world seed (बीजात्मना स्थितम्) and Brahma is defined as Sad-Brahma (सद्ब्रह्म) in relation to and in identification with (तदात्मना) the Prāṇa. It is this Prāṇa which before its manifestation existed *as a seed*; it became manifested as this non-intelligent world ” (मा० का० भा०, 1. 2). Prior to its manifestation, this world of Nāma-rūpa is called as *Avyakta*. Śaṅkara informs us that the *Prāṇabīja* exists in *Pralaya*, dissolution of this world, also in *Suṣupti*, deep slumber of finite Self, in undeveloped or *Avyākṛita* condition, *i.e.*, not yet differentiated in Space and time order.

“ In the dreamless sleep (and in *Pralaya*) the Prāṇa was non-differentiated. Before their birth (*i.e.*, appearance in developed forms of Nāma-rūpa) all objects had their *being* in the form of potential (अव्याकृत) Prāṇa. It then became gradually developed or manifested in Space and time.¹

“ All the universe in the nature of effects and cause, together with the knowing self, enters into the supreme, undecaying Self during sleep . . . and by necessary im-

¹ “अव्याकृतस्य देशकालविशेषाभावात्...अव्याकृत एव प्राणः सुषुप्ते (प्रलये च)...सर्वभावानामुत्पत्तेः प्राक् प्राणबीजात्मनैव सत्त्वम् ।”

plication even in *Pralaya* . . . and that it is produced from thence.”²

“The world in its prior condition was fit to be called as *Aryakta* (not-manifested), as it was reduced to the state of ‘Power of Seed,’ devoid of differentiated *nāma-rūpa*.”³

This *Prāṇa* in *Avyakta* stage is synonymous with *Māyā*. The *Brahma-Sūtra-Bhāṣya* says—

“बीजशक्तिरव्यक्तशब्दनिर्देश्या...मायामयी महासुषुप्तिः” (I. 4. 3)

[“*i.e.*, This seed indicated by the term ‘*Avyakta*’ . . . is like the deep slumber consisting of *Māyā*.”]

The *Māṇḍūkya-bhāṣya* states—

“अव्याकृत एव प्राणः सुषुप्ते, प्रलये च...प्राणशब्दत्वमव्याकृतस्य”
(मा० का० भा० 1. 2)

[“In the deep slumber and in the *Pralaya*, the *Prāṇa* becomes *Aryakta*. . . . The *Prāṇa* is known by the term *Avyakta*.”]

Behind this *Prāṇa* or *Māyā*, there is *Brahma* as its *Substratum* (अधिष्ठान). This *Aryākṛita* (non-manifested) *Prāṇa* is not a self-existing entity, but it cannot be explained without referring to the *Being* of *Brahma* whose energy it is—

“मया अपकृष्टं परित्यक्तं शून्यं तत् स्यात्.... सर्वभूतानां बीजं तदहमर्जुन” (गी० भा०, 10. 39)

[“Anything into which ‘I’ have not entered, from which ‘I’ am removed, would be without Self (could not exist) and would be void.”]

² “समस्तं जगत् कार्यकारणलक्षणं, सह विज्ञानात्मना, परस्मिन्नक्षरे सुषुप्तिकाले संप्रतिष्ठते । सामर्थ्यात् प्रलयेऽपि ।...तत् एव चोत्पद्यत इति च सिद्धम्”—
प्र० भा० 6. 1.

³ प्रागवस्थायां परित्यक्तव्याकृतनामरूपं बीजशक्त्यवस्थम् अव्यक्तशब्दयोग्यं दर्शयति”—ब्र० सू० भा० 1. 4. 2.

Again

तमोबीजस्य स्वातन्त्र्येण प्रवृत्तिशंका स्यात्, तथा सति सांख्यसिद्धान्तापात इति आश्रयं (substratum) दर्शयति”—(Rāmatīrtha in उप० सा० 17. 27)

[“Some one might think that this ‘Seed of Tamas,’ *i.e.*, Prāṇa-bīja acts independently and in that case our theory might resemble the Sāṅkhya Prakṛiti; to disarm such suspicion the author (Śaṅkara) shows its Substratum (आश्रय, अधिष्ठान).”]

This seed of Māyā or Prāṇa existing *in* Brahma as its substratum in undifferentiated state identically blended in it, distributed itself gradually into *three* forms—the gross (स्थूल), subtle (सूक्ष्म) and the causal (कारण). Conditions of the Prāṇa—

“तदेवैकं त्रिधा ज्ञेयं मायाबीजं पुनः क्रमात् ।

मायाव्यात्माऽविकारोऽपि बहुधैको जलार्कवत् ॥”

(उप० सा० 17. 27)

[“One seed (of Māyā) gradually divided itself—into three forms. The intelligent Ātmā which is changeless, though one, appeared as many in connection with the three-fold Māyā, like the sun appearing as many when reflected in the rippling surface of a lake.”]

These three forms of the Prāṇa may be compared with the three states of the finite individual self in its wakeful, dreaming and slumbering conditions respectively. The differentiations into gross states are the products of their subtler condition. The subtle differentiations are again the products of the Causal state which is called as the undifferentiated Causal form or seed-form of the Prāṇa (अव्याकृतप्राणावस्था). All these states were merged in Brahma in Avyakta form.

But what is the *relation* between Prāṇa and its substratum Brahma?

The Avyakta Prāṇa is really the *Swarūpa* (nature) of Brahma itself—

“मम परमेश्वरस्य विष्णोः ‘स्वभूता’...माया” (गी० भा०, 7. 14)

[“ This Māyā is inherent in Me, Viṣṇu, the Lord.”]

“नामरूपबीजभूतात्...स्वाविकारापेक्षया परात् ‘अक्षरात्’ परं सर्वोपाधि-
वर्जितम् ‘अक्षरस्यैव’ स्वरूपम्” (मु० भा०, 2. 1. 2)

[“ The Māyā or Prāṇa, the seed of all names and forms, is termed ‘Akṣara,’ and this being the *source* of all changes does not itself change. The Brahma which is devoid of all determinations and limitations is the real ‘Akṣara.’ The former Akṣara—the Māyā-seed—is, in reality, the *Swarūpa*, *i.e.*, the nature of the Akṣara Brahma.”]

There is thus a *Swarūpa* or *Tādātmya* relation (तादात्म्य) between the Avyakta Prāṇa and Brahma in which it is submerged but not obliterated.

What is *Tādātmya*?

Śaṅkara defines this *tādātmya* (तादात्म्य) in his commentary on the Bṛihadāraṇyaka thus—

“यत्स्वरूपव्यतिरेकेण अग्रहणं यस्य, तस्य, ‘तदात्मत्वं’ दृष्टं लोके”
(2. 4. 7)

[“ Something which cannot have any being or action *apart* from that of the other is in *tādātmya* relation with it.”]

Prāṇa then has no being or activity *apart* from that of Brahma which is its substratum. In all its successive forms, the Prāṇa works not apart from but in identity with Brahma .

“(नाम-रूपे) ‘आत्मतादात्म्येनैव’...सर्वावस्थासु व्याक्रियेते” । (तै०
भा०, 2 6)

[“ All its differentiations and developments are, in all conditions, in intimate relation with Brahma, not apart from Brahma.”]

“‘यदात्मकं’ मयि वर्तते स्थितिकाले” (बृ० भा०, २. १. २०)

“प्रलये च कलानाम् ‘आत्मभावागमनम्’ (प्र० भा०, ७. ५)

“(जगत्) ब्रह्मणि लीयते—‘तदात्मतया’ श्लिष्यति...तद्व्यतिरेकेण अग्र-
हणात्; तस्मात् ‘सर्वमिदं ब्रह्म’ ”—(छा० भा० ३. १४. १)

[“The world of Nāma-rūpa exists not apart from Me, but in identity with My Swarūpa (स्वरूप).”]

[“When it disappears the ten-fold *kalā* (*i.e.*, all the differentiations) are merged in My nature and thus existed in identical relation with Me.”]

[“In an order—reverse of that of birth, all this dissolves into Brahma—becomes identified with it—thus at all periods of time this universe remains one with Brahma and is never cognised *apart* from it, consequently this universe is Brahma itself, in reality.”]

We find then that the Prāṇa or Māyā, when existing unmanifested in Brahma has no being or activity⁴ *apart* from Brahma. “The Prāṇa had no independent being of its own or activity apart from Brahma and for this reason the Prāṇa *though existing* cannot violate or interfere with the unity—non-duality—of its substratum.”⁵ When the differentiations gradually develop under space and time limitations, they do not arise *separated* from or independent of, or apart from, Brahma, and when these differences go on operating (स्थितिकाले), we cannot say that they have made Brahma something else (अन्य) Brahma remains, unaffected, the same substantial being, under the appearance of differences. These differentiations again stand in Tādātmya (तादात्म्य) relation to their cause Prāṇa, as the latter is related to Brahma—its source, its substratum—in the same Tādātmya relation. They cannot make the causal substances something differ-

⁴ “नान्यत् किञ्चन मिषत्”—*i.e.*, “न किञ्चित् व्यापारवत्”—ऐ० भा०, १. १.

⁵ “स्वतः सत्तावत्के स्वव्यापारे स्वातन्त्र्यमेव स्यात्...अतः अद्वितीयस्य न विरोधः”—Ānandagiri in ऐतरेय भाष्य-टीका ।

ent (अन्य); because they are, in reality (परमार्थतः) not something different but express the nature of Brahma.

(2) To the Śruti, this Prāṇa, as soon as manifested, is known as *Sūtra* (सूत्र) :—

“तदैतद् हिरण्यगर्भस्य सूत्रात्मनो जन्म, यद्व्याकृतस्य जगतो व्याकरणम्”—बृ० भा०, 5. 5. 1

[“ The differentiation of the undifferentiated world is the birth (or first manifestation) of *Hiranyagarbha* which is *Sūtra*.”]

It is called *Sūtra*, because it weaves into itself all the differences of the world. It is this energy which related together all the existences, all the determinations (विशेष 's) in the world. It passes through all, it sustains all, as a piece of thread passes through and contains, in it, all the flowers of a garland.

“अन्यथा सकृमुष्टिवन् विशीर्येत”—बृ० भा०, 3. 6. 1

[“ Otherwise, if it did not sustain—all the differences of the world of Nāma-rūpa would have been torn to fragments, scattered, like a handful of barley-powders (सकृ)”]

But we have seen that it cannot act independently; it has Brahma as its substratum, as its source, as its sustaining ground. With a view to impress this fact upon our mind the Śruti calls Brahma as—

“सूत्रस्व सूत्रं, तस्य वै नियन्तारम्” and “प्राणस्य प्राणः”

[i.e., “ Brahma is the thread of all threads, it is the controller—the guide—of this thread.” “ It is the Prāṇa of the Prāṇa.”]

Nīlakaṇṭha thus explains :—

“ Strike a musical instrument, the strike will produce a general undifferentiated sound—अनुरणन. Then strike it more and more, varieties of sound would now be produced upon it. But all these varieties—these various degrees—high and low—of different sounds would all be heard accompanied by the general *anuraṇana* (अनुरणन)

first produced. As a piece of thread enters and touches all the different flowers in a garland, so 'I'—the self has entered and kept constantly touching all the mutually exclusive (व्यावृत्त) finite objects of the world. As the continued identity (अनुगत) remains distinguished from, and unaffected by, mutually exclusive objects, . . . so, I transcend the world."⁶

Each of the objects of the world is finite and it arises from its *negative relation* to others,⁷ as Plato says—"in this distinction from each other things are limited and hence many." But as Brahma is present, as *sūtra*, in each, contains everything, the many are also one—Infinite. We thus find that the phenomenal objects are the expression of the active non-phenomenal essences (सामान्य) behind them, and these latter are all involved in the ultimate Essence—Brahma.

We have seen there is *Tādātmya* relation between this Prāṇa and Brahma and through this Prāṇa, Brahma is the Cause of all.

“सामान्यरूपे मयि सर्वे विशेषाः प्रोता दुन्दुभ्यादिदृष्टान्तैः—रसतन्मात्ररूपे मयि सर्वे अविशेषाः प्रोताः...सूत्रवत् सर्वत्र अनुस्यूते मयि सर्वे परस्परव्यावृत्तं तत् प्रोतम्...अतः प्रपञ्चातीतोऽहम्”—गीता, 7. 7 &c.

⁷ Śaṅkara's *idea* is in this respect identical with Plato's—"A finite is that which has a limit. If something is limited it follows that beyond the limit, there is another something. Hence to be finite means to be limited by something else, and so on."

“अश्वत्वान्तं गोत्वमिति अन्तवदेव भवति स च अन्तः (limit) भिन्नेषु वस्तुषु दृष्टः।”

Thus arises a couple and system of many inter-related finite things. But limit, according to Śaṅkara, always involves negation (निवर्तकत्व)—तै० भा० 2. 1 —“The idea of the 'cow' negates or excludes the idea of the 'horse.' This is what keeps one thing separate from another thing. Each one negates or excludes the other cases from it.” Thus one finite object negates another finite object. There are therefore series of finite objects—Many.

The Gītā-bhāṣya says—

“ When Brahma is said to be not accessible to the thought or word of सत् (Existence), one may suppose it to be असत् (non-existence). To prevent this supposition, the Gītā declares its existence as *manifested* in the upādhis, through the senses of all living beings (13. 12-13). “ There must be some self-conscious principle *behind the insentient principles in activity*, such as physical body; for, we invariably find self-consciousness lying behind all insentient objects *in activity*, such as carriage in motion.” Brahma the sentient principle is not *actually engaged* (व्यापाराविष्टतया) in the particular activities; and in that supposition Brahma would be as if reduced to पररूप or assuming the character of that, with which it is connected. We should understand, Brahma manifests itself through the upādhis or limitations of the senses, through the *functions* of all the senses; that is to say, the knowable Brahma (ज्ञेय) functions as it were, through the functions of all the senses (‘ as it were ’—*i.e.*, not actually engaged, only seems to be so engaged).

We have found that the term Māyā is used in Vedānta with regard to the world, both in its undeveloped and developed conditions. But there is another term Avidyā or Ajñāna which is often employed in this connection. But this has unfortunately led to a serious misconception. There are people who regard the world to be due to our Avidyā or Ajñāna—a subjective idea of the individual soul.

To a careful reader of Śāṅkarabhāṣya it would appear that a distinction is to be made between the Individual sense of Avidyā and the Cosmic sense of Avidyā. Under the influence of the individual Avidyā or Ajñāna, we superimpose the world of Nāma-rūpa on Brahma, and Brahma becoming thus *concealed* from our views, we look

upon the world of Nāma-rūpa as a self-sufficient, separate (अन्य, स्वतन्त्र) and independent entity.

“नाम-रूपोपाधिदृष्टिरेव भवति स्वाभाविकी” (vide बृ० भा०, 3. 5. 1)

But Avidyā has got another sense in Vedānta. It is the ‘Cosmic Avidyā’ and it is equivalent to Māyā (माया) or the Prāṇa (प्राण) described before.

Take the following passages :—

(1) “ईश्वरस्य आत्मभूते इव ‘अविद्याकल्पिते’ नामरूपे संसार-प्रपञ्च-बीजभूते...मायाशक्तिः प्रकृतिरिति...अभिलष्येते, ताभ्याम् ‘अन्यः’ सर्वज्ञ ईश्वरः” —(बृ० भा० 2. 1. 14)

[“The names and forms are constructed or produced (कल्पित, कृत) by Avidyā. They are, as it were, the self or nature of Īśvara . . . are called Māyā—Śakti or Prakṛiti . . . Īśvara is *distinct* from these names and forms.”]

(2) “...अविद्यात्मिका हि सा बीजशक्तिरव्यक्तशब्दनिर्देश्या परमेश्वरा-श्रया मायामयी”—(ब्र० सू० भा०, 2. 2. 8)

[“The Seed-potency (bīja-śakti) of the world whose self or essence is Avidyā, is indicated by the term Avyakta (unevolved) and its substratum is the supreme Īśvara.”]

In the two passages quoted here, *Avidyā* cannot be taken as the ‘Individual Avidyā’; for the Avidyā inherent in an individual soul cannot be held to produce nāma-rūpa, cannot be the Cause of the whole material world including our body, senses, etc. Here Avidyā must denote the ‘cosmic’ Avidyā or Māyā which is the Cause of the material world.

The ‘individual’ Avidyā under whose influence we superimpose the world of nāma-rūpa on Brahma is false and may be destroyed by vidyā (true knowledge); but the ‘Cosmic’ Avidyā is not so. The vidyā or true Knowledge destroys the Avidyā or the ignorance of an indivi-

dual and sublates for him the world imposed on, or identified with, Brahma :

“अविद्याध्यस्तो ब्रह्मणि एकस्मिन्नयं प्रपंचो विद्यया प्रविलाप्यते” (ब्र० सू० भा० 3. 2. 21)

But this vidyā is powerless with regard to the ‘cosmic’ Avidyā which is the causal seed of the world of nāma-rūpa, which *continues to exist* after the Mukti of Jīva or the individual soul.

This distinction in use between the ‘Individual’ Avidyā and the ‘cosmic’ Avidyā or Māyā shows conclusively that the world born of the latter is not a mere *subjective appearance*. The world does not vanish into nothingness the moment the individual soul attains Mukti. All that is involved in the attainment of Mukti is the displacement of the *false outlook* (अविद्याध्यस्त) by the true one, and not the annihilation of the world. The final realisation of Vāmadeva who declared his inner conviction by saying—“अहं मनुरभवं सूर्यश्च” does not show that *Manu*, *Sūryya*, etc., disappeared from the world. But since the world is not due to our *individual Avidyā*, its only *locus* is Brahma;—the false error of ‘independent being’ of the world which may be called as Adhyāsa—this alone disappears in the Mukti, and not the world itself.

In the quotation of the passage marked (1) above, Īśvara is described as *distinguished* from, independent of, the world of nāma-rūpa . . . ” “ताभ्यामन्यः सर्वज्ञ ईश्वरः”. This part of the commentary clearly shows that the world of nāma-rūpa cannot be our subjective construction. What does our mental construction really signify? It means that in place of supreme self our mind and our senses have constructed a world of nāma-rūpa, that there does not appear to us the supreme self at all, that the supreme self is entirely reduced to the world of names and forms (अविद्याध्यस्त). Such is the influence of our ‘Individual Avidyā’ or false knowledge. Everywhere, before us,

behind us, only the differences of nāma-rūpas appear and Brahma becomes concealed from our view. The world of nāma-rūpa is thus viewed by us as something separate (स्वतन्त्र), self-existent, entirely independent (“नामरूपोपाधिदृष्टिरेव भवति स्वाभाविकी”). But it is not a real view. The world is not really the construction of our mind. There is the supreme Brahma who underlies the differences of nāma-rūpa without being affected by them: the differences of nāma-rūpa cannot really conceal Brahma. Hence, Śaṅkara has said—“ताभ्याम् अन्यः.....ईश्वरः”. If the world of nāma-rūpa were simply the *mental construction* of the finite self, no *distinction* in that case could be made between the world and Brahma, since under Adhyāsa the world would be superimposed on Brahma. But the fact is it is not only necessary to *distinguish* the world from God, it is equally necessary to distinguish it from illusion or *subjective phantasm*.

(a) We shall support this view of Ajñāna by Rāmatīrtha's view.

Rāmatīrtha, the most learned interpreter of Śaṅkara, in commenting on the celebrated *Feḍānta-Sāra*, has established the important position that *Ajñāna* (अज्ञान) must not be understood in the sense of subjective notion of an individual soul.

What he says, we shall quote here :—

“मिथ्याज्ञानजन्यसंस्कारः अज्ञानम्, असत्प्रकाशनशक्तित्वेन असद्वा — इति मतद्वयं निरस्यति ।”

[*i.e.*, “Two doctrines about the Ajñāna are to be rejected, *viz.*, that Ajñāna or *ignorance* is an *impression derived from false cognition* and that it is non-existent (*i.e.*, something merely negative)"].

“The author,” says Rāmatīrtha, “now rejects the alternative that ignorance (अज्ञान) is an erroneous cognition and a quality of the soul.”

His argument is stated below :—

“सत्त्वरजस्तमोलक्षणास्त्रयो गुणाः, कारणमव्याकृतात्मकम् ‘अज्ञानं’ त्रिरूपेण त्रिगुणात्मकम् । तथा च, गुणस्य गुणवत्तानुपपत्तेर्न मिथ्याज्ञानम् ‘अज्ञानम्’ इत्यर्थः ।”

[“ By reason of the three constituent elements—*Sattwa, Rajas and Tamas*—in the products, the cause—*Ajñāna*—also is composed of these three constituents. Since, therefore, a quality cannot possess qualities, the erroneous cognition which is a quality of the Soul, cannot be ignorance (*i.e.*, *ajñāna*); for, it possesses the three constituent elements (*i.e.*, *objective* and not a *quality of the soul*)”].

Thus, refuting the opinion that *Ajñāna* is a subjective quality of the mind, he now goes on to show that it is positive (भावरूप) and not mere negation, thus :—

“ज्ञानाभावोऽज्ञानमिति मतं निरस्यति”

(*i.e.*, “ He refutes the view that the ‘ ignorance ’ is mere *absence of knowledge* ”).

Then giving reasons in favour of the *positive* character of *Ajñāna*, he establishes the fact that it is a sort of relative entity and thus concludes :—

“ They beheld the *power* (शक्ति) of *ātma* self-illuminant, subject to its possessor, embraced by three constituents—*Sattwa, Rajas and Tamas* . . . Unless the soul were enveloped (आवृत), there could not exist the practical assurance—‘ it is not,’ ‘ it shines not ’—contradictory to another assurance—‘ it is,’ ‘ it shines ’—in the constant self-illumination of the supreme spirit ” (Gough’s translation).⁵

This आवरण or अज्ञान is explained as तमः (Tamas) with a slight admixture of रजः and सत्त्व.

⁵ “देवस्य स्वयंप्रकाशस्य आत्मनः शक्तिमत्परतन्त्रां स्वगुणैः सत्त्वादिभिः निगूढामालिङ्गिताम्...अपश्यत् ।...ब्रह्मणः स्वप्रकाशत्वेन च ‘अस्ति’ ‘प्रकाशते’ इति,—तद्विपरीतव्यवहारस्य आत्मनि ‘आवरणम्’ अन्तरेण च अनुपपत्तिः ।”

(b) We shall also give here Śaṅkara's own view as expressed by himself.

Now, we shall show that Śaṅkara himself identified *Ajñāna* with the *Prāṇa-śakti* in his *Māṇḍūkya-bhāṣya*. And this, we think, would be a conclusive proof about the objectivity of *Ajñāna*. As this is most important, we shall quote him fully.

In describing the condition of *Pralaya* (and the dreamless *śuṣupta* state of the finite self) we find the following observation in Śaṅkara's *Brahma-sūtrabhāṣya* :-

“मिथ्याज्ञानप्रतिबद्धा विभागशक्तिरनुमास्यते—अपीतावपि; एतेन मुक्तानां पुनरुत्पत्तिप्रसंगः प्रत्युक्तः, सम्यग् ज्ञानेन मिथ्याज्ञानस्य अपोदितत्वात्” (ब्र० सू० भा०, 2. 1. 9)

[“So, at the dissolution of the world (*Pralaya*) the presence of a *Causal potency* of differences—with which the *Ajñāna* or false notion is bound up—must be inferred. By this, the possibility for the reappearance of those who have already been released is precluded, since their ‘false notion’ or *ajñāna* (which binds to *Samsāra* and causes difference) has been destroyed by true knowledge”].

But let us see how Śaṅkara expresses himself describing a similar condition in his *Māṇḍūkya-bhāṣya* :-

“बीजात्मकत्वाभ्युपगमात् सतः । जीवप्रसव—(सर्वपदार्थजातस्य उपलक्षणम्—आ० गि०)—बीजात्मकत्वमपरित्यज्यैव प्राणशब्दत्वं सतः ।... निर्बीजतयैव चेत्, सति प्रलीनानां सुषुप्तिप्रलययोः पुनरुत्थानानुपपत्तिः मुक्तानां च पुनरुत्पत्तिप्रसंगः । बीजाभावाविशेषात् ।”—मा० का० भा०, 1. 2 कारिका ।

[“We are to understand the term *Sat* (सत्) as containing the *causal seed*. The term ‘sat’ denotes *prāṇa*, without leaving out the sense of its causal potentiality which is productive of all objects... If we abandon the idea of this *causal seed*, then the possibility for the reappearance of even those who have already been eman-

icipated will arise, along with those not emancipated; since no productive *causal seed* exists ”].

In comparing the two passages quoted above, it would be seen, what Śaṅkara described by the term *Ajñāna-śakti* in the *Brahma-sūtra-bhāṣya*, is the same as what he called by the term *Prāṇa-bīja* (the causal seed of *Prāṇa*) in the *Māṇḍūkya-bhāṣya*. The *Ajñāna* or ignorance being bound up with the causal seed of *Prāṇa* it is clearly an *objective matter* and not merely a *subjective notion*. This *bīja* (बीज) is the cosmic seed or the *Prāṇa-energy* of the *Sat*. Thus we find that according to Śaṅkara's own showing the world cannot be a subjective notion of the mind of man. It is called *Ajñāna*, because it is the *other*, i.e., opposite (विपरीत) of *jñāna* (ज्ञान), or the Absolute Knowledge.

Here, we should like to call our reader's attention to the concluding remarks of Śaṅkara :—

“सबीजत्वाभ्युपगमेनैव सतः प्राणत्वव्यपदेशः, सर्वश्रुतिषु च कारणत्वव्यपदेशः ।...नेति नेति च बीजवत्त्वापनयनेन व्यपदेशः।”

[“ In all Śrūtis wherever the word ‘ Sat ’ has been said we are to take the existence of causal seed—*Prāṇa* with it . . . But where such terms as ‘ neti,’ ‘ neti ’ occur in Śruti, *Brahma* devoid of this causal seed is to be understood.” That is to say, *Brahma* with the causal *Prāṇa* existing *potentially* in it is to be called as *Sad-brahma* सद्ब्रह्म). It is this undifferentiated seed (बीज) which differentiated into the modifications of names and forms].

Śaṅkara also adds further down there :—

“इतरान् सर्वभावान् प्राणो बीजात्मा जनयति” (6th Kārikā)
 (“चेतौशेवो ये तान् पुरुषः पृथक् सृजति विषयाभावविलक्षणान्”

[“ It is this *causal seed of Prāṇa* which is the productive cause of all objects of the world ”].

[“ But the *finite souls* have come out from the Absolute spirit directly, and they are different from the objects (विषय) ”].

We see from all this that the *Ajñāna* is not a *subjective* idea merely, as many people erroneously believe; but an *objective* seed or matter which is described by Rāmā-tīrtha as “ coloured by the potentiality of all effects ” :—

(‘समस्तकार्यसंस्कारोपरंजितम्’) ।

(c) Ānanda-giri, that famous commentator of Śaṅkara, also holds a similar view about *Ajñāna*. He first of all raises in anticipation an objector’s view thus :—

“ननु, अनाद्यनिर्वाच्यम् ‘अज्ञानं’ संसारस्य ‘बीजभूतं’ नास्त्येव, मिथ्याज्ञान-तत्संस्काराणामज्ञानशब्दवाच्यत्वात्” ?

[“ If some one urges the objection that since the word *Ajñāna* means *false mental conception* and its impressions, there does not exist *Ajñāna* as the beginningless *causal seed* of the world ”].

Anticipating this objection, he discusses this point and gives his own conclusion on the subject thus :—

“अतः ‘उपादानत्वेन’ अज्ञानसिद्धिः”

[“ Thus our conclusion is that—the beginningless *Ajñāna* is established as *the material cause*, of the world, and it is not a subjective *mental idea* merely ”].

In another place also, his conclusion is thus given :—

“परिणामित्वान् तस्य ‘परिणाम्युपादानं’ वक्तव्यम् । तत्र वियदादेः परिणामित्वमङ्गीकृत्य अव्याकृतं ‘परिणाम्युपादानम्’ अस्ति ।

[“ As the world is modification, it must have a modifiable material cause. Taking into consideration the fact that the ether and others are always transformed from one state into another, we hold that there exists a *transformable* material cause of the world in the form of *Avyakta* (prior to transformation or differentiation ”].

In Śaṅkara's commentary on the Chāndogya Upaniṣad, the remarks made by him about the *Prāṇa* leaves no doubt in our mind that he considered it as a *Parīṇāmī-nitya* (transformable principle) and the Supreme Reality which constitutes the truth of the *Prāṇa* and stands beyond it as its ultimate Principle is the *Kūṭastha-nitya*. Thus he describes the *Prāṇa* here :—

“सर्वं क्रिया-कारक-फलभेदजातं प्राण एव, न प्राणाद् बहिर्भूतमस्ति”—
(छा० भा०, 7. 15).

[“ It is *Prāṇa* consisting of all varieties of difference bound up in the relation of cause and effect which may be described as *विकारानृतत्रह्य* and outside of this *Prāṇa* nothing in the world exists ”].

All phenomenal changes take place within this *Prāṇa* and to this *Prāṇa* “ are fastened all differences as the spokes are fastened to the nave (of a wheel).” But *Prāṇa* is not the ultimate principle. “ There is,” Śaṅkara concludes, “ a spirit greater and higher than this *Prāṇa* and he who realises this spirit is the true *Ati-vādī* (*अतिवादी*) not he who knows merely the nature of the *Prāṇa*.”

This *Prāṇa* has been sometimes identified with the *Avidyā* and sometimes with the *Māyā*, as we have seen in the beginning of this paper.

Māyā or *Avidyā* is not therefore to be looked upon in Śaṅkara's philosophy as a mere subjective mental notion of the finite self, but it is the material cause of the *nāma-rūpas* under the control of the Absolute intelligent spirit. Our conclusion is that the *Māyā* in Śaṅkara's system is not a subjective notion but is *objective* in its character.

THE HYMNS OF SIR WILLIAM JONES

PRINCIPAL P. SESHADRI, M.A.,

Gort. College, Ajmer.

Though the reputation of Sir William Jones as an Orientalist is quite wide-spread, it is perhaps not equally well-known that he was also a votary of the muse of Poetry and he has a large number of Indian poems to his credit. As an ardent student of Sanskrit Literature, he was naturally attracted to Hindu mythology and it is not surprising that his poetical hymns are all on Hindu gods and goddesses. It has been said of Keats that he was "to Grecian gods near allied" and a similar compliment is due to Sir William Jones with reference to the Hindu pantheon, though it does not imply any adherence to the Hindu faith on his part, nor any comparison in poetic inspiration and genius between the two poets.

The passionate love lyrics of Lawrence Hope in the *Garden of Kama* have made the name of the Hindu god of Love quite popular in recent decades in the West and it is also perhaps not difficult for readers of English Literature to recall the reference to Kama in Tennyson's *Palace of Art*, but Sir William has got a whole hymn to Camdeo containing a glowing tribute to his all-compelling power. He is the

God of flowery shafts and flowery bow,
Delight of all above and all below.

and Sir William cannot help asking :

Can man resist thy power?

Has not Coleridge written in similar strain in the oft-quoted lines?

All thoughts, all passions, all delights,
Whatever stirs this mortal frame,

All are but ministers of Love,
And feed his sacred flame.

To an admirer of Kālidāsa and his *Kumārasambhava*, it was not a difficult transition from the subject of Camdeo to that of Durgā. Borrowing his materials from Kālidāsa's poems as Sir William Jones himself tells us in his prefatory note, he has given us an account in his *Hymn to Durgā* of the famous episode of Durgā's penance to obtain the love of Śiva and the ultimate realisation of her hope, though at the terrible cost of the destruction of the beautiful form of the God of Love. The hymn has some beautiful passages, as when we are told that she gathered flowers for worship :

On a moon, when edg'd with light,
The lake-born flow'rs their sapphire cups
expanded

Laughing at the scattered night,
A vale remote and silent pool she sought,
Smooth-footed, lotos-handed,
And braids of sacred blossoms wrought.

She was restless and in suspense for a long time :
Nor in drops of nectar'd sleep

Drank solace through the night,
but ultimately the radiant quire of the gods sang " strains of bridal rapture." Sir William does not however attempt any description of the final ecstasies of love for he tells his readers modestly,

Gods alone to Gods reveal

In what stupendous notes the immortals woo.

But now the strain is of a higher mood and Sir William writes in his *Hymn to Bhawani* of primeval Śakti or the goddess of Creative Power. Who that lives in Bengal, as Sir William did during his entire sojourn in India, can escape the fascination of the Śakti-cult? There are almost Miltonic touches in his account of the

evolution of creation from the original chaos of the Universe.

When time was drown'd in sacred sleep,
And raven darkness, brooded over the deep,—
Reposing on primeval pillows
Of tossing billows,
The forms of animated nature lay;
Till over, the wide abyss, where Love
Sat like a nestling dove,

From heaven's dun concave shot a golden ray.

The mother of gods, rich nature's queen, spread her genial fire over the earth and it began to teem with myriad forms of life. It is perhaps not necessary to discuss here the extent to which this account of cosmogony is coloured by Christian tradition and is not entirely faithful to the Hindu literature on the subject.

Indra, the Jupiter of the Hindu Pantheon—the parallel is complete, not only in their power and magnificence but also in their peccadilloes!—could not obviously escape treatment in a series of poems of this kind. He holds his great court in Heaven; even inspired bards cannot describe its beauties; who sees it maddens and who approaches dies :

For, with flame-darting eyes.
Around it roll a thousand sleepless dragons;
While from their diamond flagons
The feasting gods exhaustless nectar sip,
Which glows and sparkles on each fragrant lip.

Anybody who ventures to write a hymn to Sūrya, the Sun-god, runs the risk of unfavourable comparison with Keats, because of his *Hymn to Apollo* with its magnificent beginning :

God of the golden bow,
And of the golden lyre,
And of the golden hair,
And of the golden fire.

There is also Byron's vignette in honour of Apollo in his *White Hound*, with its tribute to "the god of life and poesy and light - the Sun in human limbs array'd." Sir William Jones begins with an invocation to the

Fountain of living light,

That o'er all nature streams,

and tells of his chariot's flight with its seven horses, common to the mythologies of all nations :

The couriers fly releas'd :

Then toss each verdent mane,

And gallop o'er the smooth aerial vault.

The figure of Lakshmi rising from the ocean of milk must have reminded Sir William Jones of Venus rising from the Paphian sea and he has a hymn in her honour. Her numerous names, implying different manifestations of her beneficent activities are woven into the poem and we have even the story of Sudāman who found his grave through Kṛiṣṇa told in a few stanzas.

The next poem is a tribute to Nārāyaṇa :

Spirit of Spirits ! who, through every part

Of space expanded and of endless time,

Beyond the stretch of lab'ring thought sublime,

He is the source of all life in creation and He

(Flows in the rainbow, sparkles in the dream,

Smiles in the bud, and glistens in the flower

That grows each vernal bow'r.

As in the case of the other divinities, he mentions the different manifestations of Nārāyaṇa by enumerating his other names well-known in Hindu Mythology.

It would have been surprising if Sir William Jones had not considered Sarasvatī worthy of a separate hymn. It is there---she receives her full meed of praise as the goddess of learning, the mother of Eloquence and Science who gives primeval truth the unfading bloom of youth

'with pointed reed'—apparently referring to the art of writing on leaves which has been the traditional way of preserving learning in India. The poem is also interesting for a reference to the pilgrim centre of Trivenī in Allahabad :

For thy balmy lore
Drawn from that rubied cave
Where meek cy'd pilgrims hail the triple wave.

There can be very few pictures more appealing to the student of romance than that of the Descent of Ganges and her flow along the provinces of Hindostan teeming with their millions of inhabitants and Sir William Jones has not escaped its fascination. The *Hymn to Ganga* describes the river from its flow and references are made to its ancient history and to the great cities on its banks well-known in legend and song. She was, according to the poet, the great civilizing influence in India, converting the original barbarism to the arts of peace and civilisation. The godless mountaineer roaming round his thickets drear has fallen before her mildness, wisdom and justice and has been won to peace and gentle virtue. Writing from Calcutta and conscious of the coming in of commerce on the high seas, the Ganges being linked with the great water-ways of the world to-day, Sir William has occasion to mention the British race and invoke a blessing on it :

Nor frown, dread goddess, on a peerless race
With lib'rated heart and martial grace
Wafted from colder isles remote :
As they preserve our laws and bid our terror
cease.
So be their darling laws preserv'd in health, in
joy and peace!

At the conclusion of this brief account of the hymns on Indian subjects written by Sir William Jones, it is

perhaps difficult to suppress some general reflections. It is no use disguising the fact that the poetry of Sir William is not of the highest order. While it is generally futile to analyse the causes of failure in poetry, it is easy to see that the weight of Sir William's scholarship was always a heavy burden on his poetic art, though the lines which have been quoted here, do not give a correct indication of the weakness.

Again, it is only an intense and burning religious faith which can raise compositions on subjects of this kind into the heights of real poetry. Sir William was a devout Christian, though perhaps of a liberal kind and the reader is always kept under the impression that he is writing about divinities who hardly mean anything more to him than the shadowy figures of ancient mythology conjured back to life only for the purposes of scholarship.

It is also a pathetic reflection that the sovereignty of these members of the celestial pantheon is gradually slipping away even from the land of their origin and in the years to come, the hymns will be overshadowed more and more by the handicap of the growing want of faith in their subjects, if not of the actual unfamiliarity of their contents. Shall we join the lament of Schiller that Pan is dead, or on the other hand, rest assured with Elizabeth Browning?—

What is true and just and honest,
What is lovely, what is pure—
All of praise that hath admonisht,—
All of virtue, shall endure.

THE CONCEPT OF MUKTI IN INDIAN PHILOSOPHY

DR. R. SHAMASAstry, M.A., PH.D.,

Mysore.

What distinguishes Eastern from Western Philosophy is the concept of Mukti or emancipation from the chain of birth and death. It is considered the main goal of human life and is regarded as the most important of the four human pursuits, Dharma, (virtue), Artha, (wealth), Kāma, (enjoyment), and Mukti, (emancipation). It is human to aspire for happiness and avoid misery and pain. But so long as man has the physical body and the senses, he cannot obtain unmixed happiness. If he gets rid of the body and the senses, as he is believed to do in the state of Mukti, he is promised the enjoyment of unmixed happiness or at least the entire cessation of misery and pain. For this purpose a course of virtuous life is chalked out for him. The most important feature of such a life is renunciation of all worldly pleasures and the annihilation of all kinds of desire and hatred. For it is desire and hatred (Rāga and Dvesha) which are considered as the root-cause of birth and death, from which there is no escape.

Now the question is, “ Is there a state of Mukti? The possibility of existence of such a state cannot even be dreamt of. Nor is there any proof about the existence of such a state. For man is a mass of desire, anger, and other passions which in all the systems of Indian philosophy are considered as the main cause of the chain of birth and death. Besides, the Vedas enjoin certain duties upon man with a view to the repayment of his three

debts. He has to observe certain duties in order to pay his ancestral debt (Pitṛiṇa), certain other duties to absolve himself from the debt he owes to his preceptors (Rishiṇa), some other duties to liquidate the debt due to his gods (Deva-ṛiṇa). Accordingly he cannot give up work and its results which are also the cause of birth and death."

According to Indian philosophers these objections do not hold good: in their view man can free himself from all passions or Kleśas, as they are called. For example, in deep sleep and in deep contemplation (Samādhi) he is free from all passions. The state of Mukti is compared to deep sleep and deep contemplation. The only difference between them is that while in deep sleep he is free from all passions for the time being, he is eternally free from the Kleśas in Mukti. When he wakes up from deep sleep, the Kleśas return to him and trouble him. But when he attains Mukti, that is, when he gets rid of rebirth with a physical body and the senses, he cannot have any Kleśas. Accordingly the Sāṅkhya-sūtra (5, 116) says that man attains Brahmahood in deep contemplation (Samādhi), in deep sleep (Sushupti), and in Moksha (that is, Mukti). Likewise the Bṛihadāraṇyak-ōpanishat says (2, 1) that Sushupti and Mukti are similar to each other. Desire, hatred, and other passions are the offspring of a vitiated mind. The mind is vitiated by false knowledge (Mithyā-jñāna). If false knowledge is replaced by true knowledge of things (Tatva-jñāna), all passionate thoughts must necessarily disappear once for all.

The Chārvākas do not believe in rebirth and say that death is Mukti, since all kinds of misery disappear in death. The following half verse is quoted as the Chārvāka definition of Mukti:— "Mokshastu maraṇam tach-cha prāṇavāyu-nivartanam." (Sarvārthasiddhi 7, 75).

The Buddhists believe in rebirth and say that it is due to Vāsanā or chain of passions implanted in the mind. If passions are got rid of by renunciation of all worldly desires and by true knowledge, there will be no rebirth. Hence death with mind purged of all evil thoughts and passions is Mukti or Nirvāṇa, as they call it. (Śloka-vārtika, p. 533.)

The Jainas also believe in rebirth and say that when man has purged his mind of all black thoughts, he attains Kaivalya and rises higher and higher in space. He will have no rebirth and no misery or pain.

Some Mīmāṃsakas say that the attainment of the heavenly abode called Svarga by the performance of the Jyotishṭoma sacrifice is Mukti. The Bhāṭṭas say, as we shall see later in detail, that the realisation of one's own innate or intrinsic happiness (Ātmasaukhyānubhava) is Mukti. (Śloka-vārtika, p. 534).

The Sāṅkhyas say that when a man releases himself from the bonds of Prakṛiti, Nature, and frees himself from all kinds of passions, he attains Kaivalya, the state of isolating himself from Prakṛiti.

According to Yoga philosophy existence with no attachment to any thing (Kaivalya) is Mukti.

The Vedāntins are of opinion that mere absence of misery is not Mukti. There is also the feeling of happiness (Ānanda) which is the nature of the soul. Hence, Mukti in their view is the attainment of true innate happiness due to the disappearance of passions and false knowledge.

The Naiyāyikas or the Indian Logicians have made a long discussion about the existence and nature of Mukti. (*Vide* Vātsyāyana's commentary on Gotama's Nyāyasūtras, under Apavarga). Mukti is defined as complete destruction of the twenty-one forms of misery; the twenty-one forms of misery are (1) the six senses, (2) the six kinds of

knowledge corresponding to the six senses, (3) the six kinds of objects corresponding to the six senses, (4) the physical body, (5) happiness, (6) and misery. The cessation of these twenty-one kinds of misery is termed Mukti. The idea of such a cessation of misery seems to have dawned on the mind of the Indian logicians from the observance of the state of deep sleep when the six senses are dormant with no sense of sense-objects and the body and of pleasure and pain. But there is no proof to demonstrate the existence of the soul without a body and the senses. For no such thing is perceived. Hence, perception cannot be a proof about its existence. Accordingly the Indian logicians have taken resort to syllogistic argument to prove its existence. Whatever comes into being like a wave one after another forming a chain is perishable like a flame of light which is a chain formed of flashes of light. Hence the chain of miseries is perishable. But Śrīdharabhaṭṭa discussing the nature of Mukti in his Nyāyakandalī refutes the above syllogistic argument and says that the only proof about the existence of a state of Mukti is the Upanishad passage which says that "The Soul being without a body, the feelings of pleasure and pain do not touch him." Udayana is, however, of opinion that the syllogistic argument is sound and acceptable. He also quotes Rig. 7, 59 12, and Śvetāśvatara 3, 8 in support of a state of Mukti. "The entire cessation of misery" is acceptable to all schools of Indian philosophy as a definition of Mukti. "Niśreyasam punaḥ duḥkha-nivṛttirātyantikīḥ atra cha vādinā mavivāda eva" (Kiraṇāvalī).

If in the state of Mukti there is neither pleasure nor pain, then the liberated soul may be compared to a man who has fallen senseless. If so, how can such a state be called a Purushārtha, or object of human pursuit? The logicians reply that men care more for avoidance of

misery and pain than for the attainment of positive happiness. It is of frequent occurrence that men commit suicide merely for getting rid of their present troubles; such men do not aspire for any happiness after death. There are, some people who undertake painful works with the hope of achieving some happiness in future. Such men may not care for a painless state called Mukti and may rather laugh at it. All that can be said of such people is that they are not fit candidates for our Mukti. Only those whose chief desire is to get rid of all misery and who with that object in view sacrifice all worldly pleasures and enjoyments are fit candidates for our Mukti, no matter if it is merely a state of painless existence. Such a form of Mukti is acceptable to the authors of the Nyāyamañjarī and the Kiraṇāvalī. That it is also acceptable to Gotama, the author of the Nyāyasūtras, is stated by Śrīharsha in his Naishādhā. (17, 75.) He says :—

Muktaye yaśśilātvāya śāstramūche sachētasām,
gotamam tamavetaiva yathā vittha tathaiva saḥ.

“ He who taught rational beings a state of stone-like existence called Mukti is verily Gotama (the best ox; also his name); he is as you know him, having understood the above idea.’

Quite different is, however, the view ascribed to him by Mādhava in his Śaṅkaravijaya (16. 68-69). “ A conceited logician asked Śaṅkarā that if he were an omniscient man he might distinguish between forms of Mukti in the opinion of Kaṇāda and Akshapāda; if he could not, he might as well give up his claim to omniscience.” The reply is that in the view of Kaṇāda it is a state of existence like the sky with the complete riddance of all qualities (misery is a quality). In the view of Akshapāda, however, it is a state of no misery with the feeling of happi-

ness in addition. In the Sarvasiddhāntasaṅgraha attributed to Śaṅkara the same difference between the views of Kaṇāda and Akshapāda is stated. “The experience of eternal pleasure even in the absence of objects of pleasure is a feature of Moksha (according to Akshapāda). It is better to be a jackal in the beautiful forests of the Vṛindāvana than to be in a state of Mukti devoid of all pleasure, according to the view of the Vaiśeṣikas.” This difference in the representation of Gotama’s view on Mukti between Śrīharsha on the one hand and Śaṅkara and Mādhava on the other can be reconciled by admitting that there have been two schools of commentators on Gotama’s Nyāyasūtras. One school is represented by Vātsyāyana and the other by Bhāsarvajña. The latter defines Mukti as “Sukhamātyantikam yatra buddhi-grāhyamatīndriyam, taṁ vai mokṣam vijānīyāt dush-prāpamakṛitātmabhiḥ.” (“One should know that to be Moksha where eternal happiness is perceived by the intellect and not by the senses and which is not attainable by the untrained.”) Bhūṣaṇa, the author of Nyāyabhūṣaṇa, a commentary on Bhāsarvajña’s commentary on Gotama’s Nyāyasūtras, says that the insertion of the word “sukha” in the verse is to refute the view of Kaṇāda. In his commentary on Haribhadrāsūri’s Shaḍ-darśanasamuchchaya, Guṇaratna says that there are seventeen commentaries on Bhāsarvajña’s Nyāyasāra and that Nyāyabhūṣaṇa is most important among them. Nyāyaikadeśin is another name given to Bhūṣaṇa according to Mallinātha. In his commentary on Tārkikarakshā (Khaṇḍa 1, p. 166) he says that the Nyāyaikadeśins (a different school of Nyāya) are the followers of Bhūṣaṇa. In his Nyāyapariśuddhi Vedāntadeśika says (Khaṇḍa 1, p. 17) that Bhūṣaṇa has proved that Mukti is a state of perpetual pleasure or happiness. In Sarvamataṣaṅgraha the Nyāyaikadeśins are represented as a school rejecting

Upamāna as a Pramāṇa. “Uktaṁ hi Pratyakshānumānāgamapramāṇavādino Nyāyaikadeśinah.”

It appears that there was a school of Nyāyaikadeśins long before the time of Bhāsarvajña (about 900 A.D.), for Sureśvarāchārya refers to them in his Mānasollāsa (2, 17—19) and says that the Nyāyaikadeśins accepted only three Pramāṇas. These verses are quoted by Varadarāja in his Tārkikarakshā (p. 166).

In his commentary on the Nyāyasūtras Vātsyāyana refers to a sect of Śaivites, according to whom Mukti is a state of happiness with no misery and refutes their view by interpreting the word “Sukha” in the Āgama-verse quoted by them as “Duḥkhābhāva,” absence of misery. It is evident therefore that the verse, “Sukhamātyantikam yatra etc.” defining Mukti must have been current at the time of Vātsyāyana (about the 4th Century A.D.). In quoting the verse Vātsyāyana uses the word “Āgama,” as “Yadyapi kaśchidāgamassyāt muktasyātyantikam sukhamiti.” It is therefore clear that Āgama works were current in his time as Pramāṇa works like the Vedas. It may be said therefore that as Śaivites, Śaṅkara and Mādhava accepted the authority of Āgamas and followed the Nyāyaikadeśins in interpreting Gotama’s Nyāyasūtras.

Raghunāthaśiromaṇi refers to the definition of Mukti given by the Bhāṭṭas (Kumārila and his followers) as a state of happiness and refutes it. In the Sarvasidhāntasaṅgraha the Bhāṭṭas are said to have defined Mukti as a state of happiness “Parānandānubhūtiṣyānmokshe tu vishayādṛite.” In the Mānameyodaya Kumārila’s view on Mukti is stated to be “the Soul’s experience of his own intrinsic happiness with complete cessation of all kinds of misery.” (Māna. Verse 26). But Pārthasārathimīśra does not ascribe such a view of Mukti to Kumārila. In the Tarkapāda of his Śāstradīpikā in which he

says he has faithfully followed Kumārila's views (Kumārīlamatenāham karishye śāstradīpikām). he says as follows :—“ abhāvātmakatvameva svamatam upapattyabhidhānāt. ānandavachanam tu upanyāsamātravātparamatam. na hi muktasyānandānubhavassambhavati kāraṇābhāvāt. manassyāditi chenna amanaskatvaśruteḥ.” (“ Its definition as a negative state is his own view, since necessary proof is adduced. Its description as a state of happiness is only an exposition of the view of others. For it is not possible for a Mukta to experience happiness, as he has no mind and other organs. He has no mind, as the Veda denies it to him.”) Gāgābhaṭṭa, a later writer on the Mimāṃsā work, Bhāṭṭachintāmaṇi, denies the experience of happiness in Mukti. It is only Nārāyaṇabhaṭṭa that admits the experience of happiness in Mukti.

From the above it is evident that as far back as Vātsyāyana and even earlier than his time there was a school of philosophers who admitted the experience of happiness in Mukti. “ Nityam sukhamātmāno mahatvavanmokshe abhivyaajyate,” (“ Eternal happiness like the Soul's greatness manifests itself in Moksha ”) is a passage found in the Bhāṣhya of Vātsyāyana on the Nyāyasūtras. The view expressed in the above passage is stated in the commentary as the view of the Advaitins. Raghunātha-śiromaṇi and other logicians say that a liberated soul has no body and mind, and that without a body and the mind there can be no experience of happiness in Mukti. They quote the passage of the Chāndogyopanishat, “ The soul having no body, happiness and misery do not touch him ” (8, 12) in support of their view. As to the passage of the Taittirīya (2, 6) “ Ānandam brahmaṇo rūpaṁ tacheha mokshe pratishṭhitam.” (“ Happiness is the nature of Brahman and it is eternally perceived in Moksha ”), it is explained by them as referring to some kind of happi-

ness which is intrinsic to the soul and for the experience of which the soul requires neither a body nor the mind. But Gadādhara is opposed to this view and he says that the word “Ānanda” in the passage of the Taittirīya quoted above means absence of misery and not a positive form of happiness.

Like the Vedāntins the Jainas also admit the experience of eternal happiness in Mukti. In his commentary called Ratnāvatārikā on the last Sūtra of the Pramāṇa-nayatattvālokāṅkāra, Ratnaprabhāchārya says that eternal happiness is experienced in Mukti, and quotes the Āgama verse “Sukhamātyantikam yatra, etc.” in support of his view.

Thus while the Buddhists and the logicians deny the experience of eternal happiness in Mukti, the Śaivite school of the Nyāyaikadeśins, the Vedāntins, and the Jainas admit the experience of happiness in Mukti. The latter say that while desire for worldly happiness and pleasure leads to rebirth and its miseries, desire for the eternal happiness of Mukti does not so bind a man and lead him to rebirth.

To sum up: just as the notion of spirit-worship is stated to have its origin in dream, so the notion of Mukti has its origin in sound sleep. The logicians are of opinion that in sound sleep the soul experiences neither happiness nor misery, while the Vedāntins say that there is the experience of happiness in sound sleep. In support of their view the Vedāntins point to the statement which a man awaking from sound sleep makes saying that “sukhamahamasvāpsam, I slept happily.” Mukti is accordingly a long sleep with no return to rebirth. Rebirth is a result of desire and hatred which are implanted on the mind of man at the time of his death. If the mind is purged of these and other passions and is, as it were, free from all thoughts, at the time of death, then there is

no likelihood of there being a rebirth. This view of Mukti is common to all schools of Indian philosophers, the Brāhmans, the Buddhists, and the Jainas,

Whether the concept of Mukti is logical or not is a controversial question. The arguments put forward in support of the notion are as endless as those advanced against it. However it was and is still an article of faith with a majority of the Brāhmans, the Buddhists and the Jainas. The effect of this religious sentiment on the social, economical, and political condition of ancient India was, however, for good. The aim being towards the other world, there was no communal conflict. Money being considered as a trash, there was no commercial or political calamity on account of wealth.

SOME UNKNOWN SANSKRIT POETS OF MITHILĀ

DR. HAR DUTT SHARMA, M.A., PH.D.,
Professor of Sanskrit, Hindu College, Delhi.

Mithilā has been the centre of Sanskrit learning from time immemorial. No other part of India can boast of an unbroken tradition of scholars from the hoary age of the Vedas. It is only here that we find that from the time of *Janaka* down to the present day a continuous stream of scholarship has been flowing in the land. Although Nyāya has been the speciality of this place, and it can rightly boast of *Uddyotakara*, *Udayana*, *Vācaspati* and others, yet other branches of learning were not neglected here. Another very important contribution which Mithilā has made to Sanskrit learning is in the domain of Dharmaśāstra literature. Mr. P. V. Kane says: “From the days of the Yājñavalkya Smṛti down to the modern times the land of Mithilā has produced writers whose names are illustrious.” (Hist. Dharm., p. 363). Even the province of poetry has not been forgotten. It is rather strange that the *nibandhakāras* have been famous as poets also. I propose to deal in this paper with some Maithila poets mentioned in a Sanskrit Anthology by a Maithila, which has preserved the names and verses of many unknown poets otherwise lost to us. As I have been able to find only one MS. of the work, it will not be possible for me to give different readings of the verses. There is only one MS. of this anthology named *Rasika-jīvana* in the Bhandarkar Oriental Research Institute of Poona. I have to thank Mr. P. K. Code, Supdt. of the MSS. Department, for kindly lending it to me. The book has been referred to by Dr. S. K. De (Sanskrit

Poetics, I, p. 291) and Mr. P. K. Gode (Annals of the Bhandarkar Oriental Research Institute, Vol. XII, pp. 296—399). The latter has tried to fix the date of its author *Gadādhara Bhaṭṭa* as *after A.D. 1650 or the middle of the 17th century A.D.* by means of internal evidence. I have been able to find more evidence which confirms the date arrived at by Mr. Gode.

The book is divided into ten Prabandhas and contains 1562 verses. Out of these, 581 verses are ascribed to their authors or sources and 981 are anonymous. There are 142 authors or works named, a list of which Mr. Gode has given in his article referred to above. I give here the names which are not included in Mr. Gode's list.

- Ānandadeva (fol. 31).
- Kīkākayī (fol. 5).
- Trilocana (fol. 130).
- Devagaṇa (fol. 136).
- Dhanada (fol. 130).
- Nāgamāyā (fol. 5).
- Bhaṭṭabīja (fol. 107).
- Bhānu (fol. 130 and 134).
- Bhāratīkālidāsau (fol. 98).
- Bherībhāmkāra (fol. 2).
- Matyupādhyāya (fol. 90).
- Madhusūdanasarasvatī (fol. 5).
- Muktāpīḍa (fol. 43).
- Rāma (fol. 102).
- Vaiśīmīśra (fol. 7).
- Vāhinīpati (fol. 111).
- Vāhinīmahāpātra (fol. 45).
- Sīlābhaṭṭārikā (fol. 73).
- Śu-[Śa-]kavṛddhi (fols. 63 and 67).
- Harihara (fol. 24).

Gadādharaḥṭṭa gives his parentage in the following verse :—

उमातनूजेन गदाधरेण प्रत्युद्धवं सेवितशङ्करेण ।

गौरीशपुत्रेण रसज्ञहेतोर्विरच्यते कश्चन काव्यबन्धः ॥ (Fol. 1).

The Colophon at the end of the MS. reads :—

इति श्रीभवानीभावनासक्तशाङ्करभट्टदामोदरभट्टसूनुश्रीगौरीपतिसूनुगदाधरभट्टेन विरचिते रसिकजीवने दशमः प्रबन्धः पूर्णः ॥ (Fol. 137).

From this we get the following genealogical table of our author :—

Dāmodaraḥṭṭa
|
Gaurīpati or Gaurīśa
|
Gadādharaḥṭṭa.

The author not only calls *Dāmodaraḥṭṭa* as *Śaṅkaraḥṭṭa*, but whenever he quotes the verses of *Śaṅkaraḥṭṭa* he refers to them as *Śaṅkaragurūṇām*. According to Aufrecht also *Dāmodara* was the pupil of *Śaṅkara* (C.C.I. 250a). It is, therefore, clear that *Śaṅkara* was the preceptor of *Dāmodara*. Now, we learn from Aufrecht that *Gaurīpati*, son of *Dāmodara*, wrote in 1640, a commentary *Ācārādarsābodhinī* on the *Ācārādarsa* of *Śrīdatta* (C.C.I. 172a). Therefore, *Gadādharaḥṭṭa* must have flourished somewhere about the year 1660 A.D.

According to Kane, *Śrīdatta Upādhyāya* is one of the earliest *nibandhakāras* of Mithilā; and as he names *Kalpataṛa*, *Harihara* and *Halāyudha*'s work on *Śrāddha*, he must have flourished later than 1200 A.D. “As *Caṇḍeśvara* mentions his *Samayapradīpa*, *Śrīdatta* must have flourished before the first quarter of the 14th century. If, *Gaṇeśamiśra* mentioned in the *Ācārādarsa* be the same as *Gaṇeścaramiśra*, the author of *Sugatī-sopāna* and uncle of *Caṇḍeśvara* (which appears extremely

probable), then *Śrīdatta* flourished a short time before *Caṇḍeśvara* and must have composed his works between 1275 and 1310 A.D." (Hist. Dharm., p. 365). The only verse of *Śrīdatta* found in the *Rasikajīvana* is :—

श्रेयः सदा दिशतु सालसपद्मपाते
निद्रायिते अपि दृशौ भृशमुन्नमय्य ।
सवा-[संवा-] ह्यमानचरणाम्बुजजातहर्षो
लक्ष्मीमुखेक्षणपरः परमेश्वरो वः ॥ (Fol. 7).

Dāmodarabhaṭṭa, the grandfather of our author, refers to the Moghul Emperor Akbar as *Gājīndrākabarak-ṣītiśvara* in one of his verses quoted below. Therefore, it seems that *Dāmodara* enjoyed the patronage of some king who was at the court of the great Moghul Emperor and must have flourished at about the end of the 16th century A.D. I give here the seven verses ascribed to him in the *Rasikajīvana* :

- I. दुरितसमूहवलाहकपटलीसंहरणपवमानम् ।
शिवयोरङ्गाभरणं वन्दे किञ्चित् गजाननं तेजः ॥ (Fol. 2).
- II. अहिभूषणोऽप्यभयदः कलितहालाहालोऽपि यो नित्यः ।
दिग्बसनोऽप्यखिलेशः तं शशधरशेखरं वन्दे ॥ (Fol. 2).
- III. ब्रह्मादयोऽपि यदपाङ्गतरङ्गभङ्ग्या
मृष्टिस्थितिप्रलयकारणतां व्रजन्ति ।
लावण्यवारिनिधिबीचिपरिप्लुतायै
तस्यै नमोऽस्तु सततं हरवल्लभायै ॥ (Fol. 4).
- IV. ब्रह्माण्डसम्पुटकलेवरमध्यवर्ति
चैतन्यपिण्डमिव मण्डलमस्ति यस्य ।
आलोकिनेऽपि दुरितानि निहन्ति यस्तं
मार्त्तण्डमाद्रिपुरुषं प्रणमामि नित्यम् ॥ (Fol. 5).
- V. जम्बूद्वीपगृहप्रकाशनकरी स्नेहक्षपाधायिनी
नीत्योद्गोर्णमधीततिः खलजनश्रेणीपतङ्गान्तकृत् ।
गाजीन्द्राकबरक्षितीश्वरमनश्चिन्तान्धकारापहा
यस्य क्षोणिपतेरराजदधिकं दीपोपमा लेखनी ॥ (Fol. 14).

- VI. आश्चर्यं समराम्बरे रिपुयशश्चन्द्रप्रतापार्कयोः
सर्वप्रासमयं सदैव तनुते त्वत्खङ्गराहुः कथम् ।
किं चान्यत्परलोकनिर्भयभवांस्तस्मिन्प्रहृत्योत्सवे
गृह्णाति त्यजतामकम्पद्दयो गङ्गां समस्ता भुवः ॥ (Fol. 14).
- VII. यत्कीर्तिर्वलयं भुवः सुविमलं सम्पाद्य संचारतः
क्रान्त्वा शीतगिरिं विधाय सरिता नाकस्य सख्यं दृढम् ।
आराध्यामृतभानुशेखरमलं सम्पाद्य तद्रूपतां
गच्छन्ती त्रिदशालयं द्रुतगतिः शीतांशुना स्पृहते ॥ (Fol. 17).

The following eight verses are ascribed to *Saṅkara-guru*, the preceptor of *Dāmodara* :—

- I. हस्तपङ्कजनिविष्टमोदकव्याजसंचरदशेषपुमर्थम् ।
नौमि किंचिदवधूनि तशुण्डादण्डकुण्डलितमण्डितगण्डम् ॥
(Fol. 1).
- II. संसेवितभृगुतुङ्ग विद्योतितवेदवेदाङ्गम् ।
परिनर्तितभयरंगं मनसिजभङ्गं समाश्रये लिङ्गम् ॥ (Fol. 2).
- III. अपर्णैव लता सेव्या विद्वद्भिरिति मे मतिः ।
यया वृतः पुराणोऽपि स्थाणुः सृतेऽमृतं फलम् ॥ (Fol. 4).
- IV. सत्त्वादिस्थैरगणितगुणैर्हन्त विश्वं प्रसूय
व्यक्तं धत्ते प्रहसनकरी या कुमारीति संज्ञाम ।
मोहध्वान्तप्रसरविरतिविश्वमूर्तिः समन्ता-
दाद्या शक्तिः स्फुरतु मम सा दीपवद्देहगेहे ॥ (Fol. 4).
- V. धुनोतु ध्वान्तं नस्तुलितदलितेन्दीवरवनं
घनस्निग्धं श्लक्ष्णं चिकुरनिकुरम्ब्यं तव शिवे ।
यदीयं सौरभ्यं सहजसमुपालब्धुमनसो
वसन्त्यस्मिन् मन्ये बलमथनवाटीविटपिनाम् [नः ?] ॥ (Fol. 58).
- VI. वहन्ती सिन्दूरं प्रबलकवरीभारतिमिर-
त्विषां वृन्दैर्वन्दीकृतमिव नवीनाकैः [किं] रणम् ।
तनोतु क्षेमं नस्तव वदनसौन्दर्यलहरी-
परीवाहः स्रोतःसरणिरिव सीमन्तसरणिः ॥ (Fol. 59).
- VII. हरक्रोधज्वालावलिभिरवलीढेन वपुषा
गभीरे ते नाभीसरसि कृतभङ्गो मनसिजः ।
समुत्तस्थौ तस्मादचलतनये धूमलतिका
जनस्तां जानीते तव जननि रोमावर्त्तिरिति ॥ (Fol. 66).

- VIII. न गुणाः कापि पूज्यन्ते सत्स्वीकारो हि गौरवम् ।
पीतिमा गुणसाम्येऽपि हरिद्रास्वर्णयोरिव ॥ (Fol. 136).

There are seventeen verses ascribed to *Gadādhara*. Out of these eleven bear the legend *mamāyaṃ* or *mamāyaṃ Gadādharaśya* or *mamaite Gadādharaśya*. The rest have the word *Gadādharaśya* only after them. It is just possible that there was another *Gadādhara* who was different from our author : I give below only those verses which are by our author.

- I. आदृतकुपितभवानीकृतकरमालादिवन्धनव्यसनः ।
केलिकलाकलहादौ देवो वः शङ्करः पाथात् ॥
- II. विरञ्चिनारायणवन्दनीयो मानं विनेतुं गिरिशोऽपि यस्याः ।
कृपाकटाक्षै.....णानि व्यपेक्षते सावतु वो भवानी ॥
- III. उत्फुल्लमानसरसीरुहचारुमध्यनिर्यन्मधुव्रतभरद्युतिहारिणीभिः ।
राधाविलोचनकटाक्षपरम्पराभिर्दृष्टो हरिस्तव सुखानि तनोतु कामम् ।
- IV. उमातनूजेन गदाधरेण प्रत्युद्भवं सेवितशङ्करेण ।
गौरीशपुत्रेण रसज्ञहेतोर्विरच्यते कश्चन काव्यबन्धः ॥
- V. इहोदाहरणं नानाकविनिर्मितसूक्तयः ।
लिख्यन्ते लक्ष्यवस्तूनां लक्षणान्यपि कुत्रचित् ॥ (Fol. 1).
- VI. भिक्षुकोऽपि सकलेप्सितदाता प्रेतभूमिनिलयोऽपि पवित्रः ।
भूतमित्रमपि योऽभयसत्री तं विचित्रचरितं शिवमीडे ॥ (Fol. 3)
- VII. सहर्चारं किं कथयेऽहं मधुविपिने कोऽपि गोपिकातनयः ।
दर्शनले (?) ताद्वनिताचेतोरत्नान्युपादत्ते ॥ (Fol. 8).
- VIII. रत्नसानुशिखराङ्गणफुल्लत्कल्पपादपतलेषु निषण्णाः ।
उद्गृणन्ति नृप हंससवर्णं त्वद्यशः प्रवरकिन्नररामाः ॥ (Fol. 17.)

I am doubtful about this verse, as the following line stands at its end :—*mamāyaṃ khaṇḍaprasāsteh*.

- IX. शरासने सायकमादधाने श्रीरामभद्रक्षितिपालमौलौ ।
सुराङ्गनानां वरलालसानां वामानि नेत्राणि परिस्फुरन्ति ॥
(Fol. 19).

X. अस्याः कामनिवासरम्यभवनं वक्त्रं विलोक्यादरा-
 न्निश्चित्येव सुधाकरं प्रियतमं भूमीगतं शोभनम् ।
 नासामौक्तिककैतवेन रुचिरा तारापि सा रोहिणी
 मन्ये तद्विरहासहिष्णुहृदया तत्संनिधिं सेवते ॥ (Fol. 61).

XI. आस्तां दूरतया तदीयवदनांभोजामृतास्वादनं
 नेदेत्येव मनोरथोऽपि हृदये तत्सङ्गभाषां प्रति ।
 उत्कण्ठाशिथिलीकृताङ्गलतिकं वीक्षेत मामेकदा
 सस्नेहं यदि सा सरोजवदना धन्या वयं तावता ॥ (Fol. 80).

There is one verse ascribed to *Maithila*. He seems to be identical with *Maithila Kāyastha* about whom Aufrecht says :—“ One of the poets mentioned in *Karīndracandrodaya*.” (C.C.I. p. 468a).

समुत्कीर्णे तन्व्या निशितनयनान्तेन मृदिते
 स्तनद्वन्द्वस्पन्दैः स्मितलवसुधाभिः प्लुतिमति ।
 मदन्तःकेदारे मदनकृषिकारेण जनिता
 चिरादाशावल्ली किमिति न फलं हन्त लभते ॥ (Fol. 90).

INDIAN WORDS IN THE *HUMĀYŪN NĀMA*

A. SIDDIQI, M.A., PH.D.,

Professor of Arabic and Persian, Allahabad University.

The *Humāyūn Nāma* of Gulbadan Begum, a daughter of Bābur, was not available to scholars generally until the unique MS. of the book in the British Museum¹ was carefully edited by Mrs. Annette S. Beveridge with an admirable introduction, an English translation of the text, critical notes, and a very useful biographical appendix.² She has tried to make her translation a very faithful one, but as she had to rely on a single MS. and as the text presented difficulties in ascertaining certain words and expressions, some of them not to be found in Persian dictionaries, one may not be inclined to consider her translation and explanations to be accurate in their details.

The first sentence of the text : حکم شدہ ہو : is translated as : “ There has been an order issued ” (p. 83), and the “ order issued ” is considered by the translator to be the same³ as “ mentioned by Abu’l-Faḡl for the gathering of material for the *Akbar Nāma*.” Gulbadan Begum uses the word حکم “ command ” obviously as a polite form of expression for the request made to her by her nephew, the

¹ Rien, *Catalogue of Persian MSS. in the British Museum*, London, 1879, Vol. I, p. 246, (Or. 166).

² Oriental Translation Fund, New Series I, *The History of Humāyūn (Humāyūn Nāma)*, by Gulbadan Begum, London, 1902.

³ *Humāyūn Nāma* (English translation), p. 83, f. n. 1.

Emperor. It has surely nothing to do with the order referred to by Abu'l-Fazl. Similarly, the sentence: "What is he like?" (p. 106) should have been: "Whom does he resemble?"

Some other difficulties:—

(1) *ما حاضر* (*mā ḥāẓirī*, 'not *mā ḥāẓarī* as transcribed by Mrs. Beveridge) has hardly any idea of *haste* about it, and cannot be rendered by "a *hasty* meal" (p. 102). Literally it is: "Whatever is ready (in the house to be served)", *i.e.*, "an unceremonious meal." Originally the Persian ending *-ī* (ی) was added to the Arabic *ما حاضر* "whatever present"; later the word *ما حاضر* (*ḥāẓirī*) assumed the sense of "breakfast." Hence, the Anglo-Indian "*chota hazri*." The translator's difficulty seems to have been that *ما حاضر* (*mā ḥāẓar*), and not *mā ḥāẓir* or *mā ḥāẓirī*, was to be found in the dictionaries; but the latter expression occurs twice within six lines of the text (p. 18), and its correctness cannot be doubted, also because an analogous expression exists in the two forms: *ما حاصل* (*mā ḥāṣil*) and *ما حصل* (*mā ḥaṣal*) "the result or produce."

(2) *پانداں* (*pān-dān*) is "a *pān* box" and not "*pān-dishes*" (p. 123). The ending *-dān* does not mean 'a dish,' nor does it justify the plural *-es* in "dishes."

(3) *جای نماز* (*jāy namāz*) is by no means "an oratory" (p. 124). It is a carpet, *darī* or the like, on which one says his prayers.

(4) *توشکچای خیال* (*toshak-hāy khayāl*) are not "all imaginable pillows" (p. 124), but "figured cushions," and *زرِ بفت خیال* (*zar-baft-i khayāl*) is "figured gold brocade."

The Arabic word *khayāl* does not only mean "imagination," but also "phantasm, or spectre" and "image or figure" which, for example, you see in a dream or in a mirror, and it is on that ground that in Arabic treatises on optics *khayāl* is invariably used as a technical term for

“image.” In Persian also the word is found in this sense and has been used by eminent Persian poets :

(1) Hāfiz. - مگر بخواب به بینم خیالِ منظرِ دوست (1)

(2) Hāfiz. - تکویرِ خیالِ خطِ او نقشِ بر آب است (2)

(3) بیدار در زمانه ندیدی کسی مرا
Hāfiz. - در خواب اگر خیالِ تو گشتی مصورم

(4) آئینه‌گذار دیده بازان
Faizī. - پیغام ده خیالِ سازان

(5) خیالِ روی تو اندر ضمیرِ من بگذشت (5)

Kamāl. - مرا چو آینه شد مغزِ استخوانِ روشن

In the same sense the word appears in the Persian composita *fānūs-i khayāl* and *fānūs-i khayālī*, both meaning “a lantern (cylindrical in shape, generally made of paper) in which figures of animals, etc., revolve by the smoke of the candle inside.”¹ Also in Urdu literature occur both the forms of the word.²

¹ Tajallī of Yazd : چو فانوسِ خیالِ این آسیا از دود می گردد
and Ṣā'ib : بر تن باد صبا پیرهنِ یوسف مصر
از تپِ رشک تو فانوسِ خیالی شده است

² Nasīm of Lakhna'ū :
آنے لگے بیٹھے بیٹھے چکر * فانوسِ خیالِ بن گیا گھر
and Zauq : مل کئی خاک میں جو صورتیں، ہے اُن کا خیال
کیوں نہ فانوسِ خیالی ہو بگولا ہم کو؟

The more popular word in Urdu for this sort of lantern is *shikār-gāh*, literally “a hunting house” or “a hunting box,” apparently on account of there being in it the images or shadows of animals of chase.

Mrs. Beveridge has generally followed her text slavishly, and has retained all the mistakes of the MS., and has perhaps added to them her own faulty readings. Thus, we find in the printed text رَنا (*ra'nā*) for the Indian word رانا (*rānā*); خوشالكان for خوشالكان (p. ۲۱); مرقها for مرقها (p. ۳۳), etc. Her own faulty readings seem to be responsible for errors like the following:—

p. ۱۵ : هیرانی for حیرانی; p. ۲۱ : ضعیف for ضعف and روزة for رونده; p. ۲۵ : سابق for سابق; p. ۲۶ : مصومه for مصومه; p. ۶۸ : استماع for استماع; p. ۷۰ : بلای for بالای; and p. ۹۴ : بالا for بلا

Her emendation (p. ۲۳) صُفَّة دَاْدَة (*ṣuffah dāda* and the English rendering of it “raised an estrade,” p. 107) for the صفا دَاْدَة (*ṣafā dāda*) of the text is not very plausible, because, if that were the sense, one would expect a phrase like رَاسْت کَرْدَة صُفَّة (*ṣuffa-ī rāst kardā*). The author obviously meant to say: “having cleansed the apartment by sweeping it up.” The خانة نه (p. ۳۳) I take as an example of dittography and I read simply خانة. This would make foot-note 2 of page 124 superfluous.

Gulbadan Begum wrote her Memoirs in the reign of Akbar, but it is certain that in giving an account of the days of Bābur and Humāyūn she used words and expressions which were then in use in the Persian spoken in the royal palace. Most of the words to be discussed in the following lines had surely been borrowed by the Persian-speaking conquerors of Hindustān long before the days of Akbar, when the two peoples had already come into close contact. Some of the Indian words used by the Princess surprise the reader, and the only inference to be drawn is that the early Mughul invaders adopted Indian manners and customs readily and without any prejudice.

The following words of Indian origin occur in the book :—

يك پاتر خاصه از : ۱۲ (p. ۱۲), “ a dancing-girl ” (پاتر (*pātar*), probably used for the Indian dancing-girls employed in the royal palace, is the Hindī पातर of which the diminutive पतुरिया (*paturiyā*) is often heard in Oudh.

پاندان (*pān-dān*), “ a *pān*-box ” with a *chhaparkhat* or a *palang* forms part of the equipment of the royal bed-chamber (p. ۳۳ : در مژمن خوردن چهپرکت مرصع نهاده و پاندان و : ۳۳). (در آن خانه چهپرکت از مرصع انداخته : ۳۳ and صراحی ...

“ This word,” says Mrs. Beveridge, “ excites curiosity as to the time when Gulbadan’s people learned to eat *pān*.” It certainly did not take them very long to appreciate this Indian delicacy, so very much praised by Amīr Khusrāw⁶ before the Mughuls came to India.

آن طومار را در : ۷ (p. ۷), “ a bed-stead ” (پلنگ (*palang*), (بقچه روپاک پیچیده بر بالای پلنگ بادشاهی نهادند) It appears from the context that Indian bedsteads were used in the apartments of Humāyūn and their Indian names پلنگ (*palang*) and چهپرکت (*chhaparkhat*) were in common use.

پهر (*pahar*), “ a quarter of a day or night,” i.e., three hours (p. ۳۷ : سه پهر شب مجلس بود. and again p. ۸۶ : بعد از سه پهر حضرت آسایش فرمودند) (تا دو پهر و سه گهری شب) Hindī पहर < Sanskrit प्रहर.

قوت آن نیست که تاتوئی : ۷۱ (p. ۷۱), “ a pony ” (تاتو (*tātū*), (لاغر توانم خرید) (*tātū*), The word is the same as تَتَو written after the Persian or rather the Turkish pronun-

⁶ The *Qirānu’s-Sa’dain*, Aligarh, 1918, p. 185 and elsewhere.

ciation. In Turkish, there being no long vowels, an *alif* is often used to express a short *a*.

تالاب (*tālāb*). “a tank” (p. ۵۸ several times). The original of the word is Sanskrit तडाग (*taḍāga*),⁷ the *ḍ* being turned into *r* in Hindī. A further change of *r* to *l* and of *g* to *o*, (or its elision before the *o* of the Śaurasenī ending) gave rise to *talāo*. This last form seems to have been responsible for the Persianised forms *tālāb* (being influenced by the Persian *āb*, also *āo*, “water”).

از جواهر (p. ۱۳ : جواهر). “set with jewels” (p. ۱۳ : جواهر), if not a scribe’s mistake for جواهر, as Mrs. Beveridge conjectures, is the Indian word جواهر (p. ۱۳ : جواهر), the equivalent of Ar. مرصع (*muraṣṣa*’).

کمر خنجر مرصع : ۳۳ (p. ۳۳ : جمدھر). “a dagger” (p. ۳۳ : جمدھر) is one of the many weapons enumerated by Gulbadan Begum while describing the arrangements and decorations of the *Khāna-i ṭilism* set up on the occasion of the commemoration of the accession of Humāyūn. The derivation of the word given by some of the Persian dictionaries as Ar. *janb* “side” and Pers. *dar* “rending” is to be rejected. The aspirate *dh* of the Indian word was naturally simplified to *d* by the Persians, but the word is Indian beyond all doubt, from S. *yaṁadhārā*, “the sharp edge of death” = यम (IL.जम) “the god of death” and धार “the (sharp) edge” (contracted into धर in Hindī, as is usual in the case of composita).

Besides the ordinary one-pointed *jamdhar*, there were two other kinds in use: *jamdhar-i du-lisāna* “a two-pointed *jamdhar*” and *jamdhar-i se-lisāna* “a three-

⁷ Also *taṭāka* in the *Uttararāmacarita* and elsewhere.

pointed *jamdhar* " (Pers. *du* " two," *se* " three " and Ar. *lisān* " tongue " with the Persian suffix *-a*).

جنگل (*jungal*), a word which allured Kipling so much, occurs only twice or thrice in Gulbadan's work (p. ۶۳).

جیو (*jiu*, the somewhat archaic form of *jī*, " life,") used as a term of endearment and respect (p. ۲۳ : (و هرگاه که حضرت عمه جیو تشریف ارزانی فرمایند). Bābur's sister Khānzāda Begum is so addressed by Gulbadan. Later we find the word in شیخو جیو, the pet-name of Jahāngīr.

چو کندی (*chuokhandī*), " an apartment with doors on all the four sides, located on the topmost storey of a building," (p. ۱۴) is a word which became very common in the later Persian literature," and is the Persianized form of *chuokhandī* (= *chao*- " four " + S. खण्ड *khaṇḍa* " section " + *ī*), literally " any thing having four sections or sides."

تا ... با احتیاط : ۶۳ (p. *chuokī*), " a watch-post " (p. ۶۳ : چو کی بدهند " so that they keep a careful watch "); literally " a square seat."

چھپرکت (*chhaparkat*), " a canopied bedstead " (p. ۳۳ and ۳۴, see also under پاندان). H. छप्पर (*chhappar*), " a light (thatched) roof " and खाट (*khāt*), " a bedstead."

سیر (*sēr*), " a unit of weight " (p. ۱۳).

^۸ See Egerton of Tatton's *Indian and Oriental Armour*, London 1896; Plate I. Nos. 26, 27 and 32.

^۹ *Zuhūrī*: ز چو کندی ساید بر آفتاب. It also assumed the meaning " a canopied elephant-litter," as will be seen from the following couplet by Sa'īd Ashraf:

چو کندی شکوہش اگر سایہ افکند
فیل سپہر شانہ بدوزن بزیر بار

از کروتی خاصه : p. ۵۸) (karotī), “a water-bottle” (p. ۵۸ : از کروتی خاصه). The word seems to be akin to کرّوا کرّوا (karrā), “a pitcher with spout” = S. करक *karaka* “a water vessel,” *karakapūtrikā* “a leather vessel for holding water.” Dr. Bābu Ram Saksena suggests that *karakapūtrikā* > *kararattīā* > *karotī* would be quite a normal development.

کھپوا (khopwā), “a kind of dagger” (p. ۳۳, see also under جمدهر = *khopwā* (کھپوا)), though not to be found in dictionaries, seems to be a word of popular idiom of Northern India which found its way into Persian books like the *Humāyūn Nāma* and *A'in-i Akbarī*.¹¹ According to the latter the price of a *khopwā* ranged between 8 annas and 1½ gold *muhurs* (about 14½ *rupees*), whereas the price of a *jamdhar* went up to 2½ *muhurs*. The difference is explicable, as a *jamdhar* may be more elaborate.¹² *Khopwā* may perhaps be derived from *khāp* (खाप, खाँप), “a splinter, a slice,” on account of the thinness and sharpness of its blade.

گری (garī), “a short space of time equal to 24 minutes” (p. ۱۰ : گری سه گری) is doubtless our کھری. H. चड़ी, घरी. The *Burhān-i Qātī* gives to it the meanings : (1) “any standard of measure for land, cloth, grain, liquids, or time,” (2) “22 minutes and 30 seconds,” (3) “clepsydra.” This is surely a confusion, examples of which are many in the *Burhān*.¹³ The word is surely

¹⁰ “(When the Emperor [Humāyūn] saw men flinging themselves into the wells from thirst, he let anyone drink from his own water-bottle).”

¹¹ Blochmann's edition, pp. 118 and 119.

¹² Egerton of Tatton, l. c.

¹³ Vullers and Steingass follow the *Burhān* and say nothing about the origin of the word. *Gharī* “a measure of liquid and grain” is a different word entirely and is the feminine and diminutive of *gharā* “a pitcher.” This word as well as *gharī*

not Persian. The only possibility of its being a Persian word would have been a derivation from the Avestic *gar*, "to be awake" "to keep a watch," had the root not died out.¹⁴ Bartholomae believes the word *gardad* in the Neo-Persian phrase *bīdār gardad* to have a bearing on this word¹⁵ but this is ridiculous.

گرهی (*garhī*), "a citadel" (p. ۴, etc.) is the Hindustānī *garhī* (the diminutive of *garh*).

لری (*larī*), "a string of pearls or the like" (p. ۳۳ : هر لری دو کرة آينه در پايان - قبيب سى چهل لرى ها ساخته و آويخته). This Hindustānī word *lari* (*larī*) shows that the ladies of the royal palace had also learned the Indian fashion of decorating the apartments on festive occasions.

لك (*lak*), "100,000" (pp. ۱۱, ۱۷, etc.) = S. लक्ष.

"a fold of cloth" is even to-day in common use in the Deccan, where the author of the *Burhān* apparently picked it up and perhaps considered it to be of Persian stock.

¹⁴ It is not to be found in Middle Persian or Neo-Persian.

MITHILĀ

LATE RAI BAHADUR LALA SITA RAM, B.A.

MITHILĀ, the birth place of Lady Sītā, consort of Lord Rāma, claims special reverence from natives of Ayodhyā like the present writer, but presuming that the Janaka Vaideha was not the same as Sīradhvaja Janaka, but one of his ancestors, its importance begins at an earlier date. In the *Bṛihadāraṇyaka Upanishad* Janaka Vaideha, its king, appears as the pupil of Rishi Yājñavalkya and one of the most earnest seekers after truth. It will be shown further on that Janaka Vaideha was descended from the same stock as the rulers of Ayodhyā.

The origins of the words Videha and Mithilā are purely mythical. The Vishṇupurāṇa which is closely followed by the Bhāgavata gives the following origin.

by the Bhāgavata gives the following origin of Mithilā, Videha and Janaka :

“ Nimi, the son of Ikshvāku, instituted a sacrifice that was to last for a thousand years and asked Vasishṭha to preside. Vasishṭha replied that he had already been engaged by Indra in a sacrifice which would last for 500 years and asked him to wait for the period. Nimi made no answer and Vasishṭha thought that he had agreed and went away. Nimi in the meantime employed Gautama and other Rishis and started his sacrifice. On the completion of Indra's Yajña, Vasishṭha came in all haste to Nimi but finding Gautama and others employed, he cursed Nimi that he should thenceforth cease to exist in a corporal form. He cursed Vasishṭha in turn and both abandoned their human bodies.”

It may be noted here that Nimi accused Vasishṭha of avarice which is not very creditable to Brahmans of the Vedic age.

Vasishṭha was subsequently begotten by Urvaśī. Nimi's dead-body was preserved by oils and scents till the completion of the sacrifice. The gods offered to restore him to life but he declined. The Ṛishis then agitated his body and a boy was produced who was called Janaka on account of his extraordinary birth and Videha, because his father was bodiless. He is also known as Mithi because of his birth from agitation (manth मन्थ). According to Vālmīki, however,

Nimi most virtuous man from youth,
The best of all who love the truth,
His son and heir was Mithi and,
His Janak first who ruled the land. (Griffith's
translation.)

Pāṇini however derives Mithilā differently.

“मिथिलादयश्च” (३०१।६०), मध्यन्तेऽत्र रिपवो मिथिला नगरी

“ Mithilā is the town where enemies are crushed.”

In my opinion Pāṇini's explanation is more reasonable. Nimi was a son of Ikshvāku, the founder of the solar line of kings of Ayodhyā. One of his brothers established himself in Viśālā and founded the kingdom of Vaiśālī. Another went to Mithilā giving to his capital a signification cognate to *Ayodhyā* (‘ that, which cannot be conquered ’). Apart from the legend of the Purāṇas, the origin of Videhas I have not been able to trace with any degree of certainty. The Bengal District Gazetteer, Durbhanga (p. 11), says that “ according to a legend preserved in Vedic literature, it formed part of the country in which the Videhas settled on their migration from the Punjab. The legend relates that Agni, the god

of fire accompanied the Videhas on their march eastwards from the banks of the Saraswati and when they came to the broad stream of the Gandak, informed them that their home lay to the east of the river. Thenceforward the Videhas lived to the east of the Gandak where they cleared the marshes, cultivated the virgin soil and founded a great and powerful kingdom."

I have not yet been able to trace this legend.¹ In the Śatapatha Brāhmaṇa and the Bṛihadāraṇyaka Upanishad, the learned king who is so inquisitive and is ready to present a thousand kine for each theosophical truth, is Janaka, Vaideha, whose patronage of learning excited the envy of Ajātaśatru, the ruler of the neighbouring kingdom, and who is truly the Janaka (father) of his subjects. I am inclined to believe in the Purāṇa legend so far as it makes Nimi a son of Ikshvāku. Janaka was a great patron of theological learning. If his progenitors like the Vedic Aryans went to Mithilā with the sacrificial fire it evidently establishes their claim to belong to the period immediately succeeding the Vedic. This particular scion of Ikshvāku's family was most strictly religious. If he or one of the immediate descendants by his piety won the title of *Videha* in the strictly theosophical sense of the term, there can be little to be wondered at. Videha makes the nearest approach to the modern *jīvanmukta* (जीवन्मुक्त). In India monasticity and royal dignity have gone hand in hand in the person of Aśoka the Great. The title won by one of the sovereigns was adopted by his successors, at least one of whom, the Janaka Videha of the *Bṛihadarāṇyaka*, with his teacher Yājñavalkya, has been immortalized as the first enunciator of the principles of Vedānta, afterwards consolidated by Bādarāyaṇa.

¹ The legend is given in *Śatapatha Brāhmaṇa*, 1. 4. 1. 10ff. [K. C.]

The boundaries of Mithilā have been settled from time immemorial. According to the Purāṇas it extended from the river Kauśikī (modern Kosi) in the east to Gandak in the west and from the Ganges to the forests of the Himālayas in the north. The forest on the banks of Kosi was known as the Champāraṇya चंपारण्य and the *Śakti-saṅgama-sūtra* therefore gives the following eastern and western boundaries :

“ From the banks of the Gaṇḍaka to the forests of Champā the country is called Videha, also known as Tīrabhukti.” The Maharajas of Darbhanga are called Mithileshas and when Akbar granted this country to their ancestors the grant was defined as follows :—

از کوس تا گوس و از گنگ تا سنگ

“ From Kos to Gos and from the Ganges to the stone (Himalayas).” Kos is evidently Kosi. Why Gandak should be called *Gos* is not clear.

Mithilā therefore according to the Bengal Gazetteer, Muzaffarpur (p. 151), comprised the present districts of Champaran, Muzaffarpur, Durbhanga, parts of the districts of Monghyr, Bhagalpur, Purnea and the strip of Nepal Tarai lying between these districts and the lower ranges of the Himalayas. This however includes the kingdom of Vaiśālī which was always distinct from Mithilā though at the time of Hiuen Tshang's visit in the seventh century of the Christian era the country was ruled by Samvrijjis or “united Vrijjis.” The boundaries of Vaiśālī are the Great Gandak to the west, little Gandak to the east and the Ganges to the south. Little Gandak also known as Burhi Gandak rises in the Champaran district in the Sumiraon range close to the Harha Pass, enters Muzaffarpur district in the village of Ghosewet and flows in a western direction towards Muzaffarpur which stands

on its southern bank. It then flows parallel to the Āgh-mati and passes into Durbhanga near Pusan 20 miles S. E. of Muzaffarpur and falls into the Ganges opposite Monghyr. The kingdom of Vaiśālī, therefore, evidently covered a part of the districts of Champaran, Muzaffarpur and Durbhanga. Little Gandak is, however, extremely changeable in its course and old beds which the stream has deserted are very common.

Mithilā is also known as *Tirhut* which is the modern form of *Tirabhukti*. *Tirabhukti* is evidently derived from *tira* and *bhukti* and my late lamented
Tirhut. teacher, Mahamahopadhyaya Pandit Haraprasad Shastri rightly considered it to mean the province bordering on the Ganges and that the word *bhukti* was used in the sense of a province during the eleventh and twelfth centuries. Bhogapati is a very common name for the governor of a province and Bhukti evidently is a much older expression for a province than “Sena kings of Bengal.”

“According to a tradition it means the land in which the three mythical *homas* (sacrifices in fire) were performed . . . , one at the birth of Sītā near Sītamarhi, the second at Dhanukha at the foot of the Himalayas, when the great celestial bow of Hara was broken by Rāma and the third at Janakpur, the capital of Mithilā (now in Nepal) at the marriage of Sītā.” This signification can be squeezed out by making it Tribhukti (त्रिभुक्ति), but even then we shall have to attach an extraordinary signification to *bhukti*.

In the present inquiry however we are concerned only with the geography of Mithilā and it is therefore unnecessary to describe the past history of the
Yajñavat. country. We shall first of all take up the Yajñavat, the place of the sacrifice, which the Lord Rāma visited first on entering Mithilā after delivering Ahalyā from her curse. Now Sītā is

generally called the ‘*Devayajanasambhavā*’ which Tawney translates as ‘sprung up from a sacrifice to the gods,’ and which may be more closely rendered as ‘born from the sacrificial ground.’ The honour of being the birth place of Sītā is claimed by Sitamarhi in Muzaffarpur district though this claim is disputed by Panoura, a place at the distance of one mile, both of which will be described later on. Vālmīki says that this Yajñavat was to the N.E. of the Ahalyāśrama. Sitamarhi is, however, to the south-west of Ahiari and we can only explain the difference by assuming that this Yajñavat is not the same as the Devayajana of Sītā’s birth, and this Yajñavat was in the same direction from Ahiari as Janakpur. Construction of the Yajñavedis required very good mathematical knowledge as explained in the Sulbasūtras. Janaka was a great patron of learning and there was no dearth of mathematicians at his court. Probably after mysterious appearance of Sītā the place became too hallowed for another Yajña on the same spot. We may also note that according to the Adbhuta Rāmāyaṇa, Sītā was born in Kurukshetra which by the way is also called Devayajana (*Devā ha satraṁ nīsheduh . . . ‘teshām kurukshetraṁ devayajanamāsa’*—Śatapathabrāhmaṇa). We are, however, perfectly justified in summarily dismissing the claims of this rival in favour of Sitamarhi, a place nearer home. But we shall come to Sitamarhi by and by.

We have yet to determine the locality of this Yajñavat. According to Vālmīki, Janaka came to see the party and asked Viśvāmitra to stop for twelve days during which period the Yajña was expected to be completed and inquired of him all about the young princes who accompanied him; Viśvāmitra told him that they were sons of King Daśaratha of Ayodhyā, had killed the demons who used to disturb his sacrifices and restored Ahalyā to her husband.

The news of the reconciliation of his parents was exceedingly gratifying to Śatānanda, whose joy knew no bounds. He related to the young princes the marvellous deeds of the sage who had brought them thither. The next day Janaka invited them to the Yajña and here Viśvāmitra told the king that the princes were anxious to see the bow of Śiva. Janaka replied that he had vowed to give Sītā to the man who could string the bow. He also said that more than one suiter had tried his strength on the bow and gone back disappointed. Viśvāmitra, however, was certain of Rāma's superhuman strength and persisted in his request. Janaka thereupon ordered his servants to bring the bow from the city (pura), which they did in an iron box. It is evident therefore that (1) the bow was broken in the Yajñavat and (2) that Yajñavat was at some distance from the city. Now it is believed that the bow was broken at Dhanukha, 14 miles from Janakpur in Nepal territories, where a stone bow lying over a pond in a wilderness still preserves the record of the memorable exploit. The *Mithilā-tīrtha-prakāśa* says that the bow lies in Kusuma, a village in the Koradi pargana of Nepal. We are thus inclined to think that the Yajñavat was situated on the site of this Dhanukha to the N.E. of Mithilā. Viśvāmitra's party went straight to the place of the sacrifice to which they had been invited. There was a Yajña but certainly not a Dhānusha-Yajña though as the bow was broken there at the same time, the ordinary Vedic Yajña of Janaka assumed the name of Dhānushayajña by which name it has been known to posterity.

It may be noted here that whatever value there may be in the local tradition about the three Yajñas which gave the name of Tribhukti to the province, the second Yajña was certainly performed at the time the bow was broken.

Viśvāmitra stayed in Mithilā, and messengers were sent by Janaka inviting Daśaratha to come and celebrate the marriage of his sons. After the Yajña was completed they must have gone to the capital and awaited the arrival of the marriage party. Before taking up the capital, Mithilā, we must not pass over

The flower garden. another important incident which though mentioned by Vālmīki is still generally believed. It is the Lord Rāma's visit to the king's flower garden before the bow was broken. Tradition points to the village of Phulahar in the north east corner of the Beni Patti thānā (of Darbhanga district) as the flower garden where the king's priests used to gather flowers for the worship of the gods and identifies its temple with that of Devī Girijā who was worshipped by Sītā before her marriage with Rāma. (Bengal Gazetteer—Durbhanga, page 11).

Mithilā is now divided into two portions one of which belongs to Nepal Government and the other lies within British territory. British Mithilā is known as Tirhut division and comprises the districts of Muzaffarpur, Durbhanga, Champaran and Saran.

The old capital of Mithilā lies in Nepal. We have already remarked that at the time of Hieun Tshang's visit it was governed by Vrijjis who seem

The capital. to have succeeded the Lichchavis, the precursors of the Guptas, to whom their territory seems to have passed after the marriage of Kumāra Devī with Chandragupta I. It became subsequently a wilderness. Three hundred and fifty years ago one Sūr Kiśor, a Sādhu of the Rāmānandī sect, and a native of Galtā in Jaipur State, a great votary of Sītā, was so tormented by robbers that he had to remain for seven days without food. He then composed the following stanzas :—

जहँ तीरथ तहँ दुष्ट बास जिविका नाहँ लहिये ।
 असन बसन जहँ मिलै तहाँ सतसंग न पाहिये ॥
 रार चोर बटपार कुटिल निर्धन दुख देहीं ।
 सहवासिन सो बैर दूर कहँ बसै सनेहीं ॥
 कह सूर किशोर मिले नहीं यथायोग्य चाहिये जहाँ ।
 कलिकाल ग्रस्यो अति प्रबल हूँ हाय राम रहिये कहाँ ॥

“ Wherever there is a holy place, there rogues live and one cannot earn livelihood.

“ One cannot get food or raiment nor good company,

“ Quarrelsome men, thieves, robbers and paupers torment you

“ Even companions become enemies, how far one has to live,

“ Says Sūr Kiśor, it is impossible to get the suitable place,

“ The iron age has overpowered us. Alas! Rāma, where am I to live? ”

The same night Lady Sītā appeared in a dream and ordered him to go to Mithilā.

Sūr Kiśore left Jaipur and passing through Chitrakūṭ reached Ayodhyā and stopped in Januara, a village described in my note on Ayodhyā. With the help of some sādhus of Ayodhyā he went towards Janakpur and traced the ruins. Here they tried to clear the jungle. An official of the Nepal Government happened to pass that way and on learning the object of their mission promised to give them every assistance. The ruins were cleared and several coins and images were found confirming the tradition that the site was that of Janakpur.

Sūr Kiśor commenced building a temple of Sītā which was completed only a century ago. One of his successors made it over to the Maharaja of Tikamgarh who built a very large temple here of the shape of Kanakbhavan of

Ayodhyā. It is locally called Naulākha. Here the management is entirely in the hands of the Raj officials and food is supplied gratis to poor pilgrims.

The present town of Mithilā is nothing more than a moderate sized village in which there are very few pacca houses. In fact the only pacca house ten years ago was that of the Mahant. To the south of the Mahant's house and adjoining it there is a very large temple of the Lord Rāma and his brothers. To the east of this temple there are two tanks of water, the Gaṅgāsāgar and the Dhanush-sāgar with ordinary flights of steps leading to the water. Adjoining them are temples of Śiva, Jānakī, Rāma and Janaka. To the south of the temple of Śiva and Rāma there is another tank called the Rāmsāgar. To the west of the temple of Rāma adjoining the Mahant's house are Ratnasar, Daśrathkuṇḍa and Agnikuṇḍa. There are several katcha tanks near Janakpur. It is said that there are 72 tanks and 52 kuṇḍīs of sādhus.

There is a large gathering of pilgrims on the Sudi Chait 9th and in the month of Aghan. The marriage of Rāma and Sītā is then celebrated with great pomp.

The place next in importance to Janakpur is Sitamarhi though it does not seem to have been visited by Rāma. It is the headquarters of the sub-division of that name in Muzaffarpur district. It is situated on the west bank of the river Lakhauti. A large fair takes place in the month of Chait, the principal day being the ninth of Śukla-paksha commonly called the Ramnaumī, the day on which Rāma is said to have been born in Oudh. It was at Sitamarhi that Raja Janaka when ploughing his field drove his plough-share into an earthen pot. Out of this sprang up the lovely Jānakī or Sītā whose life is described in the Rāmāyaṇa. The tank where she is said to have risen up is still pointed

out but the honour is also claimed by another place, Panoura, situated three miles south of Sitamarhi. (Statistical Account of Bengal, Champaran, page 67.)

In Sitamarhi there are four or five temples in an enclosure in addition to the temple of Śiva. In Panoura a mile to the west there is a tank with a temple of Śiva close to it. It is said that Sītā was found here and after her appearance a tank was built on the spot by King Janaka.

We have disposed of all the localities connected with the subject matter of enquiry. But an account of Mithilā will be incomplete without a description of the principal places of Puranic interest and Puranic “legend inspired by local patriotism makes this tract of country the home of several ṛishis.”

The first and foremost of them whose name has already been mentioned is Yājñavalkya. ‘A large banian tree at Jagban near the Kamatoul station of the B.N.W.R. is adored as his hermitage.’ Mithilā the home of the learned. Ṛishyaśṛiṅga who was invited by Daśaratha to perform his putreshtī yajña also belonged to Yogivana (Jagban). Singheshwara in the Madhepur sub-division of Bhagalpur district is stated by Mr. Day to be the site of his āśrama. The Raghopur state is 60 miles to the east of Durbham and Singheshwar is 24 miles to the east of it. There is a temple of Śiva inside an enclosure. In ‘Mithilā-tīrtha-prakāśa,’ Singheshwar is a shrine dedicated to Śiva and the āśrama of Ṛishyaśṛiṅga is said to be in Yogivana (Jagban) near Ahiari in Jarail pargana. It is called vibhāṇḍakāśrama but Vibhāṇḍaka was the father of Ṛishyaśṛiṅga and we have no reason to believe that he had a separate hermitage.

The Yājñavalkyāśrama of ‘Mithilā-tīrtha-prakāśa’ lies near Dhanukha in Nepal in the same village (Kusuma).

Of the other ṛishis whose nativity is claimed by Mithilā the name of Gautama has already been mentioned. His āśrama is at Brahmapur at some distance from Ahiari. Kapila, the founder of the Sāṅkhya philosophy, is said to have had his hermitage on the site of Kapileshwar in Janakpur itself though the Bengal District Gazetteer gives the honour to Kakraul to the eastern junction of Kamla and Karaia a little to the west of Madhubani where an image of Śiva is said to have been installed by the sage.

The propounder of the Pūrva Mīmāṃsā is also said to have lived at the junction of Yamuni and Kamla.

I have no materials at my disposal to judge the validity of these claims but there is not the least doubt that Mithilā was from time immemorial a great centre of learning and, though a native of Ayodhyā and a votary of Lord Rāma, must above all worship it as the land which his consort purified by condescending to be born in, “it must be duly honoured as the home where the enlightened and the learned might always find a generous patron, peace and safety, where courts were devoted to learning and culture and where poets and philosophers lived in honour and affluence.” (Bengal District Gazetteer, Durbhanga, p. 22).

And this same Mithilā in recent times is the birth place of the profound scholar Mahamahopadhyaya Dr. Ganga Nath Jha, M.A., D.Litt., LL.D.

NOTES ON THE TRIKĀYA-DOCTRINE

PROF. DR. O. STEIN,

German University, Prague.

There are two great processes in India's religious history : on the one side the monistic tendency, beginning in the Veda, developing in the Upaniṣad, finding its philosophical completion in the Vedāntasūtras; the contrary stream runs from the atheistic Buddhism (at least in its fundamentals) to the polymorphous edifice of Mahāyāna. In the latter movement which has become known just in the recent years there is a hardly yet exhausted field for research in religious psychology. How and why the Hīnayāna lost its soil in favour of Mahāyāna is one of the most attractive problems in Indian cultural history. It is true : Hīnayāna has never been, or, only for a very limited time, an undivided, homogenous system. On the other hand, Mahāyāna did not come into existence at once, it had its forerunners, may be latent and in a primitive garb, without the ontological superstructure, even deficient in the principal notions.

But there are many bridges which led from the Hīnayāna to the Mahāyāna. It is the purpose of the following lines to show the possibility of one of those ways in the *kāya*-doctrine,¹ one of the most remarkable and interesting features of the early and developed Mahāyāna.

¹ The previous treatments are quoted in the latest books on that subject: D. T. Suzuki, *Studies in the Lankavatara Sutra*, London 1930 (cf. also his translation of the Text, London 1932); Nalinaksha Dutt, *Aspects of Mahāyāna Buddhism and its Relation to Hīnayāna*, London 1930. Some notes by the late Mr. Haraprasāda Shāstri in B. C. Law's *Buddhist Studies*, Calcutta, 1931, p. 856 ff.; L. Scherman, *Buddha im Fürstenschmuck*, Abhandl. d. Bayr. Akad. d. Wiss., phil.-hist. Kl., N. F., 7, 1932, p. 11 f.; L. de La Vallée Poussin, *Notes et bibliographie bouddh.*

There are the passages in Dīghanikāya. In IX 21 the Buddha asks : What do you understand, Poṭṭhapāda, under the Self?—As material I understand the Self, Sir, possessing a form, consisting of the four great elements, feeding on material food.—And when your Self, P., would be material, possessing a form, consisting of the four great elements, feeding on material food, if it would be so, then, P., your consciousness must be something else and something else your Self. Now, for this reason, you must know this, P., that something else would be the consciousness, something else the Self. May it be so, P., that this Self is material, possessing a form, consisting of the four great elements, feeding on material food, but some phenomena of consciousness of the man in this world come into existence, some phenomena of consciousness cease. For this reason, P., you must know this that something else must be the consciousness, something else the Self. 22. As spiritual I understand the Self, Sir, possessing the main and secondary limbs, not deprived of the organs of sensorial faculties. (The Buddha repeats the arguments, given in 21, with the necessary alterations). 23 Without form I understand the Self, Sir, consisting of consciousness. (The Buddha repeats the arguments *mutatis mutandis*).

D. IX, 39 : There exist, P., these three attainments of the Self² : the attainment of the material Self, the attainment of the spiritual Self, the attainment of the Self without form. And of which kind, P., is the attainment of the material Self? Possessing a form, consisting of the four great elements, feeding on material food, such

(Mélanges chinois et bouddhiques I, Bruxelles 1932), p. 399 f. —Some scholars have even tried to date the beginning of the *Trikāya*-doctrine; cf. Bibliographie bouddh. II, No. 163, IV-V, No. 68 and J. W. Hauer, *Studia Indo-Iranica*, p. 126 ff.

² *Atta-paṭilābha* means, as Buddhaghosa remarks (*Sumaṅgalavil.* Vol. II, p. 380) *attaḥāra-paṭilābha*.

is the attainment of the material Self. And of which kind is the attainment of the spiritual Self? Possessing a form, being spiritual, possessing the main and secondary limbs, not deprived of the organs of the sensorial faculties, thus is the attainment of the spiritual Self. And of which kind is the attainment of the Self without form? Possessing no form, being consciousness, thus is the attainment of the Self without form.

The essential contents of these passages can be summarized in the sentence: the Self is threefold, (1) material, (2) spiritual, (3) without form.

In Buddhaghosa's Commentary on D. IX. 39 (Sumaṅgalav. Vol. II, p. 380) a connection is constructed with the eschatological or mythological view. He says that by the attainment of the material state of Self the Buddha teaches the existence dominated by delights in the *kāma-bhava*, as found with beings from the Avīci up to the Paranimmita-vāsavatti. The second Self belongs according to Buddhaghosa, to the *rūpa-bhava*, comprising the first *jhānabhūmi* up to the Akaniṭṭha-Brahmaloka, the third one is reaching from the Ākāśānañcāyatana-Brahmaloka up to the Neva-saññā nāsaññāyatana-Brahmaloka. These three forms of *attabhāva* correspond to the three spheres of existence: the *kāma*-, *rūpa*-, and *arūpa-bhava*. In D. I 3, 10ff. another repartition of *attā* is shown which resembles that of D. IX 21ff. (1) The *attā*, having a form, consisting of the four great elements, having its original (in an act of begetting) by parents, no doubt identical with the *olārika*. (2) The second *attā* in §11 is called *dibbo rūpī kāmāvacaro kabalīṅkārūhāra-bhakkho*. From the term *dibbo* results the superhuman being who owns such an *attā*; Buddhaghosa (l.c. Vol. I, p. 120) therefore refers correctly to the *kāmāvacara-devas*, while the former belongs to the world of men. (3) The third *attā* in D. I. 3, 12, is again divine, possesses a form,

but it is spiritual, though having all main and secondary limbs and is not deficient in the sensorial organs; beings like those belong to the Brahma-worlds, says the commentator. In the §13—16 are *attās* described who have left behind the form, reaching from the plane of the infinite up to the plane where are neither ideas nor no-ideas.

In D. II 83 a monk comes to know: this my body (*kāya*) has a form, consists of the four great elements, has its origin (in an act of begetting) by parents, is a heap of gruel and boiled rice, is not perpetual, subject to rubbing, galling,³ breaking and destruction. The *kāya* is here described by the same words as the *attā* in I 3, 10, nearly the same as the *olārika-attabhāra* in IX 21, especially 39. The monk proceeds in his meditating; when his mind, in this way concentrated, is clear, cleansed, free from blemish, without defilement, tender, ready for work, firm, immovable, he (the monk) directs and bends his mind to the creation of a spiritual body. Thus he creates out from that (material) body another body, possessing a form, being spiritual, possessing all the main and secondary limbs, not deficient in the sensorial organs. The similes in §86 want to illustrate that the spiritual one is enclosed in the material like a sword in the sheath. One would translate that in other words, the spiritual body emanates from the material by the act of meditation. The further step taken by the meditating monk, whose mental conditions are described as in §85, runs thus: he directs and bends his mind to the forms of supernatural (psycho-physical) faculties: being one, he becomes many, being many, he becomes one, till he reaches with his body even up to the Brahma-worlds.

³ On the ambiguity of these words cf. T. W. Rhys Davids SBB II, p. 87, n. 1.

All these passages show clearly that there has been the conception of different forms of being which has been contaminated with the cosmological system of different beings, namely classes of gods.

In A. III 125 (Vol. I p. 278 f.) the *deraputta* Hatthaka, filling with splendour from his beautiful appearance the whole Jetavana, approaches the Lord; but as he cannot find any support and sinks down, as clarified butter or oil, poured out on sand, trickles down, the Lord says to him : *olārikam, Hatthaka, attabhāram abhinimmināhi*, “ take, Hatthaka, a material body.” Before Brahmā appears in the assembly of the Tāvatiṃsa a splendid light comes forth from the Northern direction, a splendour becomes visible, surpassing even the majestic glory of the gods; and then appears Brahmā Sanāṃkumāra. *Yadā bhante Brahmā Sanāṃkumāro decānam Tāvatiṃsānam pātu bhavati, olārikam attabhāram abhinimminitrā pātu bhavati. Yo kho pana bhante Brahmuno pakatiraṇṇo anabhisambharanīyo so decānam Tāvatiṃsānam cakkhupathasmim*, “ When, Lord, B. S. appears in the assembly of the Tāvatiṃsa gods, he appears by creating for himself a material body. For that which is the natural appearance of B., that, Lord, is unbearable for the sight of the T.” (D. XVIII 15; 16; Cf. XIX 15f. = Vol. II, p. 209f., esp. 225f.) Brahmā assumes the appearance of the youth Pañcasikha and by sitting down on the couch of each of the Tāvatiṃsa gods he creates thirty-three shapes of himself (D. XVIII 18 = II p. 211). These passages show that the conception of three different appearances, one for men, one for gods and one for the highest being, was, at least in some mythological garb, in existence in the canonical scriptures.

Buddha “ the man ” is not always the man in the Nikāyas. The A. II 36 (= Vol. II, p. 38) refers to the answers of the Buddha given to the Brahman Dopa’s

questions: He is neither a god, nor a *gandharva*, nor a *yakṣa*, nor a man, he is a Buddha. It is true that this passage must be understood in the sense of Buddha's mentality and Buddhist cosmology, namely that the Buddha is above all the beings, which are bound to be reborn. Nevertheless, the Brahman Doṇa sees on the path where he followed the Buddha in the latter's foot-steps one of the marks of a *mahāpurisa*, the wheel. In D. XVI 3, 41—47 the Buddha expresses his regret that Ānanda did not ask him to live further; for, by his *iddhipāda* the Buddha is able to live for a Kalpa or for a part of it. Wherever the Buddha appears, in the assemblies of men or gods, he assumes the colour and the voice⁴ of them; after having instructed them he disappears, and they ask: Who is this who speaks, a god or a man? Who is this who disappeared, a god or a man? (D. XVI 3 21f.) The Kathāvatthu XVIII 1 shows that the question of Buddha's human origin vexed his believers; otherwise the passage would not use the argument of his birth in the Lumbinī. The Commentary (JPTS. 1889, p. 171), quoting the heretical view (*laddhi*) of the Vetulyaka, that the Lord had his origin—*ayoniso*—in the Tusita-heaven, that he sent only a *nimittarūpa* to the earth for teaching the law, in the person of Ānanda (Comm. on Kathāv. XVIII 2), is to some extent not in contradiction with a passage like D. XVI 3, 15: *Bodhisatto Tusitā kāyāṃ caritrā* . . . This his birth-story itself contained all the germs for the development of his supernatural entity.

The passages quoted above (p. 3f.) identify with the material *attū* the *kāya*, they call it possessing a form; the

⁴ *Vaṇṇa* and *sara*, the meaning is somewhat doubtful; see PTS. Dict. s. v. *vaṇṇa* 8.

⁵ Windisch, *Buddhas Geburt* 107 n. 1, is right in referring to Lalitav. (ed. Lefmann), p. 60, 15 and explains *kāya* by *nikāya*. But in Lalitav. 51, 7 the splendour is coming from the *tathārūpa kāya*.

step to a *rūpa-kāya* was really not far. It is true, we find the term in the Divyāv. first in differentiation from the *dharmakāya*.⁶ But we must refer to the verb *abhinimmināti*, occurring so many times in connection with the transformation of the body, and, what must be underlined, also in the Vetulyaka heterodoxy (Comm. Kathāv. XVIII 2), later on substituted by the verb or noun from the root *nirmā*. In the Suvarṇaprabhāsa. II. v. 26 and 28 (p. 15) we find the two bodies *nirmitakāya* and *dharmakāya* only.

The expression *manomaya*, referring to a higher realm of existence, reaches back on the one side to the Upaniṣad, on the other side it can be traced in connection with the *sambhogakāya* unto the Mahāyānistic texts.⁷ The suffix *-maya* is explained in Vasubandhu's Abhidh. IV. 113d (=transl. L. de La Vallée Poussin III, p. 234) as "having the nature of something," as, e.g., a *trṇamaya gṛha* is a house made of grass. In accordance with that it is said for *manomayakāya*, *manonirjātatrāt* (III 40c = Vol. II, p. 122), because the being comes into existence without any factor like blood and semen; its synonyms are *gandharva*, *antarābhava*. Beings like that belong to the *rūpadhātu*, having a form, all limbs, organs, graceful appearance, colour, are radiating by themselves, able to walk through the air, feeding on joy, living a long time. The very qualities and abilities owned the first men according to D. XXVII 10 (Vol. III, p. 84). The *sambhogakāya* is called on the other hand *manomaya*, made of mind; it is still visible (*rūparān*).⁸ In connection with the suprahuman birth, the *manomayarūpa* of the Tathāgata

⁶ See the passages quoted and discussed by N. Dutt, l. c., p. 103 f.

⁷ Cf. L. de La Vallée Poussin, JRAS. 1906, p. 961; on *manomayakāya* in Lañkāvat. cf. Suzuki, Studies, p. 208 ff., etc.

⁸ De La Vallée Poussin l. c.

is mentioned often in the Lokottara text, Mahāvastu, I. 218, 15; II. 20, 16. Not to be understood as the *sambhogakāya* of the later Mahāyāna, it must be conceded thāt a *manomayakāya*, mentioned in the D., must belong to a higher stage of the existence, either in meditation, or in the ontological sense, as divine beings possess it. The *manomayakāya*, according to D. II 83. emanating from the material by meditation, finds its counterpart in a Tibetan text, where *samādhi* is said to be the characteristic of the *sambhogakāya*.⁹

The differentiation of a material and non-material world¹⁰ to which still the deities were subjected led to the conception of the idea that the Buddha must be something higher than those *arūpa*-beings; *dhamma* was in canonical texts already the essence of the Highest, a metaphysical notion, identified with *brahman*, *ātman* and the Buddha himself.¹¹ This is the sense of the *dharmakāya* as another name, a metaphorical term for the Tathāgata in D. XXVII 9 (Vol. III, p. 84). In the Nāmasaṅgīti still the *dharmakāya* is called free from form (*arūpa*), it rests

⁹ Rockhill, The Life of the Buddha, p. 200; in the Laṅkāvat. p. 81, Suzuki, transl., p. 72, Studies, p. 210. Suzuki says, Studies p. 212 (cf. 145, 331), that the *manomaya* is a forerunner of the later *nirmāṇakāya*. I am not so sure. In the Commentary of Buddhaghosa (see above) we have learnt that the second, *manomaya-attabhāva*, belongs to the rūpabhava and reaches up to the Akanistha-heaven. In the Laṅkāvat. we do not meet with the term *sambhogakāya*, but *Viṣṇu Buddha*, who has his abode in the Akanistha-heaven, being the highest of all the rūpa-worlds (Text, p. 56, Translation, p. 50, Studies, p. 324). In verse 3 of the 4th Chapter, the Laṅkāvat. says:

*pratyātmaivedyā śuddhā ca bhūmireṣā mamātmikā,
maheśvaram param sthānam Akanistho virājate.*

For *Akanisthaya* as a name of the Buddha, cf. JRAS. 1906, p. 450, 958, 967. That the term *sambhoga* is late, as the idea of a mediate stage of the Buddha between *nirmāṇa* and *dharma*, has been remarked by Dutt, p. 120 f., 326.

¹⁰ In the Canon the *kāma-bhava* seems to be a later subdivision of the *rūpa*-world; see PTS. Dict. s. v. *rūpa* 2.

¹¹ See M. und W. Geiger, Dhanima, p. 76—80.

in the *arūpadhātu*.¹² The third existence, *arūpa-attabhāva*, is attributed to the gods from the sphere of unlimited space up to the sphere where there is no idea (*saññā*) nor absence of ideas; or, the *arūpa*-stage is only *viññāna* (see above). If the Nirvāṇa was above them, it had to be without any mental activity, it was the Absolute. The identity of *nirvāṇa* and *dharma* by the way of old speculations of the absoluteness of *brahman* and its identification with *dhamma* must have been the source of the later speculations on the Absolute.¹³ *Dharmakāya* in young Hīnayāna texts show still the immanent correlation between the *rūpa*- and *arūpa*-world, the latter being the substitute for the Absolute, later on the *dharmakāya*.

It would be wrong to try to explain the *trikāya*-doctrine only from a speculative point of view.¹⁴ The steps of development, the occurrence of only two bodies for instance in the *Suvarṇaprabhā*, where, II 28a, *dharmakāyo hi Sambuddhō, dharmadhātus Tathāgataḥ*, shows the conception nearly of the Hīnayāna; but never, unless in distinctly philosophical works, the idea of *trikāya* became free of cosmological, mythological features. To quote the *Laṅkāvatāra* p.51,7f., in Suzuki's translation

¹² JRAS. 1906, p. 956 and n. 3.

¹³ Th. Stecherbatsky, *The Conception of Buddhist Nirvāṇa*, Leingrad 1927. See the different views according to p. 231 f., esp., p. 26 f.

¹⁴ That means that the philological-historical side of the problems should not be avoided generally. A dictionary of all the terms common to Hīnayāna and Mahāyāna would show the development of meanings, originally without any philosophical intention. E. g., in D. II, 85, IX, 22, 39, the *manomaya attā* is *sabbaṅga-paccāṅgī ahīnindriyo*; in *Alalitav.* 54, 4 the elephant gets these attributes, cf. the *manomayarūpa* of the Tathāgatas in the *Mahāvastu*. In *Abhidh.* III 98 (translation Vol. II, p. 204) the first beings are described in this way. The meaning of *abhīnirmā* begins in Hīnayāna texts. The relation between *nirmāṇa-kāya* in Buddhism and *nirmāṇa-citta* in Yoga has been traced by Gopi Nath Kaviraja, *The Saraswati Bhavana Studies*, Vol. I, p. 47 ff. and by J. W. Hauer, op. cit.

p. 46 : “(Thus the Bodhisattvas) will attain the Tathāgata-body... which entering into the realm of Māyā, reaches all the Buddha-lands, the heavenly mansions of Tushita, and the abode of Akanishṭha¹⁵.”

¹⁵ In connection with the development of the idea of three stages either of the soul or of Buddha, Brahman, Viṣṇu, more could be said, if the chronology of the relevant texts would stand on a more solid basis.

DATE OF SKANDASVĀMIN

LAKSHMAN SARUP, M.A., D.Phil (Oxon),
*Professor of Sanskrit Literature at the University
of the Punjab.*

The date of Skandasvāmin depends on the date of Harisvāmin, the commentator of the *Śatapatha Brāhmaṇa*. The latter gives valuable information about himself, his relationship to Skandasvāmin and his date. He was the head of the department of law of Vikramāditya, the emperor of Avanti or Mālava. The verse is the following :—

श्रीमतोऽवन्तिनाथस्य विक्रमस्य क्षितीशितुः ।
धर्माध्यक्षो हरिस्वामी व्याख्यां कुर्वे यथामति ॥¹

“ I Harisvāmī, the head of (the department of) law of H.M. the emperor Vikramāditya, lord of Avanti, am going to explain (the ŚB) to the best of my intellectual effort.”

He states that he was a pupil of Skandasvāmin :—

यः सम्राट् कृतवान् सप्त सोमसंस्थास्तथक्श्रुतिम् ।
व्याख्यां कृत्वाध्यापयन्मां श्रीस्कन्दस्वाम्यस्ति मे गुरुः ॥

“ Śrī Skandasvāmī is my teacher who—a sovereign (among scholars)—established the seven Soma-institutions and having written a commentary taught me the revealed scripture, *i.e.*, the R̥gveda.”

The date is given in the following verse :—

sic. यदादी (= वदा) नां कलेर्जग्मुः सप्तत्रिंशच्छतानि वै ।
चत्वारिंशत्समाश्चान्यास्तदा भाष्यमिदं कृतम् ॥²

“ This commentary was written when 3700 and another 40 years of the Kali age had passed away.”

¹ See my *Indices to the Nirukta*, Introduction, pp. 29, 30.

² *Ibid.*

The Kali era began on the 18th of February 3102 B.C. The commentary was thus composed in 638 A.D. We do not know how old was Harisvāmin when he wrote this commentary. But if we take into consideration the maturity of spirit revealed in the commentary, he could hardly have written it say before he was 40 years old, although it may be the work of his old age. But even if we assign the minimum age of 40 years to Harisvāmin in 638 A.D., he would hardly receive instruction in Vedic exegesis from Skandasvāmin say before the age of 20, *i.e.*, 618 A.D. At the time of teaching him, Skandasvāmin had written a commentary on the Ṛgveda. Skandasvāmin must have been at least a middle-aged man when he wrote his commentary on the Ṛgveda, *i.e.*, he would be about 40 years old in 618 A.D. So his date will fall in the last quarter of the 6th century and the first quarter of the 7th century A.D.

But if Harisvāmin was older than 40 in 638 A.D., the date of Skandasvāmin will be pushed back slightly further. This is the only possible conclusion, if we accept the evidence supplied by Harisvāmin. But if this evidence is subjected to a critical examination, it is impossible to accept the statement as it stands. Thus, according to Harisvāmin we must assume the existence of an emperor Vikramāditya at Avanti in 638 A.D. But there was no Vikramāditya at Avanti in 638 A.D. And there could not be any emperor assuming the grand title of Vikramāditya at Avanti in 638 A.D. as Harshavardhana³ was the undisputed emperor of Northern India from 606 to 647 A.D. The only defeat suffered by him was in 620 A.D.

³ Harshavardhana cannot be identified with Harsha Vikramāditya mentioned in the *Rājatarāṅgiṇī* iii, 125, 128, as this Harsha is called शकादि which is not the title of Harshavardhana of Thanesar.

at the hands of Pulikeśin II when the Narbada was fixed as the southern boundary of his empire. Avanti or Mālava was therefore an integral part of his empire. After 620 A.D. Harsha never met with a reverse and reigned peacefully till 647 A.D. There could be, therefore, no Vikramāditya at Avanti in 638 A.D. And as far as my historical knowledge goes, there was no Vikramāditya at Avanti even during a period of two or three centuries after the death of Harsha.

Let us now see if there was any Vikramāditya in Mālava before the time of Harsha. For this it will be necessary to make a brief survey of the history of Mālava for two or three centuries previous to the reign of Harsha.

The western Satraps ruled over Mālava in the first century A.D. when the Śaka Chashtana established his kingdom at Ujjain. His grandson Rudradāman I extended his empire in the second century A.D. over the greater part of Western India, including Surāshtra, Cutch, and Sind. Chandragupta II Vikramāditya slew the last Satrap Rudrasimha and annexed Mālava to the Gupta empire about 395 A.D. None of the Western Satraps ever assumed the title of Vikramāditya, so none of them could be identified with the patron of Harisvāmin. Chandragupta II, no doubt, assumed the title of Vikramāditya, but he was not merely the lord of Avanti but of the whole of Northern India. *He could not be appropriately described as merely the lord of Avanti.* For him, this description is unsuitable as it is not comprehensive enough and would suffer from the fault of *avyūpti*. Mālava remained a part of the Gupta empire till it was wrested by the Huns under Toramāna towards the close of the 5th century A.D. Mālava was ruled by the Huns till their leader Mihirakula was defeated by Yaśodharman in c. 528 A.D. Yaśodharman was a king of central India. His inscriptions have been discovered at Mandasor, the

ancient Daśapura, about 100 miles from Ujjain. His victory over the Huns must have extended his sway over Ujjain and the rest of Mālava. As he was able to deliver India from the tyranny of the rule of the Huns, he assumed the title of Vikramāditya. As Avanti or Mālava formed the home province of his empire, he could be appropriately described as the lord of Avanti. In my opinion Yaśodharman is the only king who can be identified with the patron of Harisvāmin. The only obstacle which stands in the way of this identification is the date given by Harisvāmin himself. Now the text of the verse—which gives the date—is corrupt and has not been properly preserved. I therefore propose an emendation of the text and read the verse as follows :—

यदादी (=ब्दा) नां कलेर्जग्मुः षट्त्रिंशच्छतकानि वै ।
चत्वारिंशत्समाश्चान्यास्तदा भाष्यमिदं कृतम् ॥

“ I wrote this commentary when 3600 and another 40 years of the Kali age had passed away.”

This will give the date of the composition of the commentary of Harisvāmin as 538 A.D. Yaśodharman consolidated his kingdom after his great victory over the Huns in 528 A.D. and could thus be the patron of Harisvāmin in 538 A.D.

I may add that after Yaśodharman we do not come across any other Vikramāditya in Mālava. Yaśodharman had a long reign. He died c. 583 A.D. After his death his kingdom fell into pieces. Mālava seems to have become divided into two independent states, one of the Eastern Mālava with its capital at Ujjain⁴ and the other of Western Mālava including Valabhī, and Saurāshṭra. Śīlāditya

⁴ There is a difference of opinion. Some think Ujjain was the capital of Western Mālava. The division of Eastern and Western Mālava is assumed by most historians but the testimony of Bāṇa shows that there was no such division. He simply speaks of one Mālava only.

the son of Yaśodharman seems to be the ruler of Western Mālava only. But he seems to have lost his independence about 593 A.D. There are a few passages in Bāṇa's *Harsha-charita* which if pieced together give an indication of Śīlāditya's loss of independence. Prabhākaravardhana married Yaśovatī. Although it is not expressly stated, she seems to be the daughter of Yaśodharman. This is shown by her very name. There are several cases on record where the later Guptas named their daughters after the father's name, *e.g.*, Harsha-guptā daughter of Harshagupta was married to Ādityavarman, Mahāsena-guptā a daughter of Mahāsengupta was married to Ādityavardhana, father of Prabhākaravardhana. On the analogy of the practice among the Guptas, it may be presumed that Yaśodharman named his daughter after himself. If Yaśovatī⁵ was the daughter of Yaśodharman, then Śīlāditya would be her brother, who presented his son Bhaṇḍi to attend upon the sons of Prabhākaravardhana. Bāṇa remarks :—

अस्मिन्नेव तु काले देव्या यशोवत्या भ्राता सुतमष्टवर्षदेशीयं.....
भण्डिनामानमनुचरं कुमारयोरर्पितवान् । Ch. IV. p. 149.

“ At this very time, the brother of Queen Yaśovatī made over his son named Bhaṇḍi—eight years old—as an attendant on the princes.”

Bāṇa does not expressly mention the name of the queen's brother. But as shown above it must be *Śīlāditya*. Ordinarily an independent king would not suffer the humiliation of surrendering his son to attend upon the princes of another king. From this remark of Bāṇa, it is clear that *Śīlāditya* must have been defeated by Prabhākaravardhana and must have been compelled to surrender his son as a hostage. In this light we can now understand

⁵ The name is spelt as Yaśomatī in Harsha's Madhuban Copper Plate. Ep. Ind., I, 72.

another remark of Bāṇa. In the *Harshacharita*, Prabhākaravardhana is described as मालवल्हमीलतापरशुः, Ch. IV, p. 132, 'an axe to the creeper in the form of prosperity of Mālava.'

Śīlāditya, however, appears to have lost his kingdom altogether. This is indicated by a verse of Kalhaṇa, the author of the *Rājatarāṅgiṇī* :—

वैरागंवासितं पित्र्ये विक्रमादित्यजं न्यधात् ।
राज्ये प्रतापशीलं स शीलादित्यपराभिधम् ॥

"He (Pravarasena II of Kashmir) put Pratāpaśīla, also called Śīlāditya, the son of Vikramāditya, on the throne of his paternal kingdom, when he had been driven out by his enemies."

Śīlāditya lost his kingdom but regained it with the help of the Huna King Pravarasena, son of Toramāna.⁶ But he was finally crushed by Rājyavardhana in 606 A.D., as is shown by the following remark of Bāṇa :—

तस्माच्च हेलानिर्जितमालवानीकमपि Ch. VI, p. 208.

"Although he (Rājyavardhana) vanquished the army of the Mālava King with the greatest possible ease . . ."

With this defeat the kingdom of the Western Mālava came to an end. This is further supported by the fact that Hiuen Tsang who visited Western Mālava in 641-2 A.D. does not mention any reigning king. His Śīlāditya who ruled 60 years before his visit⁷ and who is identified by Sylvain Lévi with the Buddhist Śīlāditya I must be

⁶ This Toramāna seems to be different from the father of Mihirakula. See M. A. Stein, *A Chronicle of the Kings of Kashmir*, Introduction, pp. 82, 141.

⁷ V. A. Smith, *The Early History of India*, 4th ed., p. 343. Hiuen-Tsang, *Si-yu-ki*, translated by Beal ii. 261. A reign of 50 years is assigned to Śīlāditya by the Chinese pilgrim. This is almost impossible in the case of Śīlāditya son of Yaśodharman, but will suit Yaśodharman himself, who can be better identified with the Chinese pilgrim's Śīlāditya.

different from the brother-in-law of Prabhākaravardhana. Nothing more is heard of him in the kingdom of Western Mālava. At any rate, Dhruvabhaṭṭa, a nephew of Śīlāditya, and King of Valabhī, was a subordinate king and attended Harsha's assemblies at Kannauj and Allahabad in 643 A.D. Thus in Western Mālava there was no king who could assume the title of Vikramāditya in 638 A.D.⁸

Let us now turn to the kingdom of Eastern Mālava with its capital at Ujjain. After the breakup of the Magadha Empire, the later Guptas are known to have ruled over Eastern Mālava.⁹ They probably kept quiet during the reign of Yaśodharman. But after his death, they began to raise their head. They must have thus come into conflict with Prabhākaravardhana who seems to have inflicted defeat and a humiliating treaty on them. By the terms of this treaty, two princes named Kumāragupta and Mādhavagupta were surrendered by the Gupta King of Eastern Mālava as hostages and they were

⁸ A word may be said with regard to the cause of enmity between Prabhākaravardhana and his brother-in-law Śīlāditya. Prabhākaravardhana's matrimonial alliance with Yaśodharman must have given a stimulus to the former's ambition, to which the latter's death must have served as a fillip. Prabhākaravardhana waged a war against the Huns and was probably successful to a certain extent; that is why Bāṇa describes him as 'a lion to the deer in the form of Huns' (हृणहरिणकेसरी ch. IV p. 132). He also fought and vanquished the Kings of Sīnd, Gāndhāra, Gurjar and Lāṭa (सिन्धुराजज्वरो गुर्जरप्रजागरो गन्धाराधिपगन्धद्विपकूटपाकलो लाटपाटवपाटचरः op. cit.). Śīlāditya could not look with equanimity on the growing power and prestige of Prabhākaravardhana. As he himself could not offer effective resistance alone, he reversed the anti-Hun policy of his father Yaśodharman and cultivated friendly alliance with the foreigners. His pro-Hun tendency is shown by the name Bhaṇḍi—a Hunic name—which he gave to his son. This is further proved by the fact that he was restored to his throne by a Hun King Pravarasena II of Kashmir. The pursuit of a pro-Hun policy by Śīlāditya would explain, in my opinion, the cause of estrangement between him and his brother-in-law Prabhākaravardhana.

⁹ Rama Shankar Tripathi: Early Position of Harṣa, Malaviya Commemoration Volume, p. 265.

appointed to attend upon the sons of Prabhākaravardhana. This trend of events is indicated by the following passage from *the Harshacharita* of Bāṇa :—

परीक्षितौ शुची विनीतौ विक्रान्तावभिरूपौ मालवराजपुत्रौ भ्रातरौ.....
कुमारगुप्तमाधवगुप्तावस्माभिर्भवतोरनुचरत्वार्थमिमौ निर्दिष्टौ ।

“ I (Prabhākaravardhana) have appointed these two princes, the brothers Kumāragupta and Mādhavagupta, sons of the King of Mālava, who have been tested, who are pure, modest, spirited and goodlooking, *to attend upon you.*”

Both the princes are then brought in. The scene of their entrance is thus described by Bāṇa :—

प्रविश्य च दूरादेव चतुर्भिरङ्गैरुत्तमाङ्गेन च गां स्पृशन्तौ नमश्चक्रतुः ।
स्निग्धनरेन्द्रदृष्टिनिर्दिष्टामुचितां भूमिं भेजाते । मुहूर्तं च स्थित्वा भूपतिरादिदेश
तौ—‘अद्यप्रभृति भवद्भ्यां कुमारावनुवर्तनीयौ’ इति । ‘यथाज्ञापयति देवः’
इति मेदिनीदोलायमानमौलिभ्यामुत्थाय राज्यवर्धनहर्षो प्रणेमतुः ।...तत-
श्चारभ्य.....सततपार्श्ववर्तिनौ कुमारयोस्तौ बभूवतुः ।

—Ch. IV, p. 155.

“ Having entered, they saluted from afar,—their four limbs and head touching the ground. They took their seats in a proper place indicated by a kindly glance from the king. After a short while, the king gave them instructions, ‘ From to-day, you should both attend on the princes.’ ‘ As Your Majesty commands,’ they said, and rising saluted Rājyavardhana and Harsha, with their crowns swinging on the ground . . . From that day . . . they both became constant companions of the princes.”

From this description of Bāṇa, it is clear that Prabhākaravardhana must have subdued the Gupta King of Mālava, who was compelled to surrender his two sons to serve as attendants on the princes. But the spirit of the Mālava king was not broken. When Prabhākara-
vardhana fell seriously ill, the Gupta king of Mālava attacked Kannauj, seized and slew Grahavarman, son-in-

law of Prabhākaravardhana and imprisoned his daughter Rājyaśrī. Bāṇa's words may again be quoted :—

‘देव...यस्मिन्नहन्यवनिपतिरुपरत इत्यभूद् वार्ता तस्मिन्नेव देवो ग्रहवर्मा
दुरात्मना मालवराजेन जीवलोकमात्मनः सुकृतेन सह त्याजितः । भर्तृदारिकापि
राज्यश्रीः कालायसनिगडयुगलचुम्बितचरणा चौराङ्गनेव संयता कान्यकुब्जे
कारायां निक्षिप्ता । किंवदन्ती च यथा किलानायकं साधनं मत्वा जिघृक्षुः
सुदुर्मतिरेतामपि भुवमाजिगमिषति । इति विज्ञापिते प्रभुः प्रभवतीति’ ।

—Ch. VI, p. 204.

“ ‘ Your Majesty . . . on the very day on which the rumour that the king is dead spread about, H. M. Grahavarman was cut off from the world of the living along with his noble deeds by the wicked king of Mālava. The princess Rājyaśrī with her feet kissed by a pair of black iron fetters was thrown in the prison at Kānyakubja, confined like a common brigand's wife. It is also said that the wicked king is about to invade this land as well, as he is desirous of seizing it and he imagines the army to be without a leader at the moment. This is what I have to report. The matter now rests with your majesty.’ ”

On hearing the report of this dreadful calamity, Rājyavardhana immediately marched against the king of Mālava and took a terrible revenge. The king of Mālava was probably slain as nothing further is heard of him. His kingdom seems to have been annexed. His treasury and other paraphernalia were forfeited. Although Rājyavardhana routed the Mālava army without any difficulty he was treacherously slain by the king of Gauda, an ally of the Mālava king. But the death of Rājyavardhana did not make any difference as far as Mālava was concerned. Harsha later on received all the wealth of the Mālava King through Bhaṇḍi, who followed Rājyavardhana against Mālava. Bāṇa states :—

कदाचित्तु राज्यवर्धनभुजबलोपार्जितमशेषं मालवराजसाधनमादायागतं
समीप एवावासितं लेखहारकाद् भण्डिमशृणोत् —Ch. VII, p. 252.

“ Once he (Harsha) heard from messengers that Bhaṇḍi

who had arrived and brought with him all the wealth of the Mālava King, acquired, through the strength of arms, by Rājyavardhana—was encamped not far off.”

On the following day Harsha inspected the treasures brought by Bhaṇḍi. Among other things, there were (1) thousands of elephants अनेकसहस्रसंख्याकान्करिणः (2) horses as swift as antelopes हरिणरंहसो हरीन् (3) wonderful ornaments अलंकाराणां विशेषान् (4) pearl necklaces तारान् हारान् (5) yaktail chowries बालव्यजनानि (6) a white umbrella श्वेतातपत्रम् (7) beautiful women वारविलासिनीः (8) royal paraphernalia like lion-thrones, couches, *etc.*, सिंहासन-शयनासंदीप्रभृतीनि राज्योपकरणानि (9) all the followers of the Mālava King with their feet restrained with iron fetters, (10) and chests of treasure laden with heaps of precious stones with their numbers recorded on documents अशेषांश्च ससंख्यालेख्यपत्रान् सालंकारापीडपीडान् कोषकलशान्—Ch. VII, p. 254.

Having inspected the booty, King Harsha ordered his officers to take charge of the property according to their respective functions.

अथालोच्य तत्सर्वमवनिपालः स्वीकर्तुं यथाधिकारमादिक्षदध्यक्षान् !

This shows that the Mālava King was completely crushed. Bāṇa nowhere mentions the name of the Mālava King but states that he was a Gupta :

स पुनरवादीत् ‘देव देवभूयंगते देवे राज्यवर्धने गुप्तनाम्ना च गृहीते कुशस्थले देवी राज्यश्रीः परिभ्रश्य बन्धनाद्विन्ध्याटवीं सपरिवारा प्रविष्टा’ इति ।

—Ch. VII, p. 253.

“ He spoke again, ‘ Sire, when H. M. Rājyavardhana had attained the state of the celestial, and Kuśasthala (*i.e.*, Kannauj) was captured by a person named *Gupta*, Queen Rājyaśrī escaped from imprisonment and entered, with her retinue, the Vindhya forest.’ ” Bāṇa probably felt too great a contempt for the Mālava King to mention his name. But his name has been recorded in the Madhuban

Copper Plate inscription¹⁰ of Harsha in the following verse :—

राजानो युधि दुष्टवाजिन इव श्रीदेवगुप्तादयः
कृत्वा येन कशाप्रहारविमुखा सर्वे समं संयताः ।
उत्खाय द्विषतो विजित्य वसुधां कृत्वा प्रजानां प्रियं
प्राणानुष्मितवानरातिभवने सत्यानुरोधेन यः ॥

“ By whom, all kings like Devagupta and others were vanquished with downcast faces in battle, like wicked horses with a stroke of whip, who after uprooting his enemies, conquering the earth and doing what was agreeable to his subjects, gave up his life in the mansion of his foe, through adherence to truth.”

Rājyavardhana engaged, during his life, in two battles only. In early youth he was sent by his father against the Huns. This is described by Bāṇa in the following words :—

अथ कदाचिद्राजा राज्यवर्धनं कवचहरमाहूय हूणान्हन्तुं हरिणानिव
हरिर्हरिणेशकिशोरमपरिमितबलानुयातं चिरंतनैरमात्यैरनुरक्तैश्च महासामन्तैः
कृत्वा सामिसरमुत्तरापथं प्राहिणोत् । —Ch. V, p. 166.

“ Now once upon a time, the king summoned Rājyavardhana who wore an armour and sent him to the North to slay the Hunas as a lion sends his whelp to kill deer. He was followed by a great force and attended upon by experienced counsellors and devoted great feudal barons.”

Immediately after his return from the campaign of the North, Rājyavardhana had to march on a punitive expedition against the King of Mālava. Soon after his conquest of Mālava, he was treacherously killed by the Gauda King. So Devagupta, mentioned in the Madhuban copper plate as having been vanquished by Rājyavardhana must be the King of Mālava. After the absolute victory of Rājyavardhana, the whole army and treasure of the Mālava King was forfeited to Harsha.

¹⁰ Ep. Ind. Vol. I, p. 75

The line of rulers of Eastern Mālava came to an end about 606 A.D. When Hiuen Tsang visited Eastern Mālava in 641 A.D., the state was then administered by Brāhmaṇa officers of Harsha. Thus there could be no Vikramāditya in Eastern Mālava in 638 A.D.

If we accept the statement of Harisvāmin as recorded in the verse quoted above, we are confronted with a dilemma. We are asked to believe in the existence of a Vikramāditya in Mālava in 638 A.D. which as detailed above is out of question. The only solution of the difficulty is to emend the text of the verse so as to make Harisvāmin a contemporary of Yaśodharman, who can be the only person to be appropriately identified with the patron of the commentator of the *Śatapatha Brāhmaṇa*. If Harisvāmin composed his commentary in 538 A.D., then Skandasvāmin, his teacher, can be assigned with justice to the end of the 5th century or the beginning of the 6th century A.D.¹¹

PARASMAIPADA AND ĀTMANEPADA

IRACH J. S. TARAPOREWALA, B.A., PH.D.,

Principal, M. F. Cama Athornan Institute, Andheri.

In the ancient I.E. languages the verbal conjugation is clearly distinguishable into two main groups known to Sanskrit grammarians as *Parasmaipada* and *Ātmanepada* and to the western scholars as the Active and the Middle Voice respectively. With all the connotations implied from our English Grammar the term “voice” seems rather misleading, whereas the Sanskrit terms are quite clear and the meaning, too, is defined by these names quite exactly. The distinction between the two is rather subtle. *Parasmaipada* is “the *pada* for another.” When the action done is reflected back upon some one other than the doer thereof, the verb should be *parasmaipada*. When it is reflected back upon the doer himself, then the verb is in the *ātmanepada*—“the *pada* for one-self.” These are the basic senses of these two forms, and in older forms of the I.E. languages we see the distinction between the two strictly observed. In many cases the *pada* is determined by the very meaning of the root itself: thus रम् (‘to sport’), लभ् (‘to gain’), अश् (‘to extend’) ईश् (‘to be master’) are obviously *ātmanepada*; so also मृ (‘to die’) and डी (‘to fly’). In Latin the so-called “deponent verbs” are relics of an *ātmanepada* conjugation. These are defined in Latin grammars as “verbs with passive personal endings and a reflexive or active meaning.” Such are *morior* (‘to die’), *queror* (‘to complain’), *patior* (‘to suffer’), *potior* (‘to be master of’), *mīror* (‘to wonder’), etc. The *ātmanepada* endings are preserved in the Latin passive

alone and so the original true *ātmanepada* verbs that have survived in the language have been classified as these irregular “deponents.”¹ In Greek this distinction between the two *padas* is very carefully observed in the earlier writings and even in the later period the active and the middle senses are clearly indicated in Greek.² In the Avesta, too, the distinction between *parasmaipada* and *ātmanepada* is very clear and in the metrical portion at least (*i.e.*, in the *Gāthās* and in the *Yāsts*) has been carefully observed.

An extended use of the *ātmanepada* is when there is some advantage accruing to the doer of the action. A good example is the root यज् (‘to worship’) and its present participle यजमान, which are found in all stages of the Sanskrit language. Instances of the use of this root in the *parasmaipada* are also common in the Vedas. Another noteworthy instance of this sort of “*ātmanepada* of advantage” is from the *Bhagavad-Gītā* (xvi. 18)—असौ मया हतः शत्रुर्हनिष्ये चापरानपि. Here the root हन् (‘to kill’), usually *parasmaipada*, has been used deliberately in the *ātmanepada* in order to imply the advantage that would accrue by the slaying of the enemy.³ क्षि (‘to rule’), वृ (‘to choose,’ Av. *rara*) are also *ātmanepada* for the same reason, *viz.*, that some advantage accrues to the doer of the action.

In the passive voice the verb is always *ātmanepada* in all the I.E. languages which have preserved the double set of endings. This is but natural, for even if the verb is originally *parasmaipada* (*i.e.*, the action is reflected back upon the object of the verb), in the passive construction

¹ George M. Lane, *A Latin Grammar*, §§725, 798 and 1486 ff.

² See Pharr, *Homeric Greek*, §§1037-1068.

³ It cannot be contended that the *ātmanepada* has been used for metrical reasons, because it is equally easy to have हनिष्याम्यपरानपि.

the object becomes the grammatical subject of the verb and hence necessarily demands *ātmanepada* endings.

The main idea of the *ātmanepada* seems to be to emphasize the doer of the action, and hence that part of the finite form which implies the doer is emphasised or stressed. In other words, in the *ātmanepada*, the ending (प्रत्यय) gets the accent. If we compare some of the *parasmaipada* endings with the corresponding *ātmanepada* ones, we find the latter have the fuller or the stronger grade. Thus -सि and -से, -ति and -ते (Gāṭh. Āv. -ā and -e), -मस् (Av. -mo) and -महे (Av. -maide), -अन्ति and -अन्ते; and in Greek -μι and -μαι, -τι and -ται, -μεν and -μεθα (-μεθα) etc. The so-called “ strong ” and “ weak ” bases in certain of the Sanskrit conjugations in the Present system depend upon this fact. The difference between चिनोति and चिनुते is just this that in the latter the actor is emphasised and hence the accent falling on the ending gives us the strong form -ते.

HEMANTASIŚIRAU AND AHORĀTRE (Pāṇ. II. 4. 28)

DR. P. THIEME,
University of Breslau.

The Veda knows six seasons of the year : *grīṣmāḥ* ' Summer,' *varṣāṇi* (or *varṣāḥ*) ' rains,' ' *śarād*, ' autumn,' *hemantāḥ* ' winter,' *śiśirāḥ* ' early spring ' and *vasantāḥ* ' spring ' (A.V. xii. 1. 36). Sometimes their number is only five, *hemanta* and *śiśira* being taken as one : *pañcātaro hemantaśiśirayoḥ samāsenā*, Ait. Br. I. 1. In this case, the name of the fifth season is *hemantaśiśirāu* (T.S. I. 6. 2. 3; IV. 3. 3. 2; V.S. X. 14; K.S. XXXIX. 7.; M. S. II. 7. 20).

According to Pāṇini II. 4. 28, *hemantaśiśirār ahorātre ca cchandasi*, this form is used in the Veda (*chandasi*), from which we must infer that he did not recognize it as a correct form in his own language (*bhāṣā*). Pāṇini did not say *hemantaśiśirau*, although it is to be found in later writers again (cp. BR., Rāj. Tar. IV. 401). He must have said either *hemantaśiśire* in the dual, or—which is more likely—*hemantaśiśiram* in the singular. He knew *śiśira* as a neuter and therefore was of opinion that in Vedic *hemantaśiśirau* the gender of the first member of the compound prevailed. As the Kāśikā remarks, his rule is a *paracallīṅgāparādaḥ*, the word *pūrravat* being in force from Pāṇ. II. 4. 27.

Now *śiśira* is masculine in AV. VI. 55. 2, XII. 1. 36 and in ŚB. II. 1. 3. 1, etc. J. Wackernagel in his *Altindische Grammatik* has therefore not accepted Pāṇini's teaching (II. 1. §15a, note). And apparently he is right : *hemantaśiśirau* is formed of *hemantā-* m. + *śiśira-* m. But his statement that *śiśira* is a neuter only in classical Sanskrit is not quite accurate. There was a

reason for Pāṇini to teach *hemantaśīśirau* the way he did. In the Black Yajurveda with which he was very familiar, as we know from L. V. Schroeder's editions of the MS. and the KS.,¹ *śīśira* is a neuter. It occurs as such in MS. IV. 9. 18 *śīśiram pratiṣṭhānam (yajuh)*; KS. VIII, 1, 6; MS. I. 8. 2 *ātha śīśiram asṛjyata tasmād etād ṛtūn m āsūntam krūrām*; KS. VI. 2, XXXIV. 9 (*brāhmaṇa*); and in a *re* quoted by Yāska, Nir. I. 10, *śīśiram jīvanāya kām*.² Yet the dvandva is formed in all the Saṁhitās alike: *hemanta-śīśirau* (cf. passages given above).

The second part of Pāṇini's rule '*ahorātre*' is really an exception to the following prescription, according to which, *rātra-* in the end of a dvandva or tatpuruṣa (cf. II. 4. 26) takes masculine endings. *Ahorātre* (since AV) and its plural *ahorātrāṇi* (since RV X. 190. 2) are current Vedic forms. Again we must infer from Pāṇini's rule that he did not know or recognise these forms in his own language, though they may occur in later writers (cf. BR. Pañcatantra, I. v. 329, *ahorātrāṇi*).

But he knew *ahorātra* as a word of the spoken language. Although he omits to teach the form in which *ahan* appears before *rātra* (cp. vārt. 1. on Pāṇ VIII. 2. 38), he has taught *rātra* for *rātri* after *āhaḥ* in V. 4. 87 and makes use of the stem in his work several times: II. 1. 45 *ktenūhorātrārcayarāḥ*, III. 3. 137 *kālacibhāge cānahorātrāṇām*, VI. 2. 33 *paripratyupāpā rarjyamānāhorātrārcayareṣu*.

None of these passages is characteristic as to the gender. But since Pāṇini explicitly confines the neuter gender of the dvandva to the Veda, there can be no doubt

¹ Cf. particularly L. V. Schroeder's MS., page xiv ff. and Z. P. M. G. XXXIII, p. 194 ff.

² Note the accent *śīśiram* in all the accented passages, MS. I. 8. 2, IV. 9. 18, Nir. I. 10. *Śīśiram* corresponds to *śīśirāḥ* as *rākṣaḥ* n. to *rakṣāḥ* m., *kāraṇam* n. 'act' to *karāṇā* 'active' (cf. Macdonell, Vedic Grammar, §86).

that he used *ahorātra* as a masculine, in accordance with his rule II. 4. 29.

Ahorātra as a masculine occurs in Patañjali's Mahābhāṣya in the singular : Patañjali on vārt. on Pāṇ. VIII. 2. 68 and on Pāṇ. IV. 2. 4, where he defines Pāṇini's rule *nakṣatreṇa yuktah kālāḥ* (IV. 2. 3) in the following way *kaḥ panaḥ kālo nakṣatreṇa yujyate? ahorātrah*.

The plural *ahorātrāḥ* is easier traced. It occurs, for example, in *mantras* given in younger Vedic texts : ŚG. III. 15. 5 *ahorātrās ca saṁdhijāḥ*, T. A. X. 1. 2 *ahorātrās ca sarcaśaḥ*; VS. XXVII. 45, ŚB. VIII. 1. 4. 8, have *ahorātrās te kalpantām* instead of KS. XXXX. 6, TA. IV. 19. 1, *ahorātrāṇi te kalpantām* (cp. Bloomfield's Concordance). Furthermore we read in AV. IV. 35. 4

Yāsmān māsā nīrmitās trīmśādarūḥ saṁratsaró yāsmān nīrmito dvādaśārah.

ahorātrā³ yām pariyānto nāpīs ténaudanénālitārāṇi mṛtyām.

Pāṇini's explanation for the gender of *ahorātre*, *ahorātrāṇi* holds good. Other examples for dvandva-compounds in the dual taking the gender of the first member are *aścaraḍaranau* (Pāṇ. II. 4. 27) and Vedic *ukthūrkhā n.*, *ukthamadāni*, *ukṣaraśáu*, *dīkṣūtapāsī* (Wackernagel, *op. cit.*, §15a).

Ahorātrah on the other hand presents difficulties. A dvandva in the singular is regularly a neuter. As we have *aścaraḍaram* besides *aścaraḍaranau* (Pāṇ. II. 4. 12) or classical *varṣāśaradam* for Vedic *varṣāśarādanu*, classical *sūdrāryam* for Vedic *sūdrāryānu* (Wackernagel, *op. cit.*, §69c), we expect *ahorātram* for Vedic *ahorātré*. And we are not to be quite disappointed, for we find actually *ahorātram* in Mānava Dharmaśāstra I. 64, where it is

³ Whatever may be the reading of the Padapāṭha, *pariyānto* shows clearly enough that *ahorātrā* is sandhi form for *ahorātrāḥ* and not a neuter plural in ā.

defined as consisting of 30 muhūrtas, *i.e.*, as the solar day. In I. 65 we meet with *ahorātre*—but it does not mean ‘day and night’ as in the Veda, it is the dual of *ahorātram* signifying ‘two (kinds of) solar days,’ namely the human and the divine day: *ahorātre ribhajate sūryo mānuṣadairike*.

The form considered correct by Pāṇini (II. 4. 29) and used by Patañjali, *viz.*, *ahorātrah*, is obviously later than *ahorātrāḥ* and fashioned on this plural. First, *ahorātrah* seems to have replaced *ahorātrāṇi*. What was the reason?

I think we may guess it from the quoted AV. passages. Here the days (*ahorātrāḥ*, m.) are named together with the year (*saṁratsarah*, m.) and the months (*māsāḥ*, m.). Other parts of the year often mentioned together with the months and days are the seasons (*ṛtārah*, m.) and the half-months (*ardhamāsāḥ*, m.). They are all masculine and have apparently drawn *ahorātrāṇi* into their analogy. *Ahorātrāḥ* means the full solar days, each consisting of day and night; they are the smallest of the regularly and continually repeating parts of the year. Later on *ahorātrāḥ* must have caused the formation of a singular *ahorātrah*. But the process does not seem to have finished with this.

The parts of the full day—the *ahorātrārayacāḥ* (Pāṇ. II. 1. 45, VI. 2. 33)—*pūrcarātra*, *apararātra*, *pūrrāhṇa*, *aparāhṇa*, *mudhyāhna*, *etc.*, and the time-units *dryaha* ‘time of two days,’ *etc.*,⁴ which appear in Vedic texts only in certain adverbial cases as *pūrrāhṇe*, *sāyāhnāt* (Wacker-

⁴ According to the vārtika of the Siddhāntakaumudī “*Samkhyā-pūrrāṇi rātrāṇi klībam*,” *dvirātra*, *trirātra*, *etc.*, form an exception. But the Kāśikā has *dvirātrah*, *etc.* In Patañjali (on vārt. 1 on Pāṇ. I. 4. 48) only *trirātra* occurs, and this only once, and in the accusative, so that a decision is not possible. In Bhāṣya II. p. 162. l. 2. f. *trīṣad-rātrah*, *pañcadaśarātrah*, we find the masculine used.

nagel, *op. cit.* §49*b*), are all masculine. Wackernagel says ‘ for unknown reason ’ (15*c*), but I think we cannot be very wrong, if we believe that they have followed *ahorātrah* as *ahorātrah* has followed *māsah*, etc. The result was that Pāṇini could teach : (*dvandvataṭpuruṣayoh* II. 4. 26) *rātrāhnūhāḥ puṁsi* II. 4. 30. He has, however, to be censured : classical *sudināha*, Vedic *puṇyāhá* are *neuters*, as remarks vārt. I on Pāṇ. II. 4. 30 and so is *bhadrāhá*, AV. VI. 128. 1ff. As these words did not designate days in their strictly temporal aspect, *i.e.*, as units of time, they were removed from the influence of *ahorātrah*, etc.

OTTOROKORRHA

PROFESSOR F. W. THOMAS,

Boden Professor of Sanskrit, University of Oxford.

There is nothing new to be said concerning the Utarakurus. The allusions to this people in Sanskrit literature were quite sufficiently examined long ago by Lassen in an article published in the *Zeitschrift für die Kunde des Morgenlandes* (II, pp. 62 sqq.) and in his *Indische Alterthumskunde* (1847) I, pp. 511 sqq., 846 sqq. (= 1861, I, pp. 612-3, 1018). The early references were also examined by Muir in his *Sanskrit Texts*, Vol. II, pp. 332 sqq., and summaries of the information are given in Zimmer's *Altindisches Leben*, pp. 101-2, and by Professor Berriedale Keith in the *Vedic Index* (I, p. 84) and in the *Cambridge History of India* (I, pp. 118-9, 121). A real country being clearly contemplated in the earliest notices (*Aitareya-Brāhmaṇa*, VIII, 14 and 23), which speak of the people as *pareṇa Himacantam*, 'beyond the Himālaya,' these authorities are inclined to identify their country with Kashmir.

The Pali *Vinaya-piṭaka* (Mahāvagga, I, 19, Pārājika, I, 2) mentions the Uttara-Kuru country, with its *Anotatta-daha* (= Sanskrit *Anaratapta-hrada*), as a region which conceivably might be visited. But generally in the later literature the two appear only in connection with the schematistic geographical system which places the Uttara-Kurus, as the northern continent, to the north of Himavat and south of Gandhamādana. Concerning this geographical system, which in its main features was common to Brāhmanical, Jaina, and Buddhist beliefs and which rules exclusively in the Purāṇic and later (including Tibetan, etc.) literature, it is sufficient to refer to

Professor Kirfel's *Kosmographie der Inder* (see Index). According to this system the Anavatapta lake is identified with *Mānasa-saro-rara*; and from its northern side issues the river Sītā or Śītā, which flows out into the north-eastern ocean. The identification of this river, which is named in the *Mahā-Bhārata* (see Sørensen's Index), with the Tārīm of Chinese Turkestan (including, no doubt, its affluent, the Zarafshan or Yarkand river), appears very plainly in Huiian-tsang's account (see Beal, *Buddhist Records of the Western World*, I, pp. 12-3 and notes, and Stein, *Ancient Khotan*, pp. 27, 35). This may, however, not have been the original association, since the name of the river was attached at one period to the Jaxartes, or Syr-daryā, which still retains it (J.R.A.S. 1906, p. 202). The Sītā (in Ktesias *Sida*, in the later Greek writers *Silias* or *Sillas*) was a legendary stream, having light water whereon all objects (according to the *Mahā-Bhārata*, XII, 82, 3699, even boats) refused to float. The paradisiacal conception of the Uttara-Kuru realm, including as one notable feature a marked freedom of women, is vividly expounded in the *Mahā-Bhārata* (VI, 6, XIII. 57), and the *Rāmāyaṇa* (IV, 44, 81 sqq.).

Concerning Ptolemy's *Ottorokorrha(s)* mountain (and city) and *Ottorokorrhai* people also nearly all that is necessary has been stated by Lassen (loc. cit.) and Vivien de Saint-Martin (*Étude sur la Géographie Grecque et Latine de l'Inde*, pp. 425 sqq.) and reproduced by McCrindle in the notes to his translation of Ptolemy, pp. 298 sqq. It is pointed out that Ptolemy in his account (VI. 16) of Serike records the Ottorokorrhai as a real people settled in the south of Chinese Turkestan, along the Hemodos and the Chinese mountains, and that for their town Ottorokorrha he gives according to his system a definite longitude and latitude, which locates them between Khotan on the west and Thogara (in Kan-su) on the east.

Moreover, he places in the mountains of the Ottorokorrha country one of the sources of the river Bautisos, *i.e.*, the Cer-cen river. Ptolemy's date was about 180 A.D., and his information goes back to about 100 A.D., being derived from the work of Marinus of Tyre, who used the reports of the trade-agents of a merchant Maes travelling in Chinese Turkestan (A. Herrmann, *Die alten Seidenstrassen zwischen China und Syrien*, 1910, pp. 18-19). Since, however, the name *Ottorokorrha* is certainly the reflexion of the Indian *Uttara-kuru*, which is many centuries older, it is evident, as was remarked by Vivien de Saint-Martin, p. 414, that among the agents or informants of Maes there had been an Indian intermediary.

Now that more is known of the Himālayan countries and of Chinese Turkestan it would no longer be absurd to suppose that even the Vedic Indians had received, say through the Bactrians or through the Dards, some vague reports of peoples in Chinese Turkestan. But evidently it was in the course of a first real acquaintance with the country, at the time of the Buddhist propaganda in the first century A.D., that Indians found there a region to which they applied the old familiar designation *Uttara-Kuru*. What circumstance led to this identification? And why have we no hint of it in at least the Buddhist literature of later times, when the country had become familiarly known to pilgrims and resident communities? As has been observed by M. Sylvain Lévi (*Bulletin de l'École Française d'Extrême-Orient*, IV, pp. 558 sqq., V, pp. 253 sqq.), some of that literature is acquainted with cities and peoples in Chinese Turkestan and centres in that region. Perhaps the penchant, nowhere stronger than among Indians and Central-Asians, for etymologizing names may supply an answer to these questions. In the eastern part of Chinese Turkestan, between the Cer-cen river and Lop-nor on the north and the mountains

on the south, lay the kingdom originally known to the Chinese as Lou-lan, which name has been shown (Stein *Serindia*, pp. 415-6) to represent a form *Krora* or *Korara*, applied in the Kharoṣṭhī documents to people of the Shan-shan kingdom : the district in which lay their capital town Yü-ni was called *Krorayina*. It seems quite likely that this name, possibly in connection with some social feature, such as the relatively notable freedom of women in the country, may have suggested the application of the name *Uttara-Kuru*.

Why is it, then, that no trace of such Central-Asian *Uttara-Kurus* transpires in the Sanskrit literature, whether Brāhmanical or Buddhist? Perhaps this was a result of increased knowledge of Central Asia, which must have resulted from the travels of pilgrims and traders during the period of Kushan rule in India and from the establishment of an Indian administrative system and language in Shan-shan itself. In the course of the second century A.D. the old kingdom of Lou-lan became finally merged in the enlarged state known to the Chinese as Shan-shan (the name of Lou-lan, indeed was changed by the Chinese at an earlier date in the first century B.C.) : in the Kharoṣṭhī documents the *Korara* people and the town *Krorayina* appear only as elements in the enlarged state. Accordingly the original idea of a people identical with the legendary *Uttara-Kurus* may have lapsed for want of a basis : just as the old fable connecting Britain with the Roman Brutus failed to maintain itself in the country known as England.

The certainty (for such it is) of an Indian intermediary for one item of Ptolemy's information suggests a question concerning the name of the Cer-cen river, which he gives as *Bautisos* (elsewhere it is *Bautes*) and which the Chinese give as *A-nou-ta* (Stein, *Serindia*, p. 297). Elsewhere (*Acta Orientalia*, XII, p. 58, XIII, p. 44) we

have suggested that the Greek form was originally *Nabautes* and identical with both the Chinese and a name *Narote* occurring in the Kharoṣṭhī documents from Chinese Turkestan. Now the same Chinese characters are used (Rosenberg, *A Study of Buddhism*, p. 484, Col. 3) to represent the name of the great Nāga-king of Indian mythology, Sanskrit *Anaratapta*, Pali *Anotatta*: and this suggests that in the native name of the river the etymologizing Indians had found a reflex of that old Nāga designation. Upon reflection indeed the thing will seem to have been inevitable, once the Korara country had been identified with the realm of the Uttara-Kurus, associated from time immemorial with the Anavatapta, or Anotatta, lake and its Nāga divinity: that the latter was known to the Buddhists of Central Asia might have been confidently assumed, even if he were not several times mentioned in the local records of Khotan.

EVOLUTION OF THE MYTH OF AHALYĀ MAITREYĪ

DHIRENDRA VARMA, M.A., D.LITT.,

Reader in Hindi, University of Allahabad.

The earliest reference to the story of Ahalyā occurs in the Brāhmaṇas¹. At one place in the Satapatha Brāhmaṇa, Indra has been given the epithet 'the paramour of Ahalyā' (*Ahalgāyai jārah*, iii. 3. 4, 18). While explaining the above epithet, the Śaḍviṃśa Brāhmaṇa (i. 1) clearly says that Indra was the paramour of Ahalyā-Maitreyī. A similar reference is found in the Jaiminiya Brāhmaṇa also (ii, 79), but no details about this well-known story have been given in any of the Brāhmaṇas nor do we come across any reference to the curse of Gautama and the deliverance from it by Rāma.

The first detailed version of the story of Ahalyā is found in the Rāmāyaṇa of Vālmīki (Bālakāṇḍa, Sargas 48-49).² The story as it is related in this first Sanskrit Kāvya by Viśvāmitra to Rāma has been summarised below :³

“ This asylum formerly belonged to Gautama, and here in days of yore Gautama in company with Ahalyā carried on austerities. Perceiving occasion, Śachī's Lord, assuming the form of that ascetic approached Ahalyā. Out of curiosity that one of perverse understanding consented to the proposals of the chief of celestials. When after the meeting, Indra was about to leave

¹ Macdonell and Keith: Vedic Index, 'Ahalyā Maitreyī.'

² In his well-known Hindi book *Shri Gōsvāmi Tulsīdās jī kā Jīvancharita* (Bankipur, 1916, pp. 404-405), Babu Shiv Nandan Sahai has drawn attention to the references to the story of Ahalyā found in the post-Vedic Sanskrit literature.

³ The summary is based on the English translation of the epic by M. N. Dutt, Calcutta, 1892.

the cottage he saw Gautama returning. Seeing the wicked thousand-eyed deity in the guise of an ascetic, the anchorite, fired with rage, said—‘ And since assuming my form thou hast done this foul deed, thou shalt lose thy scrotum.’ Gautama cursed his wife also—‘ For a thousand years thou shalt live here feeding upon air, without food, tormented with repentance *and thou shalt remain in this hermitage unseen of any (adrśyā sarvabhūtānām)*. And when the son of Daśāratha, Rāma, shall come to this wood, thou shalt be cleansed of thy sin and shall in thy own form regain my side.’ Having said this Gautama forsaking this hermitage, began to carry on penances on the summit of the Himavat (Sarga 48).’’

In the next Sarga, after describing in detail how Indra was given the scrotum of a ram by the gods, Viśvāmitra addressed Rāma—‘ Therefore do thou enter the hermitage and deliver the divine Ahalyā.’ “ On hearing this Rāma along with Lakṣmaṇa and Viśvāmitra, entered the asylum, and they beheld that magnificent dame flaming in ascetic energy, and incapable of being gazed at too near even by the celestials and the Asuras . . . And by virtue of Gautama’s word, *she had been incapable of being seen by any in the three worlds, till the sight of Rāma*. And now the curse having come to an end, she could be perceived by them. And the two descendants of Raghu then took hold of her feet; but remembering Gautama’s words she on her part took hold of theirs. And with a collected mind she extended unto them the rites of hospitality. Gautama also, happy on his union with Ahalyā, honored Rāma highly. And having duly received signal honors from the ascetic, Rāma set out for Mithilā.”

The next detailed but slightly evolved version of the story occurs in the Adhyātma Rāmāyaṇa which is said to be a part of the Brahmāṇḍa Purāṇa. Here are the relevant portions of the story as put in the mouth of Viśvā-

mitra in the Bālakāṇḍa, Sarga 5 of this Rāmāyaṇa.⁴ "There was a Ṛishi named Gautama who worshipped Hari through austerities. Unto him Brahmā gave in marriage his daughter Ahalyā. With her that great ascetic lived in this Āśrama. The god Indra was ever seeking for opportunity to overpower her. Once upon a time as Gautama had gone out he approached her in the guise of the Muni. Having visited her he forthwith came out. In the meantime the Muni also returned home. Seeing Indra coming out of his house disguised as himself the Muni got very angry and cursed the king of gods thus—'Attached as thou art to lust, o sinful wretch, do thou take thousand lustful forms.' He also cursed Ahalyā—'O vile wretch, do thou remain in my Āśrama *fixed on a slab of stone* (*Śilāyām . . . tiṣṭha.*) meditating with a single heart upon the supreme Lord Rāma. On the expiry of many thousands of years when the auspicious Rāma, the son of Daśaratha, shall visit this Āśrama with his brother and shall ride the stone upon which thou art fixed, thou shalt be purified from sin and worshipping Rāma with faith . . . be freed from this curse and shalt serve me happily as before.' Saying so Gautama went to the Himālaya. Since that time Ahalyā is sitting in this auspicious Āśrama, *unseen by all creatures* subsisting upon air and waiting for the touch of the dust of thy feet." After this is described the deliverance of Ahalyā which is followed by a long *stuti* of Rāma by Ahalyā in which she describes the efficacy of the dust of the feet of Rāma and in which she ultimately identifies him with the ancient Puruṣa. 'Having thus hymned Rāma, who was standing in front of her, having bowed and circumambulated him, Ahalyā went to her husband with Rāma's permission."

⁴ The summary is based on the English translation of the Adhyātma Rāmāyaṇa by Lala Baij Nath, Allahabad 1913.

Brief references to the story of Ahalyā are scattered throughout the Sanskrit literature dealing with Rāma. For instance Kālidāsa in the *Raghuvamśa* briefly refers to the story in two verses.⁵ The story is referred to in some of the *Purāṇas* also. For instance the version found in the *Padma Purāṇa*⁶ is similar to that found in the *Kāvya* of Kālidāsa⁷.

The latest evolved form of the legend of Ahalyā occurs in the Ramaite literature written in the modern Indo-Aryan languages. The description found in the *Rāma-carita-mānasa* (*Bālakāṇḍa*, Dohās 242-43 in the *Sabhā* edition) written by Gōsvāmī Tulsīdās (1575 A.D.) is representa-

ॐ तैः शिवेषु वसतिर्गताध्वभिः
सायमाश्रमत रुध्वगृह्यत ।
येषु दीर्घतपसः परिग्रहो
वासवक्ष्णकलत्रतां ययौ ॥
प्रत्यपद्यत चिराय यत्पुनश्
चारु गौतमवधूः शिलामयी ।
स्यं वपुः स किल किल्बिषच्छ्रुदां
रामपादरजसामनुग्रहः ॥

रघुवंश, सर्ग ११, श्लोक ३३-३४ ।

६ मुनयो रघुशार्दूलसहिताः पुण्यचेतसः ।
गच्छन्तस्तस्य रामस्य पादाब्जेन महात्मनः ॥१३३॥
अभूत्सा पावनीभूता समाक्रान्ता महाशिला ।
साऽपि शप्ता पुरा भर्त्रा गौतमेन द्विजन्मना ॥१३४॥
अहल्या रघुनाथस्य पादस्पर्शाच्छ्रुभाऽभवत् ।

पद्मपुराण, खण्ड ६, अध्याय २६९ ।

⁷ I am indebted to my learned colleague Pt. K. C. Chattōpādhyāya for drawing my attention towards the mention of the story of Ahalyā in the *Kāthāsaritsāgara*. The story occurs in Book III, Chapter XVII (For English translation see 'The Ocean of Story' by Tawney and Penzer, Vol. II, pp. 45, 46). According to this version of the story the curse of Gautama was as follows:— पापशीले, चिरं शिलाभावमवाप्नुहि आराधवलोकनादिति 'Harlot, take for a long time the nature of a stone until thou behold Rāma wandering in the forest.'

tive of this comparatively modern outlook. Here is the English version of the text as given by Growse.⁸ "On the way he (Rāma) spied a hermitage without bird, deer or any living creature near it, and observing a remarkable stone inquired of the saint about it, who in reply gave him the whole history—"Gautama's wife was by a curse turned into a hard rock, and is now longing for the dust of your lotus feet, O Raghubir, show mercy upon her." Then follows the deliverance of Ahalyā in whose mouth is put a long *stuti* in praise of the greatness of Rāma. "Thus full of jubilation, with oft-renewed prostration, did Gautama's long lost bride.

With the boon she most had craved, thus graciously

return to her husband's side."

Here are a few conclusions drawn from the important references to the story mentioned above.

(1) The earliest references, as found in the Brāhmaṇas, clearly show that the story of Ahalyā is based on mythology or religious allegory and not on any historical or even legendary account. The commentators have variously interpreted the original version of the allegory. Kumārila Bhaṭta in the *Sisāwara Prakaraṇa* of the *Tantra-vārtika* suggests that the sun, because of its great splendour, is called Indra, while night is called Ahalyā because it disappears during the daytime. Now because Indra in the form of the sun makes the night (Ahalyā) disappear hence he has been given the epithet *Ahalya-jura* and not because of any illicit connection with another's wife⁹.

⁸ Growse, F. S.: *The Rāmāyana of Tulsidas*, Vol. I, (Cawnpore, 1891, pp. 132, 133.

⁹ एव समस्तवेलाः परमैश्वर्यनिमित्तमेव दृश्यते इत्युक्तम् ।
रात्रौ हि दृश्यते इत्युक्तम् ।
वैश्वदेवस्यैव हि रात्रौ दृश्यते इत्युक्तम् ।
एवमेव रात्रौ दृश्यते इत्युक्तम् ।

(2) Another remarkable feature of the earliest version of the story is that references to the curse of Gautama and the deliverance of Ahalyā by Rāma do not occur here. The story was most probably modified later on by the devotees of Viṣṇu to show his greatness, particularly in contrast to the still popular Vedic god Indra.

(3) Vālmīki has given prominence to the misbehaviour of Indra but Ahalyā's conversion into a stone-slab on account of the curse of Gautama and her taking the original form by the touch of the dust of the feet of Rāma are not mentioned in the great epic. According to Vālmīki's version she was 'incapable of being seen by any in the three worlds till the sight of Rāma.' Further it is Rāma and Lakṣmaṇa who first touch the feet of Ahalyā. It is clear that the epic version of the story belongs to a period when the efficacy of the name or the dust of the feet of Rāma had not been established.

(4) The version of the Adhyātma Rāmāyaṇa represents an intermediate stage with reference to the curse of Gautama. Here Ahalyā is not changed into a stone but performs penance fixed on a stone-slab and when Rāma touches this stone-slab with his feet she is released from the effect of the curse. In this version we, for the first time, find a long eulogy of Nārāyaṇa who has taken the form of Rāma. The misdemeanour of Indra and the deliverance by the Rāma form of Viṣṇu both occur side by side.

(5) The modern version of the story as found in the Rāma-carita-mānasa is further modified to suit the tastes of a perfect devotee of Rāma. The pious-hearted Tulsīdas could not brook the narration of the fall of Ahalyā, even though by mistake. He merely makes a guarded reference to her earlier life. From Tulsīdās's point of view, the deliverance of the fallen lady by Rāma is of greater significance and he consequently narrates the story from this place. The conversion of Ahalyā into a

stone-slab and her resuming the original form through touch of the feet of Rāma's feet have, however, been clearly mentioned by Tulsīdās. The praise of Rāma by Ahalyā is the most prominent portion of the story in the Mānasa and here the influence of the Adhyātma Rāmāyaṇa is clearly traceable.

Thus we find that this famous legend of Ahalyā begins with Indra, the paramour of Ahalyā, and ultimately merges into the greatness of Rāma, the saviour of the fallen lady. The story is a fine specimen of the gradual evolution of a Brahmanic legend or allegory and its gradual adaptation by the devotees of Viṣṇu to serve their own purpose. It has a peculiar importance from both these points of view.

SYNTAX OF THE DATIVE CASE IN THE RĠVEDA

DR. SIDDHESHWAR VARMA, M.A., D.LITT.,

Professor of Sanskrit, Prince of Wales College, Jammu.

Speyer in his Vedische und Sanskrit Syntax (p. 13) points out that the Indo-germanic dative was from the very beginning a "To-and-for Case." The close relation of the Rġvedic dative to the verb. This observation, although generally correct, is incomplete, for it ignores another indispensable and dominating fact involved in the ancient conception of the dative—the part played by the *verb* in regulating its central notion. We are so accustomed to such phrases as "A box for the journey," "A book for study," that we cannot conceive that the dative of the ancient Indo-Germanic people was dominated by some action on the part of an Agent, an action (in the widest sense, including *being*) referring to a person in most cases, but also to things.

To consider this point let us consult the most ancient literary record of the Indo-Germanic people, *viz.*, the Rġveda. Thus 'agnāye' the dative form of the word *agni-* (which, in certain respects, is, perhaps, the most important word in the Rġveda) occurs 45 times in the Rġveda. In connection with these 45 forms not a single substantive occurs; with all these forms distinct verbs (a participle only in one case) have been used.

Again, 'jánāya' the dative form of the word *jāna-* occurs 30 times in the Rġveda. In connection with 26 of these dative forms distinct verbs have been used; while in connection with only four of these forms substantives and adjectives have been employed. That even these four substantives and adjectives are either *dim verbal* or *predi-*

cative forms or are connected therewith will be evident from a notice of all these four forms which I give as follows :—

(1) *sám jánāya*—“ Happiness to mankind ”: (Rg. IX, 11. 3.). Evidently here the word *bharatu* “may be” is understood and “ happiness ” is virtually connected with the verb.

(2) *jánāya jústah* (Rg. 9. 9. 2.): “ Pleased with the person (offering praise).”

(3) *jánāya jústam* (Rg. 1. 44. 4).

(4) *jánāyedañ surijñānām* (Rg. 7. 104. 12): “ (It is) easy for a knowing person.” The last three are evidently predicative forms.

Again, take *asmábhyam*, the dative plural form of *asmád-*. This form occurs 94 times in the Rgveda of which 89 forms are distinctly connected with verbs, and only on five occasions is the form connected with substantives and adjectives. That the same remark holds good of these latter will be evident from a notice of these forms as given below :—

(1) *sám asmábhyam astu* (Rg. 5. 47. 7): “ May happiness be to us.”

(2) *asmábhyam soma gāturit* (Rg. 9. 65. 13): “ Soma (be) a guide to us.”

(3) *asmábhyam (cartih) yātam* (Rg. 1. 117. 2): “ Come to our house.”

(4) *asmábhyam āpratishkutaḥ* (Rg. 1. 7. 6): “ Not disappointing us.”

(5) *asmábhyam gāturittamaḥ . . yāhi* (Rg. 9. 106. 6): “ Come, O our best guide.”

Except in (5) and (3) the dative though directly connected with substantives and adjectives is indirectly dominated by the verb,

The above mentioned forms of the dative are all illustrations of the dative of persons, and it remains to be seen whether the verb equally holds the position of a dominating factor of the dative of things in the Ṛgveda. Let me mention an example. The word *ūtáye* (dative of *ūtí-*, “protection”) occurs 83 times in the Ṛgveda; on 82 occasions it is entirely connected with verbs; it is connected with a substantive in a single case (Ṛg. 9. 66. 4).

Even in the above exceptional case where *ūtáye* is directly connected with a substantive, in the sentence “*párasca sákhībhya ūtáye*” (9. 66. 4.), “Come for protection to (your) friends,” the indirect connection with a verb is apparent. The dative in the Ṛgveda, then, indicates that some *action* is performed for a person or a thing.

In this connection the observation of D. B. Monro¹ (A Grammar of the Homeric Dialect, 143) is of some interest. “The true dative expresses the person to or for whom some thing is done, or who is regarded as chiefly affected or interested.” That some thing is done, or some one is affected, is apparent from the data of the Ṛgveda. But that the entity for which the action is done should be necessarily a person is contradicted by the material afforded by the Ṛgveda, where side by side with persons we find (as shown in *ūtáye* above) abstract things equally and copiously connected with verbal action. There are, then, no historical literary records in the Ṛgveda for Mr. Monro’s view, though ethnologically his view may be sound and may refer to pre-historic times.

These data amply substantiate the traditional view, upheld by ancient Indian Grammarians, and propounded by Pāṇini in 1. 4. 32 (*karmanā yam abhipraiti sa sampradānam*) “that which is intended by means of *action* is the

¹ Quoted by Prof. Giles in his Manual of Comparative Philology, second edition, p. 323.

dative," that some action is a necessary and governing element in the conception at least of the Ṛgvedic dative.

The further observation of Speyer (*Ibid.*, p. 13) that the dative of purpose and the dative of persons ("Receiver") were a later development out of the "To-and-for-Case" is merely conjectural and he does not adduce facts or data to support his view. On the other hand, from the material given above and to follow, it would be evident that there is copious evidence of both these so-called developed forms of the dative in all the chronological strata of the Ṛgveda. According to Speyer, who follows Roth, the dative signifying the objective of movement, the "Wohincasus," forms an earlier stage in the Ṛgveda, and the dative signifying the person as a receiver, or the dative of purpose is a later development. Facts, however, show that quite the reverse is the case. Let us take two typical cases. If we take two verbs, say *gam-* to go and *dā-* to give, the Ṛgveda ought to show copious evidence of the dative "Wohincasus" and comparatively scanty material for the dative of persons (the Receiver). But what are the facts? My calculation shows that the verb *gam-* in the Ṛgveda is connected with 54 case-forms, out of which only one (1. 106. 2 *āgata sarvātātaye*, "come to the battle") is dative and that too belongs to a portion which pertains to a later chronological stratum of the Ṛgveda. This is the only dative "Wohincasus" which the verb *gam-* gives to us in the later chronological strata of the Ṛgveda. Of the other 53 forms, 6 are locative and 47 are accusative. On the other hand, the verb *dā-* 'to give' in the Ṛgveda is connected with 115 case-forms out of which as many as 110 are dative, and of course signify without exception, the dative of persons. These data, then, amply show that the dative of persons is neither a rare occurrence in the Ṛgveda nor a later development, for it is copiously met with in all chrono-

logical strata of the Ṛgveda. It is the dative “Wohincasus” which is, comparatively speaking, so rare in the Ṛgveda.

That the verb holds a dominating position in relation to the dative, that the dative of persons is quite copious in the Ṛgveda and the “Wohincasus” dative is comparatively rare in our Veda can be established from another group of data which I give below :—

1. The accusative form *agnim* occurs 246 times in the Ṛgveda and is of course exclusively connected with verbs. Of these 246 verbs only 2 imply “to give.” I say *imply*, for even they do not directly signify “to give.” One of them *jāgrāmsah* (6. 1. 3.) literally means “awakened,” the other *pipṛtam* (6. 60. 12) literally means “fill.” The dative form *agnāye*, however, as already indicated above, occurs 45 times in the Ṛgveda, and is exclusively connected with verbs. Of these 45 verbs as many as 10 mean “to give” and only two mean “to go, flow, move, etc.” So it is the dative (of persons of course) and not the accusative which has monopolized the verb “to give,” while the “Wohincasus” dative occurs only twice.

Another interesting fact in this connection is the number of verbs meaning “to worship”; as many as 10 of these mean “to worship” and these also show another 10 forms of the dative of persons. In fact, deducting three forms, two connected with the verb “to go” or “to move” and one connected with the verb meaning “to be able to,” the remaining 42 forms of *agnāye* are datives of persons.

2. In the same way the word *jānāya* which is strictly a dative of person occurs thirty times in our Veda, and is connected with 26 verbs, only two of which mean “to go or move.” Another interesting fact in connection with *jānāya* is that as many as 10 verbs meaning “to make”

or “create” are connected with it. This further substantiates our view of the dominating position of action as expressed by the verb in relation to the dative case in the Ṛgveda.

The above facts will be clear from the following tables.

Number and meaning of verbs connected with the word *agnīm* in the Ṛgveda :—

To give	... 2	To increase	... 6
To praise	... 46	To urge	... 3
To worship, etc.	... 24	To reveal	... 1
To choose	... 12	To send	... 1*

From the results established in the above discussion it will not be surprising to note the striking feature of the dative case in the R̥gveda—the vast variety of verbs used in connection with it. Almost every shade of meaning represented by the verb can be traced in relation to the R̥gvedic dative. For arrangement's sake I shall classify verbs into four divisions, *viz.*, verbs signifying (a) Communication (in the widest sense), (b) Feeling, (c) Action, (d) Movement.

The vast variety of verbs used in connection with the dative.

A. Communication.

Verbs meaning “to give, to speak, to beg, to report, to open, to reveal, to bring, to carry, to send, *etc.*” will come under this heading. It will be noted that by them is intended a sort of contact or approachment between one entity (a person or a thing) and another expressed by the dative, generally a person.

(1) To give :—

It is the use of this verb to which the dative in Latin and in Sanskrit (*sampradāna*) owes its name. And although ancient Indian Grammarians in general hold the

essence of the dative to be an “intended object” (animate or inanimate), there have been Indian authorities according to whom the Dative essentially signifies “to give.” This was the opinion of the *vṛttikāra* of Pāṇini (as mentioned by Bhaṭṭoji Dīkshita in his *Śabdakaustubha*, p. 534), but the opinion was rejected by Patañjali who urged that in a sentence as *khaṇḍīkopādhyāyaḥ tasmai capeṭām dadāti*, “The angry teacher gives him a slap on the face,” we cannot reasonably assume that an actual giving is meant, and yet the dative (*tasmai*) is used here. The material offered by the Ṛgveda shows that although this use of the dative, as established above, belongs to the very oldest chronological strata of the Ṛgveda, it is by no means the decisively predominant meaning. Other verbs, as “to worship, praise, etc.” equally hold their own against this use in the Ṛgveda. The name dative or *sampradāna* was only symbolic or representative and did not cover the full import of the case. Of the various examples of the dative used in connection with the verb *dā-* “to give,” a couple of examples will suffice here:—

(a) *śunām asmābhyam ūtāye varuṇo mītró (a)ryamā yacchatu.*—Ṛg. X. 126. 7.

“May Varuṇa, Mitra and Aryaman give us happiness for (our) protection.”

Note the impersonal dative (*ūtāye*) in the sense of purpose and the dative of person (*asmābhyam*) in the same sentence.

(b) *yás túbhyam agne (a)mṛtāya dāśat.*—4. 2. 9.

“He, O Agni, who offers Thee, the Immortal One.”

(2) To give up, abandon:—

(a) *ayām agnirabhiśastāye no ná pārā dāt.*—5. 3. 12.

“May not this Agni abandon us to the (false) accuser,”

(b) *mā no (a)gné (a)vasrjo (a)ghāya.*—1. 189. 5.

“Do not, O Agni, abandon us to evil.”

(3) To subject or bring under subjection :—

(a) *mā no nide ca rāktare randhīh.*—7. 31. 5.

“Do not subject us to the accuser and the false speaker.”

(b) *mā no (a)gné (a)mataye mā (a)rāratāyai rīradhah.*

3. 16. 5.

“Do not expose us to folly or to cowardice.”

(4) To beg :—

(a) *īmahe (a)gnīm suritāya.*—3. 2. 13.

“We beg wealth of Agni.”

Note the impersonal dative used here. The thing begged is put in the dative, but the person begged of is put in the accusative. This is the general rule with this verb in the R̥gveda.

(b) *īmahe tām rāyé.*—1. 10. 6.

“We beg wealth of him.”

(5) To speak, to call :—

(a) *dyukshāya . . . ráco ghrītāt svādīyo mādhuṇaśca rocata.*—8. 24. 20.

“To bright Indra, speak words sweeter than honey and ghee.”

(b) *kathā áditaye pr̥cchyāmānah pratibrarah.*—

4. 3. 8.

“When questioned, how would you tell Aditi of my sins?”

(c) *ciśre (a)hranta derāh . . . indrāya.*—5. 29. 8.

“All the gods called Indra.”

(6) To listen :—

ó shú srasārah kārāre śṛṇota.—3. 33. 9.

“Listen attentively, O rivers, to the Yajamāna.”

(7) To report :—

(a) *kathā ha tād vāruṇāya tvām agne . . . garhase.*—4. 3. 5.

“ How would you report this, O Agni, to Varuṇa? ”

(b) *prā no mitrāya vāruṇāya voco (ā)nāgasah.*—7. 62. 2.

“ Report to Mitra and Varuṇa our innocence.”

(8) To praise, to sing :—

(a) *devāya śastim amṛtāya śamṣa.*—4. 3. 3.

“ Praise immortal God.”

(b) *prā . . . harmi stóman indrāya.*—1. 61. 1.

“ I offer praise to Indra.”

(c) *ápāsmāi gāyata narah.*—9. 11. 1.

“ Sing, O men, unto him.”

(9) To worship, salute, serve :—

(a) *kāsmāi devāya harishā ridhema.*—10. 121. 1.

“ Which God should we worship with oblations? ”

(b) *indrāya gātúruśatīca yeme.*—5. 32. 10.

“ The earth, like a loving wife, served Indra.”

(c) *nyāsmāi devī svādhitiṛ jihāte.*—5. 32. 10.

“ The Goddess Svadhiti bows low before him.”

(10) To open, reveal, shine :—

(a) *ápārṇor jyótirā ryāya.*—2. 11. 18.

“ Thou hast revealed the light to the Ārya.”

(b) *sādanam sám āsmāi māhi tvishāmat sūkṛto
vi hí khyān.*—3. 31. 12.

“ The Angirasas showed him the great bright home of blessed Indra.”

(c) Agnirāyāce śuśoca.—7. 4. 3.

“Agni shines unto man.”

(11) To sell :—

mahé pārū śulkāya deyām, ná sahasrāya nāyutāya.—

6. 1. 5.

“I would not sell it even at a very high price, not for a thousand, not even for ten thousand.”

(12) To send :—

(a) sám asmābhyam purudhā gā ishanya.—3. 50. 3.

“Send us cows, O great giver!”

(b) tásmā indrāya . . . prāhiṇotanāpah.—10. 30. 7.

“Send the waters to that Indra.”

(13) To convey, carry, bring :—

(a) agnāye stutiṁ prābharadhram.—7. 5. 1.

“Convey praise to Agni.”

(b) úshastáccitrám ābharāsmābhyam.—1. 92. 13.

“Bring us, O dawn, that beautiful one.”

(14) To hurl, throw :—

(a) sá drúhcape mānushe . . . āsavishat . . . śárum.
—10. 99. 7.

“He hurled the thunderbolt on the man who opposed him.”

(b) ásmāi prabhara . . . vṛtrāya vájram.—1. 61. 12.

“Hurl the thunderbolt on this Vṛtra.”

B. Feelings.

Next in importance to verbs of communication, verbs signifying various shades of feeling (in the widest sense, including cognition in general) are copiously met with in

the Ṛgveda. Like the verbs of communication they generally refer to the dative of persons.

(1) To be kind :—

arasāya padrāte mṛḍa.—10. 155. 1.

“ Be kind, O Rudra, to the quadruped (the cow) that gives us food.”

(2) To please, to make happy :—

(a) *amśūrāsmāi pācamāno rūśat.*—9. 91. 3.

“ Soma, while, flowing, pleases him.”

(b) *indrāya riṣṇuḥ . . . ajinrat.*—1. 156. 5.

“ Vishṇu rendered Indra happy.”

(3) To appreciate or recognise :—

(a) *agnih ciketāt āsmāi.*—1. 69. 5.

“ Agni appreciates him.”

(4) To trust :—

(a) *śrāddadhatī trishāmata indrāya.*—1. 55. 5.

“ They trust in glorious Indra.”

(b) *śrāt te asmā adhāyi.*—1. 104. 7.

“ We have reposed our confidence in this, thy (power).”

(5) To wish, pray :—

(a) *tvām agne rūghāte yād rēkṇaḥ paramām ranóshī.*
1. 31. 14.

“ O Agni, the supreme wealth which you wish (for) the yajamāna.”

(b) *tāthā kṛṇu yāthā ta uśmāsīshṭāye.*—1. 30. 12.

“ Do so as we pray thee for our desired object.”

(c) *caricasyānn uśāne kāryāya.*—6. 20. 11.

“ Wishing wealth to Uśanas, the son of Kavi.”

(6) To be angry, bear malice :—

(a) *kim asmābhyam jātavedo hriṇīshe.*—7. 100. 14.

“ Why are you angry with us, O Agni! ”

(b) *gurū drésho árarushe dadhanti.*—7. 56. 19.

“ They entertain great animosity against him who does not offer oblations.”

(C). *Action (for the sake of).*

Verbs signifying action (as distinguished from ‘ feeling ’ and ‘ communication ’ specified above) represent a vast range and include anything that is produced, done, created, effected or merely exists for the sake of a person or a thing. While the verbs of feeling and communication generally refer to the dative of persons, verbs of action in this restricted sense are equally connected with persons or things. It is here that the dative of purpose and of *things* becomes prominent in the R̥gveda, but even then it does by no means replace or drive out the dative of persons. It should, however, be also clearly understood that while the verbs of ‘ communication ’ and ‘ feeling ’ directly govern the dative, as if it were accusative, the verbs of ‘ action,’ though connected with the dative and dominating its central notion in the R̥gveda, do not grammatically affect it. It seems as if the dative of purpose was the original dative *par excellence* and Indian tradition, according to which the dative signified purpose or intention (cf. Vaiyākaraṇa Bhūṣhaṇa, Benares, page 112), favours it. There is no doubt that this use of the dative as connected with verbs of action, but grammatically not governed by them, is in the R̥gveda incomparably larger than the dative grammatically governed by verbs, but a development on either side within the field of the R̥gveda is hard to trace.

(1) To spread :—

strñīta barhīr adhvarāya sādhu.—7. 43. 2.

“ Properly spread the grass for the Yajña.”

(2) To attempt, take measures :—

(a) *cikitsanti mānushāya kshāyāya.*—1. 123. 1.

“ Taking measures for human habitation.”

(b) *ā yé kṛvānāso (a) mṛtatvāya gātām.*—1. 72. 9.

“ Those who have been trying (taking steps) for immortality.”

(3) To create, make, produce, accomplish :—

(a) *jyótir andhāya cakrathur vicákshe.*—1. 117. 7.

“ They created light (*i.e.*, sight) for the blind man to see.”

(For the use of this infinitive see the section on the infinitive.)

(b) *jinvā gávishtaye dhiyah.*—9. 108. 10.

“ Accomplish the task of the Yajamāna.”

(4) To render fit or eligible :—

(a) *itthā yáthā te ūtāye rāyá rtāya . . . syāma.*—5. 20. 4.

“ Grant that we may be fit for thy protection, wealth and truth.”

(b) *prá me nāmīshé bhujé bhūt.*—10. 48. 9.

“ My devotee is fit for food and enjoyment.”

(5) To fix, place, appoint, direct :—

(a) *yuvām narā stuvaté pajriyāya kakshivate aradatam purāmdhiyam.*—1. 116. 7.

“ O Ásvins, you ordained a vigorous mind for Aṅgiras Kakshivat.”

(b) rāyé ca naḥ scapatyā ishé dhāh.—1. 54. 11.

“Lead (lit. fix) us to wealth, and food accompanied by good progeny.”

(6) To destroy :—

āryāya riśó (a) ratārīr dāsīh.—6. 25. 2.

“Thou hast destroyed the *dasyu* people for the sake of the Ārya.”

(7) To win :—

asmábhyam sámjayatam dhánāni.—1. 108. 13.

“Win wealth for us.”

D. Movement.

Verbs signifying “to move, to come, to approach, to reach,” refer to the object of movement, the ‘Wohincasus.’ I give below some examples of the dative as ‘Wohincasus.’ It will be noticed that several examples of the object of movement are datives of “the Receiver.” This further reduces the importance of the ‘Wohincasus’ dative in the Rgveda.

(1) só (a) dhrrarāya párinīgate karih.—3. 2. 7.

“The wise one is led to the Yajña.”

(2) indrāgnī arasāgatam asmábhyam.—7. 94. 7.

“Come to us, O Indra and Agni, with your protection.”

(3) tasthur mamrúshīh prāyāce.—1. 140. 8.

“The flames set out to meet Agni who was coming to them.”

(4) asmábhyam parasra dhārayā.—9. 2. 9.

“Flow unto us, O Soma, in a shower.”

In this connection Speyer points out (page 11) that the ‘Wohincasus’ may refer to a person, and his theory

is (p. 13) that the dative of the receiver (the object of giving) is a later development of the 'Wohincasus.' But if the object of movement is a person, there is no reason why a hard and fast line should be drawn between that dative of person which is a 'Wohincasus' (the object of movement) and that dative of person who is the receiver. The difference between these two datives of persons may be a difference of degree, but it cannot be a difference of kind. For instance, in the above two examples nos. 2 and 4, when it is said, "come to us", "flow unto us," there is no reason to suppose that the dative of persons in these sentences being a 'Wohincasus' is fundamentally and essentially different from the dative which Speyer calls the 'Receiver.' Is there absolutely no nuance of the "Receiver" in these two examples? Is not a faint glimpse of giving or receiving involved in the coming and the flowing asked for in these two sentences? Is not the person who wants the coming and flowing interested in or affected by the action concerned? In my opinion the central and controlling element in all these so-called stages in the development of the dative, *viz.*, predicative *action*, is present in both the cases, only with this difference that the verb like all verbs of action as specified above, does not grammatically govern the 'Wohincasus' dative, while it does govern Speyer's "Receiver-dative."

The dative connected with substantives and adjectives is comparatively rare in the R̥gveda; and in many cases,

Datives connected
with substantives
and adjectives.

as shown above, the so-called substantives and adjectives are *dim* verbal forms.

This dative may be classified into six kinds :—

1. The Dative of Advantage.
2. The Dative of Disadvantage.
3. The Dative of Relation.
4. The Dative of Possession.

5. The Dative of Capacity.

6. The Dative of Representation.

1. *The Dative of Advantage.*

Adjectives signifying 'kind,' 'amiable,' 'useful,' *etc.*, and substantives signifying 'guide' 'benefactor,' *etc.*, can be brought under this heading.

A. Kind :

prámatiś ca kāráce.—1. 31. 9.

“ And (O Agni) be kind to the Yajamāna.”

B. Amiable :

rājū viśām átithiś cārur āyāce.—2. 2. 8.

“ The Lord of his people, a guest amiable to the Yajamāna.”

C. Easy :

patháh sugám no (a)syái devárītaye kṛdhi.—2. 23. 7.

“ Make our path easy for this Yajña.”

D. Well-wishing :

kāráce jaraṇyúr viprah préshṭhaḥ.—10. 61. 23.

“ The Brahman wishing distinction to the Yajamāna became their favourite.”

E. Guide :

asmábhyam gāturittamah . . . yāhi.—9. 106. 6.

“ Come to us as our best guide.”

F. Benefactor :

ásmā urucákrir ádbhutaḥ.—2. 26. 4.

“ (Bṛhaspati) is a great benefactor of this (Yajamāna).”

G. Useful :

ásmā bhava sūparañcanā.—10. 18. 11.

“ Be useful to him.”

2. *The Dative of Disadvantage.*

rshidrishe marutaḥ . . . sṛjata drisham.—1. 39. 10.

“ O Maruts ! Create a Destroyer of the enemy of Rshis.”

3. *The Dative of Relation.*

(a) gambhīré cid bharati gādhām ásmāi.—6. 24. 8.

“ For him deep places become shallow.”

(b) sābandhū ubhé (á)smāi.—3. 1. 10.

“ Heaven and earth are his friends.”

(c) áhāny asmāi sudínā bhavanti.—7. 11. 2.

“ For him (the sacrificer) all days become good days.”

(d) viśvāhā (a)smāi śaraṇāḥ santrātra.—10. 18. 12.

“ May the dust of the earth be a home every day to him.”

(e) vibhūr víśvasmāi bháranāya.—1. 31. 2.

“ (He) who has all forms in the whole universe.”

(f) śayúḥ katidhā cidāyāve.—1. 31. 2.

“ In how many ways present with every man ! ”

(g) tvāṁ agne prathamām āyúm āyāve devā akr̥ṇvan
nāhushasya viśpátim.—1. 31. 12.

“ The Gods appointed thee, O Agni, as a general *under* the human king, Nahusha.”

(h) víśvasmāi kármaṇe puróhitaḥ.—1. 55. 3.

“ A leader in every action.”

4. *The Dative of Possession (giving the sense of the genitive).*

(a) *prá yūtaṁ carámā jñāya.*—7. 70. 5.

“Come to the Yajamāna’s Yajña.”

(b) *indrāya tārishīr ānuttāh.*—3. 31. 13.

“Indra’s powers are natural.”

(c) *asmábhyaṁ cartīr yūtam.*—1. 117. 2.

“Come to our house.”

5. *The Dative of Capacity (used in connection with adjectives and particles meaning “fit,” “capable”).*

(a) *tām āno (a)rkām amṛtāya jūṣṭam imé dhāsuḥ.*—7. 97. 5.

“They have bestowed upon us this food which is enough for immortality.”

(b) *yó (a)smā āraṁ sūktāh.*—1. 70. 5.

“Who offers praise worthy of him (Agni).”

(c) *bhūtam . . . āśvāte rathīne śáktam árrate.*—10. 40. 5.

“O Áśvins, you are fit to meet the enemy, equipped with horses and cars.”

6. *The Dative of Representation (somebody acting on behalf of another).*

(a) *indram asmábhyaṁ yācutāt.*—9. 86. 41.

“Beg Indra on our behalf.”

(b) *sidhrā agne dhiyo (a)smé.*—10. 7. 4.

“O Agni, praise on our behalf has been offered.”

There is no doubt that the infinitive in the very kernel of the R̥gveda has a tendency to develop the essential sense of the verb, *viz.*, action (cf. *máhi kárma kártave* ' 'to do great actions' 2. 22. 1, also cf. 3. 35. 7., 3. 43. 29), but its close relation and even occasional identity with the dative can be illustrated by the following examples :—

1. The infinitive used strictly as a noun in the dative case :—

(a) *mā no nide ca ráktave (a)ryó randhīh.*—7. 31. 5.

“ Do not expose us, O Lord, to the (false) accuser and the (harsh) speaker.”

Here the infinitive *ráktave* (‘ speaker ’) is used as a Noun in the dative case.

(b) Infinitive used as abstract noun.

yám yūdhyamānā ávase hávante.—2. 12. 9.

“ Whom they, while fighting, call for protection.”

2. The infinitive has not only been used as a noun in the dative case; but reverse examples can also be shown, *i.e.*, the noun in the dative case has been used in the sense of the infinitive. Here are a few examples :—

(a) *ridam mánave gātúm ishtáye.*—10. 49. 9.

“ I gave the man the way to traverse.”

(b) (*ágnim mitráṁ ná*) *jarāyai áchā vada.*—1. 38. 13.

“ Tell also Agni, the friend, to praise.”

Here the dative noun *jarāyai* is used in the infinitive sense.

(c) *muñcāmi tvā havishā jīvanāya kām ajñātayaksh-māt.*—1. 161. 1.

“ By means of homa, I cure you of this mysterious disease, in order that you may live.”

These examples show the frequent syntactical identity of the dative and the infinitive.

3. The infinitive, connected with another word in the genitive case, becomes a dative noun in the following examples :—

(a) *śā mṛdhaḥ śīsratho jīrāse naḥ*.—2. 28. 7.

“Thoroughly oppress injurious beings for our life.”
(Also cf. 6. 69. 5., 7. 62. 5.)

(b) (*nidhāyi*) . . . *agnir mānuṣha īrayādhyai*.—4. 2. .1

“Agni was set up for man’s access to Heaven.”

(c) *ishyann āṛṇāṁsy apṛm carādhyai*.—1. 61. 12.

“Bringing down showers for the movement of waters.”

The above examples further confirm the frequent syntactical identity of the dative and the infinitive.

4. Association of both the dative and the infinitive in the sense of purpose.

(a) *kṛdhī na ūrdhvāñ carāthāya jīrāse*.—1. 36. 14.

“Raise us for movement and for life.”

(b) *ā ta etu mānaḥ pānaḥ krātve dākshāya jīrāse*.—10. 57. 4.

“May your mind come to us again for action, for power and for life!”

Note the unity and continuity of the same strain in these different grammatical forms.

Dr. Giles in his *Manual of Comparative Philology* (p. 328) suggests that the frequent use in Latin of the

dative (in the sense of the accusative)
when another infinitive is used in the
same sentence (e.g., *hoc mihi haud laboris*
laborem hunc potiri) could have been developed through
attraction to the infinitive. The example quoted from
Delbrück could be reinforced by several more examples.

The dative in
attraction to the
infinitive.

But the further interesting point is that in the Ṛgveda this attraction has affected not only the accusative case, but all other cases as well. Here are some examples :—

(1) Nominative :—

pīcitārah punītāna sōmam indrāya pātave.—9. 4. 4.

“ O pressers of Soma ! press the soma, so that Indra may drink it (lit. for Indra to drink). ”

(2) Genitive :—

īdén̄yo (á)rbhāya jīrāse.—1. 146. 5.

“ He is praised for the longevity of the Yajamāna. ”

(3) Locative :—

ihá ksháyāya jīrāse.—10. 58. 1.

“ To live in this world. ”

(4) Accusative :—

Here is a striking example in which the accusative seems to have been affected, not only by the attraction of the infinitive, but also of phonetic analogy :—

vísrasmai sáhase sáhadhyai.—6. 1. 1.

“ To subdue every powerful foe. ”

SELF AND NON-SELF IN EARLY BUDDHISM

LATE PROF. DR. M. WINTERNITZ.

Unless we assume that the whole Tipiṭaka is a grand falsification of the monks who have entirely misunderstood the teaching of their Master,¹ Gotama Buddha must have taught a *doctrine of salvation*. "Salvation" meant to him—as to other teachers of his time—release from Samsāra, from the Ill (dukkha, Unrest, Suffering) caused by the ever returning round of birth, old age, death and rebirth. The deeper cause of all this Ill is ignorance, hence salvation can only be attained by true knowledge. Therefore the Buddha was, as all teachers of salvation in India have been since the times of the oldest Upaniṣads, also a philosophical thinker.

To talk of Buddhism as "mere ethics" or "merely a doctrine of salvation" is no less wrong than talking of it as if it had been only a system of philosophy. Religion and philosophy have never been separated in India, least of all in Buddhism.

Now in India, as elsewhere, new philosophical ideas are always based on earlier thoughts, whether they be accepted or modified or contradicted. It is true, the philosophical ideas of the oldest Upaniṣads probably came to Gotama Buddha only as a faint echo from past centuries.² It is characteristic that *Brahman* in Buddhist texts is only known as a masculine, as a personal god, while the

¹ This is what Mrs. Rhys Davids wants us to believe, though she does not express it as bluntly as Georg Grimm (*Die Wissenschaft des Buddhismus*, Leipzig, 1923, p. 2 note), who speaks of the "killing of the Buddha idea by its professed guardians," the learned monks.

² Cf. H. Oldenberg, *Die Lehre der Upanishaden und die Anfänge des Buddhismus*, 1915, p. 285 ff.

Upaniṣadic *neuter Brahman* is entirely unknown. On the other hand, there cannot be the least doubt that Buddha was familiar with Sāṃkhya and Yoga ideas, such as we first meet with in the second stratum of the Upaniṣad literature. The tradition that Gotama went to two teachers of Sāṃkhya and Yoga, has all the appearance of being based on historical facts.

Neither the mythological aspect of the soul as a kind of homunculus in the heart of man, or as being identical with Prāṇa, or as wandering about in dreams, leaving the body for a time and returning to it again, nor the metaphysical idea of the unity of the inner Ātman and the universal Paramātman are ever discussed in the numerous passages dealing with the Anattavāda. It is the doctrine of a permanent eternal soul, taught by the Sāṃkhya and by the Jainas, against which the Anattavāda is directed.

There has been much discussion about the real meaning of this *Anattavāda*, both among the followers of the different sects of Buddhism, and among European scholars. Years ago Prof. F. Otto Schrader³ expressed it as his opinion that Buddha did not deny a soul, but that his views about the soul were so very different from the traditional views, that he must needs appear to his contemporaries as a denier of the soul. More recently Prof. O. Strauss said: "The majority of scholars who know Buddhism from the original documents, today incline to the opinion, that the assertion that earliest Buddhism denied the soul and held Nirvāṇa to be Nought, cannot be upheld."⁴ Georg Grimm calls the denial of a soul a "monstrosity" invented in degenerated Buddhism by men of weak intellects who misunderstood Buddha's

³ Ueber den Stand der indischen Philosophie zur Zeit Mahāvīras und Buddhas, Strassburg, 1902, p. 5.

⁴ Deutsche Literaturzeitung, 1929, col. 214.

teaching that the self was unknowable, for a denial of the self.⁵ Similarly, Mrs. *Rhys Davids* tells us in her latest book⁶ that to imagine that a man like Gotama of the Sakyans was "trampling upon" the Upaniṣadic idea of Ātman as the Divine in man, "is to libel him unspeakably." Dr. Karl *Seidenstücker*⁷ says that the very Anattā doctrine, if rightly understood, presupposes the reality of the Ātman as a matter of course. Professor J. W. *Hauer*⁸ declares: "If there is anything certain, it seems to me to be this, that Buddha stuck to a last reality in man, only he did not identify it with anything that is in any way to be grasped by ordinary experience." Professor A. B. *Keith*⁹ again says: "We cannot doubt that the Buddha held the doctrine of retribution and, this being admitted, it becomes impossible logically to believe that he held the doctrine of the denial of the Ātman as it is presented in the Pāli texts." On the other hand, Professor Th. *Stcherbatsky*¹⁰ says with regard to the Anātmavāda: "Whosoever wishes to understand Buddhism must fully realize the decision and the vigour with which this doctrine is professed and defended. In this respect Buddhism stands alone among the great philosophies and religions of mankind." Prof. *Stcherbatsky*¹¹ relies chiefly on the scientific representation of the Anātmavāda by Vasubandhu. His strongest argument seems to me to be that the later phases of Buddhist philosophy all presuppose the denial of a permanent Ego.

⁵ Die Wissenschaft des Buddhismus, p. 1 f. and 27.

⁹ Bulletin of the School of Oriental Studies VI, 1931, p. 400.

¹⁰ Bulletin of the School of Oriental Studies VI, 1931, p. 873.

¹¹ See also his paper "The Soul Theory of the Buddhists" (Bulletin de l'Académie des Sciences de Russie 1919), p. 823 ff.

Though we cannot, as Prof. *Stcherbatsky* rightly points out, expect to find in the Pāli Canon anything like the scientific precision found in a Śāstra like that of Vasubandhu, it is after all the Pāli Canon in which—in spite of all scepticism as to its being the genuine word of Buddha which I share with Mrs. *Rhys Davids*, Professor *Keith* and others—we can hope to find the most visible traces of the original teaching of Gotama the Buddha.

It may, therefore, be of some use, to survey once more the most important passages on Anattā and Attā in the Pāli Canon.

The most authoritative passage on the Anattā doctrine, at least according to the canon of the Theravādins, is the *Anattalakkhaṇa-Sutta*¹² which was preached by the Buddha to the first five Bhikkhus immediately after the *Dhammacakkappavattana-Sutta*. Here it is said :

Neither the body (rūpa), nor any one of the psychical factors of individual existence, feelings, ideas, volitions, consciousness (vedanā, saññā, saṅkhārā, viññāṇa), can be said to be *attā*, the Self. For they are all subject to Ill, and we are not able to say with regard to them : “ Let my body, my feelings, *etc.*, be such and such.” Moreover, these five Khandhas or factors of individual existence, are perishable (anicca) and therefore represent Ill or Unrest (dukkha). Of anything that is perishable, subject to change, representing Ill, it cannot be said : “ This is mine, this am I, this is my self.” Having gained this knowledge, the monk turns away from body, feelings, ideas, volitions and consciousness with disgust, gets rid of passions, and realises his emancipation, knowing that “ destroyed is rebirth, accomplished the holy life, done is the task, there is no further return to this condition.”

¹² Vinayap., Mahāvagga 1, 6, 38 ff. = Samyutta 59 (III. p. 66 ff.)

What is emphasized here and repeated over and over again in the Pāli Suttas, is this : Our physical being as well as our feeling, perceiving and thinking, volitions and activities, and even our very consciousness are ever changing and impermanent, causing Unrest or Ill (*dukkha*), hence they cannot be an eternal, permanent self (*attā*), and it is mere conceit to say : “ I am this,” “ this is mine,” “ this is myself ” or even “ I am.” This conceit of “ I ” and “ mine ” must be got rid of by him who would reach the goal of Nirvāṇa. This is the very essence of the Buddha-Dhamma.¹³ The *Sakkāyadiṭṭhi*,¹⁴ i.e., the belief that individual existence is an absolute reality involving the existence of an eternal soul, is often denounced as heresy. To speak of an individual called by such and such a name, is mere convention.¹⁵ The doctrine of an individual's eternal soul (*attavāda*) is a doctrine of fools. Denounced is also the *Sassatavāda*, “ the doctrine of the Eternal,” as it is taught f. i. in the *Kaṭha-Upaniṣad*, in the *Bhagavadgītā*, and in the *Sāṃkhya* system. But the *Ucchedavāda*, “ the doctrine of Annihilation,” also is denounced as heretical.¹⁶ It is true that of the Tathāgata who has got rid of the conceit of “ I ” and “ mine,” no consciousness can be pointed out anywhere either in this life, or when he has passed away. But this does not mean that he does not exist, but only that he is untraceable, unknowable, not to be described in any way whatsoever.

In none of the numerous passages in which the Anattā theory is discussed, do we find any positive statement about an attā. Mrs. *Rhys Davids* and Dr. K. *Seidenstücker*, indeed, tell us that all the passages on the Anattā

¹³ See especially *Aṅguttara*, Vol. I, p. 133 f.

¹⁴ I do not think that this *sakkāyadiṭṭhi* can be separated from the *Sāṃkhya sat-kārya-vāda*, s. S. N. *Dasgupta*, *History of Indian Philosophy* I, p. 257 f.

¹⁵ Cf. *Majjhima* 44, *Saṃyutta* V, 10.

¹⁶ *Majjhima* 22, Vol. I, p. 136 ff.

imply that there is an eternal permanent self, different from our physical and psychical being, the Ātman of the Upaniṣads, the real man, the “Man in Man.” If this were so, it would indeed be strange that our texts or the Buddha himself should have so carefully avoided saying this directly. On the contrary, all kinds of speculations and erroneous views about an eternal self are even declared to be a hindrance on the way to Nirvāṇa. Questions regarding the nature of such a self are not answered by the Buddha, because such knowledge can never lead to the end of Ill.¹⁷

On the other hand, the self or ego in the conventional meaning of the word is never denied. It is not denied that there is a self which thinks, speaks, feels, acts and experiences the results of *karman* in the course of rebirths. Only to believe that this self is an absolute reality, eternal and everlasting, is declared to be an utterly erroneous view. Hence it is possible to speak, in this sense of the word, of seeking or knowing one’s self, of controlling and restraining one’s self, and of man being responsible for his own deeds.

Mrs. *Rhys Davids* has often quoted the little story in the Vinaya Piṭaka (Mahāvagga 1, 14), in which the Buddha tells the young men who are in search of a runaway woman: “Were it not better that you were seeking the self?” There may be in these words a faint echo of Chāndogya-Upaniṣad VIII, 1, 1 and similar Upaniṣadic sayings, but this certainly does not mean that what Buddha understood by “self” is the “God who is the self of you,” as Mrs. *Rhys Davids* thinks, but the whole context shows, and the whole Tipiṭaka proves, that “seek the self” means here: “Learn the truth about the self, as it is taught in the Anattalakkhaṇa Sutta and ever so

¹⁷ See f. i. Majjhima 2.

many other Suttas, *viz.*, that the five Khandhas are not an eternal self." In the Aṅguttara Nikāya (Vol. IV, p. 114) it is said that a monk is called "self-knowing" (*attaññū*) when he knows: "So far am I advanced in faith, virtue, learning, renunciation, wisdom, and illumination."

It is true that the conversation between King Pasenadi of Kosala and his consort Queen Mallikā¹⁸ does remind us of the famous Upaniṣad dialogue between Yājñavalkya and his wife Maitreyī.¹⁹ But we know that the Buddha liked to make use of Brahmanical phrases and reminiscences, though putting quite a different meaning into them. What the dialogue in question means is clearly expressed in the *gāthā*: "Wandering through all the quarters of the world in his thought, one never finds anywhere one dearer than the self. Thus it is also with others: the self is dear to every one. Therefore he who loves the self should not do harm to another." Mrs. Rhys Davids²⁰ thinks that this conclusion with its teaching of "pseudoethics" is not original, but that the "self" in the dialogue must not be understood as meaning "my own self" in the ordinary sense, but that it must be taken as meaning the "Divine Kinsman, the immanently Divine in every man," for "the assertion that a man is supremely dear to himself sticks in the gullet." I do not see why the Buddhist saying should "stick in the gullet" any more than the "Love thy neighbour as thyself" of the Old and the New Testament, or the "golden rule" (so little followed): "Do by others as you would be done by."

The whole chapter in which the dialogue of King Pasenadi and Mallikā occurs, is concerned with moral teaching, and has nothing to do with metaphysics. The

¹⁸ Saṃyutta III, 1, 8, Vol. I, p. 75.

¹⁹ Brhadār. Up. II, 4; IV, 5.

²⁰ Sakya, p. 188.

same King Pasenadi says a few pages earlier: "For whom, now, is the self a dear friend, and for whom is the self a hateful enemy? . . . They whose conduct in deed, word, and thought is evil, for them the self is a hateful enemy. Even though they were to say: 'Dear to us is the self,' nevertheless the self is for them a hateful enemy. Why is this? Because that which an enemy would do to an enemy, even that are they themselves doing to the self. Therefore for them is the self a hateful enemy. And they whose conduct in deed, word, and thought is virtuous, for them is the self a dear friend," etc.²¹

Numerous are the passages in the Nikāyas in which *attā*, "self," is used merely as "a conventional label for the totality of any living individual,"²² in order to impress some moral teaching, f. i. in the Attavagga of the Dhammapada (vss. 157—166). In such sayings as "Rouse thyself by thyself, restrain thyself by thyself," etc., or "For the self is the guardian of the self, the self is the refuge of the self, therefore curb thyself as a merchant curbs a good horse,"²³ the "self" certainly has nothing to do with an eternal soul.

In Aṅguttara III, 40, 4 (Vol. I, p. 149) also *attā*, "self" comes very near our "conscience": "There is no secret place in the world where thou couldst conceal thy wicked deed, thy self (*attā*), O man, knows whether it is true or false. Thou slightest, indeed, O my friend, thy noble self, if thou wouldst conceal from thy self the wickedness that is in thy self."

That the individual is responsible for his deeds, is clearly brought out, in a mythological manner in the

²¹ Sāmyutta III, 1, 4 in the translation of Mrs. Rhys Davids (Kindred Sayings I, p. 98 f.) who (in 1917) says in her note that she assigns "no metaphysical import to this dramatization of consciousness into a dual subject."

²² Mrs. Rhys Davids in Encyclopedia of Religion and Ethics XI, 351.

²³ Dhammapada 379 f.

Devadūta-Sutta (Majjhima 130), when King Yama tells the evil-doer, before he hands him over to the tortures of hells:²⁴ “Your deeds were not committed by your parents or by your brothers and sisters, or by your friends and kinsfolk, or by recluses and brahmins, or by the gods, they were committed by none but yourself, and it is you yourself who will reap the fruits thereof.”²⁵

This responsibility for one's deeds is also emphasized in the Dhammapada verse (165): “By one's self the wicked deed has been done, by one's self one becomes impure, by one's self the wicked deed remains undone, by one's self one becomes pure. Purity and impurity belong to one's self, it is impossible that one should purify another.”

In all these and many other Suttas dealing with the Anattā theory, nowhere the question of any contradiction between this theory and the doctrine of transmigration and Karman is raised. Such discussions are found in the Milindapañha, where the difficulty is solved by the theory of *Samtāna*,²⁶ that is, of “a living continuous fluid complex, which does not remain quite the same for two consecutive moments, but which continues for an endless number of existences, bridging an endless number of deaths, without becoming completely different from itself.”²⁷ The Milindapañha (II, 2, 6) explains this by such similes as that of the man who steals mango fruits

²⁴ These tortures are described with such a Sadistic gusto that I cannot bring myself to believe that this description of hells could ever have come from the mouth of the Buddha or any of his early disciples.

²⁵ Majjhima, Vol. III, p. 180 f., translation by Lord Chalmers, Further Dialogues of the Buddha, Vol. II, p. 256. See also Aṅguttara III, 35 (Vol. I, p. 140).

²⁶ The word *samtāna* occurs only in Samyutta, Vol. III, p. 143, but not in the technical meaning.

²⁷ L. de La Vallée Poussin, The Way to Nirvana, Cambridge 1917, p. 35.

and is punished as a thief in spite of his saying that the mango fruits he has stolen are not the same which the man had planted.

In the Nikāyas it seems that the Paṭiccasamuppāda doctrine was sufficient to show in which way one existence is connected with former and with future existences, and that the real connecting link between the existences of one individual is his *Karman*. As it is said in the Saṃyutta XII, 37 : “ This, ye monks, is not your body, nor that of others. You have rather to see in it, ye monks, the old *deed* (*kamma*), the result of actions, volitions and feelings (in former existences). ”

The warning, so often repeated in the Pāli Suttas, against the conceit of “ I ” and “ mine,” against thinking that one’s individual existence is an absolute reality, has also an ethical character. For the ordinary follower of Buddha, who does not and cannot aspire to final emancipation, the religion of “ non-self-ism ” is practically a religion of *unselfishness*. In this sense it is understood by modern Buddhists.²⁸ But the Anattatā doctrine in its proper meaning also, as the belief that the notion of individuality has to be entirely got rid of in order to reach Nirvāṇa, has at least an ethical import. This is proved by the fact that *Upādāna*, the cause of craving (*taṇhā*) which is at the root of Ill (*dukkha*), is not only the clinging to sensuality (*kāma*), but also the clinging to the Attavāda.²⁹

It is not a psychological or logical error to say : “ I am,” “ this is mine,” “ this is my self,” but a moral defect. Mrs. *Rhys Davids*³⁰ has already compared with this the Sāṃkhya aphorism (Sāṃkhya Kārikā 64) : *nāsmi*

²⁸ See S. *Tachibana*, *The Ethics of Buddhism*, London 1926, p. 180 ff., and T. *Matsumoto* in *Europäische Revue*, 1931, p. 569 ff.

²⁹ *Dīgha Nikāya*, XV, Vol. II, p. 58.

³⁰ *Sākya*, p. 196.

na me nāham, " I am not, not of me, not I ", which is said to follow from a study of the Sāṃkhya Principles (tattva). In the Yogasūtra (II, 3), too, the " conceit of I am " (asmitā) appears in the list of the moral defects (kleśa) together with ignorance, lust, hatred, and attachment.

Almost in literal agreement with the Buddhist Suttas we read in the Mārkaṇḍeya Purāṇa (38, 6) : " The idea of ' mine ' is the root of Ill, the idea ' this is not mine ' is final beatitude." Or : " He who wishes to become free, must give up attachment with all his might; where there is no attachment, there is an end of the talk ' That is mine.' Having abandoned the idea of ' mine ' (nirmamatvam) leads to bliss " (ib. 39, 3f.). Subāhu tells the King of Kāśī : In order to reach final emancipation, " thou shalt form no notion of ' mine,' nor of ' I.' O King " (ib. 44, 22). The section of the Mārkaṇḍeya Purāṇa in which these sentences occur is mainly a treatise on Yoga. But what is said about the duties and characteristics of the Yogin differs little from the Arhat ideal found in the Buddhist texts.

As the Anattā doctrine is both psychology and ethics, so the final goal of Buddhist teaching, the Nirvāṇa, is both metaphysics and ethics, and the fundamental truth on which all Buddhist teaching is based—the fact of dukkha or Ill—is not only philosophy but ethics as well.

Whatever may be understood by Buddhists or Brahmans by Nirvāṇa or Mokṣa, whether it be joining the infinite Nought which is as real to the Indian way of thinking as is the Ākāśa, the Void, or union with the Deity, the Absolute, the Brahman, or the All in which the individual is merged,—it always means the abandonment of the notion of individuality, and with this it implies the truth (whether it is expressly stated or not) that man cannot be freed from Ill and suffering, unless he forgets his own self, unless he realizes that he is a

mere particle of the All, and that bliss can only be reached by him who gives himself up to the greater All, which if viewed from an ethical point of view, results in the Mahāyāna ideal of the Bodhisattva who says: "What right have I to make any difference between my self and that of my neighbour, between my own welfare and his?" And finally, the truth of Ill or *Leiden* (suffering), the first of the Four Noble Truths of the Buddha,—is not its deepest meaning that of *Mitleiden* (suffering with others), resulting in *Mitleid* (compassion)? It is, after all, not Buddhist philosophy—whether we value it as low as Professor *Keith* does, or as highly as Professor *Stcherbatsky* values it—, which has won the hearts of the unnumbered millions, but the *Religion of Love and Compassion*, which the teaching of the Buddha has been from the beginning, and has remained during all its phases.

APPENDIX
SELECT
BIBLIOGRAPHY
OF
THE WRITINGS OF
MAHĀMAHOPĀDHYĀYA DR. GANGANATHA JHA
ORIGINAL WORKS

SANSKRIT—

1. Katipayadivasodgamaprarohaḥ (a collection of some of the verses composed by him), Darbhanga 1890 (*for private circulation*).
2. Velāmāhātmyam (a *māhātmya* in verse of an unimportant place in Darbhanga where Dr. Jha lived at the time, as if found in *skandapurāṇe aśrutakhaṇḍe*—a parody of the many *māhātmyas* claiming to come from this or that Purāṇa), Darbhanga 1894.
3. Bhaktikallolinī (a running metrical commentary on Śaṇḍilya's Bhaktisūtra), Benares 1895.
4. Bhāvabodhinī (commentary on Jayadeva's Prasannarāghava), Benares 1906.
5. Khadyotaḥ (commentary on Vātsyāyana's Nyāyabhāṣya), Benares 1925.
6. Mīmāṃsāmaṇḍanam (commentary on Maṇḍana Miśra's Mīmāṃsānukramaṇikā), Benares 1930.
7. Prabhākarapradīpaḥ (on the Prabhākara School of Pūrva-Mīmāṃsa)—*unpublished*.

HINDI—

1. Vaiśeṣikadarpaṇa, Benares 1921.
